*Analytica Chimica Acta*  
*Volumes 451–475, 2002*

# A

**ABE fermentation**

Application of quantitative IR spectral analysis of bacterial cells to acetone–butanol–ethanol fermentation monitoring, 471 (2002) 127

**Abraham model**

Abraham model in gas chromatography of phenol pollutants, 466 (2002) 151

**Acaricide residues**

Determination of amitraz and other acaricide residues in beeswax, 475 (2003) 97

**Accessibility**

Properties and applications of proteins encapsulated within sol–gel derived materials, 461 (2002) 1

**Acetaldehyde**

Screen-printed biosensors for the control of wine quality based on lactate and acetaldehyde determination, 458 (2002) 203

Flow monitoring of NADH consumption in bioassays based on packed-bed reactors bearing NAD<sup>+</sup>-dependent dehydrogenases. Determination of acetaldehyde using alcohol dehydrogenase, 467 (2002) 225

Quantitative analysis of gas mixtures by voltammetric sensing, 475 (2003) 17

**Acetate**

On-line simultaneous monitoring of glucose and acetate with FIA during high cell density fermentation of recombinant *E. coli*, 462 (2002) 293

**Acetonitrile**

Simple and convenient chemiluminescence method for the determination of melatonin, 455 (2002) 193

**Acetonitrile–water mixtures**

Acid–base constants of neutral bases in acetonitrile–water mixtures, 454 (2002) 157

**Acetylcholine**

Development of an interference-free chemiluminescence method for monitoring acetylcholine and choline based on immobilized enzymes, 462 (2002) 199

**Acetylcholinesterase**

Immobilization of acetylcholinesterase on screen-printed electrodes: comparative study between three immobilization methods and applications to the detection of organophosphorus insecticides, 464 (2002) 171

**Acetylene**

Quantitative analysis of gas mixtures by voltammetric sensing, 475 (2003) 17

**Acid attack in open beakers**

Assessment of dissolution techniques for the analysis of ceramic samples by plasma spectrometry, 474 (2002) 177

**Acid determination**

New electrochemical detection method in high-performance liquid chromatography for determining free fatty acids, 465 (2002) 199

**Acid digestion**

Simplified method for the Re–Os dating of molybdenite using acid digestion and isotope dilution ICP-MS, 463 (2002) 111

**Acid extractable**

Determination of Al, Cu, Fe, Mn, Pb and Zn in certified reference materials using the optimized BCR sequential extraction procedure, 454 (2002) 249

**Acid leaching**

Determination of Cd, Cu, Pb and Zn in environmental samples: microwave-assisted total digestion versus aqua regia and nitric acid extraction, 462 (2002) 59

**Acid–base constants**

Acid–base constants of neutral bases in acetonitrile–water mixtures, 454 (2002) 157

**Acid–base titration**

Multicomponent acid–base titration by principal component-artificial neural network calibration, 461 (2002) 147

**Acidic denaturation**

In situ monitoring of gold-surface adsorption and acidic denaturation of human serum albumin by an isolation-capacitance-adopted electrochemical quartz crystal impedance system, 464 (2002) 65

**Acidified slurry sample**

Tin determination in marine sediment, soil, coal fly ash and coal slurried samples by hydride generation-electrothermal atomic absorption spectrometry, 461 (2002) 261

**Acid-induced cloud point**

Evaluation of the factors affecting extraction of organic compounds based on the acid-induced phase cloud point approach, 460 (2002) 13

**Acidity constants**

Spectrophotometric determination of acidity constants of 4-(2-pyridylazo)resorcinol in binary methanol–water mixtures, 455 (2002) 335

***Acinetobacter calcoaceticum* A-122**

Determination of organophosphorus aromatic nitro insecticides by using electric-field cell orientation in microbial suspensions, 462 (2002) 165

**Acoustic shear wave**

Interfacial nucleic acid chemistry studied by acoustic shear wave propagation, 469 (2002) 101

**Acridinium ester (10-methyl-9(*p*-formylphenyl)-acridinium-fluorosulphonate)**

Electrochemiluminescence assay for the detection of acridinium esters, 461 (2002) 141

**Acridinol**

Characterisation of a synthesised fluorescent ligand (4-acridinol-1-sulphonic acid) using nuclear magnetic resonance spectroscopy, 454 (2002) 147

**Acrylic fibres**

Classification and quantitation of finishing oils by near infrared spectroscopy, 463 (2002) 295

**Actinide ions**

Evaluation of Gibbs free energy for the transfer of a highly hydrophilic ion from an acidic aqueous solution to an organic solution based on ion pair extraction, 452 (2002) 149

**Actinides**

Determination of actinides and strontium in fish samples by extraction chromatography, 458 (2002) 367

**Activated carbon**

Characterization of metal ion-exchange on modified surfaces of porous carbon, 455 (2002) 233

**Active effect**

Spectrofluorimetric determination of tannins based on their active effect on the Cu(II) catalytic oxidation of rhodamine 6G by hydrogen peroxide, 455 (2002) 187

**Acyl-Co A**

Isolation and separation of individual long-chain acyl-coenzyme A esters, 465 (2002) 427

**Additional Testing Program**

An odyssey—meeting European Union analytical criteria for residues from afar: experiences from North America, 473 (2002) 49

**Adenine**

Simultaneous determination of guanine and adenine in DNA using an electrochemically pretreated glassy carbon electrode, 461 (2002) 243

Study of solvent effects on the acid-base behaviour of adenine, adenosine 3',5'-cyclic monophosphate and poly(adenylic) acid in acetonitrile-water mixtures using hard-modelling and soft-modelling approaches, 471 (2002) 145

**Adenylate kinase**

Rapid and specific detection of bacteria using bioluminescence, 457 (2002) 109

**Adhesion**

Carbohydrate recognition: a nascent technology for the detection of bioanalyses, 457 (2002) 39

**Admicelles**

Evaluation of hydrophobic properties of sodium dodecylsulfate/ $\gamma$ -alumina admicelles based on fluorescence spectra of *N*-phenyl-1-naphthylamine, 454 (2002) 203

**ADP**

Amperometric determination of serum lactate dehydrogenase activity using an ADP-modified graphite electrode, 457 (2002) 275

**Adrenaline**

Development of integrated chemiluminescence flow sensor for the determination of adrenaline and isoprenaline, 463 (2002) 257

Determination of adrenaline by using inhibited Ru(bpy)<sub>3</sub><sup>2+</sup> electrochemiluminescence, 471 (2002) 187

**Adsorption**

Systematic studies on adsorption of trace elements Pt, Pd, Au, Se, Te, As, Hg, Sb on thiol cotton fiber, 456 (2002) 147

**Adsorptive stripping**

Determination of the antibacterial enrofloxacin by differential-pulse adsorptive stripping voltammetry, 454 (2002) 83

**Adsorptive stripping voltammetry**

Simultaneous determination of guanine and adenine in DNA using an electrochemically pretreated glassy carbon electrode, 461 (2002) 243

**Adulteration**

Study of diesel fuel contamination by excitation emission matrix spectral subtraction fluorescence, 454 (2002) 209

Electronic nose based on metal oxide semiconductor sensors as a fast alternative for the detection of adulteration of virgin olive oils, 459 (2002) 219

**Aerosol**

Grazing-exit electron probe X-ray microanalysis of ultra-thin films and single particles with high-angle resolution, 455 (2002) 245

Aerosol analysis by cavity-ring-down laser spectroscopy, 466 (2002) 1

**Affinity**

Fractionation and characterization of fulvic acid by immobilized metal ion affinity chromatography, 452 (2002) 85

High-performance liquid chromatographic fractionation and characterization of fulvic acid, 464 (2002) 47

**Affinity chromatography**

Protein A immobilized monolithic capillary column for affinity chromatography, 466 (2002) 141

**Affinity-sensing**

Reversible affinity interactions of antibody molecules at functionalized dendrimer monolayer: affinity-sensing surface with reusability, 456 (2002) 209

**Ag**

Determination of trace elements in biological materials using tetramethylammonium hydroxide for sample preparation, 470 (2002) 195

**Ag<sup>+</sup> HPLC**

Chromatographic separation and identification of conjugated linoleic acid isomers, 465 (2002) 207

**Ag<sup>+</sup> TLC**

Influence of milk fat presence on the determination of *trans* fatty acids in fats used for infant formulae, 465 (2002) 395

**Ag/AgCl quasi-reference electrode**

Development of a micro-planar Ag/AgCl quasi-reference electrode with long-term stability for an amperometric glucose sensor, 462 (2002) 253

**Ageing**

Effect of oxygenation on polyphenol changes occurring in the course of wine-making, 458 (2002) 15

Effect of maturation in small oak casks on the volatility of red wine aroma compounds, 458 (2002) 45

Aroma profile of Portuguese brandies aged in chestnut and oak woods, 458 (2002) 55

**Agmatine**

Quantitation of agmatine by liquid chromatography with laser-induced fluorescence detection, 470 (2002) 155

 **$\beta$ -Agonists**

Recent developments in the use and abuse of growth promoters, 473 (2002) 71

**Agrochemicals**

Quantitative nuclear magnetic resonance spectrometry. II. Purity of phosphorus-based agrochemicals glyphosate (*N*-(phosphonomethyl)-glycine) and profenofos (*O*-(4-bromo-2-chlorophenyl) *O*-ethyl *S*-propyl phosphorothioate) measured by  $^1\text{H}$  and  $^{31}\text{P}$  QNMR spectrometry, 474 (2002) 125

**Air**

Laser desorption-ionization of polycyclic aromatic hydrocarbons from glass surfaces with ion mobility spectrometry analysis, 453 (2002) 231

Environmental analysis of aliphatic carboxylic acids by ion-exclusion chromatography, 465 (2002) 157

**Air-segmented continuous flow analysis**

Determination of total phosphorus and nitrogen in turbid waters by oxidation with alkaline potassium peroxodisulfate and low pressure microwave digestion, autoclave heating or the use of closed vessels in a hot water bath: comparison with Kjeldahl digestion, 463 (2002) 283

**Ajugasterone**

Ecdysteroids: one potential new anabolic family in breeding animals, 473 (2002) 89

**Al(III)**

Influence of pH and metal/carbon ratios on soluble organic complexation of Fe(II), Fe(III) and Al(III) in soil solutions determined by diffusive gradients in thin films, 454 (2002) 259

**Albumin**

Prediction of human serum albumin-drug binding affinity without albumin, 454 (2002) 101

**Alcian blue 8GX**

Near-infrared fluorimetric determination of nucleic acids by shifting the ion-association equilibrium between heptamethylene cyanine and Alcian blue 8GX, 461 (2002) 235

**Alcohol dehydrogenase**

Sequential injection flow system with improved sample throughput: determination of glycerol and ethanol in wines, 458 (2002) 131

Quinohemoprotein alcohol dehydrogenase-based reagentless amperometric biosensor for ethanol monitoring during wine fermentation, 463 (2002) 39

Flow monitoring of NADH consumption in bioassays based on packed-bed reactors bearing NAD $^+$ -dependent dehydrogenases. Determination of acetaldehyde using alcohol dehydrogenase, 467 (2002) 225

**Alcohol electrode**

Performance of amperometric alcohol electrodes prepared by plasma polymerization technique, 469 (2002) 217

**Alcoholic beverages**

Analysis by gas chromatography/mass spectrometry of fatty acids and esters in alcoholic beverages and tobaccos, 465 (2002) 309

**Alginate**

Biotinylated alginate immobilization matrix in the construction of an amperometric biosensor: application for the determination of glucose, 453 (2002) 71

**Algorithms**

Standardization methods for handling instrument related signal shift in gas-sensor array measurement data, 472 (2002) 99

**Aliphatic amines**

*N*-Hydroxysuccinimidyl phenylacetate as a novel derivatizing reagent for aliphatic amines in gas chromatography, 468 (2002) 255

**Aliphatic carboxylic acids**

Environmental analysis of aliphatic carboxylic acids by ion-exclusion chromatography, 465 (2002) 157

Vacancy ion-exclusion chromatography of carboxylic acids on a strongly acidic cation-exchange resin, 474 (2002) 31

**Aliquat 336**

Liquid-supported membranes in chromium(VI) optical sensing: transport modelling, 464 (2002) 197

**Alkali fusion**

Assessment of dissolution techniques for the analysis of ceramic samples by plasma spectrometry, 474 (2002) 177

**Alkali metals**

Effect of 1,10-phenanthroline on the extraction and separation of lithium(I), sodium(I) and potassium(I) with thenoyltrifluoroacetone, 454 (2002) 241

**Alkaline aqueous solution**

Chemiluminescence of luminol induced by dissolution of oxide-covered aluminum in alkaline aqueous solution, 453 (2002) 253

**Alkaline hydrolysis of dimethyl phthalate**

Determination of rate constants from two-way kinetic-spectral data by using rank annihilation factor analysis, 454 (2002) 21

**Alkaline peroxodisulfate digestion**

Determination of total phosphorus and nitrogen in turbid waters by oxidation with alkaline potassium peroxodisulfate and low pressure microwave digestion, autoclave heating or the use of closed vessels in a hot water bath: comparison with Kjeldahl digestion, 463 (2002) 283

**Alkaline phosphatase**

Flow amperometric detection of indigo for enzyme-linked immunosorbent assays with use of screen-printed electrodes, 462 (2002) 31

Rapid spectrophotometric determination of fosfestrol following on-line hydrolysis by alkaline phosphatase using flow injection and chasing zones, 462 (2002) 119

Simultaneous flow-injection determination of fluoride, monofluorophosphate and orthophosphate ions using alkaline phosphatase immobilized on a cellulose nitrate membrane and an open-circulation approach, 467 (2002) 83

**Alkaline pulping**

Determination of anthraquinone-2-sulfonate in alkaline pulping liquor by spectrophotometry using a Nafion membrane interface, 474 (2002) 69

**Alkylphenol ethoxylates (APEs)**

Fully automated immunoassay system of endocrine disrupting chemicals using monoclonal antibodies chemically conjugated to bacterial magnetic particles, 475 (2003) 75

**Alkylphenol polyethoxylates**

Determination of polyethoxylated non-ionic surfactants using potentiometric flow injection systems. Improvement of the detection limits employing an on-line pre-concentration stage, 454 (2002) 217

**Alkylsulphonate surfactants**

Evaluation of the factors affecting extraction of organic compounds based on the acid-induced phase cloud point approach, 460 (2002) 13

**All solid-state contact**

Glucose and urea biosensors based on all solid-state PVC-NH<sub>2</sub> membrane electrodes, 452 (2002) 29

**Alliin**

Biosensoric flow-through method for the determination of cysteine sulfoxides, 469 (2002) 155

**Alliinase**

Biosensoric flow-through method for the determination of cysteine sulfoxides, 469 (2002) 155

**Alloys**

Highly selective spectrophotometric determination of trace cobalt and development of a reagentless fiber-optic sensor, 467 (2002) 205

**All-solid-state electronic tongue**

All-solid-state electronic tongue and its application for beverage analysis, 468 (2002) 303

**All-solid-state potentiometric sensor**

All-solid-state planar miniature ion-selective chloride electrode, 451 (2002) 243

**Alternating least square**

Comparison of various chemometric evaluation approaches for on-line FT-NIR transmission and FT-MIR/ATR spectroscopic data of methyl methacrylate solution polymerization, 452 (2002) 265

 **$\gamma$ -Alumina**

Evaluation of hydrophobic properties of sodium dodecylsulfate/ $\gamma$ -alumina admicelles based on fluorescence spectra of *N*-phenyl-1-naphthylamine, 454 (2002) 203

**Aluminium**

Time-based multisyringe flow injection system for the spectrofluorimetric determination of aluminium, 455 (2002) 149

**Aluminum**

Spectrofluorimetric determination of aluminum in drinking waters by sequential injection analysis, 457 (2002) 311

Availability of aluminum from glass and an Al form ion exchanger in the presence of complexing agents and amino acids, 459 (2002) 267

**Ambient pressure**

Laser desorption-ionization of polycyclic aromatic hydrocarbons from glass surfaces with ion mobility spectrometry analysis, 453 (2002) 231

**Amino acid composition**

Volatile sulphur compounds in wines related to yeast metabolism and nitrogen composition of grape musts, 458 (2002) 157

**Amino acids**

Use of modern nuclear magnetic resonance spectroscopy in wine analysis: determination of minor compounds, 458 (2002) 77

Availability of aluminum from glass and an Al form ion exchanger in the presence of complexing agents and amino acids, 459 (2002) 267

An amperometric method for the determination of trace mercury(II) by formation of complexes with L-tyrosine, 464 (2002) 123

Phanquinone: a useful fluorescent pre-chromatographic derivatization reagent for liquid chromatographic analyses of amino acid dosage forms, 474 (2002) 11

**Amino alcohols**

Potentiometric detection of *N,N'*-diethylaminoethanol and lysosomotropic amino alcohols in cation exchange high-performance liquid chromatography systems, 472 (2002) 11

**2-Aminoacetophenone**

'Untypical aging off-flavor' in wine: formation of 2-aminoacetophenone and evaluation of its influencing factors, 458 (2002) 29

**4-Aminopyrazolones derivatives**

4-Aminoantipyrine spectrophotometric method of phenol analysis. Study of the reaction products via liquid chromatography with diode-array and mass spectrometric detection, 467 (2002) 105

**Amitraz**

Determination of amitraz and other acaricide residues in beeswax, 475 (2003) 97

**Ammonia**

Method for monitoring urea and ammonia in wine and must by flow injection-pervaporation, 471 (2002) 105

**Ammonia electrode**

Biosensoric flow-through method for the determination of cysteine sulfoxides, 469 (2002) 155

**Ammonium**

A simple automated method for the speciation of dissolved inorganic nitrogen in seawater, 469 (2002) 235

**Amoxycillin**

Comparative study of net analyte signal-based methods and partial least squares for the simultaneous determination of amoxycillin and clavulanic acid by stopped-flow kinetic analysis, 463 (2002) 75

**Amperometric**

Entrapment of glucose oxidase in non-porous poly(vinyl chloride), 461 (2002) 57

**Amperometric biosensor**

On-line simultaneous determination of *S*- and *R*-perindopril using amperometric biosensors as detectors in flow systems, 467 (2002) 189

**Amperometric detection**

Rapid measurement of fish freshness indices by an amperometric flow-injection system with a 16-way switching valve and immobilized enzyme reactors, 470 (2002) 175

Amperometric determination of ethanol in beverages at copper electrodes in alkaline medium, 472 (2002) 123

**Amperometric gas sensor**

Sensitive electrochemical detection of ozone, 459 (2002) 199

**Amperometric glucose sensor**

Development of a micro-planar Ag/AgCl quasi-reference electrode with long-term stability for an amperometric glucose sensor, 462 (2002) 253

**Amperometric immunoassay**

Application of a polyaniline based ammonium sensor for the amperometric immunoassay of a urease conjugated Tal I protein, 461 (2002) 49

**Amperometry**

Direct detection of myoglobin in whole blood using a disposable amperometric immunosensor, 460 (2002) 141

An amperometric method for the determination of trace mercury(II) by formation of complexes with *L*-tyrosine, 464 (2002) 123

**Anabolic**

Recent developments in the use and abuse of growth promoters, 473 (2002) 71

Ecdysteroids: one potential new anabolic family in breeding animals, 473 (2002) 89

Detection of illegal growth promoters in biological samples using receptor binding assays, 473 (2002) 135

**Anabolic steroids**

Analytical possibilities for the detection of stanozolol and its metabolites, 473 (2002) 39

**Analysis**

Supercritical fluid extraction of organochlorine pesticides and some metabolites in frogs from National Park of Ordesa and Monte Perdido, 464 (2002) 303

Development of fatty acid analysis by high-performance liquid chromatography, gas chromatography, and related techniques, 465 (2002) 1

Aerosol analysis by cavity-ring-down laser spectroscopy, 466 (2002) 1

Confirmatory analysis method for zeranol, its metabolites and related mycotoxins in urine by liquid chromatography-negative ion electrospray tandem mass spectrometry, 473 (2002) 151

Determination of amitraz and other acaricide residues in beeswax, 475 (2003) 97

**Analytical blank**

Recent advances in measurement of Pb isotopes in polar ice and snow at sub-picogram per gram concentrations using thermal ionisation mass spectrometry, 453 (2002) 1

**Analytical detection window**

Crucial role of the detection window in metal ion speciation analysis in aquatic systems: the interplay of thermodynamic and kinetic factors as exemplified by nickel and cobalt, 466 (2002) 285

**Analytical error**

Analysis of fatty acids in plasma lipoproteins by gas chromatography-flame ionization detection. Quantitative aspects, 465 (2002) 337

**Analytical performance**

Analytical performance of commercially available and unavailable phenolic compounds using real samples by high-performance liquid chromatography-diode-array detection, 460 (2002) 61

**Angler<sup>®</sup>**

ResonSense<sup>®</sup>: simple linear fluorescent probes for quantitative homogeneous rapid polymerase chain reaction, 457 (2002) 61

**Anhydride**

Analysis of fatty acid anhydrides and polyanhydrides, 465 (2002) 257

**Anhydride analysis**

Analysis of fatty acid anhydrides and polyanhydrides, 465 (2002) 257

**Anilines**

Uptake monitoring of anilines and phenols using modified zeolites, 464 (2002) 1

**Animal experiment**

Alternative to vertebrate animal experiments in the study of metabolism of illegal growth promoters and veterinary drugs, 473 (2002) 59

**Animal feed**

Simultaneous determination of sulfadiazine and trimethoprim in animal feed by liquid chromatography with UV and tandem mass spectrometric detection, 473 (2002) 183

**Anion adsorption**

Specific adsorption of halogen anions on hydrous  $\gamma$ - $\text{Al}_2\text{O}_3$ , 470 (2002) 263

**Anion exchange chromatography**

Analysis of glycolytic intermediates in *Saccharomyces cerevisiae* using anion exchange chromatography and electrospray ionization with tandem mass spectrometric detection, 460 (2002) 209

**Anion exchange membrane**

Chromium(VI) transport through the Raipore 1030 anion exchange membrane, 464 (2002) 15

**Anion exchange separation**

Determination of sodium oxalate in Bayer liquor using flow-analysis incorporating an anion exchange column and tris(2,2'-bipyridyl)ruthenium(II) chemiluminescence detection, 458 (2002) 291

**Anion-exchange**

Ion-exchange method for separation and concentration of platinum and palladium for analysis of environmental samples by inductively coupled plasma atomic emission spectrometry, 464 (2002) 7

**Anodic stripping voltammetry**

Calibrationless determination of cadmium, lead and copper in rain samples by stripping voltammetry at mercury microelectrodes. Effect of natural convection on the deposition step, 452 (2002) 65

Determination of nanomolar concentrations of lead and cadmium by anodic-stripping voltammetry at the silver electrode, 457 (2002) 285

**Anomers equilibrium**

Structural and thermodynamic investigations of metabolites of the thromboxane synthase pathway, 465 (2002) 441

**Antarctica**

Recent advances in measurement of Pb isotopes in polar ice and snow at sub-picogram per gram concentrations using thermal ionisation mass spectrometry, 453 (2002) 1

**Anthocyanin-derived pigments**

Anthocyanin-derived pigments and colour of red wines, 458 (2002) 147

**Anthocyanins**

Use of modern nuclear magnetic resonance spectroscopy in wine analysis: determination of minor compounds, 458 (2002) 77

**Anthrahydroquinone (AHQ)**

Determination of anthraquinone-2-sulfonate in alkaline pulping liquor by spectrophotometry using a Nafion membrane interface, 474 (2002) 69

**Anthrahydroquinone sulfonic salt (AHQ-S)**

Determination of anthraquinone-2-sulfonate in alkaline pulping liquor by spectrophotometry using a Nafion membrane interface, 474 (2002) 69

**Anthraquinone (AQ)**

Determination of anthraquinone-2-sulfonate in alkaline pulping liquor by spectrophotometry using a Nafion membrane interface, 474 (2002) 69

**Anthraquinone sulfonic salt (AQ-S)**

Determination of anthraquinone-2-sulfonate in alkaline pulping liquor by spectrophotometry using a Nafion membrane interface, 474 (2002) 69

**Antibody**

Evolution of antibodies for environmental monitoring: from mice to plants, 468 (2002) 185

Development of a rapid, specific fluorescence polarization immunoassay for the herbicide chlorsulfuron, 468 (2002) 229

**Antibody-BSA hydrogel**

Immunosensor for okadaic acid using quartz crystal microbalance, 471 (2002) 33

**Antidoping analysis**

Strategies for internal quality control in antidoping analyses, 460 (2002) 289

**Antiepileptic drugs**

Simultaneous analysis of six antiepileptic drugs and two selected metabolites in human plasma by liquid chromatography after solid-phase extraction, 472 (2002) 1

**Antifouling biocides**

Toxicity evaluation of single and mixed antifouling biocides measured with acute toxicity bioassays, 456 (2002) 303

**Antigen masking**

Future of biological aerosol detection, 457 (2002) 125

**Anti-microbial resistance**

Contribution of European research to anti-microbials and hormones, 473 (2002) 83

**Antimony**

Inter-method comparison for the determination of antimony and arsenic in peat samples, 458 (2002) 387

**Antimony species**

Determination of inorganic antimony species in seawater by differential pulse anodic stripping voltammetry: stability of the tri-valent state, 452 (2002) 237

**Anti-okadaic acid monoclonal antibody**

Immunosensor for okadaic acid using quartz crystal microbalance, 471 (2002) 33

**Antioxidant**

Spectrofluorimetric determination of hydrogen peroxide scavenging activity, 452 (2002) 177

Electrochemical studies on antioxidants in bovine milk, 474 (2002) 137

#### **Antioxidant activity**

Role of melanoidins in sweet wines, 458 (2002) 169

#### **Apatite**

Determination of the sodium monofluorophosphate in a hardened cement paste by ion chromatography, 472 (2002) 37

#### **Apolipoprotein E**

Coupling of an indicator-free electrochemical DNA biosensor with polymerase chain reaction for the detection of DNA sequences related to the apolipoprotein E, 469 (2002) 93

#### **Aqua regia extraction**

Determination of Cd, Cu, Pb and Zn in environmental samples: microwave-assisted total digestion versus aqua regia and nitric acid extraction, 462 (2002) 59

#### **Aquatic humic substances**

Sorption of aquatic humic matter by DAX-8 and XAD-8 resins. Comparative study using pyrolysis gas chromatography, 471 (2002) 219

#### **Aqueous biphasic systems**

Extraction of humic acids and their fractions in poly(ethylene glycol)-based aqueous biphasic systems, 452 (2002) 95

#### **Aqueous nitrobenzene or 1,2-dichloroethane interface**

Evaluation of Gibbs free energy for the transfer of a highly hydrophilic ion from an acidic aqueous solution to an organic solution based on ion pair extraction, 452 (2002) 149

#### **Aqueous samples**

Counter-current supercritical fluid extraction of phenolic compounds from aqueous matrices, 460 (2002) 1

#### **Aqueous slurry**

Direct mercury determination in aqueous slurries of environmental and biological samples by cold vapour generation-electrothermal atomic absorption spectrometry, 460 (2002) 111

#### **Arachidonic acid**

Stable isotope analysis of fatty acids by gas chromatography-isotope ratio mass spectrometry, 465 (2002) 63

#### **Archaeology**

Stable isotope analysis of fatty acids by gas chromatography-isotope ratio mass spectrometry, 465 (2002) 63

#### **Archaeometry**

Investigation of a Roman age "bulk pigment" found in Vicenza, 475 (2003) 181

#### **Aroma**

Biogenesis of C<sub>13</sub>-norisoprenoid compounds: experiments supportive for an apo-carotenoid pathway in grapevines, 458 (2002) 3

Effect of maturation in small oak casks on the volatility of red wine aroma compounds, 458 (2002) 45

Comparison of wine aromas with different tannic content aged in French oak barrels, 458 (2002) 139

Characterisation of young Cognac spirit aromatic quality, 458 (2002) 191

#### **Aroma profile**

Aroma profile of Portuguese brandies aged in chestnut and oak woods, 458 (2002) 55

#### **Aromatic hydrocarbons**

Improvement of UV spectrophotometry methodology for the determination of total polycyclic aromatic compounds in contaminated soils, 453 (2002) 245

#### **Arsenazo-DBS**

Quantitative determination of proteins by the Rayleigh light-scattering technique after optimization of the derivation reaction with Arsenazo-DBS, 459 (2002) 313

#### **Arsenic**

Microwave-assisted digestion of organoarsenic compounds for the determination of total arsenic in aqueous, biological, and sediment samples using flow injection hydride generation electrothermal atomic absorption spectrometry, 452 (2002) 207

Determination of arsenic in gold samples using matrix exchange differential pulse stripping voltammetry, 453 (2002) 201

Analysis and leaching characteristics of mercury and arsenic in Chinese medicinal material, 453 (2002) 311

Multisyringe flow-injection system for total inorganic arsenic determination by hydride generation-atomic fluorescence spectrometry, 455 (2002) 277

Inter-method comparison for the determination of antimony and arsenic in peat samples, 458 (2002) 387

Determination of As(III) and arsenic(V) in natural waters by cathodic stripping voltammetry at a hanging mercury drop electrode, 459 (2002) 151

#### **Arsenic(III)**

Determination of As(III) and total inorganic arsenic by flow injection hydride generation atomic absorption spectrometry, 460 (2002) 227

#### **Arsenic(V)**

Determination of As(III) and total inorganic arsenic by flow injection hydride generation atomic absorption spectrometry, 460 (2002) 227

#### **Arsenobetaine**

Microwave-assisted digestion of organoarsenic compounds for the determination of total arsenic in aqueous, biological, and sediment samples using flow injection hydride generation electrothermal atomic absorption spectrometry, 452 (2002) 207

#### **Arsenoribosides**

Measurement of arsenic species in marine macroalgae by microwave-assisted extraction and high performance liquid chromatography-inductively coupled plasma mass spectrometry, 457 (2002) 173

#### **Artificial neural network**

Artificial neural networks for quantification in unresolved capillary electrophoresis peaks, 452 (2002) 47

- Multicomponent acid-base titration by principal component-artificial neural network calibration, 461 (2002) 147
- Classification and quantitation of finishing oils by near infrared spectroscopy, 463 (2002) 295
- Spectrophotometric determination of metal ions in electroplating solutions in the presence of EDTA with the aid of multivariate calibration and artificial neural networks, 463 (2002) 305
- Kinetic detection of benzene/chloroform and toluene/chloroform vapors using a single quartz piezoelectric crystal coated with calix[6]arene, 464 (2002) 57
- Application of generalized artificial neural networks coupled with an orthogonal design to optimization of a system for the kinetic spectrophotometric determination of Hg(II), 469 (2002) 303
- Simple method for colorimetric spot-test quantitative analysis of Fe(III) using a computer controlled hand-scanner, 471 (2002) 97
- As**
- Study of chemical and spectral interferences in the simultaneous determination of As, Bi, Sb, Se and Sn by hydride generation inductively coupled plasma atomic emission spectrometry, 468 (2002) 71
- Ascorbic acid**
- Poly(isonicotinic acid) modified glassy carbon electrode for electrochemical detection of norepinephrine, 454 (2002) 75
- New microdialysis-electrochemical device for simultaneous determination of ascorbic acid and 5-hydroxyindole-3-acetic acid in rat striatum, 458 (2002) 337
- Determination of ascorbic acid based on a peroxidase oscillator reaction, 466 (2002) 257
- Monitoring reactive oxygen species in vivo using microdialysis sampling and chemiluminescence detection as an alternative global method for determination of total antioxidant capacity, 467 (2002) 133
- Assay**
- Fluorimetric assay for measuring Dns-His-Lys-Arg-His-Lys cleaving enzyme using high-performance liquid chromatography, 457 (2002) 157
- Assay of certified reference materials**
- Development of an automated sequential injection on-line solvent extraction-back extraction procedure as demonstrated for the determination of cadmium with detection by electrothermal atomic absorption spectrometry, 456 (2002) 283
- Astilbin**
- Direct liquid chromatographic analysis of resveratrol derivatives and flavanols in wines with absorbance and fluorescence detection, 458 (2002) 103
- Asulam**
- Simultaneous UV and electrochemical determination of the herbicide asulam in tap water samples by micellar electrokinetic capillary chromatography, 469 (2002) 243
- Atherosclerosis**
- Interrelationship between fatty acid composition, lipid peroxidation and alpha-tocopherol consumption post-LDL-apheresis treatment evaluated by liquid chromatography and gas chromatography, 467 (2002) 125
- Atmospheric pressure chemical ionization**
- Quantification of methylphenidate in rat, rabbit and dog plasma using a chiral liquid-chromatography/tandem mass spectrometry method. Application to toxicokinetic studies, 469 (2002) 261
- Atmospheric pressure measurements**
- Quantitative millimetre wavelength spectrometry at pressures approaching atmospheric. II. Determination of oxygen at atmospheric pressure, 468 (2002) 323
- Atomic absorption spectrometry**
- Silica gel functionalized with resacetophenone: synthesis of a new chelating matrix and its application as metal ion collector for their flame atomic absorption spectrometric determination, 454 (2002) 229
- Application of multivariate methods to scalp hair metal data to distinguish between drug-free subjects and drug abusers, 455 (2002) 253
- Trace metal studies of selected white wines: an alternative approach, 458 (2002) 223
- Micelle mediated methodology for the determination of free and bound iron in wines by flame atomic absorption spectrometry, 458 (2002) 241
- Determination of As(III) and total inorganic arsenic by flow injection hydride generation atomic absorption spectrometry, 460 (2002) 227
- Atomic emission spectrometry**
- Study of chemical and spectral interferences in the simultaneous determination of As, Bi, Sb, Se and Sn by hydride generation inductively coupled plasma atomic emission spectrometry, 468 (2002) 71
- Atomic fluorescence spectrometry**
- Multisyringe flow-injection system for total inorganic arsenic determination by hydride generation-atomic fluorescence spectrometry, 455 (2002) 277
- Determination of zinc in food using atomic fluorescence spectrometry by hydride generation from organized media, 457 (2002) 305
- Atomic weight**
- Measurement of the isotopic composition and atomic weight of an isotopic reference material of platinum, IRMM-010, 460 (2002) 41
- Atrazine**
- Novel fiber-optic biosensor based on immobilized glutathione S-transferase and sol-gel entrapped bromocresol green for the determination of atrazine, 460 (2002) 151
- On-line pre-concentration of atrazine by antibody immobilization capillary electrophoresis, 464 (2002) 25
- Evaluation of a field-test kit for triazine herbicides (SensioScreen<sup>®</sup> TR500) as a fast assay to detect pesticide contamination in water samples, 475 (2003) 105

**Attenuated total reflection**

Cooled internal reflection element for infrared chemical sensing of volatile to semi-volatile organic compounds in the headspace of aqueous solutions, 462 (2002) 235

**Au colloid modified microsensor**

Novel nitric oxide microsensor and its application to the study of smooth muscle cells, 455 (2002) 199

**Australian white wine**

Trace metal studies of selected white wines: an alternative approach, 458 (2002) 223

**Authenticity**

Stable isotope analysis of fatty acids by gas chromatography-isotope ratio mass spectrometry, 465 (2002) 63

**Autoclave**

Survival and polymerase chain reaction-based detection of nucleic acid taggant markers during bacterial growth and sterilization, 475 (2003) 67

**Autoclave heating**

Determination of total phosphorus and nitrogen in turbid waters by oxidation with alkaline potassium peroxodisulfate and low pressure microwave digestion, autoclave heating or the use of closed vessels in a hot water bath: comparison with Kjeldahl digestion, 463 (2002) 283

**Automation**

Development of the continuously variable volume reactor for flow injection analysis. Part 1. Design, capabilities and testing, 455 (2002) 287

Exploiting monosegmented flow analysis to perform in-line standard additions using a single stock standard solution in spectrophotometric sequential injection procedures, 466 (2002) 345

Multicommuation in flow analysis: concepts, applications and trends, 468 (2002) 119

**Automatization**

Automated flow analysis system based on multicommuation for Cd, Ni and Pb on-line pre-concentration in a cationic exchange resin with determination by inductively coupled plasma atomic emission spectrometry, 453 (2002) 301

**Automobile**

Conducting polymer-based array for the discrimination of odours from trim plastic materials used in automobiles, 455 (2002) 41

**Auxiliary-system**

Versatile biosensor surface based on peptide nucleic acid with label free and total internal reflection fluorescence detection for quantification of endocrine disruptors, 469 (2002) 37

**Avidin-biotin**

Biotinylated alginate immobilization matrix in the construction of an amperometric biosensor: application for the determination of glucose, 453 (2002) 71

**8-Azapurines**

Selective fluorescent and fluorogenic substrates for purine-nucleoside phosphorylases from various sources, and direct fluorimetric determination of enzyme levels in human and animal blood, 472 (2002) 63

**Azur B**

Study of the interaction of Azur B with DNA and the determination of DNA based on resonance light scattering measurements, 452 (2002) 285

**B****Background correction**

Determination of nanomolar concentrations of lead and cadmium by anodic-stripping voltammetry at the silver electrode, 457 (2002) 285

**Bacteria**

Rapid and specific detection of bacteria using bioluminescence, 457 (2002) 109

Tuning the parameters for fast respirometry, 460 (2002) 257

Covalent binding of genetically engineered microorganisms to porous glass beads, 470 (2002) 71

**Bacterial fingerprinting**

Fingerprinting bacterial strains using ion mobility spectrometry, 457 (2002) 83

**Bacterial infection**

Differentiation of human serum samples by surface plasmon resonance monitoring of the integral glycoprotein interaction with a lectin panel, 459 (2002) 25

**Bacterial magnetic particles (BMPs)**

Fully automated immunoassay system of endocrine disrupting chemicals using monoclonal antibodies chemically conjugated to bacterial magnetic particles, 475 (2003) 75

**Bacterial vaginosis**

Novel application for ion mobility spectrometry: diagnosing vaginal infections through measurement of biogenic amines, 474 (2002) 115

**Bacteriophage**

Rapid and specific detection of bacteria using bioluminescence, 457 (2002) 109

**Barium**

Separation of Sr from Ca, Ba and Ra by means of  $\text{Ca}(\text{OH})_2$  and  $\text{Ba}(\text{Ra})\text{Cl}_2$  or  $\text{Ba}(\text{Ra})\text{SO}_4$  for the determination of radiostrontium, 466 (2002) 109

**Base peak chromatogram**

Matched filtering with background suppression for improved quality of base peak chromatograms and mass spectra in liquid chromatography-mass spectrometry, 454 (2002) 167

**Baseline**

Rank annihilation correction for the amendment of instrumental inconsistencies, 464 (2002) 249

**Bases**

Acid-base constants of neutral bases in acetonitrile-water mixtures, 454 (2002) 157

**Batch mode hydride generation**

Tin determination in marine sediment, soil, coal fly ash and coal slurried samples by hydride generation-electrothermal atomic absorption spectrometry, 461 (2002) 261

**Bayer liquor**

Determination of sodium oxalate in Bayer liquor using flow-analysis incorporating an anion exchange column and tris(2,2'-bipyridyl)ruthenium(II) chemiluminescence detection, 458 (2002) 291

**Beer analysis**

Determination of purines and pyrimidines in beer samples by capillary zone electrophoresis, 454 (2002) 185

**Beeswax**

Determination of amitraz and other acaricide residues in beeswax, 475 (2003) 97

**Benzalkonium chloride**

Sensitized spectrophotometric determination of trace Hg(II) in benzalkonium chloride media, 459 (2002) 75

**Benzene biomarker**

Ultratrace analysis for *trans,trans*-muconic acid by electrophoretic derivatization and capillary gas chromatography, 455 (2002) 111

**Benzodiazepines**

Separation of benzodiazepines by electrospray ionization ion mobility spectrometry-mass spectrometry, 457 (2002) 235

Recent developments in the use and abuse of growth promoters, 473 (2002) 71

**Benzoic acids**

Characterisation of humic substances by acid catalysed transesterification, 452 (2002) 105

**Benzophenone-4**

Sequential injection analysis for benzophenone-4 and phenylbenzimidazole sulphonic acid in sunscreen sprays by solid-phase extraction coupled with ultraviolet spectrometry, 464 (2002) 295

**Benzo[a]pyrene**

Time-resolved laser-induced fluorimetry for screening polycyclic aromatic hydrocarbons on solid-phase extraction membranes, 464 (2002) 261

Study of different normal-microemulsion compositions by room-temperature phosphorescence to determine benzo[a]pyrene in environmental samples, 474 (2002) 91

**Bi**

Study of chemical and spectral interferences in the simultaneous determination of As, Bi, Sb, Se and Sn by hydride generation inductively coupled plasma atomic emission spectrometry, 468 (2002) 71

**Biamperometry**

Theoretical and experimental study of the biamperometry for irreversible redox couple in flow system, 470 (2002) 229

**Bidentate amine**

Effect of 1,10-phenanthroline on the extraction and separation of lithium(I), sodium(I) and potassium(I) with thenoyltrifluoroacetone, 454 (2002) 241

**Bidentate organotins**

Selective fluoride recognition and potentiometric properties of ion-selective electrodes based on bis(halodiphenylstannyl)alkanes, 467 (2002) 197

**Bifunctional hapten**

Group-specific enzyme-linked immunosorbent assay for fenitrothion and 3-methyl-4-nitrophenol in water samples based on a polyclonal antibody, 460 (2002) 99

**Bilayer lipid membranes**

Membrane supported bilayer lipid membranes array: preparation, stability and ion-channel insertion, 460 (2002) 23

**Bilinear data**

Rank annihilation correction for the amendment of instrumental inconsistencies, 464 (2002) 249

**Binary response**

Estimating the uncertainty of binary test results to assess their compliance with regulatory limits, 455 (2002) 267

**Binary solvents**

Spectrophotometric determination of acidity constants of 4-(2-pyridylazo)resorcinol in binary methanol-water mixtures, 455 (2002) 335

**Bioaffinity assay**

Heterogeneous and homogeneous electrochemiluminoimmunoassays of hTSH at disposable oxide-covered aluminum electrodes, 458 (2002) 271

**Bioanalyte detection**

Carbohydrate recognition: a nascent technology for the detection of bioanalytes, 457 (2002) 39

**Bioanode**

Immobilisation of lactate dehydrogenase on poly(aniline)-poly(acrylate) and poly(aniline)-poly(vinyl sulphonate) films for use in a lactate biosensor, 453 (2002) 191

**Biocompatibility**

Ion-sensor property and blood compatibility of neutral-carrier-type poly(vinyl chloride) membranes coated by phosphorylcholine polymers, 463 (2002) 31

**Biodegradation**

Biodegradation studies of 4-fluorobenzoic acid and 4-fluorocinnamic acid: an evaluation of membrane inlet mass spectrometry as an alternative to high performance liquid chromatography and ion chromatography, 454 (2002) 137

**Biofluids samples**

Direct determination of aluminium in serum and urine by electrothermal atomic absorption spectrometry using ruthenium as permanent modifier, 464 (2002) 323

**Biofuel cell**

Immobilisation of lactate dehydrogenase on poly(aniline)-poly(acrylate) and poly(aniline)-poly(vinyl sulphonate) films for use in a lactate biosensor, 453 (2002) 191

**Biofunctional membranes**

Electron paramagnetic resonance spin label titration: a novel method to investigate random and site-specific immobilization of enzymes onto polymeric membranes with different properties, 470 (2002) 29

**Biogenesis**

Biogenesis of C<sub>13</sub>-norisoprenoid compounds: experiments supportive for an apo-carotenoid pathway in grapevines, 458 (2002) 3

**Biogenic amines**

Determination of volatile biogenic amines in muscle food products by ion mobility spectrometry, 463 (2002) 155  
Novel application for ion mobility spectrometry: diagnosing vaginal infections through measurement of biogenic amines, 474 (2002) 115

**Biolog MT2 microplates**

Comparison of three microbial assay procedures for measuring toxicity of chemical compounds: ToxAlert<sup>®</sup> 10, CellSense and Biolog MT2 microplates, 456 (2002) 41

**Biological and toxin weapons convention**

Mass spectrometric identification of toxins of biological origin, 457 (2002) 71

**Biological sample**

Development and application of a micro-digestion device for elemental analysis of biological samples, 451 (2002) 279  
Quantitation of agmatine by liquid chromatography with laser-induced fluorescence detection, 470 (2002) 155  
Determination of trace elements in biological materials using tetramethylammonium hydroxide for sample preparation, 470 (2002) 195

**Bioluminescence**

Identification of toxic compounds in wastewater treatment plants during a field experiment, 456 (2002) 19  
SOS-LUX- and LAC-FLUORO-TEST for the quantification of genotoxic and/or cytotoxic effects of heavy metal salts, 456 (2002) 31  
Rapid and specific detection of bacteria using bioluminescence, 457 (2002) 109  
Heterobifunctional linker between antibodies and reporter genes for immunoassay development, 459 (2002) 169  
Sol-gel luminescence biosensors: Encapsulation of recombinant *E. coli* reporters in thick silicate films, 462 (2002) 11

Use of specific bioluminescent cell lines for the detection of steroid hormone (ant)agonists in meat producing animals, 473 (2002) 119

**Bioluminescent bacteria**

Improved detection of toxic chemicals using bioluminescent bacteria, 471 (2002) 113

**Biomarker**

Development of an enzyme immunoassay for linoleic acid diols in urine, 466 (2002) 247  
Contribution of European research to endocrine disruptors, 473 (2002) 161

**Biomass burning particles**

Investigation on the geometric and matrix effects and quantitative determination of K, Cl and S atomic fraction for biomass burning particles by Monte Carlo simulation, 459 (2002) 93

**Biomass residues**

Environmental analysis of aliphatic carboxylic acids by ion-exclusion chromatography, 465 (2002) 157

**Biomimetic sensing**

Fluorescent sensing of homocysteine by molecular imprinting, 466 (2002) 17

**Biomolecule**

Properties and applications of proteins encapsulated within sol-gel derived materials, 461 (2002) 1

**Bioprocess monitoring**

Quantitation of intracellular recombinant human superoxide dismutase using surface plasmon resonance, 456 (2002) 193  
On-line simultaneous monitoring of glucose and acetate with FIA during high cell density fermentation of recombinant *E. coli*, 462 (2002) 293

**Biosensor**

Bienzymatic amperometric biosensor for glucose based on polypyrrole/ceramic carbon as electrode material, 451 (2002) 251  
Biotinylated alginate immobilization matrix in the construction of an amperometric biosensor: application for the determination of glucose, 453 (2002) 71  
Surface plasmon resonance biosensor for genetically modified organisms detection, 453 (2002) 165  
In-field monitoring of cleaning efficiency in waste water treatment plants using two phenol-sensitive biosensors, 456 (2002) 3  
SOS-LUX- and LAC-FLUORO-TEST for the quantification of genotoxic and/or cytotoxic effects of heavy metal salts, 456 (2002) 31  
Comparison of three microbial assay procedures for measuring toxicity of chemical compounds: ToxAlert<sup>®</sup> 10, CellSense and Biolog MT2 microplates, 456 (2002) 41  
Quantitation of intracellular recombinant human superoxide dismutase using surface plasmon resonance, 456 (2002) 193  
Chemiluminescence multichannel immunosensor for biodetection, 457 (2002) 3  
Selection of phage displayed peptides for the detection of 2,4,6-trinitrotoluene in seawater, 457 (2002) 13

- Towards the optimization of an optical DNA sensor: control of selectivity coefficients and relative surface affinities, 457 (2002) 29
- Reagentless pH-based biosensing using a fluorescently-labelled dextran co-entrapped with a hydrolytic enzyme in sol-gel derived nanocomposite films, 457 (2002) 47
- Yeast cells sucrose biosensor based on a potentiometric oxygen electrode, 458 (2002) 215
- Comparison of electrochemical, electrophoretic and spectrophotometric methods for creatinine determination in biological fluids, 459 (2002) 187
- Membrane supported bilayer lipid membranes array: preparation, stability and ion-channel insertion, 460 (2002) 23
- Novel fiber-optic biosensor based on immobilized glutathione *S*-transferase and sol-gel entrapped bromocresol green for the determination of atrazine, 460 (2002) 151
- Tuning the parameters for fast respirometry, 460 (2002) 257
- Properties and applications of proteins encapsulated within sol-gel derived materials, 461 (2002) 1
- Direct selective detection of genomic DNA from coliform using a fiber optic biosensor, 461 (2002) 37
- Entrapment of glucose oxidase in non-porous poly(vinyl chloride), 461 (2002) 57
- Amperometric biosensors employing an insoluble oxidant as an interference-removing agent, 461 (2002) 251
- Sol-gel luminescence biosensors: Encapsulation of recombinant *E. coli* reporters in thick silicate films, 462 (2002) 11
- Quinohemoprotein alcohol dehydrogenase-based reagentless amperometric biosensor for ethanol monitoring during wine fermentation, 463 (2002) 39
- Development of a laccase-based flow injection electrochemical biosensor for the determination of phenolic compounds and its application for monitoring remediation of Kraft E1 paper mill effluent, 463 (2002) 229
- Glucose biosensors prepared by electropolymerization of *p*-chlorophenylamine with and without Nafion, 463 (2002) 239
- Immobilization of acetylcholinesterase on screen-printed electrodes: comparative study between three immobilization methods and applications to the detection of organophosphorus insecticides, 464 (2002) 171
- Characterization of oxidoreductase-redox polymer electrostatic film assembly on gold by surface plasmon resonance spectroscopy and Fourier transform infrared-external reflection spectroscopy, 466 (2002) 201
- Polyelectrolyte-stabilized biosensors based on macroporous carbon electrode, 467 (2002) 217
- Biosensoric flow-through method for the determination of cysteine sulfoxides, 469 (2002) 155
- Quartz crystal microbalance determination of organophosphorus and carbamate pesticides, 469 (2002) 189
- Dual amperometric-potentiometric biosensor detection system for monitoring organophosphorus neurotoxins, 469 (2002) 197
- Performance of amperometric alcohol electrodes prepared by plasma polymerization technique, 469 (2002) 217
- Tethered thiazole orange intercalating dye for development of fibre-optic nucleic acid biosensors, 470 (2002) 57
- Study on the formation of the Prussian blue films on the polypyrrole surface as a potential mediator system for biosensing applications, 472 (2002) 113
- Coupling conducting polymers and mediated electrochemical responses for the detection of *Listeria*, 475 (2003) 37
- Biosensor assay**
- Biosensor analysis of penicillin G in milk based on the inhibition of carboxypeptidase activity, 468 (2002) 153
- Biosensor design**
- Practical physical aspects of interfacial nucleic acid oligomer hybridisation for biosensor design, 469 (2002) 115
- Biota**
- Supercritical fluid extraction of organochlorine pesticides and some metabolites in frogs from National Park of Ordesa and Monte Perdido, 464 (2002) 303
- Biotoxicity assay**
- Improved detection of toxic chemicals using bioluminescent bacteria, 471 (2002) 113
- 1,10-bis(2'-Carboxylphenyl)-1,4,7,10-tetraoxadecane**
- Study on the new fluorescence enhancement system of Tb-1,10-bis(2'-carboxylphenyl)-1,4,7,10-tetraoxadecane in silver chloride collosol and its analytical application, 468 (2002) 287
- Bismuth**
- Determination of bismuth, selenium and tellurium in nickel-based alloys and pure copper by flow-injection hydride generation atomic absorption spectrometry—with ascorbic acid pre-reduction and cupferron chelation-extraction, 459 (2002) 161
- Bisphenol A (BPA)**
- Measurement of bisphenol A in human serum by gas chromatography/mass spectrometry, 458 (2002) 331
- Fully automated immunoassay system of endocrine disrupting chemicals using monoclonal antibodies chemically conjugated to bacterial magnetic particles, 475 (2003) 75
- Biuret**
- Kinetics of the post-column complexation reaction of Cu(II) with *N*-formylmethionyl chemoattractant and chemotactic peptides, 474 (2002) 1
- Black Cohosh**
- High-performance liquid chromatographic analysis of Black Cohosh (*Cimicifuga racemosa*) constituents with in-line evaporative light scattering and photodiode array detection, 471 (2002) 61
- $\beta$ -Blockers**
- Micellar-organic versus aqueous-organic mobile phases for the screening of  $\beta$ -blockers, 454 (2002) 109
- Determination of  $\beta$ -blockers in pharmaceutical preparations and human urine by high-performance liquid chromatography with tris(2,2'-bipyridyl)ruthenium(II) electrogenerated chemiluminescence detection, 471 (2002) 51

**Blood enzyme levels**

Selective fluorescent and fluorogenic substrates for purine-nucleoside phosphorylases from various sources, and direct fluorimetric determination of enzyme levels in human and animal blood, 472 (2002) 63

**Body fluids**

Solid-state pH nanoelectrode based on polyaniline thin film electrodeposited onto ion-beam etched carbon fiber, 452 (2002) 1

**Boiler water**

Simultaneous determination of silicate and phosphate in boiler water at power plants based on series flow cells by using flow injection spectrophotometry, 455 (2002) 315

**Bottom ash**

Application of a sequential extraction procedure to study the release of elements from municipal solid waste incineration bottom ash, 451 (2002) 285

**Bovine milk and whey**

Electrochemical studies on antioxidants in bovine milk, 474 (2002) 137

**Bovine serum**

Simple quantification of endogenous retinoids in bovine serum by high-performance liquid chromatography – diode-array detection, 468 (2002) 237

**Bovine serum albumin**

Study of the interaction between terazosin and serum albumin. Synchronous fluorescence determination of terazosin, 452 (2002) 185

**Bovine urine**

Internal validation of screening methodology for residues of epitenbolone, trenbolone, epi-nortestosterone and nortestosterone in bovine urine using immunoaffinity cartridges for sample clean-up, 473 (2002) 111

**Brackish water**

Extraction and preconcentration of polychlorinated dibenzo-*p*-dioxins using the cloud-point methodology. Application to their determination in water samples by high-performance liquid chromatography, 470 (2002) 205

**Brandy**

Aroma profile of Portuguese brandies aged in chestnut and oak woods, 458 (2002) 55

**BRCA**

Surface-enhanced Raman scattering detection of the breast cancer susceptibility gene *BRCA1* using a silver-coated microarray platform, 469 (2002) 149

**Breast cancer detection**

Surface-enhanced Raman scattering detection of the breast cancer susceptibility gene *BRCA1* using a silver-coated microarray platform, 469 (2002) 149

**Breast tumor**

Hadamard transform fluorescence image microscopy using one-dimensional movable mask, 468 (2002) 27

**Brettanomyces yeast**

Determination of volatile phenols in fino sherry wines, 458 (2002) 95

**Brines**

Spectrophotometric analysis of iodide oxidation by chlorine in highly mineralized solutions, 456 (2002) 105

**Bromate**

Highly sensitive spectrofluorimetric kinetic determination of ultra-trace amounts of vanadium(V) based on the oxidation of 1,8-diaminonaphthalene by bromate, 455 (2002) 159

**Bromocresol green**

Novel fiber-optic biosensor based on immobilized glutathione *S*-transferase and sol-gel entrapped bromocresol green for the determination of atrazine, 460 (2002) 151

**Bromide**

Simultaneous coulometric determination of iodide, bromide and chloride in a mixture by automated coupling of constant current chronopotentiometry and square wave voltammetry, 464 (2002) 115

 **$\alpha$ -Bromonaphthalene**

Determination of trace levels of mercury in water samples based on room temperature phosphorescence energy transfer, 455 (2002) 179

**Bromopropylate**

Determination of amitraz and other acaricide residues in beeswax, 475 (2003) 97

**Browning**

Removal of iron, copper and manganese from white wines through ion exchange techniques: effects on their organoleptic characteristics and susceptibility to browning, 458 (2002) 197

**Bryophytes**

Ion-paired solid phase extraction as a sample preparation strategy for the high-performance liquid chromatographic determination of oxytetracycline in the bryophyte *Fontinalis antipyretica*, 475 (2003) 117

**BSA**

Preparation and application of functionalized nanoparticles of CdS as a fluorescence probe, 468 (2002) 35

**BTEX**

Separation of polar and non-polar analytes using dimethyl sulfoxide-modified subcritical water, 460 (2002) 185

Improved detection of toxic chemicals using bioluminescent bacteria, 471 (2002) 113

**Bulk liquid membrane**

Kinetic study of L-isoleucine transport through a liquid membrane containing di(2-ethylhexyl) phosphoric acid in kerosene, 456 (2002) 157

**Buprofezin**

Fourier transform infrared spectrometric strategies for the determination of Buprofezin in pesticide formulations, 468 (2002) 81

**Butyltin compounds**

Headspace solid-phase micro-extraction gas chromatography-mass detection method for the determination of butyltin compounds in wines, 458 (2002) 231

**C****Ca**

Determination of calcium, iron and zinc in milk powder by reaction cell inductively coupled plasma mass spectrometry, 470 (2002) 223

**Cadaverine**

Determination of volatile biogenic amines in muscle food products by ion mobility spectrometry, 463 (2002) 155

**Cadmium**

Column solid-phase extraction with Chromosorb-102 resin and determination of trace elements in water and sediment samples by flame atomic absorption spectrometry, 452 (2002) 77

Fluorescent microscopic determination of cadmium in water samples with the self-ordered ring of  $\alpha,\beta,\gamma,\delta$ -tetra(5-sulphophenyl)porphine formed on the solid support of glass slides, 453 (2002) 97

Ligand and surfactant effects on a novel electrochemiluminescent reaction involving cadmium, 454 (2002) 45

Development of an automated sequential injection on-line solvent extraction-back extraction procedure as demonstrated for the determination of cadmium with detection by electrothermal atomic absorption spectrometry, 456 (2002) 283

Determination of nanomolar concentrations of lead and cadmium by anodic-stripping voltammetry at the silver electrode, 457 (2002) 285

Voltammetry using a dental amalgam electrode for heavy metal monitoring of wines and spirits, 458 (2002) 249

Multi-component analysis by flow injection-diode array detection-spectrophotometry using partial least squares calibration model for simultaneous determination of zinc, cadmium and lead, 461 (2002) 181

Characteristics of subtractive anodic stripping voltammetry of Pb and Cd at silver and gold electrodes, 464 (2002) 99

Application of a cellulose phosphate ion exchange membrane as a binding phase in the diffusive gradients in thin films technique for measurement of trace metals, 464 (2002) 331

**Calcium**

Direct spectrophotometric determination of calcium in clinical samples with carboxyazo-*p*-CH<sub>3</sub>, 452 (2002) 303

Performance of the diffusive gradients in thin films technique for measuring Ca and Mg in freshwater, 460 (2002) 247

Separation of Sr from Ca, Ba and Ra by means of Ca(OH)<sub>2</sub> and Ba(Ra)Cl<sub>2</sub> or Ba(Ra)SO<sub>4</sub> for the determination of radiostrontium, 466 (2002) 109

**Calcium analysis**

Determination of calcium and total hardness in natural waters using a potentiometric sensor array, 464 (2002) 89

**Calcium determination**

Optical test strip for calcium determination based on a neutral ionophore, 451 (2002) 231

**Calcium(II)**

pH-stat techniques in titrimetric analysis. IV. pH-stat monitoring of chelatometric titrations, 470 (2002) 277

**Calibration**

Monofluorinated polycyclic aromatic hydrocarbons as internal standards in Shpol'skii spectroscopy: 1-fluoropyrene as an example, 459 (2002) 53

Calibration by the gradient ratio-standard addition method in flow injection flame atomic absorption spectrometry, 460 (2002) 235

**Calibration sensitivity**

Visible spectrophotometric determination of metal ions: the influence of structure on molar absorptivity value of copper(II) complexes in aqueous solution, 459 (2002) 323

**Calibrationless determination**

Voltammetric investigation on sulfide ions in aqueous solutions with mercury-coated platinum microelectrodes, 464 (2002) 217

**Calixarenes**

Solvent effect on the complex formation of distally dialkylated calix[4]arenes with 1-chloro-4-(trifluoromethyl)benzene, 461 (2002) 273

**Calixfuranopyrrole**

Calix[2]furanopyrrole and related compounds as the neutral carrier in silver ion-selective electrode, 453 (2002) 81

**Calix[6]arene**

Kinetic detection of benzene/chloroform and toluene/chloroform vapors using a single quartz piezoelectric crystal coated with calix[6]arene, 464 (2002) 57

**Calmodulin**

Screening of antagonists based on induced dissociation of a calmodulin-melittin interaction entrapped in a sol-gel derived matrix, 470 (2002) 19

**cAMP**

Study of solvent effects on the acid-base behaviour of adenine, adenosine 3',5'-cyclic monophosphate and poly(adenylic) acid in acetonitrile-water mixtures using hard-modelling and soft-modelling approaches, 471 (2002) 145

**Canarian wines**

Analysis and comparison of SIMCA models for denominations of origin of wines from de Canary Islands (Spain) builds by means of their trace and ultratrace metals content, 472 (2002) 161

**Cancer**

Application of probabilistic neural network in the clinical diagnosis of cancers based on clinical chemistry data, 471 (2002) 77

**Capacitance immunosensor**

Capacitive immunosensor for transferrin based on an *o*-aminobenzenethiol oligomer layer, 458 (2002) 297

**Capillary array electrophoresis**

Integrated circuit microchip system with multiplex capillary electrophoresis module for DNA analysis, 466 (2002) 187

**Capillary column**

Protein A immobilized monolithic capillary column for affinity chromatography, 466 (2002) 141

**Capillary electrophoresis**

Study of the white-rot fungal degradation of selected phthalocyanine dyes by capillary electrophoresis and liquid chromatography, 451 (2002) 259

Combination of flow injection with capillary electrophoresis. 8. Miniaturized capillary electrophoresis system with flow injection sample introduction and electrogenerated chemiluminescence detection, 456 (2002) 167

Development of a tetramethylrhodamine-labeled probe for a capillary electrophoresis-based competitive immunoassay of staphylococcal enterotoxin B, 457 (2002) 21

Separation of six purine bases by capillary electrophoresis with electrochemical detection, 457 (2002) 225

Study of uptake kinetics of vincristine for human erythrocytes by capillary zone electrophoresis with electrochemical detection, 461 (2002) 117

Separation and determination of homovanillic acid and vanillyl-mandelic acid by capillary electrophoresis with electrochemical detection, 461 (2002) 123

On-line pre-concentration of atrazine by antibody immobilization capillary electrophoresis, 464 (2002) 25

Determination of  $pK_a$  values of quinolones from mobility and spectroscopic data obtained by capillary electrophoresis and a diode array detector, 464 (2002) 37

Single-run capillary electrophoretic speciation of iodide and iodine, 466 (2002) 133

Sensitive capillary electrophoresis microchip determination of trinitroaromatic explosives in nonaqueous electrolyte following solid phase extraction, 469 (2002) 253

Inverse-flow derivatization for capillary electrophoresis of DNA fragments with laser-induced fluorescence detection, 470 (2002) 129

Capillary electrophoresis with electrochemiluminescence detection of procyclidine in human urine pretreated by ion-exchange cartridge, 470 (2002) 137

**Capillary liquid chromatography**

Determination of chlorophenoxy acid herbicides and their esters in soil by capillary high performance liquid chromatography with ultraviolet detection, using large volume injection and temperature gradient, 470 (2002) 147

**Capillary zone electrophoresis**

Artificial neural networks for quantification in unresolved capillary electrophoresis peaks, 452 (2002) 47

Determination of purines and pyrimidines in beer samples by capillary zone electrophoresis, 454 (2002) 185

Fast determination of flavonoids in *Glycyrrhiza radix* by capillary zone electrophoresis, 458 (2002) 345

Prediction of the separation of phenols by capillary zone electrophoresis, 458 (2002) 355

Quantification of noradrenaline and dopamine in *Portulaca oleracea* L. by capillary electrophoresis with laser-induced fluorescence detection, 471 (2002) 203

**Captopril**

Sensitive determination of captopril by flow injection analysis with chemiluminescence detection based on the enhancement of the luminol reaction, 463 (2002) 249

**Carazolol**

Determination of carazolol residues in porcine tissue by radio-receptor assay, 462 (2002) 149

**Carbofuran**

Comparative evaluation of the effects of pesticides in acute toxicity luminescence bioassays, 451 (2002) 195

**Carbohydrate recognition**

Carbohydrate recognition: a nascent technology for the detection of bioanalyses, 457 (2002) 39

**Carbon-13**

Stable isotope analysis of fatty acids by gas chromatography-isotope ratio mass spectrometry, 465 (2002) 63

**Carbon based electrodes**

Electrooxidation of pimozone and its differential pulse voltammetric and HPLC-EC determination, 453 (2002) 221

**Carbon dioxide**

Reducing the interference from  $CO_2$  or organic acids in ion-selective polymer membrane sensors having a field-effect transistor as internal reference element, 464 (2002) 79

**Carbon electrode**

Electrochemical reduction and oxidation of the antibiotic cefepime at a carbon electrode, 457 (2002) 265

Electrochemical enzyme-linked immunoassay in a DNA hybridization sensor, 469 (2002) 73

**Carbon fiber**

Solid-state pH nanoelectrode based on polyaniline thin film electrodeposited onto ion-beam etched carbon fiber, 452 (2002) 1

**Carbon monoxide**

Determination of carbon monoxide in ambient air using piezoelectric crystal sorption detection, 456 (2002) 227

**Carbon paste electrodes**

All-solid-state electronic tongue and its application for beverage analysis, 468 (2002) 303

**Carboxyazo- $p$ - $CH_3$** 

Direct spectrophotometric determination of calcium in clinical samples with carboxyazo- $p$ - $CH_3$ , 452 (2002) 303

**Carboxypeptidase activity**

Biosensor analysis of penicillin G in milk based on the inhibition of carboxypeptidase activity, 468 (2002) 153

**Caro's reaction**

Methylene blue potentiometric sensor for selective determination of sulfide ions, 466 (2002) 47

**$\beta$ -Carotene**

Simultaneous sample preparation for high-performance liquid chromatographic determination of Vitamin A and  $\beta$ -carotene in emulsified nutritional supplements after solid-phase extraction, 463 (2002) 21

**Carotenoids**

Biogenesis of  $C_{11}$ -norisoprenoid compounds: experiments supportive for an apo-carotenoid pathway in grapevines, 458 (2002) 3

**Catalysis**

Flow-injection determination of chromium(III) by its catalysis on the oxidative coupling of 3-methyl-2-benzothiazolinone hydrazone with *N*-ethyl-*N*-(2-hydroxy-3-sulfoethyl)-3-methoxyaniline, 474 (2002) 167

**Catalytic**

Application of generalized artificial neural networks coupled with an orthogonal design to optimization of a system for the kinetic spectrophotometric determination of Hg(II), 469 (2002) 303

**Catalytic methods**

Spectrophotometric catalytic determination of Fe(III) in estuarine waters using a flow-batch system, 455 (2002) 43

**Catalytic spectrofluorimetry**

Highly sensitive spectrofluorimetric kinetic determination of ultra-trace amounts of vanadium(V) based on the oxidation of 1,8-diaminonaphthalene by bromate, 455 (2002) 159

**Catalytic spectrophotometry**

Studies on catalytic spectrophotometry using  $\beta$ -cyclodextrin polymer-Schiff base metal complex as mimetic enzyme, 459 (2002) 83

**Catechin**

Chemiluminescence assay for catechin based on generation of hydrogen peroxide in basic solution, 472 (2002) 75

**Catechol biosensors**

Glassy carbon paste electrodes modified with polyphenol oxidase. Analytical applications, 459 (2002) 43

**Catecholamine**

Post-column terbium complexation and sensitized fluorescence detection for the determination of norepinephrine, epinephrine and dopamine using high-performance liquid chromatography, 462 (2002) 179

Quantifying catecholamines using multi-way kinetic modelling, 475 (2003) 137

**Cationic form**

Lipophilic derivative of rhodamine 19: characterization and spectroscopic properties, 468 (2002) 13

**Cationic surfactant (CS)**

Flow injection determination of cationic surfactants by using *N*-bromosuccinimide and *N*-chlorosuccinimide as new oxidizing agents for luminol chemiluminescence, 468 (2002) 53

**Cattle**

Ecdysteroids: one potential new anabolic family in breeding animals, 473 (2002) 89

**Cattle urine**

Influence of the storage conditions on the concentration of clenbuterol in cattle urine samples, 452 (2002) 115

**Cavity spectrometer**

Quantitative millimetre wavelength spectrometry at pressures approaching atmospheric. Part I. Absolute determination of transition line strengths and sample concentrations with a confocal Fabry-Perot cavity spectrometer, 466 (2002) 57

**CBD**

Determination of primary active constituents in *Cannabis* preparations by high-resolution gas chromatography/flame ionization detection and high-performance liquid chromatography/UV detection, 468 (2002) 245

**CBN**

Determination of primary active constituents in *Cannabis* preparations by high-resolution gas chromatography/flame ionization detection and high-performance liquid chromatography/UV detection, 468 (2002) 245

**CCD-diode array detector**

Multi-component analysis by flow injection-diode array detection-spectrophotometry using partial least squares calibration model for simultaneous determination of zinc, cadmium and lead, 461 (2002) 181

**Cd**

Comparison of conventional and fast thermal programme approaches for determination of total and extractable Cd in sediments by electrothermal atomic absorption spectrometry following sequential extraction, 466 (2002) 303

Determination of trace elements in biological materials using tetramethylammonium hydroxide for sample preparation, 470 (2002) 195

**Cd determination**

Cloud point preconcentration and flame atomic absorption spectrometric determination of Cd and Pb in human hair, 470 (2002) 215

**Cd(II) ion**

Application of multivariate curve resolution to the voltammetric study of the complexation of fulvic acids with cadmium(II) ion, 459 (2002) 291

**cDNA microarray**

Cholera toxin-induced modulation of gene expression: elucidation via cDNA microarray for rational cell-based sensor design, 457 (2002) 97

**CdS**

Preparation and application of functionalized nanoparticles of CdS as a fluorescence probe, 468 (2002) 35

**CDTA**

Analysis of copper complex lability using  $^{64}\text{Cu}$ -equilibration techniques and free-ion selective radiotracer extraction, 464 (2002) 141

**Ce anomaly**

Determination of the oxidation state of cerium in rocks by Ce L<sub>III</sub>-edge X-ray absorption near-edge structure spectroscopy, 468 (2002) 345

**Ce(IV)/Ce(III) ratio**

Determination of the oxidation state of cerium in rocks by Ce L<sub>III</sub>-edge X-ray absorption near-edge structure spectroscopy, 468 (2002) 345

**Cefepime**

Electrochemical reduction and oxidation of the antibiotic cefepime at a carbon electrode, 457 (2002) 265

**Cefixime**

Ytterbium(III)-selective membrane electrode based on cefixime, 475 (2003) 59

**Cell immobilization**

Covalent binding of genetically engineered microorganisms to porous glass beads, 470 (2002) 71

**CellSense**

Comparison of three microbial assay procedures for measuring toxicity of chemical compounds: ToxAlert<sup>®</sup> 10, CellSense and Biolog MT2 microplates, 456 (2002) 41

**Cellulose phosphate**

Application of a cellulose phosphate ion exchange membrane as a binding phase in the diffusive gradients in thin films technique for measurement of trace metals, 464 (2002) 331

**Cement paste**

Determination of the sodium monofluorophosphate in a hardened cement paste by ion chromatography, 472 (2002) 37

**Central composite design**

Highly selective spectrophotometric determination of trace cobalt and development of a reagentless fiber-optic sensor, 467 (2002) 205

**Centrifugal SPLITT**

Assessment of the distribution of pesticides on soil particle fractions in simulated irrigation run-off using centrifugal SPLITT fractionation and ELISA, 468 (2002) 199

**Ceramic carbon electrode**

Bienzymatic amperometric biosensor for glucose based on polypyrrole/ceramic carbon as electrode material, 451 (2002) 251  
Screen-printable sol-gel ceramic carbon composite pH sensor with a receptor zeolite, 455 (2002) 53

**Ceramics**

Assessment of dissolution techniques for the analysis of ceramic samples by plasma spectrometry, 474 (2002) 177

**Cerenkov**

Mixed waste reduction in radioactivity determination by using plastic scintillators, 463 (2002) 125  
Comparative study of quenching correction procedures for <sup>90</sup>Sr/<sup>90</sup>Y determination by Cerenkov, liquid scintillation and plastic scintillation techniques, 471 (2002) 135

**Cerium(IV)**

Flow-injection chemiluminescence determination of ascorbic acid by use of the cerium(IV)-Rhodamine B system, 464 (2002) 289

**Cetyltrimethylammonium chloride monomers**

Multisyringe flow injection spectrofluorimetric determination of warfarin at trace levels with on-line solid-phase preconcentration, 467 (2002) 13

**Chasing zones**

Rapid spectrophotometric determination of fosfestrol following on-line hydrolysis by alkaline phosphatase using flow injection and chasing zones, 462 (2002) 119

**Chelate extraction**

Sulfonamide-type di-Schiff base ligands as chelate extraction reagents for divalent metal cations, 466 (2002) 295

**Chelating matrix**

Silica gel functionalized with resacetophenone: synthesis of a new chelating matrix and its application as metal ion collector for their flame atomic absorption spectrometric determination, 454 (2002) 229

**Chelating resin**

Determination of vanadium, molybdenum and tungsten in complex matrix samples by chelation ion chromatography and on-line detection with inductively coupled plasma mass spectrometry, 466 (2002) 161

**Chelation ion chromatography**

Determination of vanadium, molybdenum and tungsten in complex matrix samples by chelation ion chromatography and on-line detection with inductively coupled plasma mass spectrometry, 466 (2002) 161

**Chelatometric titrations**

pH-stat techniques in titrimetric analysis. Part 3. The principles of pH-stat chelatometric titrations, 456 (2002) 313

pH-stat techniques in titrimetric analysis. IV. pH-stat monitoring of chelatometric titrations, 470 (2002) 277

**Chelex-100**

Use of the diffusion gradient thin film method to measure trace metals in fresh waters at low ionic strength, 456 (2002) 241

**CHEMFET**

Reducing the interference from CO<sub>2</sub> or organic acids in ion-selective polymer membrane sensors having a field-effect transistor as internal reference element, 464 (2002) 79

**Chemical analysis**

Can plasma spectrochemistry assist in improving the accuracy of chemical analysis?, 456 (2002) 63

**Chemical imaging**

Dual lifetime referenced optical sensor membrane for the determination of copper(II) ions, 462 (2002) 1

**Chemical interferences**

Study of chemical and spectral interferences in the simultaneous determination of As, Bi, Sb, Se and Sn by hydride generation

inductively coupled plasma atomic emission spectrometry, 468 (2002) 71

#### Chemical labeling

High throughput drug screening by direct RNA profiling on DNA sensors, 469 (2002) 141

#### Chemical residues

An odyssey—meeting European Union analytical criteria for residues from afar: experiences from North America, 473 (2002) 49

#### Chemical sensor

Starch-iodine films respond to water vapor, 455 (2002) 49

Determination of carbon monoxide in ambient air using piezo-electric crystal sorption detection, 456 (2002) 227

Cross-sensitive chemical sensors based on tetraphenylporphyrin and phthalocyanine, 457 (2002) 297

Solvent effect on the complex formation of distally dialkylated calix[4]arenes with 1-chloro-4-(trifluoromethyl)benzene, 461 (2002) 273

#### Chemically bonded phases

Gas chromatography silica packings with chemically bonded complexes of Cu(II) and Cr(III), 451 (2002) 271

#### Chemically facilitated Donnan dialysis

Chromium(VI) transport through the Raipore 1030 anion exchange membrane, 464 (2002) 15

#### Chemically modified electrodes

Voltammetric behavior and determination of estrogens at Nafion-modified glassy carbon electrode in the presence of cetyltrimethylammonium bromide, 464 (2002) 209

#### Chemiluminescence (CL)

Chemically induced phosphorescence from manganese(II) during the oxidation of various compounds by manganese(III), (IV) and (VII) in acidic aqueous solutions, 451 (2002) 181

Determination of halogenated hydrocarbons by flow injection ozone chemiluminescence, 451 (2002) 189

Chemiluminescence of luminol induced by dissolution of oxide-covered aluminum in alkaline aqueous solution, 453 (2002) 253

Simple and convenient chemiluminescence method for the determination of melatonin, 455 (2002) 193

Ultrasensitive chemiluminescence detection of aM vanadium(IV) by capillary electrophoresis, 456 (2002) 177

Chemiluminescence multichannel immunosensor for biodetection, 457 (2002) 3

Luminol chemiluminescence reaction: a new method for monitoring nitric oxide in vivo, 458 (2002) 281

Chemiluminescence flow-through sensor for pipemidic acid using solid sodium bismuthate as an oxidant, 459 (2002) 19

Monitoring urea levels during haemodialysis with a pulsed-flow chemiluminescence analyser, 461 (2002) 131

Development of an interference-free chemiluminescence method for monitoring acetylcholine and choline based on immobilized enzymes, 462 (2002) 199

Flow injection-chemiluminescence determination of octyl dimethyl PABA in sunscreen formulations, 462 (2002) 209

Sensitive determination of captopril by flow injection analysis with chemiluminescence detection based on the enhancement of the luminol reaction, 463 (2002) 249

Development of integrated chemiluminescence flow sensor for the determination of adrenaline and isoprenaline, 463 (2002) 257

Investigations of the adulteration of extra virgin olive oils with seed oils using their weak chemiluminescence, 464 (2002) 135

Flow-injection chemiluminescence determination of ascorbic acid by use of the cerium(IV)-Rhodamine B system, 464 (2002) 289

Liquid chromatography of fatty acids with chemiluminescence detection, 465 (2002) 101

Nanosized SrCO<sub>3</sub>-based chemiluminescence sensor for ethanol, 466 (2002) 69

Continuous shipboard determination of Fe(II) in polar waters using flow injection analysis with chemiluminescence detection, 466 (2002) 261

Monitoring reactive oxygen species in vivo using microdialysis sampling and chemiluminescence detection as an alternative global method for determination of total antioxidant capacity, 467 (2002) 133

Novel chemiluminescence method for detection of superoxide anions and its application to dry-cured meat, 467 (2002) 145

Implementation of chemiluminescence detection in the multisyringe flow injection technique, 467 (2002) 155

Application of the luminol chemiluminescence reaction for the determination of nine corticosteroids, 468 (2002) 43

Flow injection determination of cationic surfactants by using *N*-bromosuccinimide and *N*-chlorosuccinimide as new oxidizing agents for luminol chemiluminescence, 468 (2002) 53

Flow-injection chemiluminescence detection for studying protein binding for drug with ultrafiltration sampling, 468 (2002) 65

Optimization and development of a high-performance liquid chromatography-based one-site immunometric assay with chemiluminescence detection, 470 (2002) 37

Chemiluminescence assay for catechin based on generation of hydrogen peroxide in basic solution, 472 (2002) 75

High-performance liquid chromatographic assay of dichlorvos, isocarbophos and methyl parathion from plant leaves using chemiluminescence detection, 474 (2002) 21

Chemiluminescent flow-injection analysis of nitrates in water using on-line ultraviolet photolysis, 474 (2002) 99

Flow-injection chemiluminescent determination of nitrite in water based on the formation of peroxynitrite from the reaction of nitrite and hydrogen peroxide, 474 (2002) 107

$\beta$ -Cyclodextrin sensitized chemiluminescence of hemoglobin-hydrogen peroxide-carbonate and its analytical application, 475 (2003) 163

#### Chemisorption film

Optical oxygen sensor based on fluorescence change of pyrene-1-butyric acid chemisorption film on an anodic oxidation aluminium plate, 471 (2002) 25

#### Chemometrics

Comparison of various chemometric evaluation approaches for on-line FT-NIR transmission and FT-MIR/ATR spectroscopic data of methyl methacrylate solution polymerization, 452 (2002) 265

- Clustering with dendrograms on interpretation variables, 454 (2002) 13
- Classification of metal ions according to their complexing properties: a data-driven approach, 455 (2002) 131
- Use of modern nuclear magnetic resonance spectroscopy in wine analysis: determination of minor compounds, 458 (2002) 77
- Application of factor analysis for resolving thermogravimetric-mass spectrometric analysis spectra, 461 (2002) 215
- Chemotaxonomy**
- Development of fatty acid analysis by high-performance liquid chromatography, gas chromatography, and related techniques, 465 (2002) 1
- Chestnut wood**
- Aroma profile of Portuguese brandies aged in chestnut and oak woods, 458 (2002) 55
- Chinese gall**
- Spectrofluorimetric determination of tannins based on their activating effect on the Cu(II) catalytic oxidation of rhodamine 6G by hydrogen peroxide, 455 (2002) 187
- Chinese medicinal materials**
- Analysis and leaching characteristics of mercury and arsenic in Chinese medicinal material, 453 (2002) 311
- Chiral capillary electrophoresis**
- Enantiomeric analysis of methotrexate in pharmaceuticals by cyclodextrin-modified capillary electrophoresis, 471 (2002) 211
- Chiral discrimination**
- Chiral discrimination of dansyl-amino-acid enantiomers on teicoplanin phase: sucrose-perchlorate anion dependence, 457 (2002) 149
- Chiral recognition**
- Enantioselective polymer prepared by surface imprinting technique using a bifunctional molecule, 469 (2002) 173
- Chirality**
- Chromatographic analysis of lipoxygenase products, 465 (2002) 319
- Chitosan**
- High-performance liquid chromatographic determination of neutraceuticals, glucosamine sulphate and chitosan, in raw materials and dosage forms, 462 (2002) 125
- Chloramphenicol**
- Voltammetric determination of chloramphenicol in milk at electrochemically activated carbon fibre microelectrodes, 461 (2002) 65
- Chlordimeform**
- Determination of amitraz and other acaricide residues in beeswax, 475 (2003) 97
- Chlorfenvinphos**
- Determination of amitraz and other acaricide residues in beeswax, 475 (2003) 97
- Chloride**
- Simultaneous coulometric determination of iodide, bromide and chloride in a mixture by automated coupling of constant current chronopotentiometry and square wave voltammetry, 464 (2002) 115
- Determination of chloride by multisyringe flow injection analysis and sequential injection analysis with potentiometric detection, 467 (2002) 25
- Chloride sensor**
- All-solid-state planar miniature ion-selective chloride electrode, 451 (2002) 243
- Chlorinated aliphatic hydrocarbons (CAHs)**
- Chlorine stable isotope measurements of chlorinated aliphatic hydrocarbons by thermal ionization mass spectrometry, 455 (2002) 1
- Chlorine**
- Chlorine stable isotope measurements of chlorinated aliphatic hydrocarbons by thermal ionization mass spectrometry, 455 (2002) 1
- Spectrophotometric analysis of iodide oxidation by chlorine in highly mineralized solutions, 456 (2002) 105
- Chlorophenol**
- Indirect competitive immunoassay for trichlorophenol determination. Rational evaluation of the competitor heterology effect, 452 (2002) 191
- Chlorophenoxy acid and esters**
- Determination of chlorophenoxy acid herbicides and their esters in soil by capillary high performance liquid chromatography with ultraviolet detection, using large volume injection and temperature gradient, 470 (2002) 147
- Chlorpromazine hydrochloride**
- Investigation of a liquid-liquid extraction system based on non-ionic surfactant-salt-H<sub>2</sub>O and mechanism of drug extraction, 452 (2002) 321
- Chlorsulfuron**
- Development of a rapid, specific fluorescence polarization immunoassay for the herbicide chlorsulfuron, 468 (2002) 229
- Cholera**
- Cholera toxin-induced modulation of gene expression: elucidation via cDNA microarray for rational cell-based sensor design, 457 (2002) 97
- Choline**
- Development of an interference-free chemiluminescence method for monitoring acetylcholine and choline based on immobilized enzymes, 462 (2002) 199
- Chromatographic immunoassay**
- Optimization and development of a high-performance liquid chromatography-based one-site immunometric assay with chemiluminescence detection, 470 (2002) 37
- Chromatography**
- Prediction of human serum albumin-drug binding affinity without albumin, 454 (2002) 101

Rank annihilation correction for the amendment of instrumental inconsistencies, 464 (2002) 249

Application of the luminol chemiluminescence reaction for the determination of nine corticosteroids, 468 (2002) 43

#### **Chromatography-mass spectrometry**

Comparison of wine aromas with different tannic content aged in French oak barrels, 458 (2002) 139

#### **Chromium**

Simultaneous determination of chromium(VI) and chromium(III) at trace levels by adsorptive stripping voltammetry, 470 (2002) 241

Speciation of chromium(III) and chromium(VI) by in situ separation and sequential determination with electrothermal vaporization inductively coupled plasma atomic emission spectrometry, 471 (2002) 121

Extraction and preconcentration of Cr(VI) from urine using supported liquid membrane, 474 (2002) 59

#### **Chromium (VI)**

Chromium(VI) transport through the Raipore 1030 anion exchange membrane, 464 (2002) 15

Liquid-supported membranes in chromium(VI) optical sensing: transport modelling, 464 (2002) 197

Multi-pumping in flow analysis: concepts, instrumentation, potentialities, 466 (2002) 125

#### **Chromium(III) and total chromium determination**

Flow-injection determination of chromium(III) by its catalysis on the oxidative coupling of 3-methyl-2-benzothiazolinone hydrazone with *N*-ethyl-*N*-(2-hydroxy-3-sulfoethyl)-3-methoxyaniline, 474 (2002) 167

#### **Chromoionophore**

Optical test strip for calcium determination based on a neutral ionophore, 451 (2002) 231

#### **Chronocoulometry**

Chronocoulometric flow-injection analysis with solvent polymeric membrane ion sensors, 459 (2002) 11

#### ***Cimicifuga racemosa***

High-performance liquid chromatographic analysis of Black Cohosh (*Cimicifuga racemosa*) constituents with in-line evaporative light scattering and photodiode array detection, 471 (2002) 61

#### **(-)-Cinchonidine**

Molecular imprinting in alcohols: utility of a pre-polymer based strategy for synthesizing stereoselective artificial receptor polymers in hydrophilic media, 466 (2002) 11

#### **Cinchonine**

Piezoelectric quartz crystal sensors based on ion-pair complexes for the determination of cinchonine in human serum and urine, 454 (2002) 65

#### **Ciprofloxacin**

Determination of the antibacterial enrofloxacin by differential-pulse adsorptive stripping voltammetry, 454 (2002) 83

In vitro study of experimental factors affecting the microdialysis results, 459 (2002) 143

Simultaneous determination of levofloxacin and ciprofloxacin in microdialysates and plasma by high-performance liquid chromatography, 463 (2002) 199

#### ***Cis-β-carotene***

Ultrasensitive assays of *trans*- and *cis*-β-carotenes in vegetable oils by high-performance liquid chromatography-thermal lens detection, 460 (2002) 193

#### ***cis-trans*-Isomers equilibrium**

Structural and thermodynamic investigations of metabolites of the thromboxane synthase pathway, 465 (2002) 441

#### **Citrate selective electrodes**

Citrate selective electrodes for the flow injection analysis of soft drinks, beers and pharmaceutical products, 471 (2002) 41

#### **CLA**

Chromatographic separation and identification of conjugated linoleic acid isomers, 465 (2002) 207

#### **Classification**

Multivariate classification of rosé wines from different Spanish protected designations of origin, 458 (2002) 187

Chemometrics characterisation of the quality of river water, 462 (2002) 87

Application of probabilistic neural network in the clinical diagnosis of cancers based on clinical chemistry data, 471 (2002) 77

#### **Classification methods**

Wheat lipids to discriminate species, varieties, geographical origins and crop years, 454 (2002) 315

#### **Clavulanic acid**

Comparative study of net analyte signal-based methods and partial least squares for the simultaneous determination of amoxycillin and clavulanic acid by stopped-flow kinetic analysis, 463 (2002) 75

#### **Cleaning validation**

Cleaning validation in the toiletries industry, 467 (2002) 261

#### **Clenbuterol**

Influence of the storage conditions on the concentration of clenbuterol in cattle urine samples, 452 (2002) 115

#### **Clinical analysis**

Piezoelectric quartz crystal sensors based on ion-pair complexes for the determination of cinchonine in human serum and urine, 454 (2002) 65

#### **Clinical samples**

Direct spectrophotometric determination of calcium in clinical samples with carboxyazo-*p*-CH<sub>3</sub>, 452 (2002) 303

#### **Clomipramine**

Automated spectrophotometric determination of clomipramine on a multicommutated flow system, 467 (2002) 75

***Clostridium acetobutylicum***

Application of quantitative IR spectral analysis of bacterial cells to acetone-butanol-ethanol fermentation monitoring, 471 (2002) 127

**Cloud point extraction**

Micelle mediated methodology for the determination of free and bound iron in wines by flame atomic absorption spectrometry, 458 (2002) 241

Study of high-performance liquid chromatographic separation of selected herbicides by hydro-methanolic and micellar liquid chromatography using Genapol X-080 non-ionic surfactant as mobile phase constituent, 466 (2002) 325

Extraction and preconcentration of polychlorinated dibenzo-*p*-dioxins using the cloud-point methodology. Application to their determination in water samples by high-performance liquid chromatography, 470 (2002) 205

**Cloud point preconcentration**

Cloud point preconcentration and flame atomic absorption spectrometric determination of Cd and Pb in human hair, 470 (2002) 215

**Clozapine**

Simultaneous determination of clozapine, clozapine *N*-oxide, *N*-desmethylclozapine, risperidone, and 9-hydroxyrisperidone in plasma by high performance liquid chromatography with ultra-violet detection, 460 (2002) 201

**Cluster analysis**

Application of multivariate methods to scalp hair metal data to distinguish between drug-free subjects and drug abusers, 455 (2002) 253

Analysis and comparison of SIMCA models for denominations of origin of wines from de Canary Islands (Spain) builds by means of their trace and ultratrace metals content, 472 (2002) 161

**Clustering**

Clustering with dendrograms on interpretation variables, 454 (2002) 13

**CO<sub>2</sub> system**

Spectrophotometric measurement of total inorganic carbon in aqueous solutions using a liquid core waveguide, 451 (2002) 221

**Coal**

Tin determination in marine sediment, soil, coal fly ash and coal slurried samples by hydride generation-electrothermal atomic absorption spectrometry, 461 (2002) 261

Potentiometric determination of fluoride in geological and biological samples following pyrohydrolytic decomposition, 466 (2002) 117

**Coal fly ash**

Tin determination in marine sediment, soil, coal fly ash and coal slurried samples by hydride generation-electrothermal atomic absorption spectrometry, 461 (2002) 261

**Coated graphite**

Novel Ag<sup>+</sup> ion-selective electrodes based on two new mixed azathioether crowns containing a 1,10-phenanthroline sub-unit, 462 (2002) 225

**Cobalt**

Column solid-phase extraction with Chromosorb-102 resin and determination of trace elements in water and sediment samples by flame atomic absorption spectrometry, 452 (2002) 77

Comparative study of 8-hydroxyquinoline derivatives as chelating reagents for flow-injection preconcentration of cobalt in a knotted reactor, 453 (2002) 143

Crucial role of the detection window in metal ion speciation analysis in aquatic systems: the interplay of thermodynamic and kinetic factors as exemplified by nickel and cobalt, 466 (2002) 285

Implementation of chemiluminescence detection in the multisyringe flow injection technique, 467 (2002) 155

Highly selective spectrophotometric determination of trace cobalt and development of a reagentless fiber-optic sensor, 467 (2002) 205

**Cobalt phthalocyanine**

Fabrication of a covalently attached multilayer film electrode containing cobalt phthalocyanine and its application as a potentiometric sensor of iodide ion, 455 (2002) 61

**Cobalt-selective electrode**

Cobalt(II)-selective membrane electrode using a recently synthesized mercapto compound, 462 (2002) 245

**Cocaine**

Development of a screening method for cocaine and cocaine metabolites in saliva using hollow fiber membrane solvent microextraction, 458 (2002) 311

**Cofactor recycling**

Immobilisation of lactate dehydrogenase on poly(aniline)-poly(acrylate) and poly(aniline)-poly(vinyl sulphonate) films for use in a lactate biosensor, 453 (2002) 191

**Coke oven**

Principal component analysis application in polycyclic aromatic hydrocarbons "musse watch" analyses for source identification, 461 (2002) 201

**Cold vapour**

Direct mercury determination in aqueous slurries of environmental and biological samples by cold vapour generation-electrothermal atomic absorption spectrometry, 460 (2002) 111

**Coliform**

Direct selective detection of genomic DNA from coliform using a fiber optic biosensor, 461 (2002) 37

**Colorants**

Automatic screening method for the rapid and simple discrimination between synthetic and natural colorants in foods, 464 (2002) 237

**Colour**

Effect of oxygenation on polyphenol changes occurring in the course of wine-making, 458 (2002) 15

Role of melanoidins in sweet wines, 458 (2002) 169

**Column efficiency**

Separation of polar and non-polar analytes using dimethyl sulfoxide-modified subcritical water, 460 (2002) 185

**Column liquid chromatography**

Chiral discrimination of dansyl-amino-acid enantiomers on teicoplanin phase: sucrose-perchlorate anion dependence, 457 (2002) 149

**Combinatorial chemistry**

Quartz crystal microbalance sensor targeting low molecular weight compounds using oligopeptide binder and peptide-immobilized latex beads, 469 (2002) 183

**Combustion**

Stable isotope analysis of fatty acids by gas chromatography-isotope ratio mass spectrometry, 465 (2002) 63

**Competitive interactions**

Analysis of fatty acids by gas chromatography, and its relevance to research on health and nutrition, 465 (2002) 39

**Complement factor 4**

Enhanced surface plasmon resonance immunoassay for human complement factor 4, 453 (2002) 173

**Complexation**

Influence of pH and metal/carbon ratios on soluble organic complexation of Fe(II), Fe(III) and Al(III) in soil solutions determined by diffusive gradients in thin films, 454 (2002) 259

**Compliance values**

Estimating the uncertainty of binary test results to assess their compliance with regulatory limits, 455 (2002) 267

**Composite electrodes**

Glassy carbon paste electrodes modified with polyphenol oxidase. Analytical applications, 459 (2002) 43

**Conductimetric detection**

Vacancy ion-exclusion chromatography of carboxylic acids on a strongly acidic cation-exchange resin, 474 (2002) 31

**Conducting polymer**

Conducting polymer-based array for the discrimination of odours from trim plastic materials used in automobiles, 455 (2002) 41

**Conductometric biosensor**

Assessment of the toxicity of methyl parathion and its photodegradation products in water samples using conductometric enzyme biosensors, 459 (2002) 33

**Confirmatory methods**

Contribution of European research to anti-microbials and hormones, 473 (2002) 83

**Conformation**

Properties and applications of proteins encapsulated within sol-gel derived materials, 461 (2002) 1

**Conjugated double bonds**

Application of analytical derivatizations to the quantitative and qualitative determination of fatty acids, 465 (2002) 93

**Conjugated linoleic acid**

Chromatographic separation and identification of conjugated linoleic acid isomers, 465 (2002) 207

**Conodont**

Determination of the oxidation state of cerium in rocks by Ce L<sub>III</sub>-edge X-ray absorption near-edge structure spectroscopy, 468 (2002) 345

**Constant current chronopotentiometry**

Simultaneous coulometric determination of iodide, bromide and chloride in a mixture by automated coupling of constant current chronopotentiometry and square wave voltammetry, 464 (2002) 115

**Contaminants**

Contamination of animal feedingstuffs as a cause of residues in food: a review of regulatory aspects, incidence and control, 473 (2002) 3

**Contamination**

Availability of aluminum from glass and an Al form ion exchanger in the presence of complexing agents and amino acids, 459 (2002) 267

**Continuous flow liquid membrane extraction**

Continuous flow liquid membrane extraction: a novel automatic trace-enrichment technique based on continuous flow liquid-liquid extraction combined with supported liquid membrane, 455 (2002) 93

**Continuous flow liquid-liquid extraction**

Continuous flow liquid membrane extraction: a novel automatic trace-enrichment technique based on continuous flow liquid-liquid extraction combined with supported liquid membrane, 455 (2002) 93

**Continuous-flow**

Continuous-flow system for reduction of metal readsorption during sequential extraction of soil, 472 (2002) 147

**Copper**

Column solid-phase extraction with Chromosorb-102 resin and determination of trace elements in water and sediment samples by flame atomic absorption spectrometry, 452 (2002) 77

Fractionation and characterization of fulvic acid by immobilized metal ion affinity chromatography, 452 (2002) 85

Electrochemical and quartz crystal microbalance studies of lead(II) deposition and stripping in the presence of copper on a gold electrode modified with 2,2'-bipyridyl in polyaniline, 455 (2002) 69

Copper(II)-selective electrode based on dithioacetal, 455 (2002) 225

Minimalism approach for determination of Cu, Fe and Zn in serum by simultaneous electrothermal atomic absorption spectrometry, 458 (2002) 321

Flow system with in-line separation/preconcentration coupled to graphite furnace atomic absorption spectrometry with W-Rh permanent modifier for copper determination in seawater, 463 (2002) 275

Application of a cellulose phosphate ion exchange membrane as a binding phase in the diffusive gradients in thin films technique for measurement of trace metals, 464 (2002) 331

**Copper complex lability**

Analysis of copper complex lability using  $^{64}\text{Cu}$ -equilibration techniques and free-ion selective radiotracer extraction, 464 (2002) 141

**Copper determination**

Determination of copper in seawater based on a liquid membrane preconcentration system, 460 (2002) 35

**Copper electrodes**

Amperometric determination of ethanol in beverages at copper electrodes in alkaline medium, 472 (2002) 123

**Copper phthalocyanine**

Development of an enzymeless biosensor for the determination of phenolic compounds, 455 (2002) 215

**Copper(II)**

pH-stat techniques in titrimetric analysis. Part 3. The principles of pH-stat chelatometric titrations, 456 (2002) 313

Dual lifetime referenced optical sensor membrane for the determination of copper(II) ions, 462 (2002) 1

pH-stat techniques in titrimetric analysis. IV. pH-stat monitoring of chelatometric titrations, 470 (2002) 277

**Copper(II) and chromium(III) complexes**

Gas chromatography silica packings with chemically bonded complexes of Cu(II) and Cr(III), 451 (2002) 271

**Coprecipitation**

Determination of some trace metals in water and sediment samples by flame atomic absorption spectrometry after coprecipitation with cerium (IV) hydroxide, 452 (2002) 231

**Correction**

Rank annihilation correction for the amendment of instrumental inconsistencies, 464 (2002) 249

**Correlation optimized warping**

A comparison of two algorithms for warping of analytical signals, 456 (2002) 77

**Corticosteroids**

Direct injection micellar liquid chromatographic method for the analysis of corticosteroids in creams, ointments and other pharmaceuticals, 454 (2002) 125

Development of a tandem thin-layer chromatography-high-performance liquid chromatography method for the identification and determination of corticosteroids in cosmetic products, 457 (2002) 187

Spectrophotometric determination of hydrocortisone, nystatin and oxytetracycline in synthetic and pharmaceutical preparations based on various univariate and multivariate methods, 460 (2002) 85

Application of the luminol chemiluminescence reaction for the determination of nine corticosteroids, 468 (2002) 43

Recent developments in the use and abuse of growth promoters, 473 (2002) 71

**Cortisol measurement**

Development of a non-competitive immunoassay for cortisol and its application to the analysis of saliva, 468 (2002) 315

**Cosmetic products analysis**

Development of a tandem thin-layer chromatography-high-performance liquid chromatography method for the identification and determination of corticosteroids in cosmetic products, 457 (2002) 187

**Coulometry**

Simultaneous coulometric determination of iodide, bromide and chloride in a mixture by automated coupling of constant current chronopotentiometry and square wave voltammetry, 464 (2002) 115

**Countercurrent SFE**

Countercurrent supercritical fluid extraction of phenolic compounds from aqueous matrices, 460 (2002) 1

**Covalent immobilization**

Immobilization of oligonucleotides onto silica nanoparticles for DNA hybridization studies, 470 (2002) 51

**Covalently attached multilayer films**

Fabrication of a covalently attached multilayer film electrode containing cobalt phthalocyanine and its application as a potentiometric sensor of iodide ion, 455 (2002) 61

**CP-HPLC**

Chromatographic analysis of lipoxygenase products, 465 (2002) 319

**Cr**

Determination of trace elements in biological materials using tetramethylammonium hydroxide for sample preparation, 470 (2002) 195

**Cr(III)**

Determination of chromium(III) and chromium(VI) by use of a spectrophotometric sequential injection system, 467 (2002) 51

**Cr(VI)**

Flow injection on-line preconcentration of low levels of Cr(VI) with detection by ETAAS. Comparison of using an open tubular PTFE knotted reactor and a column reactor packed with PTFE beads, 463 (2002) 99

Determination of chromium(III) and chromium(VI) by use of a spectrophotometric sequential injection system, 467 (2002) 51

**Creams**

Development and validation of a new Fourier transform infrared spectrometric method for the quantification of urea in creams and ointments, 451 (2002) 323

Direct injection micellar liquid chromatographic method for the analysis of corticosteroids in creams, ointments and other pharmaceuticals, 454 (2002) 125

**Creatine**

Simultaneous flow-injection assay of creatinine and creatine in serum by the combined use of a 16-way switching valve, some specific enzyme reactors and a highly selective hydrogen peroxide electrode, 462 (2002) 283

**Creatinine**

Comparison of electrochemical, electrophoretic and spectrophotometric methods for creatinine determination in biological fluids, 459 (2002) 187

Amperometric biosensors employing an insoluble oxidant as an interference-removing agent, 461 (2002) 251

Simultaneous flow-injection assay of creatinine and creatine in serum by the combined use of a 16-way switching valve, some specific enzyme reactors and a highly selective hydrogen peroxide electrode, 462 (2002) 283

**Cresol red**

Spectrophotometric pH measurements of freshwater, 453 (2002) 13

**CRLAS**

Aerosol analysis by cavity-ring-down laser spectroscopy, 466 (2002) 1

**CRM 483**

Determination of Al, Cu, Fe, Mn, Pb and Zn in certified reference materials using the optimized BCR sequential extraction procedure, 454 (2002) 249

**CRM 601**

Determination of Al, Cu, Fe, Mn, Pb and Zn in certified reference materials using the optimized BCR sequential extraction procedure, 454 (2002) 249

**Cross-linked poly(vinyl alcohol)**

Stability of new optical pH sensing material based on cross-linked poly(vinyl alcohol) copolymer, 455 (2002) 207

**Cross-sensitivity**

Cross-sensitive chemical sensors based on tetraphenylporphyrin and phthalocyanine, 457 (2002) 297

**Crystal violet**

Resonance Rayleigh scattering, frequency doubling scattering and second-order scattering spectra of the heparin-crystal violet system and their analytical application, 468 (2002) 275

**Crystalline silica**

Direct-on-filter analysis of crystalline silica using photoacoustic Fourier transform-infrared spectroscopy, 457 (2002) 257

**CTAB**

Langmuir aggregation of Evans blue on cetyltrimethylammonium bromide and on proteins and its application, 458 (2002) 417

Voltammetric behavior and determination of estrogens at Nafion-modified glassy carbon electrode in the presence of cetyltrimethylammonium bromide, 464 (2002) 209

**Cu**

Cold ultrasonic acid extraction of copper, lead and zinc from soil samples, 452 (2002) 143

Determination of trace elements in biological materials using tetramethylammonium hydroxide for sample preparation, 470 (2002) 195

**Cu(II) catalyst**

Optical fibre sensor for hydrogen sulphide monitoring in mouth air, 471 (2002) 13

**Cu<sup>2+</sup>**

Poly(vinyl chloride)-membrane ion-selective bulk optode based on 1,10-dibenzyl-1,10-diaza-18-crown-6 and 1-(2-pyridylazo)-2-naphthol for Cu<sup>2+</sup> and Pb<sup>2+</sup> ions, 464 (2002) 187

**Current transient**

Surface plasmon resonance transients at an electrochemical interface: time resolved measurements using a bicell photodiode, 475 (2003) 47

**Curve resolution**

Application of factor analysis for resolving thermogravimetric-mass spectrometric analysis spectra, 461 (2002) 215

**Curve-fitting**

Variable reduction on electronic tongue data, 452 (2002) 255

**CW 7**

Determination of Al, Cu, Fe, Mn, Pb and Zn in certified reference materials using the optimized BCR sequential extraction procedure, 454 (2002) 249

**Cyanide**

Solvent extraction flow-injection manifold for the simultaneous spectrophotometric determination of free cyanide and thiocyanate ions based upon on-line masking of cyanides by formaldehyde, 452 (2002) 295

**Cyanine**

Near-infrared fluorimetric determination of nucleic acids by shifting the ion-association equilibrium between heptamethylene cyanine and Alcian blue 8GX, 461 (2002) 235

**Cyanine dyes**

A compact long-wavelength fluorescence detection system and its application to flow injection immunoassay, 454 (2002) 31

**Cyclam**

Cobalt(II) and nickel(II) complexes of a cyclam derivative as carriers in iodide-selective electrodes, 459 (2002) 229

**Cyclic voltammetry (CV)**

Electrooxidation of pimozone and its differential pulse voltammetric and HPLC-EC determination, 453 (2002) 221

Electrochemical studies on antioxidants in bovine milk, 474 (2002) 137

 **$\beta$ -Cyclodextrin**

Determination of six components in Rhubarb by cyclodextrin-modified micellar electrokinetic chromatography using a mixed micellar system of sodium cholate and sodium taurocholate, 456 (2002) 183

Effect of small organic molecules on room temperature phosphorescence properties of naphthol ternary inclusion complexes in  $\beta$ -cyclodextrin, 463 (2002) 135

Spectrofluorimetric study of the  $\beta$ -cyclodextrin-dapsone-linear alcohol supramolecular system and determination of dapsone, 469 (2002) 273

$\beta$ -Cyclodextrin sensitized chemiluminescence of hemoglobin-hydrogen peroxide-carbonate and its analytical application, 475 (2003) 163

#### Cyclodextrin

Study on molecular recognition of *para*-aminobenzoic acid species by  $\alpha$ -,  $\beta$ - and hydroxypropyl- $\beta$ -cyclodextrin, 458 (2002) 305

Uptake monitoring of anilines and phenols using modified zeolites, 464 (2002) 1

Differentiating geometrical isomers of retinoids and controlling their photo-isomerization by complexation with cyclodextrins, 468 (2002) 161

Cyclodextrin-porphyrin supramolecular sensitizer for mercury(II) ion, 469 (2002) 285

Frequency doubling scattering and second-order scattering technology as novel methods for the determination of the inclusion constant of procaine hydrochloride to  $\beta$ -cyclodextrin, 472 (2002) 89

Investigation on the inclusion behavior of *neutral red* with  $\beta$ -cyclodextrin, hydroxypropyl- $\beta$ -cyclodextrin and sulfobutyl-ether- $\beta$ -cyclodextrin, 474 (2002) 189

#### $\gamma$ -Cyclodextrin

Blue and red photoluminescence of bicapped [60]fullerene- $\gamma$ -cyclodextrin complex in aqueous solutions, 472 (2002) 83

#### $\beta$ -Cyclodextrin cross-linked polymer

Studies on catalytic spectrophotometry using  $\beta$ -cyclodextrin polymer-Schiff base metal complex as mimetic enzyme, 459 (2002) 83

#### Cymiazole

Determination of amitraz and other acaricide residues in beeswax, 475 (2003) 97

#### Cyromazine

Comparative evaluation of the effects of pesticides in acute toxicity luminescence bioassays, 451 (2002) 195

#### Cysteine

Characterization of metal ion-exchange on modified surfaces of porous carbon, 455 (2002) 233

#### Cytochrome *c*

Superoxide sensor based on cytochrome *c* immobilized on mixed-thiol SAM with a new calibration method, 454 (2002) 53

#### Cytotoxicity

SOS-LUX- and LAC-FLUORO-TEST for the quantification of genotoxic and/or cytotoxic effects of heavy metal salts, 456 (2002) 31

## D

#### 2,4-D

Dry atmospheric deposition and deposition velocities of dicamba, 2,4-dichlorophenoxyacetic acid and  $\gamma$ -1,2,3,4,5,6-hexachlorocyclohexane, 467 (2002) 245

#### Daidzein

Determination of puerarin and daidzein in *Puerariae radix* and its medicinal preparations by micellar electrokinetic capillary chromatography with electrochemical detection, 452 (2002) 123

#### D-Amino acid oxidase

On-line simultaneous determination of *S*- and *R*-perindopril using amperometric biosensors as detectors in flow systems, 467 (2002) 189

#### Dansyl-amino-acid

Chiral discrimination of dansyl-amino-acid enantiomers on teicoplanin phase: sucrose-perchlorate anion dependence, 457 (2002) 149

#### *Daphnia magna*

Comparative evaluation of the effects of pesticides in acute toxicity luminescence bioassays, 451 (2002) 195

Toxicity evaluation of single and mixed antifouling biocides measured with acute toxicity bioassays, 456 (2002) 303

#### Dapsone

Spectrofluorimetric study of the  $\beta$ -cyclodextrin-dapsone-linear alcohol supramolecular system and determination of dapsone, 469 (2002) 273

#### Data mining

Representative subset selection, 468 (2002) 91

#### Data standardization

Standardization methods for handling instrument related signal shift in gas-sensor array measurement data, 472 (2002) 99

#### Database

Database dedicated to information published during the Benelux conferences on hormone and veterinary drug residue analyses, 473 (2002) 53

#### DATAN

Spectrophotometric determination of acidity constants of 4-(2-pyridylazo)resorcinol in binary methanol-water mixtures, 455 (2002) 335

#### DAX/XAD resin

Sorption of aquatic humic matter by DAX-8 and XAD-8 resins. Comparative study using pyrolysis gas chromatography, 471 (2002) 219

#### DBzDA18C6

Poly(vinyl chloride)-membrane ion-selective bulk optode based on 1,10-dibenzyl-1,10-diaza-18-crown-6 and 1-(2-pyridylazo)-2-naphthol for  $\text{Cu}^{2+}$  and  $\text{Pb}^{2+}$  ions, 464 (2002) 187

#### Dendrimer

Reversible affinity interactions of antibody molecules at functionalized dendrimer monolayer: affinity-sensing surface with reusability, 456 (2002) 209

#### Dendrograms

Clustering with dendrograms on interpretation variables, 454 (2002) 13

**Denoise**

Use of wavelet transform to enhance piezoelectric signals for analytical purposes, 456 (2002) 93

**Dental amalgam electrode**

Voltammetry using a dental amalgam electrode for heavy metal monitoring of wines and spirits, 458 (2002) 249

**Deposition velocity**

Dry atmospheric deposition and deposition velocities of dicamba, 2,4-dichlorophenoxyacetic acid and  $\gamma$ -1,2,3,4,5,6-hexachlorocyclohexane, 467 (2002) 245

**Derivative spectrophotometry**

Spectrophotometric determination of hydrocortisone, nystatin and oxytetracycline in synthetic and pharmaceutical preparations based on various univariate and multivariate methods, 460 (2002) 85

**Derivatization**

Ultratrace analysis for *trans,trans*-muconic acid by electrophoretic derivatization and capillary gas chromatography, 455 (2002) 111

**Derivatizing reagent**

*N*-Hydroxysuccinimidyl phenylacetate as a novel derivatizing reagent for aliphatic amines in gas chromatography, 468 (2002) 255

**Desorption**

Systematic studies on adsorption of trace elements Pt, Pd, Au, Se, Te, As, Hg, Sb on thiol cotton fiber, 456 (2002) 147

**Detection**

Rapid and specific detection of bacteria using bioluminescence, 457 (2002) 109

Detection of microcystins with protein phosphatase inhibition assay, high-performance liquid chromatography–UV detection and enzyme-linked immunosorbent assay. Comparison of methods, 466 (2002) 213

Kinetics of the post-column complexation reaction of Cu(II) with *N*-formylmethionyl chemoattractant and chemotactic peptides, 474 (2002) 1

**Detection techniques**

High-performance liquid chromatography of fatty acids in biological samples, 465 (2002) 81

**Determination**

Study of the interaction between terazosin and serum albumin. Synchronous fluorescence determination of terazosin, 452 (2002) 185

Determination of six components in Rhubarb by cyclodextrin-modified micellar electrokinetic chromatography using a mixed micellar system of sodium cholate and sodium taurocholate, 456 (2002) 183

High-performance liquid chromatographic determination of neurochemicals, glucosamine sulphate and chitosan, in raw materials and dosage forms, 462 (2002) 125

**Determination of osmium-modified target DNA**

Electrochemical enzyme-linked immunoassay in a DNA hybridization sensor, 469 (2002) 73

**Determination of oxygen**

Quantitative millimetre wavelength spectrometry at pressures approaching atmospheric. II. Determination of oxygen at atmospheric pressure, 468 (2002) 323

**Dexamethasone**

Use of specific bioluminescent cell lines for the detection of steroid hormone (ant)agonists in meat producing animals, 473 (2002) 119

**DGT**

Influence of pH and metal/carbon ratios on soluble organic complexation of Fe(II), Fe(III) and Al(III) in soil solutions determined by diffusive gradients in thin films, 454 (2002) 259

**DGT method**

Use of the diffusion gradient thin film method to measure trace metals in fresh waters at low ionic strength, 456 (2002) 241

**Di(2-ethylhexyl) phosphoric acid (D2EHPA)**

Kinetic study of *L*-isoleucine transport through a liquid membrane containing di(2-ethylhexyl) phosphoric acid in kerosene, 456 (2002) 157

**Diabetes**

Determination of long-chain fatty acids in heart and skeletal muscle by capillary gas chromatography, 465 (2002) 351

Membrane-immobilized haptoglobin as affinity matrix for a hemoglobin-A1c immunosensor, 470 (2002) 111

**1,8-Diaminonaphthalene**

Highly sensitive spectrofluorimetric kinetic determination of ultra-trace amounts of vanadium(V) based on the oxidation of 1,8-diaminonaphthalene by bromate, 455 (2002) 159

**Diastereomer**

Gas chromatographic separation of *R/S*- $\alpha$ -hydroxy fatty acid esters, 465 (2002) 299

**1,8-dibenzyl-1,3,6,8,10,13-hexaazacyclotetradecane–Ni(II)**

Selective thiocyanate poly(vinyl chloride) membrane based on a 1,8-dibenzyl-1,3,6,8,10,13-hexaazacyclotetradecane–Ni(II) perchlorate, 462 (2002) 25

**4,4'-Dibromobenzophenone**

Determination of amitraz and other acaricide residues in beeswax, 475 (2003) 97

**Dicamba**

Dry atmospheric deposition and deposition velocities of dicamba, 2,4-dichlorophenoxyacetic acid and  $\gamma$ -1,2,3,4,5,6-hexachlorocyclohexane, 467 (2002) 245

**Dichloromethane**

Automated control and optimisation of ion mobility spectrometry responses using a sheath-flow inlet, 463 (2002) 143

**2,6-Dichlorophenolindophenol**

Optical fibre sensor for hydrogen sulphide monitoring in mouth air, 471 (2002) 13

**2,4-Dichlorophenoxyacetic acid**

Reaction cell inductively coupled plasma mass spectrometry-based immunoassay using ferrocene tethered hydroxysuccinimide ester as label for the determination of 2,4-dichlorophenoxyacetic acid, 472 (2002) 55

**Dichlorvos**

High-performance liquid chromatographic assay of dichlorvos, isocarbophos and methyl parathion from plant leaves using chemiluminescence detection, 474 (2002) 21

**Diesel**

Study of diesel fuel contamination by excitation emission matrix spectral subtraction fluorescence, 454 (2002) 209

**Diet**

Stable isotope analysis of fatty acids by gas chromatography–isotope ratio mass spectrometry, 465 (2002) 63

**Diethylaminoethanol**

Potentiometric detection of *N,N'*-diethylaminoethanol and lysosomotropic amino alcohols in cation exchange high-performance liquid chromatography systems, 472 (2002) 11

**Differential pulse anodic stripping voltammetry**

Determination of inorganic antimony species in seawater by differential pulse anodic stripping voltammetry: stability of the trivalent state, 452 (2002) 237

**Differential pulse anodic voltammetry**

Differential pulse voltammetric determination of trace Te(IV) at a poly(3,3'-diaminobenzidine) film modified gold electrode in flow systems, 453 (2002) 209

**Differential pulse cathodic stripping voltammetry**

Differential pulse cathodic stripping voltammetric determination of nanomolar levels of dissolved sulfide applicable to field analysis of groundwater, 459 (2002) 209  
Speciation analysis of selenium using voltammetric techniques, 467 (2002) 167

**Differential pulse stripping voltammetry**

Determination of arsenic in gold samples using matrix exchange differential pulse stripping voltammetry, 453 (2002) 201

**Differential pulse voltammetry**

Electrooxidation of pimozone and its differential pulse voltammetric and HPLC–EC determination, 453 (2002) 221  
Determination of the antibacterial enrofloxacin by differential-pulse adsorptive stripping voltammetry, 454 (2002) 83  
Specific adsorption of halogen anions on hydrous  $\gamma$ -Al<sub>2</sub>O<sub>3</sub>, 470 (2002) 263

**Diffuse reflectance spectrometry**

Determination of gallic acid with 4-nitrobenzenediazonium tetrafluoroborate by diffuse reflectance spectrometry on polyurethane foam, 469 (2002) 295

**Diffusion**

Performance of the diffusive gradients in thin films technique for measuring Ca and Mg in freshwater, 460 (2002) 247

**Diffusion profiles**

Determination of diffusion profiles of silver ions in soda-lime–silica glass by X-ray fluorescence spectrometry, 459 (2002) 305

**Diffusive gradients in thin films**

Performance of the diffusive gradients in thin films technique for measuring Ca and Mg in freshwater, 460 (2002) 247  
Application of a cellulose phosphate ion exchange membrane as a binding phase in the diffusive gradients in thin films technique for measurement of trace metals, 464 (2002) 331

**Diiflubenzuron**

Rapid on-site immunoassay for diiflubenzuron in grains, 468 (2002) 209

**Digestion**

Cold ultrasonic acid extraction of copper, lead and zinc from soil samples, 452 (2002) 143  
Inter-method comparison for the determination of antimony and arsenic in peat samples, 458 (2002) 387

**Dihydromyricetin-3-O-rhamnoside**

Direct liquid chromatographic analysis of resveratrol derivatives and flavanols in wines with absorbance and fluorescence detection, 458 (2002) 103

**Dihydrostreptomycin**

Monoclonal-based enzyme-linked immunosorbent assay and immunochromatographic rapid assay for dihydrostreptomycin in milk, 472 (2002) 45

**Diisopropylamine**

Characterization of polycyclic aromatic hydrocarbons in environmental samples by selective fluorescence quenching, 459 (2002) 61

 **$\beta$ -Diketone**

Effect of 1,10-phenanthroline on the extraction and separation of lithium(I), sodium(I) and potassium(I) with thenoyltrifluoroacetone, 454 (2002) 241

**Dimer**

Lipophilic derivative of rhodamine 19: characterization and spectroscopic properties, 468 (2002) 13

**Dimethylaminopyridine**

Simple and rapid procedure for the determination of individual free fatty acids in serum, 465 (2002) 433

**Dimethylarsinic acid**

Microwave-assisted digestion of organoarsenic compounds for the determination of total arsenic in aqueous, biological, and sediment samples using flow injection hydride generation electrothermal atomic absorption spectrometry, 452 (2002) 207

**Dimethyldiselenide**

Speciation analysis of selenium using voltammetric techniques, 467 (2002) 167

**Dimethyloxazoline**

Chromatographic separation and identification of conjugated linoleic acid isomers, 465 (2002) 207

**Dimethylloxazoline derivatives**

Identification of minor fatty acids in mussels (*Mytilus galloprovincialis*) by GC-MS of their 2-alkenyl-4,4-dimethylloxazoline derivatives, 465 (2002) 409

**2,4-Dinitrophenylhydrazine**

Determination of free formaldehyde in foundry resins as its 2,4-dinitrophenylhydrazone by liquid chromatography, 467 (2002) 97

**Diode array detection**

4-Aminoantipyrine spectrophotometric method of phenol analysis. Study of the reaction products via liquid chromatography with diode-array and mass spectrometric detection, 467 (2002) 105

Simultaneous analysis of six antiepileptic drugs and two selected metabolites in human plasma by liquid chromatography after solid-phase extraction, 472 (2002) 1

**Diode array detector**

Determination of  $pK_a$  values of quinolones from mobility and spectroscopic data obtained by capillary electrophoresis and a diode array detector, 464 (2002) 37

**Dioxins**

Comparison of immunoaffinity column recovery patterns of polychlorinated dibenzo-*p*-dioxins/polychlorinated dibenzofurans on columns generated with different monoclonal antibody clones and polyclonal antibodies, 457 (2002) 199

**1,5-Diphenylcarbazine**

Liquid-supported membranes in chromium(VI) optical sensing: transport modelling, 464 (2002) 197

**Dipicolinate extraction**

Enhanced spore detection using dipicolinate extraction techniques, 455 (2002) 167

**Direct derivatization**

High-performance liquid chromatographic determination of free fatty acids and esterified fatty acids in biological materials as their 2-nitrophenylhydrazides, 465 (2002) 237

**Direct exponential curve resolution algorithm**

Determination of the ethylene oxide content of polyether polyols by low-field  $^1\text{H}$  nuclear magnetic resonance spectrometry, 472 (2002) 133

**Direct injection**

Direct injection micellar liquid chromatographic method for the analysis of corticosteroids in creams, ointments and other pharmaceuticals, 454 (2002) 125

**Direct screening**

Continuous photometric method for the screening of human urines for phenothiazines, 462 (2002) 275

**Direct standardization**

Standardization methods for handling instrument related signal shift in gas-sensor array measurement data, 472 (2002) 99

**Disaccharide sensor**

Integration of bienzymatic disaccharide sensors for simultaneous determination of disaccharides by means of light addressable potentiometric sensor, 471 (2002) 3

**Di-Schiff base**

Sulfonamide-type di-Schiff base ligands as chelate extraction reagents for divalent metal cations, 466 (2002) 295

**Dissociation constant**

Determination of  $pK_a$  values of quinolones from mobility and spectroscopic data obtained by capillary electrophoresis and a diode array detector, 464 (2002) 37

Study of solvent effects on the acid-base behaviour of adenine, adenosine 3',5'-cyclic monophosphate and poly(adenylic) acid in acetonitrile-water mixtures using hard-modelling and soft-modelling approaches, 471 (2002) 145

**Dissolved inorganic carbon**

Spectrophotometric measurement of total inorganic carbon in aqueous solutions using a liquid core waveguide, 451 (2002) 221

**Dissolved iron**

Improved method for shipboard determination of iron in seawater by flow injection analysis, 453 (2002) 21

**Distributed expert systems**

Present and future of expert systems in food analysis, 454 (2002) 1

**Disulfide-coupling**

Immobilization of oligonucleotides onto silica nanoparticles for DNA hybridization studies, 470 (2002) 51

**1,3-Dithiane,2-(4-methoxy phenyl)**

Copper(II)-selective electrode based on dithioacetal, 455 (2002) 225

**Dithione**

Dithione as chelator in the flow injection separation and pre-concentration system of trace metals in biological samples, 451 (2002) 305

**Dithiosquarylium dye**

Surface plasmon resonance study on enhanced refractive index change of an  $\text{Ag}^+$  ion-sensing membrane containing dithiosquarylium dye, 460 (2002) 133

**Dithizone**

Determination of trace levels of mercury in water samples based on room temperature phosphorescence energy transfer, 455 (2002) 179

**Diuretics**

Rapid determination of diuretics in human urine by gas chromatography-mass spectrometry following microwave assisted derivatization, 475 (2003) 125

**Diuron**

Assessment of the distribution of pesticides on soil particle fractions in simulated irrigation run-off using centrifugal SPLITT fractionation and ELISA, 468 (2002) 199

**Divalent metal cations**

Sulfonamide-type di-Schiff base ligands as chelate extraction reagents for divalent metal cations, 466 (2002) 295

**D-Lactate**

Screen-printed biosensors for the control of wine quality based on lactate and acetaldehyde determination, 458 (2002) 203

**DLR**

Dual lifetime referenced optical sensor membrane for the determination of copper(II) ions, 462 (2002) 1

**DMOX**

Chromatographic separation and identification of conjugated linoleic acid isomers, 465 (2002) 207

**DMSO**

Separation of polar and non-polar analytes using dimethyl sulfoxide-modified subcritical water, 460 (2002) 185

**DNA**

Study of the interaction of Azur B with DNA and the determination of DNA based on resonance light scattering measurements, 452 (2002) 285

Towards the optimization of an optical DNA sensor: control of selectivity coefficients and relative surface affinities, 457 (2002) 29

Simultaneous determination of guanine and adenine in DNA using an electrochemically pretreated glassy carbon electrode, 461 (2002) 243

Voltammetric determination of DNA hybridization using methylene blue and self-assembled alkanethiol monolayer on gold electrodes, 462 (2002) 39

Fluorescence microscopic quantification of DNA with  $\alpha, \beta, \gamma, \delta$ -tetrakis[4-(trimethylammonium)phenyl]porphine by a ring-like deposition technique, 466 (2002) 193

Renewable microcolumns for automated DNA purification and flow-through amplification: from sediment samples through polymerase chain reaction, 469 (2002) 129

Tethered thiazole orange intercalating dye for development of fibre-optic nucleic acid biosensors, 470 (2002) 57

**DNA biosensor**

Voltammetric determination of DNA hybridization using methylene blue and self-assembled alkanethiol monolayer on gold electrodes, 462 (2002) 39

Electrochemical nucleic acid biosensors, 469 (2002) 63

**DNA electrophoresis**

Surface modification of polymer-based microfluidic devices, 470 (2002) 87

**DNA fragments**

Inverse-flow derivatization for capillary electrophoresis of DNA fragments with laser-induced fluorescence detection, 470 (2002) 129

**DNA hybridization**

Electrochemical biosensing of DNA hybridization by ferrocenyl groups functionalized polypyrrole, 469 (2002) 85

Electrochemical detection of DNA hybridization based on silver-enhanced gold nanoparticle label, 469 (2002) 165

**DNA hybridization and electrochemical detection on two different surfaces**

Electrochemical enzyme-linked immunoassay in a DNA hybridization sensor, 469 (2002) 73

**DNA immobilization**

Surface-enhanced Raman scattering detection of the breast cancer susceptibility gene *BRCA1* using a silver-coated microarray platform, 469 (2002) 149

**DNA ladder**

Integrated circuit microchip system with multiplex capillary electrophoresis module for DNA analysis, 466 (2002) 187

**DNA separation**

Integrated circuit microchip system with multiplex capillary electrophoresis module for DNA analysis, 466 (2002) 187

**Dns-His-Lys-Arg-His-Lys cleaving enzyme**

Fluorimetric assay for measuring Dns-His-Lys-Arg-His-Lys cleaving enzyme using high-performance liquid chromatography, 457 (2002) 157

**Docosahexaenoic acid**

Stable isotope analysis of fatty acids by gas chromatography-isotope ratio mass spectrometry, 465 (2002) 63

**Dodecylamine**

Enhanced spore detection using dipicolinate extraction techniques, 455 (2002) 167

**DOM**

Influence of pH and metal/carbon ratios on soluble organic complexation of Fe(II), Fe(III) and Al(III) in soil solutions determined by diffusive gradients in thin films, 454 (2002) 259

**Donor groups**

Visible spectrophotometric determination of metal ions: the influence of structure on molar absorptivity value of copper(II) complexes in aqueous solution, 459 (2002) 323

**Dopamine**

Quantification of noradrenaline and dopamine in *Portulaca oleracea* L. by capillary electrophoresis with laser-induced fluorescence detection, 471 (2002) 203

**Doping**

Rapid determination of diuretics in human urine by gas chromatography-mass spectrometry following microwave assisted derivatization, 475 (2003) 125

**Double membrane**

Reducing the interference from CO<sub>2</sub> or organic acids in ion-selective polymer membrane sensors having a field-effect transistor as internal reference element, 464 (2002) 79

**DPASV**

Interactions of Pb(II) with particles of a polluted river, 462 (2002) 73

**Drinking water**

Time-based multisyringe flow injection system for the spectrofluorimetric determination of aluminium, 455 (2002) 149

**Drug**

Study of uptake kinetics of vincristine for human erythrocytes by capillary zone electrophoresis with electrochemical detection, 461 (2002) 117

**Drug screening**

High throughput drug screening by direct RNA profiling on DNA sensors, 469 (2002) 141

**Drug-protein interaction**

Flow-injection chemiluminescence detection for studying protein binding for drug with ultrafiltration sampling, 468 (2002) 65

**Drugs**

Prediction of human serum albumin-drug binding affinity without albumin, 454 (2002) 101

**Dry deposition**

Dry atmospheric deposition and deposition velocities of dicamba, 2,4-dichlorophenoxyacetic acid and  $\gamma$ -1,2,3,4,5,6-hexachlorocyclohexane, 467 (2002) 245

**Dry reagent strips**

Application of time-resolved luminescence to dry reagent chemical technology, 452 (2002) 169

**Dry-cured meat**

Novel chemiluminescence method for detection of superoxide anions and its application to dry-cured meat, 467 (2002) 145

**DTPA**

Analysis of copper complex lability using  $^{64}\text{Cu}$ -equilibration techniques and free-ion selective radiotracer extraction, 464 (2002) 141

**Dual emission**

Ultrasensitive fluorescent probe for the hydrophobic range of solvent polarities, 464 (2002) 273

**Dual lifetime referencing**

Dual lifetime referenced optical sensor membrane for the determination of copper(II) ions, 462 (2002) 1

**Dual-enzyme chip**

Simultaneous detection of uric acid and glucose on a dual-enzyme chip using scanning electrochemical microscopy/scanning chemiluminescence microscopy, 458 (2002) 263

**Durability**

Ion-sensor property and blood compatibility of neutral-carrier-type poly(vinyl chloride) membranes coated by phosphorylcholine polymers, 463 (2002) 31

**Durbin-Watson**

Durbin-Watson statistic as a morphological estimator of information content, 454 (2002) 277

**Dust**

Preconcentration of palladium in a flow-through electrochemical cell for determination by graphite furnace atomic absorption spectrometry, 462 (2002) 305

**Dynamic reaction cell**

Determination of calcium, iron and zinc in milk powder by reaction cell inductively coupled plasma mass spectrometry, 470 (2002) 223

**Dynamic time warping**

A comparison of two algorithms for warping of analytical signals, 456 (2002) 77

**E*****E. coli***

Quantitation of intracellular recombinant human superoxide dismutase using surface plasmon resonance, 456 (2002) 193

Sol-gel luminescence biosensors: Encapsulation of recombinant *E. coli* reporters in thick silicate films, 462 (2002) 11

**EC<sub>50</sub>**

Comparative evaluation of the effects of pesticides in acute toxicity luminescence bioassays, 451 (2002) 195

**Ecdysteroids**

Recent developments in the use and abuse of growth promoters, 473 (2002) 71

Ecdysteroids: one potential new anabolic family in breeding animals, 473 (2002) 89

**Ecdysterone**

Ecdysteroids: one potential new anabolic family in breeding animals, 473 (2002) 89

**Edible oils**

Analysis of fatty acids in foods by supercritical fluid chromatography, 465 (2002) 131

**EDTA**

Heavy metal mobility assessment in sediments based on a kinetic approach of the EDTA extraction: search for optimal experimental conditions, 459 (2002) 245

Analysis of copper complex lability using  $^{64}\text{Cu}$ -equilibration techniques and free-ion selective radiotracer extraction, 464 (2002) 141

**Effective concentration (EC)**

Comparison of three microbial assay procedures for measuring toxicity of chemical compounds: ToxAlert<sup>®</sup> 10, CellSense and Biolog MT2 microplates, 456 (2002) 41

**Efficiency**

Micellar-organic versus aqueous-organic mobile phases for the screening of  $\beta$ -blockers, 454 (2002) 109

**Eggs**

Halofuginone contamination in feeds as a cause of residues in eggs, 473 (2002) 177

**Electric tongue**

Cross-sensitive chemical sensors based on tetraphenylporphyrin and phthalocyanine, 457 (2002) 297

**Electric-field cell orientation**

Determination of organophosphorus aromatic nitro insecticides by using electric-field cell orientation in microbial suspensions, 462 (2002) 165

**Electrocatalysis**

Determination of hydrogen peroxide using glassy carbon and graphite/polyester composite electrodes modified by vanadium-doped zirconias, 452 (2002) 11

Amperometric detection of nitrite and nitrate at tetraethenated porphyrin-modified electrodes in a continuous-flow assembly, 452 (2002) 23

**Electrocatalytic detection**

Amperometric determination of serum lactate dehydrogenase activity using an ADP-modified graphite electrode, 457 (2002) 275

**Electrochemical**

Reversible affinity interactions of antibody molecules at functionalized dendrimer monolayer: affinity-sensing surface with reusability, 456 (2002) 209

Simultaneous detection of uric acid and glucose on a dual-enzyme chip using scanning electrochemical microscopy/scanning chemiluminescence microscopy, 458 (2002) 263

**Electrochemical biosensing**

Electrochemical biosensing of DNA hybridization by ferrocenyl groups functionalized polypyrrole, 469 (2002) 85

**Electrochemical biosensor**

Electrochemical detection of DNA hybridization based on silver-enhanced gold nanoparticle label, 469 (2002) 165

**Electrochemical detection**

Determination of puerarin and daidzein in *Puerariae radix* and its medicinal preparations by micellar electrokinetic capillary chromatography with electrochemical detection, 452 (2002) 123

Separation of six purine bases by capillary electrophoresis with electrochemical detection, 457 (2002) 225

Study of uptake kinetics of vincristine for human erythrocytes by capillary zone electrophoresis with electrochemical detection, 461 (2002) 117

Separation and determination of homovanillic acid and vanillyl-mandelic acid by capillary electrophoresis with electrochemical detection, 461 (2002) 123

New electrochemical detection method in high-performance liquid chromatography for determining free fatty acids, 465 (2002) 199

Simultaneous UV and electrochemical determination of the herbicide asulam in tap water samples by micellar electrokinetic capillary chromatography, 469 (2002) 243

Nickel oxide-modified composite electrode for electrochemical detection of polyhydroxyl compounds in liquid chromatographic analysis, 471 (2002) 195

**Electrochemical DNA biosensor**

Coupling of an indicator-free electrochemical DNA biosensor with polymerase chain reaction for the detection of DNA sequences related to the apolipoprotein E, 469 (2002) 93

**Electrochemical enzyme immunoassay**

Electrochemical enzyme immunoassay using immobilized antibody on gold film with monitoring of surface plasmon resonance signal, 463 (2002) 219

**Electrochemical immunoassay**

Simultaneous and sequential enzyme immunoassays on gold bands with flow electrochemical detection, 453 (2002) 63

**Electrochemical impedance**

In situ monitoring of gold-surface adsorption and acidic denaturation of human serum albumin by an isolation-capacitance-adopted electrochemical quartz crystal impedance system, 464 (2002) 65

**Electrochemical impedance spectroscopy (EIS)**

Physical adsorption of protamine for heparin assay using a quartz crystal microbalance and electrochemical impedance spectroscopy, 462 (2002) 261

**Electrochemical preconcentration**

Preconcentration of palladium in a flow-through electrochemical cell for determination by graphite furnace atomic absorption spectrometry, 462 (2002) 305

**Electrochemical pretreatment**

Simultaneous determination of guanine and adenine in DNA using an electrochemically pretreated glassy carbon electrode, 461 (2002) 243

**Electrochemical sensor for DNA hybridization**

Electrochemical enzyme-linked immunoassay in a DNA hybridization sensor, 469 (2002) 73

**Electrochemical sensors**

All-solid-state electronic tongue and its application for beverage analysis, 468 (2002) 303

**Electrochemically activated carbon fibres**

Voltammetric determination of chloramphenicol in milk at electrochemically activated carbon fibre microelectrodes, 461 (2002) 65

**Electrochemiluminescence (ECL)**

Chemiluminescence of luminol induced by dissolution of oxide-covered aluminum in alkaline aqueous solution, 453 (2002) 253

Ligand and surfactant effects on a novel electrochemiluminescent reaction involving cadmium, 454 (2002) 45

Hot electron-induced electrogenerated chemiluminescence of 1-aminonaphthalene-4-sulphonate at oxide-covered aluminium electrodes in aqueous solution, 454 (2002) 193

Heterogeneous and homogeneous electrochemiluminoimmunoassays of hTSH at disposable oxide-covered aluminum electrodes, 458 (2002) 271

Electrochemiluminescence assay for the detection of acridinium esters, 461 (2002) 141

Capillary electrophoresis with electrochemiluminescence detection of procyclidine in human urine pretreated by ion-exchange cartridge, 470 (2002) 137

Determination of adrenaline by using inhibited  $\text{Ru}(\text{bpy})_3^{2+}$  electrochemiluminescence, 471 (2002) 187

### Electrochemistry

Electrochemical behavior of tryptophan and its derivatives at a glassy carbon electrode modified with hemin, 452 (2002) 245

Electrochemical nucleic acid biosensors, 469 (2002) 63

### Electrode

Electrochemical nucleic acid biosensors, 469 (2002) 63

### Electrodegradation of phenol

Determination of rate constants from two-way kinetic-spectral data by using rank annihilation factor analysis, 454 (2002) 21

### Electrogenerated chemiluminescence

Time-resolved electrochemiluminescence of platinum(II) coporphyrin, 453 (2002) 269

Hot electron-induced electrogenerated chemiluminescence of 1-aminonaphthalene-4-sulphonate at oxide-covered aluminium electrodes in aqueous solution, 454 (2002) 193

Combination of flow injection with capillary electrophoresis. 8. Miniaturized capillary electrophoresis system with flow injection sample introduction and electrogenerated chemiluminescence detection, 456 (2002) 167

Heterogeneous and homogeneous electrochemiluminoimmunoassays of hTSH at disposable oxide-covered aluminum electrodes, 458 (2002) 271

Determination of sophoridine and related lupin alkaloids using  $\text{tris}(2,2'\text{-bipyridine})\text{ruthenium}$  electrogenerated chemiluminescence, 466 (2002) 79

Determination of  $\beta$ -blockers in pharmaceutical preparations and human urine by high-performance liquid chromatography with  $\text{tris}(2,2'\text{-bipyridyl})\text{ruthenium(II)}$  electrogenerated chemiluminescence detection, 471 (2002) 51

### Electroless gold deposition

Evaluation of electroless gold deposited on porous silica for ligand attachment for metal ion-exchange, 454 (2002) 37

### Electron paramagnetic resonance

Electron paramagnetic resonance spin label titration: a novel method to investigate random and site-specific immobilization of enzymes onto polymeric membranes with different properties, 470 (2002) 29

### Electron probe X-ray microanalysis

Investigation on the geometric and matrix effects and quantitative determination of K, Cl and S atomic fraction for biomass burning particles by Monte Carlo simulation, 459 (2002) 93

### Electronic nose

Conducting polymer-based array for the discrimination of odours from trim plastic materials used in automobiles, 455 (2002) 41

Outer product analysis of electronic nose and visible spectra: application to the measurement of peach fruit characteristics, 459 (2002) 107

### Electronic olfactometry

Electronic nose based on metal oxide semiconductor sensors as a fast alternative for the detection of adulteration of virgin olive oils, 459 (2002) 219

### Electronic tongue

Variable reduction on electronic tongue data, 452 (2002) 255

Flow injection analysis applied to a voltammetric electronic tongue, 471 (2002) 159

### Electrophoresis

Ultrasensitive chemiluminescence detection of aM vanadium(IV) by capillary electrophoresis, 456 (2002) 177

Analytical methods for the characterization of proteins and peptides in wines, 458 (2002) 63

### Electroplating solutions

Spectrophotometric determination of metal ions in electroplating solutions in the presence of EDTA with the aid of multivariate calibration and artificial neural networks, 463 (2002) 305

### Electropolymerization

Electrochemical behavior of tryptophan and its derivatives at a glassy carbon electrode modified with hemin, 452 (2002) 245

### Electrospray

Separation of benzodiazepines by electrospray ionization ion mobility spectrometry-mass spectrometry, 457 (2002) 235

Chromatographic analysis of lipoxygenase products, 465 (2002) 319

Screening and confirmatory strategies for the surveillance of anabolic steroid abuse within Northern Ireland, 473 (2002) 99

### Electrostatic film assembly

Characterization of oxidoreductase-redox polymer electrostatic film assembly on gold by surface plasmon resonance spectroscopy and Fourier transform infrared-external reflection spectroscopy, 466 (2002) 201

### Electrothermal

Speciation of chromium(III) and chromium(VI) by in situ separation and sequential determination with electrothermal vaporization inductively coupled plasma atomic emission spectrometry, 471 (2002) 121

### Electrothermal atomic absorption spectrometry

Microwave-assisted digestion of organoarsenic compounds for the determination of total arsenic in aqueous, biological, and sediment samples using flow injection hydride generation electrothermal atomic absorption spectrometry, 452 (2002) 207

Comparative study of 8-hydroxyquinoline derivatives as chelating reagents for flow-injection preconcentration of cobalt in a knotted reactor, 453 (2002) 143

Development of an automated sequential injection on-line solvent extraction-back extraction procedure as demonstrated for the

- determination of cadmium with detection by electrothermal atomic absorption spectrometry, 456 (2002) 283
- Minimalism approach for determination of Cu, Fe and Zn in serum by simultaneous electrothermal atomic absorption spectrometry, 458 (2002) 321
- Flow system with in-line separation/preconcentration coupled to graphite furnace atomic absorption spectrometry with W-Rh permanent modifier for copper determination in seawater, 463 (2002) 275
- Direct determination of aluminium in serum and urine by electrothermal atomic absorption spectrometry using ruthenium as permanent modifier, 464 (2002) 323
- Determination of trace elements in biological materials using tetramethylammonium hydroxide for sample preparation, 470 (2002) 195

#### Electrothermal atomisation

- Direct mercury determination in aqueous slurries of environmental and biological samples by cold vapour generation-electrothermal atomic absorption spectrometry, 460 (2002) 111
- Tin determination in marine sediment, soil, coal fly ash and coal slurried samples by hydride generation-electrothermal atomic absorption spectrometry, 461 (2002) 261

#### Electrothermal-AAS

- Ultrasonic extraction combined with fast furnace analysis as an improved methodology for total selenium determination in seafood by electrothermal-atomic absorption spectrometry, 452 (2002) 217

#### ELISA

- Development of an enzyme-linked immunosorbent assay for pentachlorophenol, 460 (2002) 279
- Relative performance of immunochemical (enzyme-linked immunosorbent assay) and gas chromatography-electron-capture detection techniques to quantify polychlorinated biphenyls in mussel tissues, 461 (2002) 75
- Quantification of hemorphin-7 peptides by enzyme linked immunosorbent assay with secondary antibody, 461 (2002) 229
- Flow amperometric detection of indigo for enzyme-linked immunosorbent assays with use of screen-printed electrodes, 462 (2002) 31
- Enzyme-linked immunosorbent assay for the determination of 20(S)-protopanaxatriol, 462 (2002) 157
- On-line pre-concentration of atrazine by antibody immobilization capillary electrophoresis, 464 (2002) 25
- Detection of microcystins with protein phosphatase inhibition assay, high-performance liquid chromatography-UV detection and enzyme-linked immunosorbent assay. Comparison of methods, 466 (2002) 213
- Monoclonal-based enzyme-linked immunosorbent assay and immuno-chromatographic rapid assay for dihydrostreptomycin in milk, 472 (2002) 45
- Synthesis of haptens for immunoassay of organophosphorus pesticides and effect of heterology in hapten spacer arm length on immunoassay sensitivity, 475 (2003) 85

- Evaluation of a field-test kit for triazine herbicides (SensioScreen<sup>®</sup> TR500) as a fast assay to detect pesticide contamination in water samples, 475 (2003) 105

#### ELSD

- High-performance liquid chromatographic analysis of Black Cohosh (*Cimicifuga racemosa*) constituents with in-line evaporative light scattering and photodiode array detection, 471 (2002) 61

#### Elution strength

- Micellar-organic versus aqueous-organic mobile phases for the screening of  $\beta$ -blockers, 454 (2002) 109
- Separation of polar and non-polar analytes using dimethyl sulfoxide-modified subcritical water, 460 (2002) 185

#### Emulsified food analysis

- Simultaneous sample preparation for high-performance liquid chromatographic determination of Vitamin A and  $\beta$ -carotene in emulsified nutritional supplements after solid-phase extraction, 463 (2002) 21

#### Emulsion

- Enantioselective polymer prepared by surface imprinting technique using a bifunctional molecule, 469 (2002) 173

#### Enantiomer

- Gas chromatographic separation of *R/S*- $\alpha$ -hydroxy fatty acid esters, 465 (2002) 299

#### Enantioselective

- Quantification of methylphenidate in rat, rabbit and dog plasma using a chiral liquid-chromatography/tandem mass spectrometry method. Application to toxicokinetic studies, 469 (2002) 261

#### Enantioselective flow-through immunosensor

- Enantioselective sequential-injection chemiluminescence immunoassays for 3,3',5-triiodothyronine ( $T_3$ ) and thyroxine ( $T_4$ ), 463 (2002) 5

#### Enantioselective sequential-injection immunoassay

- Enantioselective sequential-injection chemiluminescence immunoassays for 3,3',5-triiodothyronine ( $T_3$ ) and thyroxine ( $T_4$ ), 463 (2002) 5

#### Endocrine disrupting chemicals (EDCs)

- Fully automated immunoassay system of endocrine disrupting chemicals using monoclonal antibodies chemically conjugated to bacterial magnetic particles, 475 (2003) 75

#### Endocrine disruption

- Alternative to vertebrate animal experiments in the study of metabolism of illegal growth promoters and veterinary drugs, 473 (2002) 59

#### Endocrine disruptor

- Sex hormones originating from different livestock production systems: fate and potential disrupting activity in the environment, 473 (2002) 27
- Contribution of European research to endocrine disruptors, 473 (2002) 161

**Endospore detection**

Enhanced spore detection using dipicolinate extraction techniques, 455 (2002) 167

**Endosulfan**

Assessment of the distribution of pesticides on soil particle fractions in simulated irrigation run-off using centrifugal SPLITT fractionation and ELISA, 468 (2002) 199

**Energy transfer**

Determination of trace levels of mercury in water samples based on room temperature phosphorescence energy transfer, 455 (2002) 179

**Enhanced chemiluminescence**

Development of a heterogeneous chemiluminescent flow immunoassay for DDT and related compounds, 453 (2002) 43

**Enhanced immunoassay**

Enhanced surface plasmon resonance immunoassay for human complement factor 4, 453 (2002) 173

**Enrichment**

Stable isotope analysis of fatty acids by gas chromatography–isotope ratio mass spectrometry, 465 (2002) 63

**Enrofloxacin**

Determination of the antibacterial enrofloxacin by differential-pulse adsorptive stripping voltammetry, 454 (2002) 83

**Enterotoxin**

Cholera toxin-induced modulation of gene expression: elucidation via cDNA microarray for rational cell-based sensor design, 457 (2002) 97

**Entrapment**

Entrapment of glucose oxidase in non-porous poly(vinyl chloride), 461 (2002) 57

**Environmental**

Quartz crystal microbalance determination of organophosphorus and carbamate pesticides, 469 (2002) 189

**Environmental analysis**

Characterization of polycyclic aromatic hydrocarbons in environmental samples by selective fluorescence quenching, 459 (2002) 61

Environmental analysis of aliphatic carboxylic acids by ion-exclusion chromatography, 465 (2002) 157

**Environmental and biological samples**

Direct mercury determination in aqueous slurries of environmental and biological samples by cold vapour generation–electrothermal atomic absorption spectrometry, 460 (2002) 111

**Environmental impact**

Application of a sequential extraction procedure to study the release of elements from municipal solid waste incineration bottom ash, 451 (2002) 285

**Environmental monitoring**

Development of a laccase-based flow injection electrochemical biosensor for the determination of phenolic compounds and

its application for monitoring remediation of Kraft E1 paper mill effluent, 463 (2002) 229

**Environmental safety**

Contribution of European research to endocrine disruptors, 473 (2002) 161

**Environmental samples**

Determination of Cd, Cu, Pb and Zn in environmental samples: microwave-assisted total digestion versus aqua regia and nitric acid extraction, 462 (2002) 59

Ion-exchange method for separation and concentration of platinum and palladium for analysis of environmental samples by inductively coupled plasma atomic emission spectrometry, 464 (2002) 7

**Environmental water analysis**

Headspace solid phase microextraction for the analysis of the new antifouling agents Irgarol 1051 and Sea Nine 211 in natural waters, 468 (2002) 171

**Environmental waters**

Occurrence and determination of herbicides and their major transformation products in environmental waters, 462 (2002) 187

**Enzymatic biosensors**

Glassy carbon paste electrodes modified with polyphenol oxidase. Analytical applications, 459 (2002) 43

**Enzymatic electrodes**

Indirect determination of pepsin activity in human serum protein samples by polyphenol oxidase electrodes, 460 (2002) 163

**Enzyme**

In-field monitoring of cleaning efficiency in waste water treatment plants using two phenol-sensitive biosensors, 456 (2002) 3

Electron paramagnetic resonance spin label titration: a novel method to investigate random and site-specific immobilization of enzymes onto polymeric membranes with different properties, 470 (2002) 29

**Enzyme electrode**

Biotinylated alginate immobilization matrix in the construction of an amperometric biosensor: application for the determination of glucose, 453 (2002) 71

Entrapment of glucose oxidase in non-porous poly(vinyl chloride), 461 (2002) 57

Characterization of oxidoreductase–redox polymer electrostatic film assembly on gold by surface plasmon resonance spectroscopy and Fourier transform infrared–external reflection spectroscopy, 466 (2002) 201

Dual amperometric–potentiometric biosensor detection system for monitoring organophosphorus neurotoxins, 469 (2002) 197

Performance of amperometric alcohol electrodes prepared by plasma polymerization technique, 469 (2002) 217

**Enzyme immobilisation**

Immobilisation of lactate dehydrogenase on poly(aniline)–poly(acrylate) and poly(aniline)–poly(vinyl sulphonate) films for use in a lactate biosensor, 453 (2002) 191

Development of an interference-free chemiluminescence method for monitoring acetylcholine and choline based on immobilized enzymes, 462 (2002) 199

#### Enzyme immunoassay

Simultaneous and sequential enzyme immunoassays on gold bands with flow electrochemical detection, 453 (2002) 63

#### Enzyme reactor

Development of a bienzyme reactor sensor system for the determination of ornithine, 456 (2002) 219

Simultaneous flow-injection assay of creatinine and creatine in serum by the combined use of a 16-way switching valve, some specific enzyme reactors and a highly selective hydrogen peroxide electrode, 462 (2002) 283

Rapid measurement of fish freshness indices by an amperometric flow-injection system with a 16-way switching valve and immobilized enzyme reactors, 470 (2002) 175

#### Enzyme sensor

Rapid fabrication of electrochemical enzyme sensor chip using polydimethylsiloxane microfluidic channel, 468 (2002) 143

#### Enzymeless biosensor

Development of an enzymeless biosensor for the determination of phenolic compounds, 455 (2002) 215

#### Enzyme-linked immunoassay of target DNA

Electrochemical enzyme-linked immunoassay in a DNA hybridization sensor, 469 (2002) 73

#### Enzyme-linked immunosorbent assay

Synthesis of haptens for immunoassay of organophosphorus pesticides and effect of heterology in hapten spacer arm length on immunoassay sensitivity, 475 (2003) 85

#### Epinephrine (EP)

Two-rate method for simultaneous kinetic determination based on detecting the reagent in successive reactions, 464 (2002) 153

#### Epithelial

Cholera toxin-induced modulation of gene expression: elucidation via cDNA microarray for rational cell-based sensor design, 457 (2002) 97

#### Epoxide

High-performance liquid chromatography-thermospray ionization-mass spectrometry of the oxidation products of polyunsaturated fatty acids, 465 (2002) 227

#### EPR spectrometry

Studies on the uncertainties in quantitative EPR estimations due to the construction of the cavities used, 453 (2002) 155

#### EQCM

Electrochemical and quartz crystal microbalance studies of lead(II) deposition and stripping in the presence of copper on a gold electrode modified with 2,2'-bipyridyl in polyaniline, 455 (2002) 69

#### Equivalent chain length (ECL)

Gas chromatographic and mass spectrometric methods for the characterisation of long-chain fatty acids. Application to wool wax extracts, 465 (2002) 359

#### Erythrocyte

Study of uptake kinetics of vincristine for human erythrocytes by capillary zone electrophoresis with electrochemical detection, 461 (2002) 117

#### Erythrosine B

Spectrophotometric determination of trace ionic and non-ionic surfactants based on a collection on a membrane filter as the ion associate of the surfactant with Erythrosine B, 455 (2002) 83

#### *Escherichia coli*

On-line simultaneous monitoring of glucose and acetate with FIA during high cell density fermentation of recombinant *E. coli*, 462 (2002) 293

#### Essential fatty acids

Analysis of fatty acids by gas chromatography, and its relevance to research on health and nutrition, 465 (2002) 39

#### Esterification

Application of analytical derivatizations to the quantitative and qualitative determination of fatty acids, 465 (2002) 93

#### Esterified fatty acids

High-performance liquid chromatographic determination of free fatty acids and esterified fatty acids in biological materials as their 2-nitrophenylhydrazides, 465 (2002) 237

#### Estimated daily intakes

Simultaneous determination of imidacloprid, carbendazim, methiocarb and hexythiazox in peaches and nectarines by liquid chromatography-mass spectrometry, 461 (2002) 109

#### Estrogen

Voltammetric behavior and determination of estrogens at Nafion-modified glassy carbon electrode in the presence of cetyltrimethylammonium bromide, 464 (2002) 209

Versatile biosensor surface based on peptide nucleic acid with label free and total internal reflection fluorescence detection for quantification of endocrine disruptors, 469 (2002) 37

#### Estuarine waters

Spectrophotometric catalytic determination of Fe(III) in estuarine waters using a flow-batch system, 455 (2002) 327

#### ETAAS

Flow injection on-line preconcentration of low levels of Cr(VI) with detection by ETAAS. Comparison of using an open tubular PTFE knotted reactor and a column reactor packed with PTFE beads, 463 (2002) 99

Comparison of conventional and fast thermal programme approaches for determination of total and extractable Cd in sediments by electrothermal atomic absorption spectrometry following sequential extraction, 466 (2002) 303

**Ethambutol**

Determination of ethambutol by ion-pair reversed phase liquid chromatography with UV detection, 456 (2002) 189

**Ethanol**

Sequential injection flow system with improved sample throughput: determination of glycerol and ethanol in wines, 458 (2002) 131

Quinohemoprotein alcohol dehydrogenase-based reagentless amperometric biosensor for ethanol monitoring during wine fermentation, 463 (2002) 39

Nanosized  $\text{SrCO}_3$ -based chemiluminescence sensor for ethanol, 466 (2002) 69

Amperometric determination of ethanol in beverages at copper electrodes in alkaline medium, 472 (2002) 123

Quantitative analysis of gas mixtures by voltammetric sensing, 475 (2003) 17

**Ethers and thioethers**

Gas chromatography silica packings with chemically bonded complexes of Cu(II) and Cr(III), 451 (2002) 271

**Ethyl acetate**

Automated control and optimisation of ion mobility spectrometry responses using a sheath-flow inlet, 463 (2002) 143

**Ethyl parathion**

Application of solid-phase microextraction for monitoring the photocatalytic decomposition of fenthion and parathion in aqueous  $\text{TiO}_2$  suspensions, 467 (2002) 233

**Ethylene**

Determination of halogenated hydrocarbons by flow injection ozone chemiluminescence, 451 (2002) 189

**Ethylene oxide**

Determination of the ethylene oxide content of polyether polyols by low-field  $^1\text{H}$  nuclear magnetic resonance spectrometry, 472 (2002) 133

**Ethylhexyl (octyl) methoxycinnamate (OMC)**

Cleaning validation in the toiletries industry, 467 (2002) 261

**Ethylphenols**

Determination of volatile phenols in fino sherry wines, 458 (2002) 95

Determination of ethylphenol compounds in wine by headspace solid-phase microextraction in conjunction with gas chromatography and flame ionization detection, 458 (2002) 111

**European Union**

An odyssey—meeting European Union analytical criteria for residues from aflatoxins: experiences from North America, 473 (2002) 49

**Europium tracer**

Homogeneous stopped-flow fluorimmunoassay using europium as label, 460 (2002) 271

**Evans blue (EB)**

Langmuir aggregation of Evans blue on cetyltrimethylammonium bromide and on proteins and its application, 458 (2002) 417

**Excitation emission matrix spectral subtraction**

Study of diesel fuel contamination by excitation emission matrix spectral subtraction fluorescence, 454 (2002) 209

**Excited-state intramolecular proton transfer**

Ultrasensitive fluorescent probe for the hydrophobic range of solvent polarities, 464 (2002) 273

**Excretion**

Sex hormones originating from different livestock production systems: fate and potential disrupting activity in the environment, 473 (2002) 27

**Exogenous**

Removal of exogenously bound elements from human hair by various washing procedures and determination by inductively coupled plasma mass spectrometry, 455 (2002) 23

**Experimental design**

Artificial neural networks for quantification in unresolved capillary electrophoresis peaks, 452 (2002) 47

Robust regression and outlier detection in the evaluation of robustness tests with different experimental designs, 463 (2002) 53

Sonic spray ionization interface for liquid chromatography-mass spectrometry, 468 (2002) 263

**Expert systems**

Present and future of expert systems in food analysis, 454 (2002) 1

**Explosive detection**

Selection of phage displayed peptides for the detection of 2,4,6-trinitrotoluene in seawater, 457 (2002) 13

**Explosives**

Sensitive capillary electrophoresis microchip determination of trinitroaromatic explosives in nonaqueous electrolyte following solid phase extraction, 469 (2002) 253

**Exposure**

Contribution of European research to endocrine disruptors, 473 (2002) 161

**Extractability**

Countercurrent supercritical fluid extraction of phenolic compounds from aqueous matrices, 460 (2002) 1

**Extraction**

Cold ultrasonic acid extraction of copper, lead and zinc from soil samples, 452 (2002) 143

Kinetic study of L-isoleucine transport through a liquid membrane containing di(2-ethylhexyl) phosphoric acid in kerosene, 456 (2002) 157

Isolation and separation of individual long-chain acyl-coenzyme A esters, 465 (2002) 427

Extraction and preconcentration of Cr(VI) from urine using supported liquid membrane, 474 (2002) 59

**Extraction chromatography**

Determination of actinides and strontium in fish samples by extraction chromatography, 458 (2002) 367

Determination of niobium, tantalum, zirconium and hafnium in geological materials by extraction chromatography and inductively coupled plasma mass spectrometry, 458 (2002) 375

#### Extraction fraction

A study of microdialysis sampling of metal ions, 456 (2002) 253

#### Extraction of organic compounds

Evaluation of the factors affecting extraction of organic compounds based on the acid-induced phase cloud point approach, 460 (2002) 13

#### Extraction-back extraction

Development of an automated sequential injection on-line solvent extraction-back extraction procedure as demonstrated for the determination of cadmium with detection by electrothermal atomic absorption spectrometry, 456 (2002) 283

## F

#### FAAS

Synthesis of amidinothioureido-silica gel and its application to flame atomic absorption spectrometric determination of silver, gold and palladium with on-line preconcentration and separation, 452 (2002) 223

Determination of copper in seawater based on a liquid membrane preconcentration system, 460 (2002) 35

#### Factor analysis

Application of factor analysis for resolving thermogravimetric-mass spectrometric analysis spectra, 461 (2002) 215

#### Factorial design

Tin determination in marine sediment, soil, coal fly ash and coal slurried samples by hydride generation-electrothermal atomic absorption spectrometry, 461 (2002) 261

#### False positive

Cholera toxin-induced modulation of gene expression: elucidation via cDNA microarray for rational cell-based sensor design, 457 (2002) 97

#### Fast determination

Fast determination of flavonoids in *Glycyrrhizae radix* by capillary zone electrophoresis, 458 (2002) 345

#### Fast thermal programmes

Comparison of conventional and fast thermal programme approaches for determination of total and extractable Cd in sediments by electrothermal atomic absorption spectrometry following sequential extraction, 466 (2002) 303

#### Fatty acid

Stable isotope analysis of fatty acids by gas chromatography-isotope ratio mass spectrometry, 465 (2002) 63

Analysis of fatty acids in plasma lipoproteins by gas chromatography-flame ionization detection. Quantitative aspects, 465 (2002) 337

#### Fatty acid identification technology

The gas chromatograph in practical analyses of common and uncommon fatty acids for the 21st century, 465 (2002) 175

#### Fatty acid metabolism

Stable isotope analysis of fatty acids by gas chromatography-isotope ratio mass spectrometry, 465 (2002) 63

#### Fatty acid methyl esters

Analysis of fatty acids in foods by supercritical fluid chromatography, 465 (2002) 131

The gas chromatograph in practical analyses of common and uncommon fatty acids for the 21st century, 465 (2002) 175

#### Fatty acid re-extraction

Simple and rapid procedure for the determination of individual free fatty acids in serum, 465 (2002) 433

#### Fatty acids

Characterisation of humic substances by acid catalysed transesterification, 452 (2002) 105

Development of fatty acid analysis by high-performance liquid chromatography, gas chromatography, and related techniques, 465 (2002) 1

High-performance liquid chromatography of fatty acids in biological samples, 465 (2002) 81

Application of analytical derivatizations to the quantitative and qualitative determination of fatty acids, 465 (2002) 93

Liquid chromatography of fatty acids with chemiluminescence detection, 465 (2002) 101

Fluorescent tagging of physiologically important carboxylic acids, including fatty acids, for their detection in liquid chromatography, 465 (2002) 111

Analysis of fatty acids by column liquid chromatography, 465 (2002) 145

High performance liquid chromatography of fatty acid metabolites. Improvement of sensitivity by radiometric, fluorimetric and mass spectrometric methods, 465 (2002) 193

Determination of long-chain fatty acids in heart and skeletal muscle by capillary gas chromatography, 465 (2002) 351

Gas chromatographic and mass spectrometric methods for the characterisation of long-chain fatty acids. Application to wool wax extracts, 465 (2002) 359

Identification of minor fatty acids in mussels (*Mytilus galloprovincialis*) by GC-MS of their 2-alkenyl-4,4-dimethylloxazoline derivatives, 465 (2002) 409

Interrelationship between fatty acid composition, lipid peroxidation and alpha-tocopherol consumption post-LDL-apheresis treatment evaluated by liquid chromatography and gas chromatography, 467 (2002) 125

#### Fatty acids and esters

Analysis by gas chromatography/mass spectrometry of fatty acids and esters in alcoholic beverages and tobaccos, 465 (2002) 309

#### Fatty alcohols

Gas chromatographic and mass spectrometric methods for the characterisation of long-chain fatty acids. Application to wool wax extracts, 465 (2002) 359

**Fe**

Determination of calcium, iron and zinc in milk powder by reaction cell inductively coupled plasma mass spectrometry, 470 (2002) 223

Simple method for colorimetric spot-test quantitative analysis of Fe(III) using a computer controlled hand-scanner, 471 (2002) 97

**Fe(II)**

Influence of pH and metal/carbon ratios on soluble organic complexation of Fe(II), Fe(III) and Al(III) in soil solutions determined by diffusive gradients in thin films, 454 (2002) 259

**Fe(III)**

Influence of pH and metal/carbon ratios on soluble organic complexation of Fe(II), Fe(III) and Al(III) in soil solutions determined by diffusive gradients in thin films, 454 (2002) 259

**Feature selection**

Feature selection for hierarchical clustering, 466 (2002) 311

**Fenamiphos**

Comparative evaluation of the effects of pesticides in acute toxicity luminescence bioassays, 451 (2002) 195

**Fenitrooxon**

Group-specific enzyme-linked immunosorbent assay for fenitrooxon and 3-methyl-4-nitrophenol in water samples based on a polyclonal antibody, 460 (2002) 99

**Fentanyl**

Determination of umbilical cord and maternal plasma concentrations of fentanyl by using novel spectrophotometric and chemiluminescence enzyme immunoassays, 459 (2002) 177

**Fenthion**

Application of solid-phase microextraction for monitoring the photocatalytic decomposition of fenthion and parathion in aqueous TiO<sub>2</sub> suspensions, 467 (2002) 233

Synthesis of haptens for immunoassay of organophosphorus pesticides and effect of heterology in hapten spacer arm length on immunoassay sensitivity, 475 (2003) 85

**Fermentation**

Volatile sulphur compounds in wines related to yeast metabolism and nitrogen composition of grape musts, 458 (2002) 157

Quinohemoprotein alcohol dehydrogenase-based reagentless amperometric biosensor for ethanol monitoring during wine fermentation, 463 (2002) 39

**Ferrocene labeled conjugate**

Reaction cell inductively coupled plasma mass spectrometry-based immunoassay using ferrocene tethered hydroxysuccinimide ester as label for the determination of 2,4-dichlorophenoxyacetic acid, 472 (2002) 55

**Ferrocenyl groups**

Electrochemical biosensing of DNA hybridization by ferrocenyl groups functionalized polypyrrole, 469 (2002) 85

**FIA**

Simultaneous and sequential enzyme immunoassays on gold bands with flow electrochemical detection, 453 (2002) 63

Application of a polyaniline based ammonium sensor for the amperometric immunoassay of a urease conjugated Tal I protein, 461 (2002) 49

A simple automated method for the speciation of dissolved inorganic nitrogen in seawater, 469 (2002) 235

Chemiluminescent flow-injection analysis of nitrates in water using on-line ultraviolet photolysis, 474 (2002) 99

**Fiber optic**

Towards the optimization of an optical DNA sensor: control of selectivity coefficients and relative surface affinities, 457 (2002) 29

Novel fiber-optic biosensor based on immobilized glutathione S-transferase and sol-gel entrapped bromocresol green for the determination of atrazine, 460 (2002) 151

**Fibre optic links**

Quantitative millimetre wavelength spectrometry at pressures approaching atmospheric. II. Determination of oxygen at atmospheric pressure, 468 (2002) 323

**Fibre optic probe**

On-line non-destructive determination of proteins and infiltrated fat in Iberian pork loin by near infrared spectrometry with a remote reflectance fibre optic probe, 453 (2002) 281

Mineral analysis (Fe, Zn, Ca, Na, K) of fresh Iberian pork loin by near infrared reflectance spectrometry. Determination of Fe, Na and K with a remote fibre-optic reflectance probe, 468 (2002) 293

**Fiber-optic sensor**

Highly selective spectrophotometric determination of trace cobalt and development of a reagentless fiber-optic sensor, 467 (2002) 205

**Field method**

Differential pulse cathodic stripping voltammetric determination of nanomolar levels of dissolved sulfide applicable to field analysis of groundwater, 459 (2002) 209

**Filters**

Flow injection-chemiluminescence determination of octyl dimethyl PABA in sunscreen formulations, 462 (2002) 209

**Fingerprints**

Principal component analysis application in polycyclic aromatic hydrocarbons "mussel watch" analyses for source identification, 461 (2002) 201

**Fire suppressant**

Hydrogen fluoride analyzer for gases and aerosols, 460 (2002) 219

**Firefly luciferase**

Development of a thermostable firefly luciferase, 457 (2002) 115

**First derivative of ratio spectra**

Stability indicating spectrophotometric methods for determination of glafenine using first derivative of ratio spectra and chemometric techniques, 461 (2002) 155

**First derivative spectrophotometry**

Determination of lamivudine and zidovudine in binary mixtures using first derivative spectrophotometric, first derivative of the

ratio-spectra and high-performance liquid chromatography-UV methods, 466 (2002) 175

### **Fish freshness**

Rapid measurement of fish freshness indices by an amperometric flow-injection system with a 16-way switching valve and immobilized enzyme reactors, 470 (2002) 175

### **Fish samples**

Determination of actinides and strontium in fish samples by extraction chromatography, 458 (2002) 367

### **Flame atomic absorption spectrometry**

Dithione as chelator in the flow injection separation and pre-concentration system of trace metals in biological samples, 451 (2002) 305

Column solid-phase extraction with Chromosorb-102 resin and determination of trace elements in water and sediment samples by flame atomic absorption spectrometry, 452 (2002) 77

Determination of stoichiometry of  $\text{Li}_{1+x}\text{CoO}_2$  materials by flame atomic absorption spectrometry and automated potentiometric titration, 455 (2002) 35

Calibration by the gradient ratio-standard addition method in flow injection flame atomic absorption spectrometry, 460 (2002) 235

Cloud point preconcentration and flame atomic absorption spectrometric determination of Cd and Pb in human hair, 470 (2002) 215

### **Flame ionization detector corrections**

The gas chromatograph in practical analyses of common and uncommon fatty acids for the 21st century, 465 (2002) 175

### **Flavonoids**

Fast determination of flavonoids in *Glycyrrhizae radix* by capillary zone electrophoresis, 458 (2002) 345

Natively fluorescent isoflavones exhibiting anomalous Stokes' shifts, 468 (2002) 3

High-performance liquid chromatographic analysis of Black Cohosh (*Cimicifuga racemosa*) constituents with in-line evaporative light scattering and photodiode array detection, 471 (2002) 61

### **Flavour**

Effect of maturation in small oak casks on the volatility of red wine aroma compounds, 458 (2002) 45

### **Flexible fused silica columns**

The gas chromatograph in practical analyses of common and uncommon fatty acids for the 21st century, 465 (2002) 175

### **Flow analysis**

Exploiting monosegmented flow analysis to perform in-line standard additions using a single stock standard solution in spectrophotometric sequential injection procedures, 466 (2002) 345

Multicommutation in flow analysis: concepts, applications and trends, 468 (2002) 119

Determination of anthraquinone-2-sulfonate in alkaline pulping liquor by spectrophotometry using a Nafion membrane interface, 474 (2002) 69

Spectrophotometric determination of phytic acid in plant extracts using a multi-pumping flow system, 474 (2002) 161

### **Flow cell**

Comparison of electrochemical, electrophoretic and spectrophotometric methods for creatinine determination in biological fluids, 459 (2002) 187

### **Flow cytometry (FCM)**

Future of biological aerosol detection, 457 (2002) 125

### **Flow electrochemical enzyme immunoassay**

Flow amperometric detection of indigo for enzyme-linked immunosorbent assays with use of screen-printed electrodes, 462 (2002) 31

### **Flow immunoassay**

Development of a heterogeneous chemiluminescent flow immunoassay for DDT and related compounds, 453 (2002) 43

### **Flow injection (FI)**

Dithione as chelator in the flow injection separation and pre-concentration system of trace metals in biological samples, 451 (2002) 305

Comparative study of 8-hydroxyquinoline derivatives as chelating reagents for flow-injection preconcentration of cobalt in a knotted reactor, 453 (2002) 143

Analysis for Cd, Cu, Ni, Zn, and Mn in estuarine water by inductively coupled plasma mass spectrometry coupled with an automated flow injection system, 455 (2002) 11

Simultaneous determination of silicate and phosphate in boiler water at power plants based on series flow cells by using flow injection spectrophotometry, 455 (2002) 315

Combination of flow injection with capillary electrophoresis. 8. Miniaturized capillary electrophoresis system with flow injection sample introduction and electrogenerated chemiluminescence detection, 456 (2002) 167

On-line photo-derivatization with flow injection and liquid chromatography-atmospheric pressure electrospray mass spectrometry for the identification of indoles, 460 (2002) 49

Propelling devices: the heart of flow injection approaches, 461 (2002) 169

Rapid spectrophotometric determination of fosfestrol following on-line hydrolysis by alkaline phosphatase using flow injection and chasing zones, 462 (2002) 119

Flow injection-chemiluminescence determination of octyl dimethyl PABA in sunscreen formulations, 462 (2002) 209

Flow injection on-line preconcentration of low levels of Cr(VI) with detection by ETAAS. Comparison of using an open tubular PTFE knotted reactor and a column reactor packed with PTFE beads, 463 (2002) 99

Sensitive determination of captopril by flow injection analysis with chemiluminescence detection based on the enhancement of the luminol reaction, 463 (2002) 249

Multisyringe flow injection spectrofluorimetric determination of warfarin at trace levels with on-line solid-phase preconcentration, 467 (2002) 13

Flow-injection chemiluminescence detection for studying protein binding for drug with ultrafiltration sampling, 468 (2002) 65

A simple automated method for the speciation of dissolved inorganic nitrogen in seawater, 469 (2002) 235

- Method for monitoring urea and ammonia in wine and must by flow injection–pervaporation, 471 (2002) 105
- Determination of adrenaline by using inhibited Ru(bpy)<sub>3</sub><sup>2+</sup> electrochemiluminescence, 471 (2002) 187

#### Flow injection analysis (FIA)

- Improved method for shipboard determination of iron in seawater by flow injection analysis, 453 (2002) 21
- Using on-line solid phase extraction for flow-injection spectrophotometric determination of salbutamol, 455 (2002) 103
- Development of the continuously variable volume reactor for flow injection analysis. Part 1. Design, capabilities and testing, 455 (2002) 287
- Determination of hydrogen peroxide by using a flow injection system with immobilized peroxidase and long pathlength capillary spectrophotometry, 455 (2002) 305
- Development of xylitol oxidase-based flow injection analysis for monitoring of xylitol concentrations, 456 (2002) 293
- Calibration by the gradient ratio-standard addition method in flow injection flame atomic absorption spectrometry, 460 (2002) 235
- Multi-component analysis by flow injection-diode array detection-spectrophotometry using partial least squares calibration model for simultaneous determination of zinc, cadmium and lead, 461 (2002) 181
- On-line simultaneous monitoring of glucose and acetate with FIA during high cell density fermentation of recombinant *E. coli*, 462 (2002) 293
- Development of integrated chemiluminescence flow sensor for the determination of adrenaline and isoprenaline, 463 (2002) 257
- Determination of total phosphorus and nitrogen in turbid waters by oxidation with alkaline potassium peroxodisulfate and low pressure microwave digestion, autoclave heating or the use of closed vessels in a hot water bath: comparison with Kjeldahl digestion, 463 (2002) 283
- Continuous shipboard determination of Fe(II) in polar waters using flow injection analysis with chemiluminescence detection, 466 (2002) 261
- On-line simultaneous determination of *S*- and *R*-perindopril using amperometric biosensors as detectors in flow systems, 467 (2002) 189
- Flow injection determination of cationic surfactants by using *N*-bromosuccinimide and *N*-chlorosuccinimide as new oxidizing agents for luminol chemiluminescence, 468 (2002) 53
- Fourier transform infrared spectrometric strategies for the determination of Buprofezin in pesticide formulations, 468 (2002) 81
- Citrate selective electrodes for the flow injection analysis of soft drinks, beers and pharmaceutical products, 471 (2002) 41
- Flow injection analysis applied to a voltammetric electronic tongue, 471 (2002) 159
- Amperometric determination of ethanol in beverages at copper electrodes in alkaline medium, 472 (2002) 123
- Flow-injection determination of chromium(III) by its catalysis on the oxidative coupling of 3-methyl-2-benzothiazolinone hydrazone with *N*-ethyl-*N*-(2-hydroxy-3-sulfoethyl)-3-methoxyaniline, 474 (2002) 167

#### Flow injection hydride generation

- Microwave-assisted digestion of organoarsenic compounds for the determination of total arsenic in aqueous, biological, and sediment samples using flow injection hydride generation electrothermal atomic absorption spectrometry, 452 (2002) 207

#### Flow methods

- Differential pulse voltammetric determination of trace Te(IV) at a poly(3,3'-diaminobenzidine) film modified gold electrode in flow systems, 453 (2002) 209

#### Flow monitoring

- Flow monitoring of NADH consumption in bioassays based on packed-bed reactors bearing NAD<sup>+</sup>-dependent dehydrogenases. Determination of acetaldehyde using alcohol dehydrogenase, 467 (2002) 225

#### Flow system

- Multi-pumping in flow analysis: concepts, instrumentation, potentialities, 466 (2002) 125
- Theoretical and experimental study of the biamperometry for irreversible redox couple in flow system, 470 (2002) 229

#### Flow-analysis

- Determination of sodium oxalate in Bayer liquor using flow-analysis incorporating an anion exchange column and tris(2,2'-bipyridyl)ruthenium(II) chemiluminescence detection, 458 (2002) 291

#### Flow-batch system

- Spectrophotometric catalytic determination of Fe(III) in estuarine waters using a flow-batch system, 455 (2002) 327

#### Flow-injection

- Determination of bismuth, selenium and tellurium in nickel-based alloys and pure copper by flow-injection hydride generation atomic absorption spectrometry—with ascorbic acid pre-reduction and cupferron chelation-extraction, 459 (2002) 161
- Simultaneous flow-injection determination of fluoride, monofluorophosphate and orthophosphate ions using alkaline phosphatase immobilized on a cellulose nitrate membrane and an open-circulation approach, 467 (2002) 83
- Flow-injection chemiluminescent determination of nitrite in water based on the formation of peroxynitrite from the reaction of nitrite and hydrogen peroxide, 474 (2002) 107

#### Flow-injection amperometry (FIamp)

- Electrochemical studies on antioxidants in bovine milk, 474 (2002) 137

#### Flow-injection analysis (FIA)

- Immunochromatographic flow-injection method for detection of human serum immunoglobulin G antibodies to *Helicobacter pylori*, 453 (2002) 53
- Chronocoulometric flow-injection analysis with solvent polymeric membrane ion sensors, 459 (2002) 11
- Simultaneous flow-injection assay of creatinine and creatine in serum by the combined use of a 16-way switching valve, some specific enzyme reactors and a highly selective hydrogen peroxide electrode, 462 (2002) 283

- Flow-injection chemiluminescence determination of ascorbic acid by use of the cerium(IV)-Rhodamine B system, 464 (2002) 289
- Rapid measurement of fish freshness indices by an amperometric flow-injection system with a 16-way switching valve and immobilized enzyme reactors, 470 (2002) 175
- Flow-injection spectrophotometry**
- Solvent extraction flow-injection manifold for the simultaneous spectrophotometric determination of free cyanide and thiocyanate ions based upon on-line masking of cyanides by formaldehyde, 452 (2002) 295
- Flow-rate gradient**
- Determination of testosterone and its metabolites using liquid chromatography with elevated column temperature and flow-rate gradient, 457 (2002) 165
- Flow-through sensor**
- Chemiluminescence flow-through sensor for pipemidic acid using solid sodium bismuthate as an oxidant, 459 (2002) 19
- Fluorescein**
- Stability of new optical pH sensing material based on cross-linked poly(vinyl alcohol) copolymer, 455 (2002) 207
- Fluorescence**
- Spectrafluorimetric method for the rapid screening of toxic heavy metals in water samples, 451 (2002) 203
- Fractionation and characterization of fulvic acid by immobilized metal ion affinity chromatography, 452 (2002) 85
- Comparison of methods for the determination of ochratoxin A in wine, 453 (2002) 33
- Selective fluorescence quenching of polycyclic aromatic hydrocarbons by nitromethane within room temperature ionic liquid 1-butyl-3-methylimidazolium hexafluorophosphate, 453 (2002) 89
- Characterisation of a synthesised fluorescent ligand (4-acridinol-1-sulphonic acid) using nuclear magnetic resonance spectroscopy, 454 (2002) 147
- Study of diesel fuel contamination by excitation emission matrix spectral subtraction fluorescence, 454 (2002) 209
- Stability of new optical pH sensing material based on cross-linked poly(vinyl alcohol) copolymer, 455 (2002) 207
- SOS-LUX- and LAC-FLUORO-TEST for the quantification of genotoxic and/or cytotoxic effects of heavy metal salts, 456 (2002) 31
- Development of a tetramethylrhodamine-labeled probe for a capillary electrophoresis-based competitive immunoassay of staphylococcal enterotoxin B, 457 (2002) 21
- Towards the optimization of an optical DNA sensor: control of selectivity coefficients and relative surface affinities, 457 (2002) 29
- Reagentless pH-based biosensing using a fluorescently-labelled dextran co-entrapped with a hydrolytic enzyme in sol-gel derived nanocomposite films, 457 (2002) 47
- ResonSense<sup>®</sup>: simple linear fluorescent probes for quantitative homogeneous rapid polymerase chain reaction, 457 (2002) 61
- Fluorimetric assay for measuring Dns-His-Lys-Arg-His-Lys cleaving enzyme using high-performance liquid chromatography, 457 (2002) 157
- Direct liquid chromatographic analysis of resveratrol derivatives and flavanols in wines with absorbance and fluorescence detection, 458 (2002) 103
- Study on molecular recognition of *para*-aminobenzoic acid species by  $\alpha$ -,  $\beta$ - and hydroxypropyl- $\beta$ -cyclodextrin, 458 (2002) 305
- Characterization of polycyclic aromatic hydrocarbons in environmental samples by selective fluorescence quenching, 459 (2002) 61
- Properties and applications of proteins encapsulated within sol-gel derived materials, 461 (2002) 1
- Fluorescence microscopic quantification of DNA with  $\alpha$ , $\beta$ , $\gamma$ , $\delta$ -tetrakis[4-(trimethylammonium)phenyl]porphine by a ring-like deposition technique, 466 (2002) 193
- Natively fluorescent isoflavones exhibiting anomalous Stokes' shifts, 468 (2002) 3
- Lipophilic derivative of rhodamine 19: characterization and spectroscopic properties, 468 (2002) 13
- Fluorescence-based nucleic acid detection and microarrays, 469 (2002) 3
- Planar waveguides for ultra-high sensitivity of the analysis of nucleic acids, 469 (2002) 49
- Cyclodextrin-porphyrin supramolecular sensitizer for mercury(II) ion, 469 (2002) 285
- Screening of antagonists based on induced dissociation of a calmodulin-melittin interaction entrapped in a sol-gel derived matrix, 470 (2002) 19
- Tethered thiazole orange intercalating dye for development of fibre-optic nucleic acid biosensors, 470 (2002) 57
- Optical oxygen sensor based on fluorescence change of pyrene-1-butyric acid chemisorption film on an anodic oxidation aluminium plate, 471 (2002) 25
- Selective fluorescent and fluorogenic substrates for purine-nucleoside phosphorylases from various sources, and direct fluorimetric determination of enzyme levels in human and animal blood, 472 (2002) 63
- Investigation on the inclusion behavior of *neutral* red with  $\beta$ -cyclodextrin, hydroxypropyl- $\beta$ -cyclodextrin and sulfobutylether- $\beta$ -cyclodextrin, 474 (2002) 189
- Fluorescence enhancement**
- Study on the new fluorescence enhancement system of Tb-1,10-bis(2'-carboxylphenyl)-1,4,7,10-tetraoxadecane in silver chloride collosol and its analytical application, 468 (2002) 287
- Fluorescence excitation emission matrix**
- Detection of verapamil drug by fluorescence and trilinear decomposition techniques, 453 (2002) 105
- Fluorescence imaging**
- Hadamard transform fluorescence image microscopy using one-dimensional movable mask, 468 (2002) 27
- Fluorescence in situ hybridization**
- Future of biological aerosol detection, 457 (2002) 125
- Fluorescence microscopic analysis**
- Fluorescent microscopic determination of cadmium in water samples with the self-ordered ring of  $\alpha$ , $\beta$ , $\gamma$ , $\delta$ -tetra(5-sulfophenyl)porphine formed on the solid support of glass slides, 453 (2002) 97

**Fluorescence optosensor**

Room-temperature luminescence optosensings based on immobilized active principles actives. Application to nafronyl and naproxen determination in pharmaceutical preparations and biological fluids, 462 (2002) 217

**Fluorescence polarization immunoassay**

Development of a rapid, specific fluorescence polarization immunoassay for the herbicide chlorsulfuron, 468 (2002) 229

**Fluorescence probe**

Ultrasensitive fluorescent probe for the hydrophobic range of solvent polarities, 464 (2002) 273

Preparation and application of functionalized nanoparticles of CdS as a fluorescence probe, 468 (2002) 35

**Fluorescence quenching**

Characterization of polycyclic aromatic hydrocarbons in environmental samples by selective fluorescence quenching, 459 (2002) 61

**Fluorescence tagging**

Fluorescent tagging of physiologically important carboxylic acids, including fatty acids, for their detection in liquid chromatography, 465 (2002) 111

**Fluorescence yields**

Measurement of K shell radiative transition probabilities and  $K$ ,  $L_2$  and  $L_3$  shell/subshell fluorescence yields of some elements in the atomic number range  $30 \leq Z \leq 40$ , 454 (2002) 327

**Fluorescent aerodynamic particle sizer (FLAPS)**

Future of biological aerosol detection, 457 (2002) 125

**Fluorescent sensor**

Lead-selective fluorescent optode membrane based on 3,3',5,5'-tetramethyl-N-(9-anthrylmethyl)benzidine, 460 (2002) 123

**Fluoride**

Potentiometric determination of fluoride in geological and biological samples following pyrohydrolytic decomposition, 466 (2002) 117

Simultaneous flow-injection determination of fluoride, monofluorophosphate and orthophosphate ions using alkaline phosphatase immobilized on a cellulose nitrate membrane and an open-circulation approach, 467 (2002) 83

**Fluoride electrode**

Hydrogen fluoride analyzer for gases and aerosols, 460 (2002) 219

**Fluoride-selective ionophore**

Selective fluoride recognition and potentiometric properties of ion-selective electrodes based on bis(halodiphenylstannyl)alkanes, 467 (2002) 197

Zirconium(IV)-porphyrins as novel ionophores for fluoride-selective polymeric membrane electrodes, 468 (2002) 133

**Fluorimetric detection**

High performance liquid chromatography of fatty acid metabolites. Improvement of sensitivity by radiometric, fluorimetric and mass spectrometric methods, 465 (2002) 193

**Fluorimetry**

Spectrofluorimetric determination of tannins based on their active effect on the Cu(II) catalytic oxidation of rhodamine 6G by hydrogen peroxide, 455 (2002) 187

Spectrofluorimetric determination of aluminum in drinking waters by sequential injection analysis, 457 (2002) 311

**Fluorinated analogues**

Monofluorinated polycyclic aromatic hydrocarbons as internal standards in Shpol'skii spectroscopy: 1-fluoropyrene as an example, 459 (2002) 53

**Fluorogenic pre-column derivatization**

Phanquinone: a useful fluorescent pre-chromatographic derivatization reagent for liquid chromatographic analyses of amino acid dosage forms, 474 (2002) 11

**Fluorogenic substrates**

Selective fluorescent and fluorogenic substrates for purine-nucleoside phosphorylases from various sources, and direct fluorimetric determination of enzyme levels in human and animal blood, 472 (2002) 63

**7-Fluoro-4-nitrobenzoxadiazole**

Quantitation of agmatine by liquid chromatography with laser-induced fluorescence detection, 470 (2002) 155

**Fluoro-tagging**

Fluorescent sensing of homocysteine by molecular imprinting, 466 (2002) 17

**Flurbiprofen**

Determination of flurbiprofen in pharmaceutical formulations by UV spectrophotometry and liquid chromatography, 463 (2002) 207

**4-Fluorobenzoic acid**

Biodegradation studies of 4-fluorobenzoic acid and 4-fluorocinnamic acid: an evaluation of membrane inlet mass spectrometry as an alternative to high performance liquid chromatography and ion chromatography, 454 (2002) 137

**4-Fluorocinnamic acid**

Biodegradation studies of 4-fluorobenzoic acid and 4-fluorocinnamic acid: an evaluation of membrane inlet mass spectrometry as an alternative to high performance liquid chromatography and ion chromatography, 454 (2002) 137

**Fontinalis antipyretica**

Ion-paired solid phase extraction as a sample preparation strategy for the high-performance liquid chromatographic determination of oxytetracycline in the bryophyte *Fontinalis antipyretica*, 475 (2003) 117

**Food**

Use of specific bioluminescent cell lines for the detection of steroid hormone (ant)agonists in meat producing animals, 473 (2002) 119

**Food analysis**

Present and future of expert systems in food analysis, 454 (2002) 1  
Yeast cells sucrose biosensor based on a potentiometric oxygen electrode, 458 (2002) 215

Homogeneous stopped-flow fluoroimmunoassay using europium as label, 460 (2002) 271

Database dedicated to information published during the Benelux conferences on hormone and veterinary drug residue analyses, 473 (2002) 53

Spectrophotometric determination of phytic acid in plant extracts using a multi-pumping flow system, 474 (2002) 161

#### **Food and human tissue fatty acids**

Analysis of fatty acids by gas chromatography, and its relevance to research on health and nutrition, 465 (2002) 39

#### **Food safety**

Contribution of European research to anti-microbials and hormones, 473 (2002) 83

Liquid chromatographic-mass spectrometric analysis of 11 glucocorticoid residues and an optimization of enzymatic hydrolysis conditions in bovine liver, 473 (2002) 127

#### **Food simulants**

Migration studies from recycled paper packaging materials: development of an analytical method for rapid testing, 467 (2002) 253

#### **Foods**

Automatic screening method for the rapid and simple discrimination between synthetic and natural colorants in foods, 464 (2002) 237

#### **Formaldehyde**

Determination of free formaldehyde in foundry resins as its 2,4-dinitrophenylhydrazone by liquid chromatography, 467 (2002) 97

#### **Formetanate**

Comparative evaluation of the effects of pesticides in acute toxicity luminescence bioassays, 451 (2002) 195

#### **Fosfestrol**

Rapid spectrophotometric determination of fosfestrol following on-line hydrolysis by alkaline phosphatase using flow injection and chasing zones, 462 (2002) 119

#### **Foundry resins**

Determination of free formaldehyde in foundry resins as its 2,4-dinitrophenylhydrazone by liquid chromatography, 467 (2002) 97

#### **Four-component nasal solutions**

Chrometric assisted simultaneous spectrophotometric determination of four-component nasal solutions with a reduced number of calibration samples, 453 (2002) 289

#### **Fourier transform infrared spectrometry**

Development and validation of a new Fourier transform infrared spectrometric method for the quantification of urea in creams and ointments, 451 (2002) 323

Fourier transform infrared spectrometric strategies for the determination of Buprofezin in pesticide formulations, 468 (2002) 81

#### **F-PAH**

Monofluorinated polycyclic aromatic hydrocarbons as internal standards in Shpol'skii spectroscopy: 1-fluoropyrene as an example, 459 (2002) 53

#### **Fractional chain length (FCL)**

Gas chromatographic and mass spectrometric methods for the characterisation of long-chain fatty acids. Application to wool wax extracts, 465 (2002) 359

#### **Fractional factorial design**

Development of a generic flow-injection analysis method for compounds with a secondary amine or amide function, using an experimental design approach. Part II. Selection and evaluation of the chemical reaction parameters, 455 (2002) 117

#### **Fractionation**

Extraction of humic acids and their fractions in poly(ethylene glycol)-based aqueous biphasic systems, 452 (2002) 95

Determination of Al, Cu, Fe, Mn, Pb and Zn in certified reference materials using the optimized BCR sequential extraction procedure, 454 (2002) 249

#### **Free fatty acids**

Analysis of fatty acids in foods by supercritical fluid chromatography, 465 (2002) 131

New electrochemical detection method in high-performance liquid chromatography for determining free fatty acids, 465 (2002) 199

High-performance liquid chromatographic determination of free fatty acids and esterified fatty acids in biological materials as their 2-nitrophenylhydrazides, 465 (2002) 237

#### **Free-ion selective radiotracer extraction**

Analysis of copper complex lability using  $^{64}\text{Cu}$ -equilibration techniques and free-ion selective radiotracer extraction, 464 (2002) 141

#### **French oak**

Comparison of wine aromas with different tannic content aged in French oak barrels, 458 (2002) 139

#### **Frequency doubling scattering**

Resonance Rayleigh scattering, frequency doubling scattering and second-order scattering spectra of the heparin-crystal violet system and their analytical application, 468 (2002) 275

Frequency doubling scattering and second-order scattering technology as novel methods for the determination of the inclusion constant of procaine hydrochloride to  $\beta$ -cyclodextrin, 472 (2002) 89

#### **Fresh water**

Spectrophotometric pH measurements of freshwater, 453 (2002) 13

Extraction and preconcentration of polychlorinated dibenzo-*p*-dioxins using the cloud-point methodology. Application to their determination in water samples by high-performance liquid chromatography, 470 (2002) 205

#### **Freshness**

Determination of volatile biogenic amines in muscle food products by ion mobility spectrometry, 463 (2002) 155

#### **Freshness index**

Rapid measurement of fish freshness indices by an amperometric flow-injection system with a 16-way switching valve and immobilized enzyme reactors, 470 (2002) 175

**Fruits**

Simultaneous determination of imidacloprid, carbendazim, methiocarb and hexythiazox in peaches and nectarines by liquid chromatography-mass spectrometry, 461 (2002) 109

**Fruits quality**

Outer product analysis of electronic nose and visible spectra: application to the measurement of peach fruit characteristics, 459 (2002) 107

**FT-IR**

Direct-on-filter analysis of crystalline silica using photoacoustic Fourier transform-infrared spectroscopy, 457 (2002) 257

**FT-IR spectroscopy**

Variable selection for multivariate calibration using a genetic algorithm: prediction of additive concentrations in polymer films from Fourier transform-infrared spectral data, 461 (2002) 189

**Fullerene**

Blue and red photoluminescence of bicapped [60]fullerene- $\gamma$ -cyclodextrin complex in aqueous solutions, 472 (2002) 83

**Full-term**

Stable isotope analysis of fatty acids by gas chromatography-isotope ratio mass spectrometry, 465 (2002) 63

**Fully automated immunoassay system**

Fully automated immunoassay system of endocrine disrupting chemicals using monoclonal antibodies chemically conjugated to bacterial magnetic particles, 475 (2003) 75

**Fulvic acid**

Fractionation and characterization of fulvic acid by immobilized metal ion affinity chromatography, 452 (2002) 85

Application of multivariate curve resolution to the voltammetric study of the complexation of fulvic acids with cadmium(II) ion, 459 (2002) 291

**Furans**

Comparison of immunoaffinity column recovery patterns of polychlorinated dibenzo-*p*-dioxins/polychlorinated dibenzofurans on columns generated with different monoclonal antibody clones and polyclonal antibodies, 457 (2002) 199

**Fuzzy neural network**

Quantitative fuzzy neural network for analytical determination, 468 (2002) 105

**G****Gallic acid**

Determination of gallic acid with 4-nitrobenzenediazonium tetrafluoroborate by diffuse reflectance spectrometry on polyurethane foam, 469 (2002) 295

**Gallium-68**

Separation of  $^{68}\text{Ga}$  from  $^{68}\text{Ge}$  using a macroporous organic polymer containing *N*-methylglucamine groups, 453 (2002) 135

**Garance Lacquer**

Investigation of a Roman age "bulk pigment" found in Vicenza, 475 (2003) 181

**Garlic**

Biosensoric flow-through method for the determination of cysteine sulfoxides, 469 (2002) 155

**Garrote shrinkage**

Use of wavelet transform to enhance piezoelectric signals for analytical purposes, 456 (2002) 93

**Gas analyzer**

Hydrogen fluoride analyzer for gases and aerosols, 460 (2002) 219

**Gas chromatography**

Gas chromatography silica packings with chemically bonded complexes of Cu(II) and Cr(III), 451 (2002) 271

Assessment of uncertainty in pesticide multiresidue analytical methods: main sources and estimation, 454 (2002) 297

Development of a solid-phase microextraction method for the determination of phthalic acid esters in water, 457 (2002) 211

Determination of ethylphenol compounds in wine by headspace solid-phase microextraction in conjunction with gas chromatography and flame ionization detection, 458 (2002) 111

Analysis of organophosphorus pesticides by gas chromatography-mass spectrometry with negative chemical ionization: a study on the ionization conditions, 461 (2002) 97

Analysis of fatty acids by gas chromatography, and its relevance to research on health and nutrition, 465 (2002) 39

Stable isotope analysis of fatty acids by gas chromatography-isotope ratio mass spectrometry, 465 (2002) 63

Gas chromatographic separation of *R/S*- $\alpha$ -hydroxy fatty acid esters, 465 (2002) 299

Analysis of fatty acids in plasma lipoproteins by gas chromatography-flame ionization detection. Quantitative aspects, 465 (2002) 337

Determination of long-chain fatty acids in heart and skeletal muscle by capillary gas chromatography, 465 (2002) 351

Influence of milk fat presence on the determination of *trans* fatty acids in fats used for infant formulae, 465 (2002) 395

Simple and rapid procedure for the determination of individual free fatty acids in serum, 465 (2002) 433

Abraham model in gas chromatography of phenol pollutants, 466 (2002) 151

Gas chromatographic-tandem mass spectrometric identification of phenolic compounds in Sicilian olive oils, 466 (2002) 335

Migration studies from recycled paper packaging materials: development of an analytical method for rapid testing, 467 (2002) 253

Headspace solid phase microextraction for the analysis of the new antifouling agents Irgarol 1051 and Sea Nine 211 in natural waters, 468 (2002) 171

Determination of primary active constituents in *Cannabis* preparations by high-resolution gas chromatography/flame ionization

detection and high-performance liquid chromatography/UV detection, 468 (2002) 245

*N*-Hydroxysuccinimidyl phenylacetate as a novel derivatizing reagent for aliphatic amines in gas chromatography, 468 (2002) 255

#### Gas chromatography-mass spectrometry

Headspace solid-phase micro-extraction gas chromatography-mass detection method for the determination of butyltin compounds in wines, 458 (2002) 231

Measurement of bisphenol A in human serum by gas chromatography/mass spectrometry, 458 (2002) 331

Identification of minor fatty acids in mussels (*Mytilus galloprovincialis*) by GC-MS of their 2-alkenyl-4,4-dimethyloxazoline derivatives, 465 (2002) 409

Rapid determination of diuretics in human urine by gas chromatography-mass spectrometry following microwave assisted derivatization, 475 (2003) 125

#### Gas sensor

Standardization methods for handling instrument related signal shift in gas-sensor array measurement data, 472 (2002) 99

Polyaniline as a new sensitive layer for gas sensors, 475 (2003) 1

Quantitative analysis of gas mixtures by voltammetric sensing, 475 (2003) 17

Portable oral malodor analyzer using highly sensitive  $\text{In}_2\text{O}_3$  gas sensor combined with a simple gas chromatography system, 475 (2003) 27

#### Gas-liquid chromatography

The gas chromatograph in practical analyses of common and uncommon fatty acids for the 21st century, 465 (2002) 175

#### GC

Development of fatty acid analysis by high-performance liquid chromatography, gas chromatography, and related techniques, 465 (2002) 1

Chromatography of very long-chain fatty acids from animal and plant kingdoms, 465 (2002) 273

Analysis by gas chromatography/mass spectrometry of fatty acids and esters in alcoholic beverages and tobaccos, 465 (2002) 309

#### GC/MS

Chromatographic analysis of lipoxigenase products, 465 (2002) 319

#### GC/MS/SIM

Strategy and principles of the simultaneous analysis of prostanoids by gas chromatography/mass spectrometry/selected-ion monitoring, 465 (2002) 379

#### GC-ECD

Ultratrace analysis for *trans,trans*-muconic acid by electrophoric derivatization and capillary gas chromatography, 455 (2002) 111

Relative performance of immunochemical (enzyme-linked immunosorbent assay) and gas chromatography-electron-capture detection techniques to quantify polychlorinated biphenyls in mussel tissues, 461 (2002) 75

Construction and validation of a cryogen free gas chromatography-electron-capture detection system for the measurement of ambient halocarbons, 461 (2002) 85

#### GC-FID

Chromatographic separation and identification of conjugated linoleic acid isomers, 465 (2002) 207

#### GC-FTIR

Chromatographic separation and identification of conjugated linoleic acid isomers, 465 (2002) 207

#### GC-MS

Chromatographic separation and identification of conjugated linoleic acid isomers, 465 (2002) 207

Analysis by gas chromatography/mass spectrometry of fatty acids and esters in alcoholic beverages and tobaccos, 465 (2002) 309

Influence of milk fat presence on the determination of *trans* fatty acids in fats used for infant formulae, 465 (2002) 395

Analytical possibilities for the detection of stanozolol and its metabolites, 473 (2002) 39

Determination of amitraz and other acaricide residues in beeswax, 475 (2003) 97

#### GC-MS of fatty acid derivatives

The gas chromatograph in practical analyses of common and uncommon fatty acids for the 21st century, 465 (2002) 175

#### Gel permeation chromatography

Extraction of humic acids and their fractions in poly(ethylene glycol)-based aqueous biphasic systems, 452 (2002) 95

#### Genapol X-080

Study of high-performance liquid chromatographic separation of selected herbicides by hydro-methanolic and micellar liquid chromatography using Genapol X-080 non-ionic surfactant as mobile phase constituent, 466 (2002) 325

#### Gene expression

Cholera toxin-induced modulation of gene expression: elucidation via cDNA microarray for rational cell-based sensor design, 457 (2002) 97

Fluorescence-based nucleic acid detection and microarrays, 469 (2002) 3

#### Generic FIA-system

Development of a generic flow-injection analysis method for compounds with a secondary amine or amide function, using an experimental design approach. Part II. Selection and evaluation of the chemical reaction parameters, 455 (2002) 117

#### Genetic algorithm

Variable selection for multivariate calibration using a genetic algorithm: prediction of additive concentrations in polymer films from Fourier transform-infrared spectral data, 461 (2002) 189

Simultaneous determination of chromium(VI) and chromium(III) at trace levels by adsorptive stripping voltammetry, 470 (2002) 241

#### Genetic algorithms

Feature selection for hierarchical clustering, 466 (2002) 311

#### Genetically-modified organisms

Survival and polymerase chain reaction-based detection of nucleic acid taggant markers during bacterial growth and sterilization, 475 (2003) 67

**Genomic DNA**

Direct selective detection of genomic DNA from coliform using a fiber optic biosensor, 461 (2002) 37

**Genotoxicity**

SOS-LUX- and LAC-FLUORO-TEST for the quantification of genotoxic and/or cytotoxic effects of heavy metal salts, 456 (2002) 31

**Genotoxicity testing**

Sol-gel luminescence biosensors: Encapsulation of recombinant *E. coli* reporters in thick silicate films, 462 (2002) 11

**Geographical origin**

Use of modern nuclear magnetic resonance spectroscopy in wine analysis: determination of minor compounds, 458 (2002) 77

Characterization of the geographical origin of Italian red wines based on traditional and nuclear magnetic resonance spectroscopic determinations, 458 (2002) 177

**Geological materials**

Determination of niobium, tantalum, zirconium and hafnium in geological materials by extraction chromatography and inductively coupled plasma mass spectrometry, 458 (2002) 375

**Germanium-68**

Separation of  $^{68}\text{Ga}$  from  $^{68}\text{Ge}$  using a macroporous organic polymer containing *N*-methylglucamine groups, 453 (2002) 135

**GFAAS**

Preconcentration of palladium in a flow-through electrochemical cell for determination by graphite furnace atomic absorption spectrometry, 462 (2002) 305

**GFP**

SOS-LUX- and LAC-FLUORO-TEST for the quantification of genotoxic and/or cytotoxic effects of heavy metal salts, 456 (2002) 31

**Ginsenoside  $F_1$** 

Enzyme-linked immunosorbent assay for the determination of 20(S)-protopanaxatriol, 462 (2002) 157

**Glafenine**

Stability indicating spectrophotometric methods for determination of glaufenine using first derivative of ratio spectra and chemometric techniques, 461 (2002) 155

**Glass**

Availability of aluminum from glass and an Al form ion exchanger in the presence of complexing agents and amino acids, 459 (2002) 267

**Glassy carbon electrode**

Poly(isonicotinic acid) modified glassy carbon electrode for electrochemical detection of norepinephrine, 454 (2002) 75

Simultaneous determination of guanine and adenine in DNA using an electrochemically pretreated glassy carbon electrode, 461 (2002) 243

**Glassy carbon microparticles**

Glassy carbon paste electrodes modified with polyphenol oxidase. Analytical applications, 459 (2002) 43

**Glassy carbon paste electrode**

Glassy carbon paste electrodes modified with polyphenol oxidase. Analytical applications, 459 (2002) 43

**Glucocorticoids**

Liquid chromatographic-mass spectrometric analysis of 11 glucocorticoid residues and an optimization of enzymatic hydrolysis conditions in bovine liver, 473 (2002) 127

**Glucosamine**

High-performance liquid chromatographic determination of neutraceuticals, glucosamine sulphate and chitosan, in raw materials and dosage forms, 462 (2002) 125

**Glucose**

Bienzymatic amperometric biosensor for glucose based on polypyrrole/ceramic carbon as electrode material, 451 (2002) 251

Amperometric biosensors employing an insoluble oxidant as an interference-removing agent, 461 (2002) 251

On-line simultaneous monitoring of glucose and acetate with FIA during high cell density fermentation of recombinant *E. coli*, 462 (2002) 293

Monitoring reactive oxygen species in vivo using microdialysis sampling and chemiluminescence detection as an alternative global method for determination of total antioxidant capacity, 467 (2002) 133

**Glucose biosensor**

Glucose and urea biosensors based on all solid-state PVC-NH<sub>2</sub> membrane electrodes, 452 (2002) 29

**Glucose oxidase (GOD)**

Biotinylated alginate immobilization matrix in the construction of an amperometric biosensor: application for the determination of glucose, 453 (2002) 71

Simultaneous detection of uric acid and glucose on a dual-enzyme chip using scanning electrochemical microscopy/scanning chemiluminescence microscopy, 458 (2002) 263

Entrapment of glucose oxidase in non-porous poly(vinyl chloride), 461 (2002) 57

Glucose biosensors prepared by electropolymerization of *p*-chlorophenylamine with and without Nafion, 463 (2002) 239

**Glucose sensor**

Integration of bienzymatic disaccharide sensors for simultaneous determination of disaccharides by means of light addressable potentiometric sensor, 471 (2002) 3

**Glutathione (GSH)**

Direct spectrofluorimetric determination of glutathione in biological samples using 5-maleimidyl-2-(*m*-methylphenyl) benzoxazole, 451 (2002) 211

**Glutathione S-transferase**

Novel fiber-optic biosensor based on immobilized glutathione S-transferase and sol-gel entrapped bromocresol green for the determination of atrazine, 460 (2002) 151

**Glycated hemoglobin**

Membrane-immobilized haptoglobin as affinity matrix for a hemoglobin-A1c immunosensor, 470 (2002) 111

**Glycerol**

Sequential injection flow system with improved sample throughput: determination of glycerol and ethanol in wines, 458 (2002) 131

**Glycerol dehydrogenase**

Sequential injection flow system with improved sample throughput: determination of glycerol and ethanol in wines, 458 (2002) 131

**Glycolytic compounds**

Analysis of glycolytic intermediates in *Saccharomyces cerevisiae* using anion exchange chromatography and electrospray ionization with tandem mass spectrometric detection, 460 (2002) 209

**Glycoprotein**

Differentiation of human serum samples by surface plasmon resonance monitoring of the integral glycoprotein interaction with a lectin panel, 459 (2002) 25

**Glycosidases**

Effects of enzyme treatment and skin extraction on varietal volatiles in Spanish wines made from Chardonnay, Muscat, Airén, and Macabeo grapes, 458 (2002) 39

**Glycosides**

Biogenesis of C<sub>13</sub>-norisoprenoid compounds: experiments supportive for an apo-carotenoid pathway in grapevines, 458 (2002) 3

***Glycyrrhizae radix***

Fast determination of flavonoids in *Glycyrrhizae radix* by capillary zone electrophoresis, 458 (2002) 345

**Glyphosate**

Quantitative nuclear magnetic resonance spectrometry. II. Purity of phosphorus-based agrochemicals glyphosate (*N*-(phosphonomethyl)-glycine) and profenofos (*O*-(4-bromo-2-chlorophenyl) *O*-ethyl *S*-propyl phosphorothioate) measured by <sup>1</sup>H and <sup>31</sup>P QNMR spectrometry, 474 (2002) 125

**Goat-immunoglobulin G (G-IgG)**

Solid substrate room temperature phosphorescence immunoassay based on an antibody labeled with tetramethylrhodamine B isothiocyanate, 470 (2002) 121

**Gold**

Synthesis of amidinothioureido-silica gel and its application to flame atomic absorption spectrometric determination of silver, gold and palladium with on-line preconcentration and separation, 452 (2002) 223

Determination of arsenic in gold samples using matrix exchange differential pulse stripping voltammetry, 453 (2002) 201

Characterization of jewellery products by laser-induced breakdown spectroscopy, 457 (2002) 247

**Gold bands (films)**

Simultaneous and sequential enzyme immunoassays on gold bands with flow electrochemical detection, 453 (2002) 63

**Gold electrode**

Differential pulse voltammetric determination of trace Te(IV) at a poly(3,3'-diaminobenzidine) film modified gold electrode in flow systems, 453 (2002) 209

Characteristics of subtractive anodic stripping voltammetry of Pb and Cd at silver and gold electrodes, 464 (2002) 99

**Gold film**

Electrochemical enzyme immunoassay using immobilized antibody on gold film with monitoring of surface plasmon resonance signal, 463 (2002) 219

**Gold film electrode**

Surface plasmon resonance transients at an electrochemical interface: time resolved measurements using a bicell photodiode, 475 (2003) 47

**Gold nanoparticle**

Electrochemical detection of DNA hybridization based on silver-enhanced gold nanoparticle label, 469 (2002) 165

**Gold uptake**

1,4,8,11-Tetraazacyclotetradecane bound to poly(*p*-chloromethylstyrene-ethylene glycol dimethacrylate) microbeads for selective gold uptake, 464 (2002) 313

**Grain herbicides**

Occurrence and determination of herbicides and their major transformation products in environmental waters, 462 (2002) 187

**GRAM**

Limit of detection estimator for second-order bilinear calibration, 451 (2002) 313

Time shift correction in second-order liquid chromatographic data with iterative target transformation factor analysis, 470 (2002) 163

**Gramicidin**

Membrane supported bilayer lipid membranes array: preparation, stability and ion-channel insertion, 460 (2002) 23

**Grape**

Biogenesis of C<sub>13</sub>-norisoprenoid compounds: experiments supportive for an apo-carotenoid pathway in grapevines, 458 (2002) 3

Ultrasound-assisted extraction and determination of tartaric and malic acids from grapes and winemaking by-products, 458 (2002) 119

**Grape seeds**

Ultrasound-assisted extraction and determination of tartaric and malic acids from grapes and winemaking by-products, 458 (2002) 119

**Graphite furnace atomic absorption spectrometry**

Microwave-assisted digestion procedure for the determination of palladium in road dust, 459 (2002) 257

**Graphite-coated**

Novel coated-graphite membrane sensor based on *N,N'*-dimethylcyanodiaz-18-crown-6 for the determination of ultra-trace amounts of lead, 464 (2002) 181

**Grazing-exit electron probe X-ray microanalysis**

Grazing-exit electron probe X-ray microanalysis of ultra-thin films and single particles with high-angle resolution, 455 (2002) 245

**Groundwater**

Differential pulse cathodic stripping voltammetric determination of nanomolar levels of dissolved sulfide applicable to field analysis of groundwater, 459 (2002) 209

**Group-specific ELISA**

Group-specific enzyme-linked immunosorbent assay for fenitrothion and 3-methyl-4-nitrophenol in water samples based on a polyclonal antibody, 460 (2002) 99

**Growth promotor**

Alternative to vertebrate animal experiments in the study of metabolism of illegal growth promotors and veterinary drugs, 473 (2002) 59

Recent developments in the use and abuse of growth promotors, 473 (2002) 71

Liquid chromatographic-mass spectrometric analysis of 11 glucocorticoid residues and an optimization of enzymatic hydrolysis conditions in bovine liver, 473 (2002) 127

**Guanine**

Simultaneous determination of guanine and adenine in DNA using an electrochemically pretreated glassy carbon electrode, 461 (2002) 243

# H

***H. pylori* antibodies**

Immunochromatographic flow-injection method for detection of human serum immunoglobulin G antibodies to *Helicobacter pylori*, 453 (2002) 53

**Hadamard transform**

Hadamard transform fluorescence image microscopy using one-dimensional movable mask, 468 (2002) 27

**Haemodialysis**

Monitoring urea levels during haemodialysis with a pulsed-flow chemiluminescence analyser, 461 (2002) 131

**Hafnium**

Determination of niobium, tantalum, zirconium and hafnium in geological materials by extraction chromatography and inductively coupled plasma mass spectrometry, 458 (2002) 375

**Hair**

Cloud point preconcentration and flame atomic absorption spectrometric determination of Cd and Pb in human hair, 470 (2002) 215

**Hair analysis**

Removal of exogenously bound elements from human hair by various washing procedures and determination by inductively coupled plasma mass spectrometry, 455 (2002) 23

**Halitosis**

Optical fibre sensor for hydrogen sulphide monitoring in mouth air, 471 (2002) 13

Portable oral malodor analyzer using highly sensitive  $\text{In}_2\text{O}_3$  gas sensor combined with a simple gas chromatography system, 475 (2003) 27

**Halocarbons**

Construction and validation of a cryogen free gas chromatography-electron-capture detection system for the measurement of ambient halocarbons, 461 (2002) 85

**Halofuginone**

Halofuginone contamination in feeds as a cause of residues in eggs, 473 (2002) 177

**Halogenated compounds**

Determination of halogenated hydrocarbons by flow injection ozone chemiluminescence, 451 (2002) 189

**Hand-scanner**

Simple method for colorimetric spot-test quantitative analysis of Fe(III) using a computer controlled hand-scanner, 471 (2002) 97

**Hapten**

Development of a rapid, specific fluorescence polarization immunoassay for the herbicide chlorsulfuron, 468 (2002) 229

**Hapten design**

Indirect competitive immunoassay for trichlorophenol determination. Rational evaluation of the competitor heterology effect, 452 (2002) 191

**Hapten synthesis**

Synthesis of haptens for immunoassay of organophosphorus pesticides and effect of heterology in hapten spacer arm length on immunoassay sensitivity, 475 (2003) 85

**Haptoglobin**

Membrane-immobilized haptoglobin as affinity matrix for a hemoglobin-A1c immunosensor, 470 (2002) 111

**Hazard**

Contribution of European research to endocrine disruptors, 473 (2002) 161

**HbA1c**

Membrane-immobilized haptoglobin as affinity matrix for a hemoglobin-A1c immunosensor, 470 (2002) 111

 **$\gamma$ -HCH**

Dry atmospheric deposition and deposition velocities of dicamba, 2,4-dichlorophenoxyacetic acid and  $\gamma$ -1,2,3,4,5,6-hexachlorocyclohexane, 467 (2002) 245

**Headspace analysis**

Determination of ethylphenol compounds in wine by headspace solid-phase microextraction in conjunction with gas chromatography and flame ionization detection, 458 (2002) 111

**Headspace solid-phase micro-extraction**

Headspace solid-phase micro-extraction gas chromatography-mass detection method for the determination of butyltin compounds in wines, 458 (2002) 231

Cooled internal reflection element for infrared chemical sensing of volatile to semi-volatile organic compounds in the headspace of aqueous solutions, 462 (2002) 235

**Heart**

Determination of long-chain fatty acids in heart and skeletal muscle by capillary gas chromatography, 465 (2002) 351

**Heavy metal**

Spectrafluorimetric method for the rapid screening of toxic heavy metals in water samples, 451 (2002) 203

Calibrationless determination of cadmium, lead and copper in rain samples by stripping voltammetry at mercury microelectrodes. Effect of natural convection on the deposition step, 452 (2002) 65

Use of bioluminescent bacterial sensors as an alternative method for measuring heavy metals in soil extracts, 456 (2002) 55

Heavy metal mobility assessment in sediments based on a kinetic approach of the EDTA extraction: search for optimal experimental conditions, 459 (2002) 245

Covalent binding of genetically engineered microorganisms to porous glass beads, 470 (2002) 71

Improved detection of toxic chemicals using bioluminescent bacteria, 471 (2002) 113

Continuous-flow system for reduction of metal readsorption during sequential extraction of soil, 472 (2002) 147

**Heavy metal monitoring**

Determination of Cd, Cu, Pb and Zn in environmental samples: microwave-assisted total digestion versus aqua regia and nitric acid extraction, 462 (2002) 59

**Heavy metal salts**

SOS-LUX- and LAC-FLUORO-TEST for the quantification of genotoxic and/or cytotoxic effects of heavy metal salts, 456 (2002) 31

**Hemin**

Electrochemical behavior of tryptophan and its derivatives at a glassy carbon electrode modified with hemin, 452 (2002) 245

**Hemoglobin**

$\beta$ -Cyclodextrin sensitized chemiluminescence of hemoglobin-hydrogen peroxide-carbonate and its analytical application, 475 (2003) 163

**Hemorphin-7 peptides**

Quantification of hemorphin-7 peptides by enzyme linked immunosorbent assay with secondary antibody, 461 (2002) 229

**Heparin**

Physical adsorption of protamine for heparin assay using a quartz crystal microbalance and electrochemical impedance spectroscopy, 462 (2002) 261

Resonance Rayleigh scattering, frequency doubling scattering and second-order scattering spectra of the heparin-crystal violet system and their analytical application, 468 (2002) 275

**Heptane sulfonate**

Determination of ethambutol by ion-pair reversed phase liquid chromatography with UV detection, 456 (2002) 189

**Herbicides**

Study of high-performance liquid chromatographic separation of selected herbicides by hydro-methanolic and micellar liquid chromatography using Genapol X-080 non-ionic surfactant as mobile phase constituent, 466 (2002) 325

Molecularly imprinted polymer for metsulfuron-methyl and its binding characteristics for sulfonylurea herbicides, 468 (2002) 217

Determination of chlorophenoxy acid herbicides and their esters in soil by capillary high performance liquid chromatography with ultraviolet detection, using large volume injection and temperature gradient, 470 (2002) 147

**Herbs**

Spectrofluorimetric determination of hydrogen peroxide scavenging activity, 452 (2002) 177

**Heterology**

Indirect competitive immunoassay for trichlorophenol determination. Rational evaluation of the competitor heterology effect, 452 (2002) 191

**Hexoses**

Characterisation of humic substances by acid catalysed transesterification, 452 (2002) 105

**Hg(II)**

Application of generalized artificial neural networks coupled with an orthogonal design to optimization of a system for the kinetic spectrophotometric determination of Hg(II), 469 (2002) 303

**HG-AAS**

Inter-method comparison for the determination of antimony and arsenic in peat samples, 458 (2002) 387

**Hierarchical cluster analysis**

Classification of metal ions according to their complexing properties: a data-driven approach, 455 (2002) 131

**Hierarchical clustering**

Feature selection for hierarchical clustering, 466 (2002) 311

**hIgG**

Protein A immobilized monolithic capillary column for affinity chromatography, 466 (2002) 141

**High performance liquid chromatography (HPLC)**

Influence of the storage conditions on the concentration of clenbuterol in cattle urine samples, 452 (2002) 115

Fluorimetric assay for measuring Dns-His-Lys-Arg-His-Lys cleaving enzyme using high-performance liquid chromatography, 457 (2002) 157

Prediction of  $\log k_w$  of disubstituted benzene derivatives in reversed-phase high-performance liquid chromatography using multiple linear regression and radial basis function neural network, 463 (2002) 89

- Simultaneous determination of levofloxacin and ciprofloxacin in microdialysates and plasma by high-performance liquid chromatography, 463 (2002) 199
- Liquid chromatography of fatty acids with chemiluminescence detection, 465 (2002) 101
- Analysis of fatty acids by column liquid chromatography, 465 (2002) 145
- High performance liquid chromatography of fatty acid metabolites. Improvement of sensitivity by radiometric, fluorimetric and mass spectrometric methods, 465 (2002) 193
- New electrochemical detection method in high-performance liquid chromatography for determining free fatty acids, 465 (2002) 199
- High-performance liquid chromatographic determination of free fatty acids and esterified fatty acids in biological materials as their 2-nitrophenylhydrazides, 465 (2002) 237
- High-performance liquid chromatographic assay of dichlorvos, isocarbophos and methyl parathion from plant leaves using chemiluminescence detection, 474 (2002) 21
- Supported liquid membrane extraction for identification of phenolic compounds in the nutrient solution of closed hydroponic growing systems for tomato, 474 (2002) 49
- High pressure**  
Development and application of a micro-digestion device for elemental analysis of biological samples, 451 (2002) 279
- High throughput**  
Fluorescence-based nucleic acid detection and microarrays, 469 (2002) 3  
High throughput drug screening by direct RNA profiling on DNA sensors, 469 (2002) 141
- High-performance liquid chromatography with electrochemical detection**  
Electrooxidation of pimozone and its differential pulse voltammetric and HPLC-EC determination, 453 (2002) 221
- High-performance liquid chromatography-mass spectrometry**  
Determination of free polyunsaturated fatty acids and their oxidative metabolites by high-performance liquid chromatography (HPLC) and mass spectrometry (MS), 465 (2002) 417
- High-temperature water**  
Separation of polar and non-polar analytes using dimethyl sulfoxide-modified subcritical water, 460 (2002) 185
- High-throughput**  
On-line detection of sulfamethazine and sulfadiazine in porcine bile using a multi-channel high-throughput SPR biosensor, 473 (2002) 143
- Histamine**  
Molecular imprinting-based fluorescent chemosensor for histamine using zinc(II)-protoporphyrin as a functional monomer, 466 (2002) 31
- Historical perspectives of chromatography**  
Development of fatty acid analysis by high-performance liquid chromatography, gas chromatography, and related techniques, 465 (2002) 1
- HMDE**  
Determination of As(III) and arsenic(V) in natural waters by cathodic stripping voltammetry at a hanging mercury drop electrode, 459 (2002) 151
- H<sub>2</sub>O<sub>2</sub> scavenging ability**  
Spectrofluorimetric determination of hydrogen peroxide scavenging activity, 452 (2002) 177
- Hollow fiber membrane solvent microextraction**  
Development of a screening method for cocaine and cocaine metabolites in saliva using hollow fiber membrane solvent microextraction, 458 (2002) 311
- Holocene**  
High-sensitivity measurements of strontium isotopes in polar ice, 469 (2002) 225
- Homocysteine**  
Fluorescent sensing of homocysteine by molecular imprinting, 466 (2002) 17
- Homogeneous fluoroimmunoassay**  
Homogeneous stopped-flow fluoroimmunoassay using europium as label, 460 (2002) 271
- Homovanillic acid**  
Spectrofluorimetric determination of hydrogen peroxide scavenging activity, 452 (2002) 177  
Separation and determination of homovanillic acid and vanillyl-mandelic acid by capillary electrophoresis with electrochemical detection, 461 (2002) 123
- Hormone and veterinary drug residues**  
Database dedicated to information published during the Benelux conferences on hormone and veterinary drug residue analyses, 473 (2002) 53
- Hormones**  
Internal validation of screening methodology for residues of epitenbolone, trenbolone, epi-nortestosterone and nortestosterone in bovine urine using immunoaffinity cartridges for sample clean-up, 473 (2002) 111
- Hot electron**  
Time-resolved electrochemiluminescence of platinum(II) coproporphyrin, 453 (2002) 269  
Hot electron-induced electrogenerated chemiluminescence of 1-aminonaphthalene-4-sulphonate at oxide-covered aluminium electrodes in aqueous solution, 454 (2002) 193  
Heterogeneous and homogeneous electrochemiluminoimmunoassays of hTSH at disposable oxide-covered aluminium electrodes, 458 (2002) 271
- HPCIM**  
Spectral curve deconvolution in micellar systems with H-point curve isolation and H-point standard addition methods, 459 (2002) 119

**HPLC**

- Analysis of polyethoxylated surfactants in microemulsion-oil-water systems. Part II, 452 (2002) 129
- Determination of testosterone and its metabolites using liquid chromatography with elevated column temperature and flow-rate gradient, 457 (2002) 165
- Development of a tandem thin-layer chromatography-high-performance liquid chromatography method for the identification and determination of corticosteroids in cosmetic products, 457 (2002) 187
- High-performance liquid chromatographic determination of neutraceuticals, glucosamine sulphate and chitosan, in raw materials and dosage forms, 462 (2002) 125
- Post-column terbium complexation and sensitized fluorescence detection for the determination of norepinephrine, epinephrine and dopamine using high-performance liquid chromatography, 462 (2002) 179
- High-performance liquid chromatographic fractionation and characterization of fulvic acid, 464 (2002) 47
- Development of fatty acid analysis by high-performance liquid chromatography, gas chromatography, and related techniques, 465 (2002) 1
- High-performance liquid chromatography of fatty acids in biological samples, 465 (2002) 81
- Fluorescent tagging of physiologically important carboxylic acids, including fatty acids, for their detection in liquid chromatography, 465 (2002) 111
- Chromatography of very long-chain fatty acids from animal and plant kingdoms, 465 (2002) 273
- Isolation and separation of individual long-chain acyl-coenzyme A esters, 465 (2002) 427
- Determination of lamivudine and zidovudine in binary mixtures using first derivative spectrophotometric, first derivative of the ratio-spectra and high-performance liquid chromatography-UV methods, 466 (2002) 175
- Detection of microcystins with protein phosphatase inhibition assay, high-performance liquid chromatography-UV detection and enzyme-linked immunosorbent assay. Comparison of methods, 466 (2002) 213
- Quantitation of agmatine by liquid chromatography with laser-induced fluorescence detection, 470 (2002) 155
- Time shift correction in second-order liquid chromatographic data with iterative target transformation factor analysis, 470 (2002) 163
- Determination of  $\beta$ -blockers in pharmaceutical preparations and human urine by high-performance liquid chromatography with tris(2,2'-bipyridyl)ruthenium(II) electrogenerated chemiluminescence detection, 471 (2002) 51
- High-performance liquid chromatographic analysis of Black Cohosh (*Cimicifuga racemosa*) constituents with in-line evaporative light scattering and photodiode array detection, 471 (2002) 61
- Potentiometric detection of *N,N'*-diethylaminoethanol and lysosomotropic amino alcohols in cation exchange high-performance liquid chromatography systems, 472 (2002) 11
- Ion-paired solid phase extraction as a sample preparation strategy for the high-performance liquid chromatographic determination

of oxytetracycline in the bryophyte *Fontinalis antipyretica*, 475 (2003) 117

**HPLC analysis**

- Determination of sophoridine and related lupin alkaloids using tris(2,2'-bipyridine)ruthenium electrogenerated chemiluminescence, 466 (2002) 79

**HPLC/MS-MS**

- Occurrence and determination of herbicides and their major transformation products in environmental waters, 462 (2002) 187

**HPLC-DAD**

- Analytical performance of commercially available and unavailable phenolic compounds using real samples by high-performance liquid chromatography-diode-array detection, 460 (2002) 61
- Simple quantification of endogenous retinoids in bovine serum by high-performance liquid chromatography - diode-array detection, 468 (2002) 237

**HPLC-ICP-MS**

- Measurement of arsenic species in marine macroalgae by microwave-assisted extraction and high performance liquid chromatography-inductively coupled plasma mass spectrometry, 457 (2002) 173

**HPLC-TLS**

- Ultrasensitive assays of *trans*- and *cis*- $\beta$ -carotenes in vegetable oils by high-performance liquid chromatography-thermal lens detection, 460 (2002) 193

**HPLC-TSP-mass spectrometry**

- High-performance liquid chromatography-thermospray ionization-mass spectrometry of the oxidation products of polyunsaturated-fatty acids, 465 (2002) 227

**HPSAM**

- Spectral curve deconvolution in micellar systems with H-point curve isolation and H-point standard addition methods, 459 (2002) 119

**8-HQ**

- A study of microdialysis sampling of metal ions, 456 (2002) 253

**HS-SPME**

- Headspace solid phase microextraction for the analysis of the new antifouling agents Irgarol 1051 and Sea Nine 211 in natural waters, 468 (2002) 171

**Human ferritin**

- Development of an immunosensor for human ferritin, a nonspecific tumor marker, based on a quartz crystal microbalance, 453 (2002) 181

**Human hair**

- Application of multivariate methods to scalp hair metal data to distinguish between drug-free subjects and drug abusers, 455 (2002) 253

**Human plasma**

- Simultaneous analysis of six antiepileptic drugs and two selected metabolites in human plasma by liquid chromatography after solid-phase extraction, 472 (2002) 1

**Human saliva**

Solvent extraction flow-injection manifold for the simultaneous spectrophotometric determination of free cyanide and thiocyanate ions based upon on-line masking of cyanides by formaldehyde, 452 (2002) 295

**Human serum**

Electrooxidation of pimozone and its differential pulse voltammetric and HPLC-EC determination, 453 (2002) 221

Prediction of human serum albumin-drug binding affinity without albumin, 454 (2002) 101

Measurement of bisphenol A in human serum by gas chromatography/mass spectrometry, 458 (2002) 331

Differentiation of human serum samples by surface plasmon resonance monitoring of the integral glycoprotein interaction with a lectin panel, 459 (2002) 25

Electrochemical characterisation of nefazodone hydrochloride and voltammetric determination of the drug in pharmaceuticals and human serum, 462 (2002) 49

Determination of lamivudine and zidovudine in binary mixtures using first derivative spectrophotometric, first derivative of the ratio-spectra and high-performance liquid chromatography-UV methods, 466 (2002) 175

Direct and simultaneous spectrofluorometric determination of naproxen and salicylate in human serum assisted by chemometric analysis, 471 (2002) 87

**Human serum albumin adsorption on gold electrodes**

In situ monitoring of gold-surface adsorption and acidic denaturation of human serum albumin by an isolation-capacitance-adopted electrochemical quartz crystal impedance system, 464 (2002) 65

**Humic acids**

Extraction of humic acids and their fractions in poly(ethylene glycol)-based aqueous biphasic systems, 452 (2002) 95

**Humic substances**

Characterisation of humic substances by acid catalysed transesterification, 452 (2002) 105

High-performance liquid chromatographic fractionation and characterization of fulvic acid, 464 (2002) 47

Crucial role of the detection window in metal ion speciation analysis in aquatic systems: the interplay of thermodynamic and kinetic factors as exemplified by nickel and cobalt, 466 (2002) 285

**Hybrid eluents**

Study of high-performance liquid chromatographic separation of selected herbicides by hydro-methanolic and micellar liquid chromatography using Genapol X-080 non-ionic surfactant as mobile phase constituent, 466 (2002) 325

**Hybridisation**

Towards the optimization of an optical DNA sensor: control of selectivity coefficients and relative surface affinities, 457 (2002) 29

Voltammetric determination of DNA hybridization using methylene blue and self-assembled alkanethiol monolayer on gold electrodes, 462 (2002) 39

Practical physical aspects of interfacial nucleic acid oligomer hybridisation for biosensor design, 469 (2002) 115

Tethered thiazole orange intercalating dye for development of fibre-optic nucleic acid biosensors, 470 (2002) 57

**Hydrated electron**

Hot electron-induced electrogenerated chemiluminescence of 1-aminonaphthalene-4-sulphonate at oxide-covered aluminium electrodes in aqueous solution, 454 (2002) 193

**Hydride generation**

Multisyringe flow-injection system for total inorganic arsenic determination by hydride generation-atomic fluorescence spectrometry, 455 (2002) 277

Determination of tin in soil by continuous hydride generation and inductively coupled plasma mass spectrometry, 456 (2002) 263

Determination of zinc in food using atomic fluorescence spectrometry by hydride generation from organized media, 457 (2002) 305

Determination of As(III) and total inorganic arsenic by flow injection hydride generation atomic absorption spectrometry, 460 (2002) 227

Determination of trace lead by hydride generation-inductively coupled plasma-mass spectrometry, 463 (2002) 177

Study of chemical and spectral interferences in the simultaneous determination of As, Bi, Sb, Se and Sn by hydride generation inductively coupled plasma atomic emission spectrometry, 468 (2002) 71

**Hydride generation atomic absorption spectrometry**

Determination of bismuth, selenium and tellurium in nickel-based alloys and pure copper by flow-injection hydride generation atomic absorption spectrometry—with ascorbic acid pre-reduction and cupferron chelation-extraction, 459 (2002) 161

**Hydride generation atomic fluorescence spectrometry**

Analysis and leaching characteristics of mercury and arsenic in Chinese medicinal material, 453 (2002) 311

**Hydrocortisone**

Spectrophotometric determination of hydrocortisone, nystatin and oxytetracycline in synthetic and pharmaceutical preparations based on various univariate and multivariate methods, 460 (2002) 85

**Hydrogel matrix**

Effect of hydrogel matrix on binding kinetics of protein-protein interactions on sensor surface, 456 (2002) 201

**Hydrogen fluoride**

Hydrogen fluoride analyzer for gases and aerosols, 460 (2002) 219

**Hydrogen peroxide**

Determination of hydrogen peroxide using glassy carbon and graphite/polyester composite electrodes modified by vanadium-doped zirconias, 452 (2002) 11

Determination of hydrogen peroxide by using a flow injection system with immobilized peroxidase and long pathlength capillary spectrophotometry, 455 (2002) 305

Chemiluminescence assay for catechin based on generation of hydrogen peroxide in basic solution, 472 (2002) 75

$\beta$ -Cyclodextrin sensitized chemiluminescence of hemoglobin-hydrogen peroxide-carbonate and its analytical application, 475 (2003) 163

#### Hydrogen sulfide

Portable oral malodor analyzer using highly sensitive  $\text{In}_2\text{O}_3$  gas sensor combined with a simple gas chromatography system, 475 (2003) 27

#### Hydrogen sulphide

Optical fibre sensor for hydrogen sulphide monitoring in mouth air, 471 (2002) 13

#### Hydrolysis

Determination of the sodium monofluorophosphate in a hardened cement paste by ion chromatography, 472 (2002) 37

#### Hydrolytic degradation

Analysis of fatty acid anhydrides and polyanhydrides, 465 (2002) 257

#### Hydroperoxide

High-performance liquid chromatography-thermospray ionization-mass spectrometry of the oxidation products of polyunsaturated fatty acids, 465 (2002) 227

Chromatographic analysis of lipoygenase products, 465 (2002) 319

#### Hydrophobic interaction

Sulfonamide imprinted polymers using co-functional monomers, 452 (2002) 277

#### Hydrophobicity

Evaluation of hydrophobic properties of sodium dodecylsulfate/ $\gamma$ -alumina admicelles based on fluorescence spectra of *N*-phenyl-1-naphthylamine, 454 (2002) 203

#### Hydrothermal

In situ osmotic analyzer for the year-long continuous determination of Fe in hydrothermal systems, 463 (2002) 265

#### Hydrous $\gamma\text{-Al}_2\text{O}_3$

Specific adsorption of halogen anions on hydrous  $\gamma\text{-Al}_2\text{O}_3$ , 470 (2002) 263

#### Hydroxide

High-performance liquid chromatography-thermospray ionization-mass spectrometry of the oxidation products of polyunsaturated fatty acids, 465 (2002) 227

#### Hydroxy acid ester

Gas chromatographic separation of *R/S*- $\alpha$ -hydroxy fatty acid esters, 465 (2002) 299

#### Hydroxy fatty acids

Gas chromatographic and mass spectrometric methods for the characterisation of long-chain fatty acids. Application to wool wax extracts, 465 (2002) 359

#### Hydroxy fatty alcohols

Gas chromatographic and mass spectrometric methods for the characterisation of long-chain fatty acids. Application to wool wax extracts, 465 (2002) 359

#### 3-Hydroxychromones

Ultrasensitive fluorescent probe for the hydrophobic range of solvent polarities, 464 (2002) 273

#### Hydroxyheptadecatrienoic acid

Structural and thermodynamic investigations of metabolites of the thromboxane synthase pathway, 465 (2002) 441

#### 5-Hydroxyindole-3-acetic acid

New microdialysis-electrochemical device for simultaneous determination of ascorbic acid and 5-hydroxyindole-3-acetic acid in rat striatum, 458 (2002) 337

#### Hydroxylations

High performance liquid chromatography of fatty acid metabolites. Improvement of sensitivity by radiometric, fluorimetric and mass spectrometric methods, 465 (2002) 193

#### 8-Hydroxyquinoline

Improved method for shipboard determination of iron in seawater by flow injection analysis, 453 (2002) 21

Speciation of chromium(III) and chromium(VI) by in situ separation and sequential determination with electrothermal vaporization inductively coupled plasma atomic emission spectrometry, 471 (2002) 121

#### 8-Hydroxyquinoline derivatives

Comparative study of 8-hydroxyquinoline derivatives as chelating reagents for flow-injection preconcentration of cobalt in a knotted reactor, 453 (2002) 143

#### 8-Hydroxyquinoline-5-sulphonic acid

Time-based multisyringe flow injection system for the spectrofluorimetric determination of aluminium, 455 (2002) 149

#### Hypercholesterolaemia

Interrelationship between fatty acid composition, lipid peroxidation and alpha-tocopherol consumption post-LDL-apheresis treatment evaluated by liquid chromatography and gas chromatography, 467 (2002) 125

#### Hyphenation

Combination of flow injection with capillary electrophoresis. 8. Miniaturized capillary electrophoresis system with flow injection sample introduction and electrogenerated chemiluminescence detection, 456 (2002) 167

## I

#### IAC

Comparison of immunoaffinity column recovery patterns of polychlorinated dibenzo-*p*-dioxins/polychlorinated dibenzofurans

on columns generated with different monoclonal antibody clones and polyclonal antibodies, 457 (2002) 199

#### **Iberian pork loin**

On-line non-destructive determination of proteins and infiltrated fat in Iberian pork loin by near infrared spectrometry with a remote reflectance fibre optic probe, 453 (2002) 281

#### **IC microchip**

Integrated circuit microchip system with multiplex capillary electrophoresis module for DNA analysis, 466 (2002) 187

#### **Ice cores**

Recent advances in measurement of Pb isotopes in polar ice and snow at sub-picogram per gram concentrations using thermal ionisation mass spectrometry, 453 (2002) 1

#### **ICP-AES**

Automated flow analysis system based on multicommution for Cd, Ni and Pb on-line pre-concentration in a cationic exchange resin with determination by inductively coupled plasma atomic emission spectrometry, 453 (2002) 301

Characterization of the geographical origin of Italian red wines based on traditional and nuclear magnetic resonance spectrometric determinations, 458 (2002) 177

Ion-exchange method for separation and concentration of platinum and palladium for analysis of environmental samples by inductively coupled plasma atomic emission spectrometry, 464 (2002) 7

Determination of Ru, Rh, Pd, Te, Mo and Zr in spent pressurized water reactor fuels by ion exchange and extraction chromatographic separations and inductively coupled plasma atomic emission spectrometric analysis, 475 (2003) 171

#### **ICP-AES analysis**

Dimensional and elemental characterization of suspended particulate matter in natural waters: quantitative aspects in the integrated ultrafiltration, split-flow thin cell and inductively coupled plasma-atomic emission spectrometry approach, 470 (2002) 253

#### **ICP-MS**

Analysis for Cd, Cu, Ni, Zn, and Mn in estuarine water by inductively coupled plasma mass spectrometry coupled with an automated flow injection system, 455 (2002) 11

Removal of exogenously bound elements from human hair by various washing procedures and determination by inductively coupled plasma mass spectrometry, 455 (2002) 23

Accurate and precise lithium isotopic determinations of igneous rock samples using multi-collector inductively coupled plasma mass spectrometry, 456 (2002) 271

Determination of niobium, tantalum, zirconium and hafnium in geological materials by extraction chromatography and inductively coupled plasma mass spectrometry, 458 (2002) 375

Inter-method comparison for the determination of antimony and arsenic in peat samples, 458 (2002) 387

Determination of vanadium, molybdenum and tungsten in complex matrix samples by chelation ion chromatography and on-line

detection with inductively coupled plasma mass spectrometry, 466 (2002) 161

Analysis and comparison of SIMCA models for denominations of origin of wines from de Canary Islands (Spain) builds by means of their trace and ultratrace metals content, 472 (2002) 161

Assessment of dissolution techniques for the analysis of ceramic samples by plasma spectrometry, 474 (2002) 177

#### **ICP-OES**

Assessment of dissolution techniques for the analysis of ceramic samples by plasma spectrometry, 474 (2002) 177

#### **ID-ICP-MS**

Simplified method for the Re-Os dating of molybdenite using acid digestion and isotope dilution ICP-MS, 463 (2002) 111

#### **IgG**

Electrochemical enzyme immunoassay using immobilized antibody on gold film with monitoring of surface plasmon resonance signal, 463 (2002) 219

#### **Igneous rock**

Accurate and precise lithium isotopic determinations of igneous rock samples using multi-collector inductively coupled plasma mass spectrometry, 456 (2002) 271

#### **Imidurea**

Validation of a micellar electrokinetic capillary chromatography method for the determination of imidurea, methyl and propylparabens in a pharmaceutical ointment, 463 (2002) 15

#### **Immobilisation**

Stability of new optical pH sensing material based on cross-linked poly(vinyl alcohol) copolymer, 455 (2002) 207

Immobilization of acetylcholinesterase on screen-printed electrodes: comparative study between three immobilization methods and applications to the detection of organophosphorus insecticides, 464 (2002) 171

#### **Immobilized metal ion affinity chromatography (IMAC)**

Fractionation and characterization of fulvic acid by immobilized metal ion affinity chromatography, 452 (2002) 85

High-performance liquid chromatographic fractionation and characterization of fulvic acid, 464 (2002) 47

#### **Immobilized peroxidase**

Determination of hydrogen peroxide by using a flow injection system with immobilized peroxidase and long pathlength capillary spectrophotometry, 455 (2002) 305

#### **Immunoaffinity**

Comparison of methods for the determination of ochratoxin A in wine, 453 (2002) 33

Internal validation of screening methodology for residues of epi-trenbolone, trenbolone, epi-nortestosterone and nortestosterone in bovine urine using immunoaffinity cartridges for sample clean-up, 473 (2002) 111

**Immunoassay**

- Indirect competitive immunoassay for trichlorophenol determination. Rational evaluation of the competitor heterology effect, 452 (2002) 191
- A compact long-wavelength fluorescence detection system and its application to flow injection immunoassay, 454 (2002) 31
- Chemiluminescence multichannel immunosensor for biodetection, 457 (2002) 3
- Development of a tetramethylrhodamine-labeled probe for a capillary electrophoresis-based competitive immunoassay of staphylococcal enterotoxin B, 457 (2002) 21
- Future of biological aerosol detection, 457 (2002) 125
- Heterogeneous and homogeneous electrochemiluminoimmunoassays of hTSH at disposable oxide-covered aluminum electrodes, 458 (2002) 271
- Heterobifunctional linker between antibodies and reporter genes for immunoassay development, 459 (2002) 169
- Determination of umbilical cord and maternal plasma concentrations of fentanyl by using novel spectrophotometric and chemiluminescence enzyme immunoassays, 459 (2002) 177
- Development of an enzyme-linked immunosorbent assay for pentachlorophenol, 460 (2002) 279
- Relative performance of immunochemical (enzyme-linked immunosorbent assay) and gas chromatography-electron-capture detection techniques to quantify polychlorinated biphenyls in mussel tissues, 461 (2002) 75
- Development of an enzyme immunoassay for linoleic acid diols in urine, 466 (2002) 247
- Evolution of antibodies for environmental monitoring: from mice to plants, 468 (2002) 185
- Assessment of the distribution of pesticides on soil particle fractions in simulated irrigation run-off using centrifugal SPLITT fractionation and ELISA, 468 (2002) 199
- Rapid on-site immunoassay for diflufenuron in grains, 468 (2002) 209
- Reaction cell inductively coupled plasma mass spectrometry-based immunoassay using ferrocene tethered hydroxysuccinimide ester as label for the determination of 2,4-dichlorophenoxyacetic acid, 472 (2002) 55

**Immunochemical rapid assay**

- Monoclonal-based enzyme-linked immunosorbent assay and immunochemical rapid assay for dihydrostreptomycin in milk, 472 (2002) 45

**Immunochemistry**

- Immunochemical flow-injection method for detection of human serum immunoglobulin G antibodies to *Helicobacter pylori*, 453 (2002) 53

**Immunomagnetic separation**

- Rapid and specific detection of bacteria using bioluminescence, 457 (2002) 109

**Immunomembrane**

- Evaluation of a field-test kit for triazine herbicides (SensioScreen<sup>®</sup> TR500) as a fast assay to detect pesticide contamination in water samples, 475 (2003) 105

**Immunosensor**

- Development of an immunosensor for human ferritin, a nonspecific tumor marker, based on a quartz crystal microbalance, 453 (2002) 181
- Quantitation of intracellular recombinant human superoxide dismutase using surface plasmon resonance, 456 (2002) 193
- Direct detection of myoglobin in whole blood using a disposable amperometric immunosensor, 460 (2002) 141
- Membrane-immobilized haptoglobin as affinity matrix for a hemoglobin-A1c immunosensor, 470 (2002) 111
- Immunosensor for okadaic acid using quartz crystal microbalance, 471 (2002) 33

**Immunosupports**

- Development of a heterogeneous chemiluminescent flow immunoassay for DDT and related compounds, 453 (2002) 43

**Import**

- An odyssey—meeting European Union analytical criteria for residues from afar: experiences from North America, 473 (2002) 49

**Impregnation**

- Study of adsorption processes of model drugs at supercritical conditions using partial least squares regression, 452 (2002) 311

**In situ**

- In situ osmotic analyzer for the year-long continuous determination of Fe in hydrothermal systems, 463 (2002) 265

**In vitro expression**

- Heterobifunctional linker between antibodies and reporter genes for immunoassay development, 459 (2002) 169

**In vivo monitoring**

- Luminol chemiluminescence reaction: a new method for monitoring nitric oxide in vivo, 458 (2002) 281

**INAA**

- Inter-method comparison for the determination of antimony and arsenic in peat samples, 458 (2002) 387

**In-capillary derivatization**

- Single-run capillary electrophoretic speciation of iodide and iodine, 466 (2002) 133

**Inclusion complexes**

- Effect of small organic molecules on room temperature phosphorescence properties of naphthol ternary inclusion complexes in  $\beta$ -cyclodextrin, 463 (2002) 135
- Differentiating geometrical isomers of retinoids and controlling their photo-isomerization by complexation with cyclodextrins, 468 (2002) 161

**Inclusion constant**

- Frequency doubling scattering and second-order scattering technology as novel methods for the determination of the inclusion constant of procaine hydrochloride to  $\beta$ -cyclodextrin, 472 (2002) 89

**Incorporation**

Stable isotope analysis of fatty acids by gas chromatography-isotope ratio mass spectrometry, 465 (2002) 63

**Incurred tissues**

Determination of carazolol residues in porcine tissue by radio-receptor assay, 462 (2002) 149

**Indium oxide**

Portable oral malodor analyzer using highly sensitive  $\text{In}_2\text{O}_3$  gas sensor combined with a simple gas chromatography system, 475 (2003) 27

**Indole-3-acetic acid**

'Untypical aging off-flavor' in wine: formation of 2-aminoacetophenone and evaluation of its influencing factors, 458 (2002) 29

**Indoles**

On-line photo-derivatization with flow injection and liquid chromatography-atmospheric pressure electrospray mass spectrometry for the identification of indoles, 460 (2002) 49

**3-Indoxyl phosphate**

Flow amperometric detection of indigo for enzyme-linked immunosorbent assays with use of screen-printed electrodes, 462 (2002) 31

**Inductively coupled plasma**

Determination of trace lead by hydride generation-inductively coupled plasma-mass spectrometry, 463 (2002) 177

Study of chemical and spectral interferences in the simultaneous determination of As, Bi, Sb, Se and Sn by hydride generation inductively coupled plasma atomic emission spectrometry, 468 (2002) 71

**Inductively coupled plasma-atomic emission spectrometry**

Microwave digestion of sludge, soil and sediment samples for metal analysis by inductively coupled plasma-atomic emission spectrometry, 468 (2002) 335

**Inductively coupled plasma-mass spectrometry**

Determination of trace silver in superalloys and steels by inductively coupled plasma-mass spectrometry, 451 (2002) 329

Analysis and leaching characteristics of mercury and arsenic in Chinese medicinal material, 453 (2002) 311

Determination of tin in soil by continuous hydride generation and inductively coupled plasma mass spectrometry, 456 (2002) 263

Measurement of the isotopic composition and atomic weight of an isotopic reference material of platinum, IRMM-010, 460 (2002) 41

Advantages and limitations of the semi-quantitative operation mode of an inductively coupled plasma-mass spectrometer for multi-element analysis of wines, 463 (2002) 165

Determination of calcium, iron and zinc in milk powder by reaction cell inductively coupled plasma mass spectrometry, 470 (2002) 223

Reaction cell inductively coupled plasma mass spectrometry-based immunoassay using ferrocene tethered hydroxysuccinimide ester as label for the determination of 2,4-dichlorophenoxyacetic acid, 472 (2002) 55

**Infant formulae**

Influence of milk fat presence on the determination of *trans* fatty acids in fats used for infant formulae, 465 (2002) 395

**Infants**

Stable isotope analysis of fatty acids by gas chromatography-isotope ratio mass spectrometry, 465 (2002) 63

**In-field analysis**

In-field monitoring of cleaning efficiency in waste water treatment plants using two phenol-sensitive biosensors, 456 (2002) 3

**Infrared**

Cooled internal reflection element for infrared chemical sensing of volatile to semi-volatile organic compounds in the headspace of aqueous solutions, 462 (2002) 235

**Infrared fibre optic**

Remote microwave wavelength spectrometry using an infrared fibre optic telecommunication network, 463 (2002) 1

**Infrared spectrometry**

Methods for coating filter paper for solid-phase microextraction with luminescence detection and characterization of the coated filter paper by infrared spectrometry, 474 (2002) 77

**Injections**

Enantiomeric analysis of methotrexate in pharmaceuticals by cyclodextrin-modified capillary electrophoresis, 471 (2002) 211

**In-line preconcentration**

Flow system with in-line separation/preconcentration coupled to graphite furnace atomic absorption spectrometry with W-Rh permanent modifier for copper determination in seawater, 463 (2002) 275

**Inosine**

Voltammetric determination of DNA hybridization using methylene blue and self-assembled alkanethiol monolayer on gold electrodes, 462 (2002) 39

**Insoluble residue**

Determination of Ru, Rh, Pd, Te, Mo and Zr in spent pressurized water reactor fuels by ion exchange and extraction chromatographic separations and inductively coupled plasma atomic emission spectrometric analysis, 475 (2003) 171

**Integrated biosensor**

Integration of bienzymatic disaccharide sensors for simultaneous determination of disaccharides by means of light addressable potentiometric sensor, 471 (2002) 3

**Integrated optical waveguide (IOW)**

Starch-iodine films respond to water vapor, 455 (2002) 49

**Intercalation**

Tethered thiazole orange intercalating dye for development of fibre-optic nucleic acid biosensors, 470 (2002) 57

**Interfacial DNA**

Interfacial nucleic acid chemistry studied by acoustic shear wave propagation, 469 (2002) 101

**Interference**

- Amperometric biosensors employing an insoluble oxidant as an interference-removing agent, 461 (2002) 251
- Reducing the interference from CO<sub>2</sub> or organic acids in ion-selective polymer membrane sensors having a field-effect transistor as internal reference element, 464 (2002) 79

 **$\alpha$ -Interferon**

- A compact long-wavelength fluorescence detection system and its application to flow injection immunoassay, 454 (2002) 31

**Internal quality control**

- Strategies for internal quality control in antidoping analyses, 460 (2002) 289

**International food residue conferences**

- Database dedicated to information published during the Benelux conferences on hormone and veterinary drug residue analyses, 473 (2002) 53

**Introduction**

- Heavy metal mobility assessment in sediments based on a kinetic approach of the EDTA extraction: search for optimal experimental conditions, 459 (2002) 245

**Inverse-flow derivatization**

- Inverse-flow derivatization for capillary electrophoresis of DNA fragments with laser-induced fluorescence detection, 470 (2002) 129

**Iodide**

- Simultaneous coulometric determination of iodide, bromide and chloride in a mixture by automated coupling of constant current chronopotentiometry and square wave voltammetry, 464 (2002) 115
- Single-run capillary electrophoretic speciation of iodide and iodine, 466 (2002) 133

**Iodide determination**

- Cobalt(II) and nickel(II) complexes of a cyclam derivative as carriers in iodide-selective electrodes, 459 (2002) 229

**Iodide ion**

- Fabrication of a covalently attached multilayer film electrode containing cobalt phthalocyanine and its application as a potentiometric sensor of iodide ion, 455 (2002) 61

**Iodide oxidation**

- Spectrophotometric analysis of iodide oxidation by chlorine in highly mineralized solutions, 456 (2002) 105

**Iodine**

- Single-run capillary electrophoretic speciation of iodide and iodine, 466 (2002) 133

**Iodine species**

- Spectrophotometric analysis of iodide oxidation by chlorine in highly mineralized solutions, 456 (2002) 105

**Ion carriers**

- Membrane supported bilayer lipid membranes array: preparation, stability and ion-channel insertion, 460 (2002) 23

**Ion channels**

- Membrane supported bilayer lipid membranes array: preparation, stability and ion-channel insertion, 460 (2002) 23

**Ion chromatography**

- Determination of the sodium monofluorophosphate in a hardened cement paste by ion chromatography, 472 (2002) 37

**Ion exchange**

- Removal of iron, copper and manganese from white wines through ion exchange techniques: effects on their organoleptic characteristics and susceptibility to browning, 458 (2002) 197
- Availability of aluminum from glass and an Al form ion exchanger in the presence of complexing agents and amino acids, 459 (2002) 267
- Performance of the diffusive gradients in thin films technique for measuring Ca and Mg in freshwater, 460 (2002) 247

**Ion exchange and HDEHP extraction chromatography**

- Determination of Ru, Rh, Pd, Te, Mo and Zr in spent pressurized water reactor fuels by ion exchange and extraction chromatographic separations and inductively coupled plasma atomic emission spectrometric analysis, 475 (2003) 171

**Ion exchange membrane**

- Application of a cellulose phosphate ion exchange membrane as a binding phase in the diffusive gradients in thin films technique for measurement of trace metals, 464 (2002) 331

**Ion mobility spectrometry**

- Laser desorption-ionization of polycyclic aromatic hydrocarbons from glass surfaces with ion mobility spectrometry analysis, 453 (2002) 231
- Fingerprinting bacterial strains using ion mobility spectrometry, 457 (2002) 83
- Separation of benzodiazepines by electrospray ionization ion mobility spectrometry-mass spectrometry, 457 (2002) 235
- Automated control and optimisation of ion mobility spectrometry responses using a sheath-flow inlet, 463 (2002) 143

**Ion mobility spectrometry (IMS)**

- Determination of volatile biogenic amines in muscle food products by ion mobility spectrometry, 463 (2002) 155
- Novel application for ion mobility spectrometry: diagnosing vaginal infections through measurement of biogenic amines, 474 (2002) 115

**Ion pair extraction**

- Evaluation of Gibbs free energy for the transfer of a highly hydrophilic ion from an acidic aqueous solution to an organic solution based on ion pair extraction, 452 (2002) 149

**Ion selective electrode**

- Determination of polyethoxylated non-ionic surfactants using potentiometric flow injection systems. Improvement of the detection limits employing an on-line pre-concentration stage, 454 (2002) 217
- Potentiometric determination of fluoride in geological and biological samples following pyrohydrolytic decomposition, 466 (2002) 117

**Ion sensor**

Chronocoulometric flow-injection analysis with solvent polymeric membrane ion sensors, 459 (2002) 11

**Ion-exchange**

Evaluation of electrodeless gold deposited on porous silica for ligand attachment for metal ion-exchange, 454 (2002) 37

Lead-selective fluorescent optode membrane based on 3,3',5,5'-tetramethyl-N-(9-anthrylmethyl)benzidine, 460 (2002) 123

Implementation of suitable flow injection/sequential injection-sample separation/preconcentration schemes for determination of trace metal concentrations using detection by electrothermal atomic absorption spectrometry and inductively coupled plasma mass spectrometry, 467 (2002) 3

Iron(II) and iron(III) determination by potentiometry and ion-exchange voltammetry at ionomer-coated electrodes, 474 (2002) 147

**Ion-exchange cartridge**

Capillary electrophoresis with electrochemiluminescence detection of procyclidine in human urine pretreated by ion-exchange cartridge, 470 (2002) 137

**Ion-exclusion chromatography**

Environmental analysis of aliphatic carboxylic acids by ion-exclusion chromatography, 465 (2002) 157

Vacancy ion-exclusion chromatography of carboxylic acids on a strongly acidic cation-exchange resin, 474 (2002) 31

**Ionophore**

Lithium sensor based on the laser scanning semiconductor transducer, 459 (2002) 1

**Ion-pair HPLC**

Determination of ethambutol by ion-pair reversed phase liquid chromatography with UV detection, 456 (2002) 189

**Ion-paired**

Ion-paired solid phase extraction as a sample preparation strategy for the high-performance liquid chromatographic determination of oxytetracycline in the bryophyte *Fontinalis antipyretica*, 475 (2003) 117

**Ion-selective bulk optode**

Poly(vinyl chloride)-membrane ion-selective bulk optode based on 1,10-dibenzyl-1,10-diaza-18-crown-6 and 1-(2-pyridylazo)-2-naphthol for  $\text{Cu}^{2+}$  and  $\text{Pb}^{2+}$  ions, 464 (2002) 187

**Ion-selective electrode**

Cobalt(II) and nickel(II) complexes of a cyclam derivative as carriers in iodide-selective electrodes, 459 (2002) 229

**Ion-selective membrane**

Ion-sensor property and blood compatibility of neutral-carrier-type poly(vinyl chloride) membranes coated by phosphorylcholine polymers, 463 (2002) 31

**Ion-selective polymeric membrane**

Zirconium(IV)-porphyrins as novel ionophores for fluoride-selective polymeric membrane electrodes, 468 (2002) 133

**Ionsuppression**

Analysis of glycolytic intermediates in *Saccharomyces cerevisiae* using anion exchange chromatography and electrospray ionization with tandem mass spectrometric detection, 460 (2002) 209

**IR spectroscopy**

Application of quantitative IR spectral analysis of bacterial cells to acetone-butanol-ethanol fermentation monitoring, 471 (2002) 127

**Irgarol 1051**

Headspace solid phase microextraction for the analysis of the new antifouling agents Irgarol 1051 and Sea Nine 211 in natural waters, 468 (2002) 171

**IRMS**

Stable isotope analysis of fatty acids by gas chromatography-isotope ratio mass spectrometry, 465 (2002) 63

**Iron**

Column solid-phase extraction with Chromosorb-102 resin and determination of trace elements in water and sediment samples by flame atomic absorption spectrometry, 452 (2002) 77

Spectrophotometric catalytic determination of Fe(III) in estuarine waters using a flow-batch system, 455 (2002) 327

Minimalism approach for determination of Cu, Fe and Zn in serum by simultaneous electrothermal atomic absorption spectrometry, 458 (2002) 321

Exploiting monosegmented flow analysis to perform in-line standard additions using a single stock standard solution in spectrophotometric sequential injection procedures, 466 (2002) 345

Iron(II) and iron(III) determination by potentiometry and ion-exchange voltammetry at ionomer-coated electrodes, 474 (2002) 147

**Iron determination**

In situ osmotic analyzer for the year-long continuous determination of Fe in hydrothermal systems, 463 (2002) 265

**Iron species**

Micelle mediated methodology for the determination of free and bound iron in wines by flame atomic absorption spectrometry, 458 (2002) 241

**Iron(II)**

Continuous shipboard determination of Fe(II) in polar waters using flow injection analysis with chemiluminescence detection, 466 (2002) 261

On-line determination of iron(II) and iron(III) using a spectrophotometric sequential injection system, 467 (2002) 35

**Iron(II) determination**

Development of the continuously variable volume reactor for flow injection analysis. Part 1. Design, capabilities and testing, 455 (2002) 287

**Iron(III)**

On-line determination of iron(II) and iron(III) using a spectrophotometric sequential injection system, 467 (2002) 35

**Irreversible redox couple**

Theoretical and experimental study of the biamperometry for irreversible redox couple in flow system, 470 (2002) 229

**ISE**

Copper(II)-selective electrode based on dithioacetal, 455 (2002) 225

Selective fluoride recognition and potentiometric properties of ion-selective electrodes based on bis(halodiphenylstannyl)alkanes, 467 (2002) 197

**ISFET**

Reducing the interference from CO<sub>2</sub> or organic acids in ion-selective polymer membrane sensors having a field-effect transistor as internal reference element, 464 (2002) 79

Development of a urea biosensor based on a polymeric membrane including zeolite, 466 (2002) 39

Characteristics of the hydrogen ion-sensitive field effect transistors with sol-gel-derived lead titanate gate, 469 (2002) 205

**Isocarbophos**

High-performance liquid chromatographic assay of dichlorvos, isocarbophos and methyl parathion from plant leaves using chemiluminescence detection, 474 (2002) 21

**Isoflavones**

Natively fluorescent isoflavones exhibiting anomalous Stokes' shifts, 468 (2002) 3

**Isolation**

Comparison of immunoaffinity column recovery patterns of polychlorinated dibenzo-*p*-dioxins/polychlorinated dibenzofurans on columns generated with different monoclonal antibody clones and polyclonal antibodies, 457 (2002) 199

**Isolation-capacitance-based combination measurements**

In situ monitoring of gold-surface adsorption and acidic denaturation of human serum albumin by an isolation-capacitance-adopted electrochemical quartz crystal impedance system, 464 (2002) 65

**Isonicotinic acid**

Poly(isonicotinic acid) modified glassy carbon electrode for electrochemical detection of norepinephrine, 454 (2002) 75

**Isooctane**

Simple and rapid procedure for the determination of individual free fatty acids in serum, 465 (2002) 433

**Isoprenaline**

Development of integrated chemiluminescence flow sensor for the determination of adrenaline and isoprenaline, 463 (2002) 257

**Isotope analysis**

Stable isotope analysis of fatty acids by gas chromatography-isotope ratio mass spectrometry, 465 (2002) 63

**Isotope dilution method**

Strategy and principles of the simultaneous analysis of prostanoids by gas chromatography/mass spectrometry/selected-ion monitoring, 465 (2002) 379

**Isotope effect**

Stable isotope analysis of fatty acids by gas chromatography-isotope ratio mass spectrometry, 465 (2002) 63

**Isotope ratio**

Stable isotope analysis of fatty acids by gas chromatography-isotope ratio mass spectrometry, 465 (2002) 63

High-sensitivity measurements of strontium isotopes in polar ice, 469 (2002) 225

**Isotopic composition**

Measurement of the isotopic composition and atomic weight of an isotopic reference material of platinum, IRMM-010, 460 (2002) 41

**Isotopic measurement**

Chlorine stable isotope measurements of chlorinated aliphatic hydrocarbons by thermal ionization mass spectrometry, 455 (2002) 1

**Italian red wines**

Characterization of the geographical origin of Italian red wines based on traditional and nuclear magnetic resonance spectrometric determinations, 458 (2002) 177

**ITTFA**

Time shift correction in second-order liquid chromatographic data with iterative target transformation factor analysis, 470 (2002) 163

## J

**Jaffé reaction**

Comparison of electrochemical, electrophoretic and spectrophotometric methods for creatinine determination in biological fluids, 459 (2002) 187

**Jewellery analysis**

Characterization of jewellery products by laser-induced breakdown spectroscopy, 457 (2002) 247

## K

**Ketones**

Gas chromatography silica packings with chemically bonded complexes of Cu(II) and Cr(III), 451 (2002) 271

**Kinetic analysis**

Kinetic detection of benzene/chloroform and toluene/chloroform vapors using a single quartz piezoelectric crystal coated with calix[6]arene, 464 (2002) 57

**Kinetic extraction**

Heavy metal mobility assessment in sediments based on a kinetic approach of the EDTA extraction: search for optimal experimental conditions, 459 (2002) 245

**Kinetic studies**

Application of the luminol chemiluminescence reaction for the determination of nine corticosteroids, 468 (2002) 43

**Kinetics**

Kinetic study of L-isoleucine transport through a liquid membrane containing di(2-ethylhexyl) phosphoric acid in kerosene, 456 (2002) 157

Quantifying catecholamines using multi-way kinetic modelling, 475 (2003) 137

**Kjeldahl digestion**

Determination of total phosphorus and nitrogen in turbid waters by oxidation with alkaline potassium peroxodisulfate and low pressure microwave digestion, autoclave heating or the use of closed vessels in a hot water bath: comparison with Kjeldahl digestion, 463 (2002) 283

**Knotted reactor**

Comparative study of 8-hydroxyquinoline derivatives as chelating reagents for flow-injection preconcentration of cobalt in a knotted reactor, 453 (2002) 143

Flow injection on-line preconcentration of low levels of Cr(VI) with detection by ETAAS. Comparison of using an open tubular PTFE knotted reactor and a column reactor packed with PTFE beads, 463 (2002) 99

**KO<sub>2</sub>**

Superoxide sensor based on cytochrome c immobilized on mixed-thiol SAM with a new calibration method, 454 (2002) 53

**Kohonen self-organizing map**

Classification of metal ions according to their complexing properties: a data-driven approach, 455 (2002) 131

**Kraft**

Determination of anthraquinone-2-sulfonate in alkaline pulping liquor by spectrophotometry using a Nafion membrane interface, 474 (2002) 69

**Kraton 1107**

Application of factor analysis for resolving thermogravimetric-mass spectrometric analysis spectra, 461 (2002) 215

# L

**Lab-on-valve**

Implementation of suitable flow injection/sequential injection-sample separation/preconcentration schemes for determination of trace metal concentrations using detection by electrothermal atomic absorption spectrometry and inductively coupled plasma mass spectrometry, 467 (2002) 3

**Laboratory-made extraction vessel**

Pressurised hot water extraction and thermal desorption of polycyclic aromatic hydrocarbons from sediment with use of a novel extraction vessel, 466 (2002) 93

**Laccase**

Development of a laccase-based flow injection electrochemical biosensor for the determination of phenolic compounds and its application for monitoring remediation of Kraft E1 paper mill effluent, 463 (2002) 229

 **$\beta$ -Lactam receptor protein**

Biosensor analysis of penicillin G in milk based on the inhibition of carboxypeptidase activity, 468 (2002) 153

**L-Amino acid oxidase**

On-line simultaneous determination of S- and R-perindopril using amperometric biosensors as detectors in flow systems, 467 (2002) 189

**Lamivudine**

Determination of lamivudine and zidovudine in binary mixtures using first derivative spectrophotometric, first derivative of the ratio-spectra and high-performance liquid chromatography-UV methods, 466 (2002) 175

**Langmuir aggregation**

Langmuir aggregation of Evans blue on cetyltrimethylammonium bromide and on proteins and its application, 458 (2002) 417

**Lanolin**

Gas chromatographic and mass spectrometric methods for the characterisation of long-chain fatty acids. Application to wool wax extracts, 465 (2002) 359

**LAPS**

Integration of bienzymatic disaccharide sensors for simultaneous determination of disaccharides by means of light addressable potentiometric sensor, 471 (2002) 3

**Large multi-response experimental design data**

Parallel co-ordinate geometry and principal component analysis for the interpretation of large multi-response experimental designs, 458 (2002) 397

**L-Ascorbic acid**

Flow-injection chemiluminescence determination of ascorbic acid by use of the cerium(IV)-Rhodamine B system, 464 (2002) 289

**Laser**

Aerosol analysis by cavity-ring-down laser spectroscopy, 466 (2002) 1

**Laser desorption**

Laser desorption-ionization of polycyclic aromatic hydrocarbons from glass surfaces with ion mobility spectrometry analysis, 453 (2002) 231

**Laser ionization**

Laser desorption-ionization of polycyclic aromatic hydrocarbons from glass surfaces with ion mobility spectrometry analysis, 453 (2002) 231

**Laser-induced breakdown spectroscopy**

Characterization of jewellery products by laser-induced breakdown spectroscopy, 457 (2002) 247

**Laser-induced fluorescence**

Inverse-flow derivatization for capillary electrophoresis of DNA fragments with laser-induced fluorescence detection, 470 (2002) 129

Quantification of noradrenaline and dopamine in *Portulaca oleracea* L. by capillary electrophoresis with laser-induced fluorescence detection, 471 (2002) 203

**Laser-induced fluorescence detection**

Quantitation of agmatine by liquid chromatography with laser-induced fluorescence detection, 470 (2002) 155

**Latex beads**

Quartz crystal microbalance sensor targeting low molecular weight compounds using oligopeptide binder and peptide-immobilized latex beads, 469 (2002) 183

**LC**

Natively fluorescent isoflavones exhibiting anomalous Stokes' shifts, 468 (2002) 3

**LC/MS**

Chromatographic analysis of lipoxygenase products, 465 (2002) 319

**LC-ED**

In vivo determination of the monoamine neurotransmitters in rat brain by liquid chromatography with a thioctic acid/iridium oxide-palladium modified electrode, 472 (2002) 27

**LC-ESI-MS/MS**

Quantitation of tylosin in swine tissues by liquid chromatography combined with electrospray ionization mass spectrometry, 473 (2002) 167

**LC-MS**

Sonic spray ionization interface for liquid chromatography-mass spectrometry, 468 (2002) 263

Analytical possibilities for the detection of stanozolol and its metabolites, 473 (2002) 39

Liquid chromatographic-mass spectrometric analysis of 11 glucocorticoid residues and an optimization of enzymatic hydrolysis conditions in bovine liver, 473 (2002) 127

**LC-MS analysis**

Countercurrent supercritical fluid extraction of phenolic compounds from aqueous matrices, 460 (2002) 1

**LDL-apheresis**

Interrelationship between fatty acid composition, lipid peroxidation and alpha-tocopherol consumption post-LDL-apheresis treatment evaluated by liquid chromatography and gas chromatography, 467 (2002) 125

**Leaching**

Application of a sequential extraction procedure to study the release of elements from municipal solid waste incineration bottom ash, 451 (2002) 285

**Lead**

Column solid-phase extraction with Chromosorb-102 resin and determination of trace elements in water and sediment samples by flame atomic absorption spectrometry, 452 (2002) 77

Recent advances in measurement of Pb isotopes in polar ice and snow at sub-picogram per gram concentrations using thermal ionisation mass spectrometry, 453 (2002) 1

Electrochemical and quartz crystal microbalance studies of lead(II) deposition and stripping in the presence of copper on a gold electrode modified with 2,2'-bipyridyl in polyaniline, 455 (2002) 69

Determination of nanomolar concentrations of lead and cadmium by anodic-stripping voltammetry at the silver electrode, 457 (2002) 285

Voltammetry using a dental amalgam electrode for heavy metal monitoring of wines and spirits, 458 (2002) 249

Lead-selective fluorescent optode membrane based on 3,3',5,5'-tetramethyl-N-(9-anthrylmethyl)benzidine, 460 (2002) 123

Multi-component analysis by flow injection-diode array detection-spectrophotometry using partial least squares calibration model for simultaneous determination of zinc, cadmium and lead, 461 (2002) 181

Characteristics of subtractive anodic stripping voltammetry of Pb and Cd at silver and gold electrodes, 464 (2002) 99

Voltammetric behavior and trace determination of Pb<sup>2+</sup> at a mercury-free screen-printed silver electrode, 464 (2002) 229

**Lead ion-selective electrode**

Novel coated-graphite membrane sensor based on *N,N'*-dimethylcyanodiazia-18-crown-6 for the determination of ultra-trace amounts of lead, 464 (2002) 181

**Lead isotopes**

Recent advances in measurement of Pb isotopes in polar ice and snow at sub-picogram per gram concentrations using thermal ionisation mass spectrometry, 453 (2002) 1

**Lead titanate**

Characteristics of the hydrogen ion-sensitive field effect transistors with sol-gel-derived lead titanate gate, 469 (2002) 205

**Lead(II)**

Interactions of Pb(II) with particles of a polluted river, 462 (2002) 73

**Lectin panel**

Differentiation of human serum samples by surface plasmon resonance monitoring of the integral glycoprotein interaction with a lectin panel, 459 (2002) 25

**Legislation**

Contribution of European research to anti-microbials and hormones, 473 (2002) 83

Contribution of European research to endocrine disruptors, 473 (2002) 161

**Legumes**

Analytical performance of commercially available and unavailable phenolic compounds using real samples by high-performance liquid chromatography-diode-array detection, 460 (2002) 61

**Leukotoxin**

Development of an enzyme immunoassay for linoleic acid diols in urine, 466 (2002) 247

**Leukotoxin diol**

Development of an enzyme immunoassay for linoleic acid diols in urine, 466 (2002) 247

**Levan**

Future of biological aerosol detection, 457 (2002) 125

**Level width**

Measurement of K shell radiative transition probabilities and  $K$ ,  $L_2$  and  $L_3$  shell/subshell fluorescence yields of some elements in the atomic number range  $30 \leq Z \leq 40$ , 454 (2002) 327

**Levofloxacin**

Simultaneous determination of levofloxacin and ciprofloxacin in microdialysates and plasma by high-performance liquid chromatography, 463 (2002) 199

**LFER**

Potentiometric detection of  $N,N'$ -diethylaminoethanol and lysosomotropic amino alcohols in cation exchange high-performance liquid chromatography systems, 472 (2002) 11

**LGM**

High-sensitivity measurements of strontium isotopes in polar ice, 469 (2002) 225

**Lifetime measurements**

Natively fluorescent isoflavones exhibiting anomalous Stokes' shifts, 468 (2002) 3

**Ligands**

Complexation, liquid-liquid extraction, and transport through a liquid membrane of protonated peptides using crown ethers, 466 (2002) 101

**Light addressable potentiometric sensor**

Integration of bienzymatic disaccharide sensors for simultaneous determination of disaccharides by means of light addressable potentiometric sensor, 471 (2002) 3

**Light emitting diode**

Integrated chemical sensor array platform based on a light emitting diode, xerogel-derived sensor elements, and high-speed pin printing, 470 (2002) 101

**Light-addressable potentiometric sensor**

Lithium sensor based on the laser scanning semiconductor transducer, 459 (2002) 1

**LightCycler<sup>®</sup>**

ResonSense<sup>®</sup>: simple linear fluorescent probes for quantitative homogeneous rapid polymerase chain reaction, 457 (2002) 61

**Lignin**

Characterisation of a wheat straw cell wall residue by various techniques. A comparative study with a synthetic and an extracted lignin, 459 (2002) 133

**Lignocellulosic**

Characterisation of a wheat straw cell wall residue by various techniques. A comparative study with a synthetic and an extracted lignin, 459 (2002) 133

**Limit of detection**

Limit of detection estimator for second-order bilinear calibration, 451 (2002) 313

**Line width**

Measurement of K shell radiative transition probabilities and  $K$ ,  $L_2$  and  $L_3$  shell/subshell fluorescence yields of some elements in the atomic number range  $30 \leq Z \leq 40$ , 454 (2002) 327

**Linear alcohol**

Spectrofluorimetric study of the  $\beta$ -cyclodextrin-dapsone-linear alcohol supramolecular system and determination of dapsone, 469 (2002) 273

**Linear alkylbenzene sulfonates (LASs)**

Fully automated immunoassay system of endocrine disrupting chemicals using monoclonal antibodies chemically conjugated to bacterial magnetic particles, 475 (2003) 75

**Linear discriminant analysis**

Application of multivariate methods to scalp hair metal data to distinguish between drug-free subjects and drug abusers, 455 (2002) 253

**Linoleic acid**

Stable isotope analysis of fatty acids by gas chromatography-isotope ratio mass spectrometry, 465 (2002) 63

**Lipid extraction**

Simple and rapid procedure for the determination of individual free fatty acids in serum, 465 (2002) 433

**Lipid wheat analysis**

Wheat lipids to discriminate species, varieties, geographical origins and crop years, 454 (2002) 315

**Lipoprotein**

Analysis of fatty acids in plasma lipoproteins by gas chromatography-flame ionization detection. Quantitative aspects, 465 (2002) 337

**Lipoprotein metabolism**

Interrelationship between fatty acid composition, lipid peroxidation and alpha-tocopherol consumption post-LDL-apheresis treatment evaluated by liquid chromatography and gas chromatography, 467 (2002) 125

**Lipoxygenase**

Chromatographic analysis of lipoxygenase products, 465 (2002) 319

**Lipoxygenase products**

Chromatographic analysis of lipoxygenase products, 465 (2002) 319

**Liquid chromatographic analysis**

Nickel oxide-modified composite electrode for electrochemical detection of polyhydroxyl compounds in liquid chromatographic analysis, 471 (2002) 195

**Liquid chromatography**

Study of the white-rot fungal degradation of selected phthalocyanine dyes by capillary electrophoresis and liquid chromatography, 451 (2002) 259

Improvement of UV spectrophotometry methodology for the determination of total polycyclic aromatic compounds in contaminated soils, 453 (2002) 245

Mass spectrometric identification of toxins of biological origin, 457 (2002) 71

Effect of oxygenation on polyphenol changes occurring in the course of wine-making, 458 (2002) 15

Analytical methods for the characterization of proteins and peptides in wines, 458 (2002) 63

Direct liquid chromatographic analysis of resveratrol derivatives and flavanols in wines with absorbance and fluorescence detection, 458 (2002) 103

Determination of flurbiprofen in pharmaceutical formulations by UV spectrophotometry and liquid chromatography, 463 (2002) 207

Structural and thermodynamic investigations of metabolites of the thromboxane synthase pathway, 465 (2002) 441

Molecular imprinting in alcohols: utility of a pre-polymer based strategy for synthesizing stereoselective artificial receptor polymers in hydrophilic media, 466 (2002) 11

Simultaneous determination of methylparaben, propylparaben, sodium diclofenac and its degradation product in a topical emulgel by reversed-phase liquid chromatography, 467 (2002) 91

Determination of free formaldehyde in foundry resins as its 2,4-dinitrophenylhydrazone by liquid chromatography, 467 (2002) 97

Cleaning validation in the toiletries industry, 467 (2002) 261

Determination of primary active constituents in *Cannabis* preparations by high-resolution gas chromatography/flame ionization detection and high-performance liquid chromatography/UV detection, 468 (2002) 245

Extraction and preconcentration of polychlorinated dibenzo-*p*-dioxins using the cloud-point methodology. Application to their determination in water samples by high-performance liquid chromatography, 470 (2002) 205

Simultaneous analysis of six antiepileptic drugs and two selected metabolites in human plasma by liquid chromatography after solid-phase extraction, 472 (2002) 1

**Liquid chromatography/electrospray ionisation mass spectrometry**

Effect of oxygenation on polyphenol changes occurring in the course of wine-making, 458 (2002) 15

**Liquid chromatography-mass spectrometry**

Anthocyanin-derived pigments and colour of red wines, 458 (2002) 147

Simultaneous determination of imidacloprid, carbendazim, methiocarb and hexythiazox in peaches and nectarines by liquid chromatography-mass spectrometry, 461 (2002) 109

**Liquid chromatography-negative ion electrospray tandem mass spectrometric**

Confirmatory analysis method for zearanol, its metabolites and related mycotoxins in urine by liquid chromatography-negative ion electrospray tandem mass spectrometry, 473 (2002) 151

**Liquid chromatography-tandem mass spectrometric detection**

Simultaneous determination of sulfadiazine and trimethoprim in animal feed by liquid chromatography with UV and tandem mass spectrometric detection, 473 (2002) 183

**Liquid chromatography-ultraviolet detection**

Simultaneous determination of sulfadiazine and trimethoprim in animal feed by liquid chromatography with UV and tandem mass spectrometric detection, 473 (2002) 183

**Liquid core waveguide**

Spectrophotometric measurement of total inorganic carbon in aqueous solutions using a liquid core waveguide, 451 (2002) 221

**Liquid membrane**

Calix[2]furan[2]pyrrole and related compounds as the neutral carrier in silver ion-selective electrode, 453 (2002) 81

Determination of copper in seawater based on a liquid membrane preconcentration system, 460 (2002) 35

**Liquid membrane electrodes**

Potentiometric detection of *N,N'*-diethylaminoethanol and lysosomotropic amino alcohols in cation exchange high-performance liquid chromatography systems, 472 (2002) 11

**Liquid scintillation**

Comparative study of quenching correction procedures for  $^{90}\text{Sr}/^{90}\text{Y}$  determination by Cerenkov, liquid scintillation and plastic scintillation techniques, 471 (2002) 135

**Liquid scintillator**

Mixed waste reduction in radioactivity determination by using plastic scintillators, 463 (2002) 125

**Liquid waveguide capillary cell**

Determination of hydrogen peroxide by using a flow injection system with immobilized peroxidase and long pathlength capillary spectrophotometry, 455 (2002) 305

**Liquid-liquid extraction (LLE)**

Aroma composition of wine studied by different extraction methods, 458 (2002) 85

Complexation, liquid-liquid extraction, and transport through a liquid membrane of protonated peptides using crown ethers, 466 (2002) 101

Implementation of suitable flow injection/sequential injection-sample separation/preconcentration schemes for determination of trace metal concentrations using detection by electrothermal atomic absorption spectrometry and inductively coupled plasma mass spectrometry, 467 (2002) 3

Development and validation of liquid chromatographic method for the determination of lycopene in plasma, 467 (2002) 115

**Liquid-supported membranes**

Liquid-supported membranes in chromium(VI) optical sensing: transport modelling, 464 (2002) 197

**L-Isoleucine**

Kinetic study of L-isoleucine transport through a liquid membrane containing di(2-ethylhexyl) phosphoric acid in kerosene, 456 (2002) 157

**Listeria**

Coupling conducting polymers and mediated electrochemical responses for the detection of *Listeria*, 475 (2003) 37

**Lithium cobalt oxide**

Determination of stoichiometry of  $\text{Li}_{1+x}\text{CoO}_2$  materials by flame atomic absorption spectrometry and automated potentiometric titration, 455 (2002) 35

**Lithium isotopes**

Accurate and precise lithium isotopic determinations of igneous rock samples using multi-collector inductively coupled plasma mass spectrometry, 456 (2002) 271

**Lithium sensitivity**

Lithium sensor based on the laser scanning semiconductor transducer, 459 (2002) 1

**Liver**

Use of specific bioluminescent cell lines for the detection of steroid hormone (ant)agonists in meat producing animals, 473 (2002) 119

**Livestock production**

Sex hormones originating from different livestock production systems: fate and potential disrupting activity in the environment, 473 (2002) 27

**Localized analysis of thin-films**

Grazing-exit electron probe X-ray microanalysis of ultra-thin films and single particles with high-angle resolution, 455 (2002) 245

**LOEC**

Comparative evaluation of the effects of pesticides in acute toxicity luminescence bioassays, 451 (2002) 195

**Log *H***

Radial basis function network-based quantitative structure-property relationship for the prediction of Henry's law constant, 462 (2002) 101

**Long-term**

In situ osmotic analyzer for the year-long continuous determination of Fe in hydrothermal systems, 463 (2002) 265

**Long-term potential stability**

Development of a micro-planar Ag/AgCl quasi-reference electrode with long-term stability for an amperometric glucose sensor, 462 (2002) 253

**Long-wavelength fluorescence**

A compact long-wavelength fluorescence detection system and its application to flow injection immunoassay, 454 (2002) 31

**Low density lipoprotein**

Low density lipoprotein interaction with amino acid-modified self assembled monolayers on surface plasmon resonance surfaces, 470 (2002) 3

**Low ionic strength**

Spectrophotometric pH measurements of freshwater, 453 (2002) 13

**Low pressure microwave heating**

Determination of total phosphorus and nitrogen in turbid waters by oxidation with alkaline potassium peroxodisulfate and low pressure microwave digestion, autoclave heating or the use of closed vessels in a hot water bath: comparison with Kjeldahl digestion, 463 (2002) 283

**Low-field NMR spectrometry**

Determination of the ethylene oxide content of polyether polyols by low-field  $^1\text{H}$  nuclear magnetic resonance spectrometry, 472 (2002) 133

**Low-polar solvents**

Ultrasensitive fluorescent probe for the hydrophobic range of solvent polarities, 464 (2002) 273

**L-Tyr-containing peptides**

Indirect determination of pepsin activity in human seric protein samples by polyphenol oxidase electrodes, 460 (2002) 163

**L-Tyrosine**

Indirect determination of pepsin activity in human seric protein samples by polyphenol oxidase electrodes, 460 (2002) 163  
An amperometric method for the determination of trace mercury(II) by formation of complexes with L-tyrosine, 464 (2002) 123

**luc-gene**

Use of bioluminescent bacterial sensors as an alternative method for measuring heavy metals in soil extracts, 456 (2002) 55

**Luciferase reporter gene**

Use of specific bioluminescent cell lines for the detection of steroid hormone (ant)agonists in meat producing animals, 473 (2002) 119

**Lucigenin**

Monitoring reactive oxygen species in vivo using microdialysis sampling and chemiluminescence detection as an alternative global method for determination of total antioxidant capacity, 467 (2002) 133

**Luminescence**

Blue and red photoluminescence of bicapped [60]fullerene- $\gamma$ -cyclodextrin complex in aqueous solutions, 472 (2002) 83

**Luminol**

Determination of umbilical cord and maternal plasma concentrations of fentanyl by using novel spectrophotometric and chemiluminescence enzyme immunoassays, 459 (2002) 177

Development of an interference-free chemiluminescence method for monitoring acetylcholine and choline based on immobilized enzymes, 462 (2002) 199

Continuous shipboard determination of Fe(II) in polar waters using flow injection analysis with chemiluminescence detection, 466 (2002) 261

Monitoring reactive oxygen species in vivo using microdialysis sampling and chemiluminescence detection as an alternative global method for determination of total antioxidant capacity, 467 (2002) 133

Novel chemiluminescence method for detection of superoxide anions and its application to dry-cured meat, 467 (2002) 145

Implementation of chemiluminescence detection in the multisyringe flow injection technique, 467 (2002) 155

Application of the luminol chemiluminescence reaction for the determination of nine corticosteroids, 468 (2002) 43

Flow injection determination of cationic surfactants by using *N*-bromosuccinimide and *N*-chlorosuccinimide as new oxidizing agents for luminol chemiluminescence, 468 (2002) 53

#### **Lupin alkaloids**

Determination of sophoridine and related lupin alkaloids using tris(2,2'-bipyridine)ruthenium electrogenerated chemiluminescence, 466 (2002) 79

#### **Lycopene**

Development and validation of liquid chromatographic method for the determination of lycopene in plasma, 467 (2002) 115

#### **Lymphoma**

Cholera toxin-induced modulation of gene expression: elucidation via cDNA microarray for rational cell-based sensor design, 457 (2002) 97

## **M**

#### **Magnesium**

Performance of the diffusive gradients in thin films technique for measuring Ca and Mg in freshwater, 460 (2002) 247

#### **Magnesium(II)**

pH-stat techniques in titrimetric analysis. Part 3. The principles of pH-stat chelatometric titrations, 456 (2002) 313

pH-stat techniques in titrimetric analysis. IV. pH-stat monitoring of chelatometric titrations, 470 (2002) 277

#### **Magnetic beads with attached DNA probe**

Electrochemical enzyme-linked immunoassay in a DNA hybridization sensor, 469 (2002) 73

#### **Magnetic sector**

Accurate and precise lithium isotopic determinations of igneous rock samples using multi-collector inductively coupled plasma mass spectrometry, 456 (2002) 271

#### **Maillard reaction**

Three-way principal component analysis applied to food analysis: an example, 462 (2002) 133

#### **Maize herbicides**

Occurrence and determination of herbicides and their major transformation products in environmental waters, 462 (2002) 187

#### **5-Maleimidyl-2-(*m*-methylphenyl)benzoxazole (MMPB)**

Direct spectrofluorimetric determination of glutathione in biological samples using 5-maleimidyl-2-(*m*-methylphenyl) benzoxazole, 451 (2002) 211

#### **Malic acid**

Ultrasound-assisted extraction and determination of tartaric and malic acids from grapes and winemaking by-products, 458 (2002) 119

#### **Manganese oxidants**

Chemically induced phosphorescence from manganese(II) during the oxidation of various compounds by manganese(III), (IV) and (VII) in acidic aqueous solutions, 451 (2002) 181

#### **Manifold configurations**

Solving the problems of sequential injection systems as process analyzers, 467 (2002) 61

#### **Manometry**

Tuning the parameters for fast respirometry, 460 (2002) 257

#### **Marine sediment**

Tin determination in marine sediment, soil, coal fly ash and coal slurried samples by hydride generation-electrothermal atomic absorption spectrometry, 461 (2002) 261

#### **Mass sensitizing**

Quartz crystal microbalance sensor targeting low molecular weight compounds using oligopeptide binder and peptide-immobilized latex beads, 469 (2002) 183

#### **Mass spectrometric**

Analysis of organophosphorus pesticides by gas chromatography-mass spectrometry with negative chemical ionization: a study on the ionization conditions, 461 (2002) 97

#### **Mass spectrometric detection**

Determination of purines and pyrimidines in beer samples by capillary zone electrophoresis, 454 (2002) 185

High performance liquid chromatography of fatty acid metabolites. Improvement of sensitivity by radiometric, fluorimetric and mass spectrometric methods, 465 (2002) 193

4-Aminoantipyrine spectrophotometric method of phenol analysis. Study of the reaction products via liquid chromatography with diode-array and mass spectrometric detection, 467 (2002) 105

#### **Mass spectrometry (MS)**

Comparison of methods for the determination of ochratoxin A in wine, 453 (2002) 33

Mass spectrometric identification of toxins of biological origin, 457 (2002) 71

Analytical methods for the characterization of proteins and peptides in wines, 458 (2002) 63

On-line photo-derivatization with flow injection and liquid chromatography-atmospheric pressure electrospray mass spectrometry for the identification of indoles, 460 (2002) 49

Determination of trace lead by hydride generation-inductively coupled plasma-mass spectrometry, 463 (2002) 177

Gas chromatographic-tandem mass spectrometric identification of phenolic compounds in Sicilian olive oils, 466 (2002) 335

Migration studies from recycled paper packaging materials: development of an analytical method for rapid testing, 467 (2002) 253

Quantification of methylphenidate in rat, rabbit and dog plasma using a chiral liquid-chromatography/tandem mass spectrometry method. Application to toxicokinetic studies, 469 (2002) 261

#### Matched filtering

Matched filtering with background suppression for improved quality of base peak chromatograms and mass spectra in liquid chromatography-mass spectrometry, 454 (2002) 167

#### Matrix matching

Spectrophotometric catalytic determination of Fe(III) in estuarine waters using a flow-batch system, 455 (2002) 327

#### Maturation

Aroma profile of Portuguese brandies aged in chestnut and oak woods, 458 (2002) 55

#### Meat

An odyssey—meeting European Union analytical criteria for residues from afar: experiences from North America, 473 (2002) 49

#### Mechanism of extraction

Investigation of a liquid-liquid extraction system based on non-ionic surfactant-salt-H<sub>2</sub>O and mechanism of drug extraction, 452 (2002) 321

#### Mediator

Study on the formation of the Prussian blue films on the polypyrrole surface as a potential mediator system for biosensing applications, 472 (2002) 113

#### Medicated feeds

Quantitative analysis for oxytetracycline in medicated premixes and feeds by second-derivative synchronous spectrofluorimetry, 455 (2002) 143

#### Medicated premixes

Quantitative analysis for oxytetracycline in medicated premixes and feeds by second-derivative synchronous spectrofluorimetry, 455 (2002) 143

#### Medium exchange

Differential pulse voltammetric determination of trace Te(IV) at a poly(3,3'-diaminobenzidine) film modified gold electrode in flow systems, 453 (2002) 209

Voltammetry using a dental amalgam electrode for heavy metal monitoring of wines and spirits, 458 (2002) 249

#### Melanoidins

Role of melanoidins in sweet wines, 458 (2002) 169

#### Melatonin

Simple and convenient chemiluminescence method for the determination of melatonin, 455 (2002) 193

#### Meldola Blue

Screen-printed biosensors for the control of wine quality based on lactate and acetaldehyde determination, 458 (2002) 203

#### Membrane

Development of an interference-free chemiluminescence method for monitoring acetylcholine and choline based on immobilized enzymes, 462 (2002) 199

Determination of anthraquinone-2-sulfonate in alkaline pulping liquor by spectrophotometry using a Nafion membrane interface, 474 (2002) 69

#### Membrane filter

Spectrophotometric determination of trace ionic and non-ionic surfactants based on a collection on a membrane filter as the ion associate of the surfactant with Erythrosine B, 455 (2002) 83

#### Membrane filtration

Extraction of humic acids and their fractions in poly(ethylene glycol)-based aqueous biphasic systems, 452 (2002) 95

#### Membrane inlet mass spectrometry

Biodegradation studies of 4-fluorobenzoic acid and 4-fluorocinnamic acid: an evaluation of membrane inlet mass spectrometry as an alternative to high performance liquid chromatography and ion chromatography, 454 (2002) 137

#### MEMS

Surface modification of polymer-based microfluidic devices, 470 (2002) 87

#### Mercapto compound

Cobalt(II)-selective membrane electrode using a recently synthesized mercapto compound, 462 (2002) 245

#### Mercury

Analysis and leaching characteristics of mercury and arsenic in Chinese medicinal material, 453 (2002) 311

Determination of trace levels of mercury in water samples based on room temperature phosphorescence energy transfer, 455 (2002) 179

Sensitized spectrophotometric determination of trace Hg(II) in benzalkonium chloride media, 459 (2002) 75

An amperometric method for the determination of trace mercury(II) by formation of complexes with L-tyrosine, 464 (2002) 123

#### Mercury film electrode

Perfluorinated anion-exchange polymer mercury film electrode for anodic stripping voltammetric determination of zinc(II): effect of model organic compounds, 454 (2002) 93

#### Mercury ion

Cyclodextrin-porphyrin supramolecular sensitizer for mercury(II) ion, 469 (2002) 285

#### Mercury microelectrodes

Calibrationless determination of cadmium, lead and copper in rain samples by stripping voltammetry at mercury microelectrodes. Effect of natural convection on the deposition step, 452 (2002) 65

#### Mercury sulfide

Voltammetric investigation on sulfide ions in aqueous solutions with mercury-coated platinum microelectrodes, 464 (2002) 217

**Mercury vapor**

Pretreatment of water samples using UV irradiation-peroxodisulfate for the determination of total mercury, 454 (2002) 271

**Mercury-coated platinum microelectrodes**

Voltammetric investigation on sulfide ions in aqueous solutions with mercury-coated platinum microelectrodes, 464 (2002) 217

**Meso-tetra(4-trimethylammoniumphenyl) porphyrin**

Multi-component analysis by flow injection-diode array detection-spectrophotometry using partial least squares calibration model for simultaneous determination of zinc, cadmium and lead, 461 (2002) 181

**Metabolism**

Alternative to vertebrate animal experiments in the study of metabolism of illegal growth promoters and veterinary drugs, 473 (2002) 59

**Metabolites**

Simultaneous determination of clozapine, clozapine *N*-oxide, *N*-desmethylclozapine, risperidone, and 9-hydroxyrisperidone in plasma by high performance liquid chromatography with ultra-violet detection, 460 (2002) 201

Supercritical fluid extraction of organochlorine pesticides and some metabolites in frogs from National Park of Ordesa and Monte Perdido, 464 (2002) 303

Analytical possibilities for the detection of stanozolol and its metabolites, 473 (2002) 39

**Metal binding**

Evaluation of electrodeless gold deposited on porous silica for ligand attachment for metal ion-exchange, 454 (2002) 37

**Metal chelates**

Characterisation of a synthesised fluorescent ligand (4-acridinol-1-sulphonic acid) using nuclear magnetic resonance spectroscopy, 454 (2002) 147

**Metal complexation**

Application of multivariate curve resolution to the voltammetric study of the complexation of fulvic acids with cadmium(II) ion, 459 (2002) 291

**Metal ion complexes**

Classification of metal ions according to their complexing properties: a data-driven approach, 455 (2002) 131

**Metal ion detection**

Surface plasmon resonance study on enhanced refractive index change of an Ag<sup>+</sup> ion-sensing membrane containing dithiosquarylium dye, 460 (2002) 133

**Metal ion-exchange**

Characterization of metal ion-exchange on modified surfaces of porous carbon, 455 (2002) 233

**Metal ions**

Silica gel functionalized with resacetophenone: synthesis of a new chelating matrix and its application as metal ion collector for

their flame atomic absorption spectrometric determination, 454 (2002) 229

A study of microdialysis sampling of metal ions, 456 (2002) 253

Spectrophotometric determination of metal ions in electroplating solutions in the presence of EDTA with the aid of multivariate calibration and artificial neural networks, 463 (2002) 305

**Metal oxide semiconductor gas sensors**

Electronic nose based on metal oxide semiconductor sensors as a fast alternative for the detection of adulteration of virgin olive oils, 459 (2002) 219

**Metalloporphyrins**

Time-resolved electrochemiluminescence of platinum(II) coproporphyrin, 453 (2002) 269

**Metals**

Removal of exogenously bound elements from human hair by various washing procedures and determination by inductively coupled plasma mass spectrometry, 455 (2002) 23

Removal of iron, copper and manganese from white wines through ion exchange techniques: effects on their organoleptic characteristics and susceptibility to browning, 458 (2002) 197

Microwave digestion of sludge, soil and sediment samples for metal analysis by inductively coupled plasma-atomic emission spectrometry, 468 (2002) 335

**Metaphos**

Determination of organophosphorus aromatic nitro insecticides by using electric-field cell orientation in microbial suspensions, 462 (2002) 165

**Methodology**

Relative performance of immunochemical (enzyme-linked immunosorbent assay) and gas chromatography-electron-capture detection techniques to quantify polychlorinated biphenyls in mussel tissues, 461 (2002) 75

**Methotrexate**

Enantiomeric analysis of methotrexate in pharmaceuticals by cyclodextrin-modified capillary electrophoresis, 471 (2002) 211

**Methyl chloroformate**

Simple and rapid procedure for the determination of individual free fatty acids in serum, 465 (2002) 433

**Methyl derivatives**

Rapid determination of diuretics in human urine by gas chromatography-mass spectrometry following microwave assisted derivatization, 475 (2003) 125

**Methyl mercaptan**

Portable oral malodor analyzer using highly sensitive In<sub>2</sub>O<sub>3</sub> gas sensor combined with a simple gas chromatography system, 475 (2003) 27

**Methyl parathion**

Assessment of the toxicity of methyl parathion and its photodegradation products in water samples using conductometric enzyme biosensors, 459 (2002) 33

High-performance liquid chromatographic assay of dichlorvos, isocarbophos and methyl parathion from plant leaves using chemiluminescence detection, 474 (2002) 21

#### **Methylene blue**

Voltammetric determination of DNA hybridization using methylene blue and self-assembled alkanethiol monolayer on gold electrodes, 462 (2002) 39

Methylene blue potentiometric sensor for selective determination of sulfide ions, 466 (2002) 47

#### **7-Methylguanosine**

Selective fluorescent and fluorogenic substrates for purine-nucleoside phosphorylases from various sources, and direct fluorimetric determination of enzyme levels in human and animal blood, 472 (2002) 63

#### **3-Methyl-4-nitrophenol**

Group-specific enzyme-linked immunosorbent assay for fenitrotoxin and 3-methyl-4-nitrophenol in water samples based on a polyclonal antibody, 460 (2002) 99

#### **Methylparaben**

Simultaneous determination of methylparaben, propylparaben, sodium diclofenac and its degradation product in a topical emulgel by reversed-phase liquid chromatography, 467 (2002) 91

#### **Methylphenidate (MPH)**

Quantification of methylphenidate in rat, rabbit and dog plasma using a chiral liquid-chromatography/tandem mass spectrometry method. Application to toxicokinetic studies, 469 (2002) 261

#### **Methyltriazolinedione**

Chromatographic separation and identification of conjugated linoleic acid isomers, 465 (2002) 207

#### **Metrology**

Can plasma spectrochemistry assist in improving the accuracy of chemical analysis?, 456 (2002) 63

#### **Metsulfuron-methyl**

Molecularly imprinted polymer for metsulfuron-methyl and its binding characteristics for sulfonylurea herbicides, 468 (2002) 217

#### **Micellar electrokinetic capillary chromatographic**

Validation of a micellar electrokinetic capillary chromatography method for the determination of imidurea, methyl and propylparabens in a pharmaceutical ointment, 463 (2002) 15

#### **Micellar electrokinetic capillary chromatography**

Determination of puerarin and daidzein in *Puerariae radix* and its medicinal preparations by micellar electrokinetic capillary chromatography with electrochemical detection, 452 (2002) 123

Uptake monitoring of anilines and phenols using modified zeolites, 464 (2002) 1

Simultaneous UV and electrochemical determination of the herbicide asulam in tap water samples by micellar electrokinetic capillary chromatography, 469 (2002) 243

#### **Micellar electrokinetic chromatography**

Comparison of electrochemical, electrophoretic and spectrophotometric methods for creatinine determination in biological fluids, 459 (2002) 187

Optimized separation of pharmacologically active xanthenes from *Securidaca inappendiculata* by micellar electrokinetic chromatography and microemulsion electrokinetic chromatography, 474 (2002) 37

#### **Micellar liquid chromatography**

Direct injection micellar liquid chromatographic method for the analysis of corticosteroids in creams, ointments and other pharmaceuticals, 454 (2002) 125

Study of high-performance liquid chromatographic separation of selected herbicides by hydro-methanolic and micellar liquid chromatography using Genapol X-080 non-ionic surfactant as mobile phase constituent, 466 (2002) 325

#### **Micellar systems**

Spectral curve deconvolution in micellar systems with H-point curve isolation and H-point standard addition methods, 459 (2002) 119

#### **Micellar-organic mobile phases**

Micellar-organic versus aqueous-organic mobile phases for the screening of  $\beta$ -blockers, 454 (2002) 109

#### **Microarray**

Fluorescence-based nucleic acid detection and microarrays, 469 (2002) 3

Planar waveguides for ultra-high sensitivity of the analysis of nucleic acids, 469 (2002) 49

High throughput drug screening by direct RNA profiling on DNA sensors, 469 (2002) 141

#### **Microbead**

Renewable microcolumns for automated DNA purification and flow-through amplification: from sediment samples through polymerase chain reaction, 469 (2002) 129

#### **Microbial biosensor**

Microbial biosensor for *p*-nitrophenol using *Moraxella* sp., 470 (2002) 79

#### **Microbiological detection**

Development of a thermostable firefly luciferase, 457 (2002) 115

#### **Microbiology**

Fingerprinting bacterial strains using ion mobility spectrometry, 457 (2002) 83

#### **Microchannel**

Rapid fabrication of electrochemical enzyme sensor chip using polydimethylsiloxane microfluidic channel, 468 (2002) 143

#### **Microchip**

Sensitive capillary electrophoresis microchip determination of trinitroaromatic explosives in nonaqueous electrolyte following solid phase extraction, 469 (2002) 253

**Microcystin**

Detection of microcystins with protein phosphatase inhibition assay, high-performance liquid chromatography–UV detection and enzyme-linked immunosorbent assay. Comparison of methods, 466 (2002) 213

**Microdialysis**

A study of microdialysis sampling of metal ions, 456 (2002) 253  
New microdialysis-electrochemical device for simultaneous determination of ascorbic acid and 5-hydroxyindole-3-acetic acid in rat striatum, 458 (2002) 337

Simultaneous determination of levofloxacin and ciprofloxacin in microdialysates and plasma by high-performance liquid chromatography, 463 (2002) 199

**Microdialysis methodology**

In vitro study of experimental factors affecting the microdialysis results, 459 (2002) 143

**Microdialysis sampling**

Luminol chemiluminescence reaction: a new method for monitoring nitric oxide in vivo, 458 (2002) 281

Monitoring reactive oxygen species in vivo using microdialysis sampling and chemiluminescence detection as an alternative global method for determination of total antioxidant capacity, 467 (2002) 133

In vivo determination of the monoamine neurotransmitters in rat brain by liquid chromatography with a thioctic acid/iridium oxide–palladium modified electrode, 472 (2002) 27

**Micro-digestion**

Development and application of a micro-digestion device for elemental analysis of biological samples, 451 (2002) 279

**Microelectrode**

Voltammetric determination of chloramphenicol in milk at electrochemically activated carbon fibre microelectrodes, 461 (2002) 65

Rapid fabrication of electrochemical enzyme sensor chip using polydimethylsiloxane microfluidic channel, 468 (2002) 143

**Microelectrostatic field**

Langmuir aggregation of Evans blue on cetyltrimethylammonium bromide and on proteins and its application, 458 (2002) 417

**Microemulsion**

Study of different normal-microemulsion compositions by room-temperature phosphorescence to determine benzo[a]pyrene in environmental samples, 474 (2002) 91

**Microemulsion electrokinetic chromatography**

Optimized separation of pharmacologically active xanthenes from *Securidaca inappendiculata* by micellar electrokinetic chromatography and microemulsion electrokinetic chromatography, 474 (2002) 37

**Microextraction**

Methods for coating filter paper for solid-phase microextraction with luminescence detection and characterization of the coated filter paper by infrared spectrometry, 474 (2002) 77

**Microorganism**

Determination of organophosphorus aromatic nitro insecticides by using electric-field cell orientation in microbial suspensions, 462 (2002) 165

**Microphase adsorption-spectral correction technique**

Langmuir aggregation of Evans blue on cetyltrimethylammonium bromide and on proteins and its application, 458 (2002) 417

**Microscopy**

Simultaneous detection of uric acid and glucose on a dual-enzyme chip using scanning electrochemical microscopy/scanning chemiluminescence microscopy, 458 (2002) 263

Fluorescence microscopic quantification of DNA with  $\alpha,\beta,\gamma,\delta$ -tetakis[4-(trimethylammonium)phenyl]porphine by a ring-like deposition technique, 466 (2002) 193

Hadamard transform fluorescence image microscopy using one-dimensional movable mask, 468 (2002) 27

**Microsensor**

New microdialysis-electrochemical device for simultaneous determination of ascorbic acid and 5-hydroxyindole-3-acetic acid in rat striatum, 458 (2002) 337

**Microwave assisted digestion**

Microwave-assisted digestion of organoarsenic compounds for the determination of total arsenic in aqueous, biological, and sediment samples using flow injection hydride generation electrothermal atomic absorption spectrometry, 452 (2002) 207

Microwave-assisted digestion procedure for the determination of palladium in road dust, 459 (2002) 257

**Microwave digestion**

Determination of Cd, Cu, Pb and Zn in environmental samples: microwave-assisted total digestion versus aqua regia and nitric acid extraction, 462 (2002) 59

Microwave digestion of sludge, soil and sediment samples for metal analysis by inductively coupled plasma–atomic emission spectrometry, 468 (2002) 335

Assessment of dissolution techniques for the analysis of ceramic samples by plasma spectrometry, 474 (2002) 177

**Microwave-assisted extraction**

Measurement of arsenic species in marine macroalgae by microwave-assisted extraction and high performance liquid chromatography–inductively coupled plasma mass spectrometry, 457 (2002) 173

**Microwaves**

Rapid determination of diuretics in human urine by gas chromatography–mass spectrometry following microwave assisted derivatization, 475 (2003) 125

**Migration**

Migration studies from recycled paper packaging materials: development of an analytical method for rapid testing, 467 (2002) 253

**Milk**

Biosensor analysis of penicillin G in milk based on the inhibition of carboxypeptidase activity, 468 (2002) 153

Monoclonal-based enzyme-linked immunosorbent assay and immuno-chromatographic rapid assay for dihydrostreptomycin in milk, 472 (2002) 45

#### Milk fat

Influence of milk fat presence on the determination of *trans* fatty acids in fats used for infant formulae, 465 (2002) 395

#### Milk powder

Determination of calcium, iron and zinc in milk powder by reaction cell inductively coupled plasma mass spectrometry, 470 (2002) 223

#### Millimetre wave transition line strengths

Quantitative millimetre wavelength spectrometry at pressures approaching atmospheric. Part I. Absolute determination of transition line strengths and sample concentrations with a confocal Fabry-Perot cavity spectrometer, 466 (2002) 57

#### Mimetic enzyme

Studies on catalytic spectrophotometry using  $\beta$ -cyclodextrin polymer-Schiff base metal complex as mimetic enzyme, 459 (2002) 83

#### Mineral analysis

Mineral analysis (Fe, Zn, Ca, Na, K) of fresh Iberian pork loin by near infrared reflectance spectrometry. Determination of Fe, Na and K with a remote fibre-optic reflectance probe, 468 (2002) 293

#### Minimalism

Minimalism approach for determination of Cu, Fe and Zn in serum by simultaneous electrothermal atomic absorption spectrometry, 458 (2002) 321

#### Minimum description length principle

Use of wavelet transform to enhance piezoelectric signals for analytical purposes, 456 (2002) 93

#### MitoScan<sup>TM</sup>

Comparative evaluation of the effects of pesticides in acute toxicity luminescence bioassays, 451 (2002) 195

#### Mixed anhydride

Analysis of fatty acid anhydrides and polyanhydrides, 465 (2002) 257

#### Mixed azathioether crowns

Novel Ag<sup>+</sup> ion-selective electrodes based on two new mixed azathioether crowns containing a 1,10-phenanthroline sub-unit, 462 (2002) 225

#### Mixed micellar system

Determination of six components in Rhubarb by cyclodextrin-modified micellar electrokinetic chromatography using a mixed micellar system of sodium cholate and sodium taurocholate, 456 (2002) 183

#### Mixed waste

Mixed waste reduction in radioactivity determination by using plastic scintillators, 463 (2002) 125

#### Mixed-thiol monolayer

Superoxide sensor based on cytochrome *c* immobilized on mixed-thiol SAM with a new calibration method, 454 (2002) 53

#### Mixing chamber

Development of the continuously variable volume reactor for flow injection analysis. Part I. Design, capabilities and testing, 455 (2002) 287

#### Mixtures

Comparative evaluation of the effects of pesticides in acute toxicity luminescence bioassays, 451 (2002) 195

#### Mobile phase modifier

Analysis of fatty acids in foods by supercritical fluid chromatography, 465 (2002) 131

#### Mobility

Properties and applications of proteins encapsulated within sol-gel derived materials, 461 (2002) 1

#### Model contaminants

Migration studies from recycled paper packaging materials: development of an analytical method for rapid testing, 467 (2002) 253

#### Model drugs

Study of adsorption processes of model drugs at supercritical conditions using partial least squares regression, 452 (2002) 311

#### Model similarity

Analysis and comparison of SIMCA models for denominations of origin of wines from de Canary Islands (Spain) builds by means of their trace and ultratrace metals content, 472 (2002) 161

#### Moderate breakdown point

Robust regression and outlier detection in the evaluation of robustness tests with different experimental designs, 463 (2002) 53

#### Modified electrode

Solid-state pH nanoelectrode based on polyaniline thin film electrodeposited onto ion-beam etched carbon fiber, 452 (2002) 1

Amperometric detection of nitrite and nitrate at tetraethenated porphyrin-modified electrodes in a continuous-flow assembly, 452 (2002) 23

Electrochemical behavior of tryptophan and its derivatives at a glassy carbon electrode modified with hemin, 452 (2002) 245

Amperometric determination of serum lactate dehydrogenase activity using an ADP-modified graphite electrode, 457 (2002) 275

#### Modified gold electrode

Superoxide sensor based on cytochrome *c* immobilized on mixed-thiol SAM with a new calibration method, 454 (2002) 53

#### Modifier

Optimized separation of pharmacologically active xanthenes from *Securidaca inappendiculata* by micellar electrokinetic chromatography and microemulsion electrokinetic chromatography, 474 (2002) 37

**Molar absorptivity of metal complexes**

Visible spectrophotometric determination of metal ions: the influence of structure on molar absorptivity value of copper(II) complexes in aqueous solution, 459 (2002) 323

**Molecular descriptor**

Radial basis function network-based quantitative structure-property relationship for the prediction of Henry's law constant, 462 (2002) 101

**Molecular farming**

Evolution of antibodies for environmental monitoring: from mice to plants, 468 (2002) 185

**Molecular imprinting**

Sulfonamide imprinted polymers using co-functional monomers, 452 (2002) 277

Molecular imprinting in alcohols: utility of a pre-polymer based strategy for synthesizing stereoselective artificial receptor polymers in hydrophilic media, 466 (2002) 11

Fluorescent sensing of homocysteine by molecular imprinting, 466 (2002) 17

Molecularly imprinted polymer for metsulfuron-methyl and its binding characteristics for sulfonylurea herbicides, 468 (2002) 217

Enantioselective polymer prepared by surface imprinting technique using a bifunctional molecule, 469 (2002) 173

**Molecular modeling**

Indirect competitive immunoassay for trichlorophenol determination. Rational evaluation of the competitor heterology effect, 452 (2002) 191

**Molecular recognition**

Sulfonamide imprinted polymers using co-functional monomers, 452 (2002) 277

Study on molecular recognition of *para*-aminobenzoic acid species by  $\alpha$ -,  $\beta$ - and hydroxypropyl- $\beta$ -cyclodextrin, 458 (2002) 305

Molecular imprinting in alcohols: utility of a pre-polymer based strategy for synthesizing stereoselective artificial receptor polymers in hydrophilic media, 466 (2002) 11

**Molecularly imprinted polymers (MIPs)**

Molecularly imprinted polymers for on-line preconcentration by solid phase extraction of pirimicarb in water samples, 451 (2002) 297

Molecular imprinting-based fluorescent chemosensor for histamine using zinc(II)-protoporphyrin as a functional monomer, 466 (2002) 31

**Molybdenite**

Simplified method for the Re-Os dating of molybdenite using acid digestion and isotope dilution ICP-MS, 463 (2002) 111

**Monitoring**

Evolution of antibodies for environmental monitoring: from mice to plants, 468 (2002) 185

**Monitoring xylitol**

Development of xylitol oxidase-based flow injection analysis for monitoring of xylitol concentrations, 456 (2002) 293

**Monoclonal antibodies (MoAbs)**

Development of an immunosensor for human ferritin, a nonspecific tumor marker, based on a quartz crystal microbalance, 453 (2002) 181

On-line pre-concentration of atrazine by antibody immobilization capillary electrophoresis, 464 (2002) 25

**Monoclonal antibody**

Monoclonal-based enzyme-linked immunosorbent assay and immuno-chromatographic rapid assay for dihydrostreptomycin in milk, 472 (2002) 45

**Monofluorophosphate**

Simultaneous flow-injection determination of fluoride, monofluorophosphate and orthophosphate ions using alkaline phosphatase immobilized on a cellulose nitrate membrane and an open-circulation approach, 467 (2002) 83

**Monolithic rod**

Protein A immobilized monolithic capillary column for affinity chromatography, 466 (2002) 141

**Monte Carlo simulation**

Investigation on the geometric and matrix effects and quantitative determination of K, Cl and S atomic fraction for biomass burning particles by Monte Carlo simulation, 459 (2002) 93

***Moraxella* sp.**

Microbial biosensor for *p*-nitrophenol using *Moraxella* sp., 470 (2002) 79

**Morphological estimator**

Durbin-Watson statistic as a morphological estimator of information content, 454 (2002) 277

**MS/MS**

Gas chromatographic-tandem mass spectrometric identification of phenolic compounds in Sicilian olive oils, 466 (2002) 335

**MS-MS detection**

Analysis of glycolytic intermediates in *Saccharomyces cerevisiae* using anion exchange chromatography and electrospray ionization with tandem mass spectrometric detection, 460 (2002) 209

**MTAD**

Chromatographic separation and identification of conjugated linoleic acid isomers, 465 (2002) 207

**Multianalyte detection**

Chemiluminescence multichannel immunosensor for biodetection, 457 (2002) 3

**Multi-collector**

Accurate and precise lithium isotopic determinations of igneous rock samples using multi-collector inductively coupled plasma mass spectrometry, 456 (2002) 271

**Multicommutated flow system**

Automated spectrophotometric determination of clomipramine on a multicommutated flow system, 467 (2002) 75

**Multicommutation**

- Automated flow analysis system based on multicommution for Cd, Ni and Pb on-line pre-concentration in a cationic exchange resin with determination by inductively coupled plasma atomic emission spectrometry, 453 (2002) 301
- Time-based multisyringe flow injection system for the spectrofluorimetric determination of aluminium, 455 (2002) 149
- Implementation of chemiluminescence detection in the multisyringe flow injection technique, 467 (2002) 155
- Multicommution in flow analysis: concepts, applications and trends, 468 (2002) 119

**Multicomponent analysis**

- Multicomponent acid-base titration by principal component-artificial neural network calibration, 461 (2002) 147

**Multi-element analysis**

- Advantages and limitations of the semi-quantitative operation mode of an inductively coupled plasma-mass spectrometer for multi-element analysis of wines, 463 (2002) 165

**Multi-enrichment**

- Systematic studies on adsorption of trace elements Pt, Pd, Au, Se, Te, As, Hg, Sb on thiol cotton fiber, 456 (2002) 147

**Multiparametric solvent polarity scaling**

- Ultrasensitive fluorescent probe for the hydrophobic range of solvent polarities, 464 (2002) 273

**Multiple linear regression**

- Sonic spray ionization interface for liquid chromatography-mass spectrometry, 468 (2002) 263

**Multi-pumping**

- Multi-pumping in flow analysis: concepts, instrumentation, potentialities, 466 (2002) 125
- Spectrophotometric determination of phytic acid in plant extracts using a multi-pumping flow system, 474 (2002) 161

**Multisyringe**

- Multisyringe flow injection spectrofluorimetric determination of warfarin at trace levels with on-line solid-phase preconcentration, 467 (2002) 13

**Multisyringe flow injection analysis (MSFIA)**

- Time-based multisyringe flow injection system for the spectrofluorimetric determination of aluminium, 455 (2002) 149
- Multisyringe flow-injection system for total inorganic arsenic determination by hydride generation-atomic fluorescence spectrometry, 455 (2002) 277
- Determination of chloride by multisyringe flow injection analysis and sequential injection analysis with potentiometric detection, 467 (2002) 25
- Implementation of chemiluminescence detection in the multisyringe flow injection technique, 467 (2002) 155

**Multivariate**

- Standardization methods for handling instrument related signal shift in gas-sensor array measurement data, 472 (2002) 99

**Multivariate analysis**

- Multivariate classification of rosé wines from different Spanish protected designations of origin, 458 (2002) 187

**Multivariate calibration**

- Variable selection for multivariate calibration using a genetic algorithm: prediction of additive concentrations in polymer films from Fourier transform-infrared spectral data, 461 (2002) 189
- Classification and quantitation of finishing oils by near infrared spectroscopy, 463 (2002) 295
- Spectrophotometric determination of metal ions in electroplating solutions in the presence of EDTA with the aid of multivariate calibration and artificial neural networks, 463 (2002) 305
- Determination of calcium and total hardness in natural waters using a potentiometric sensor array, 464 (2002) 89
- Simultaneous determination of chromium(VI) and chromium(III) at trace levels by adsorptive stripping voltammetry, 470 (2002) 241
- Direct and simultaneous spectrofluorometric determination of naproxen and salicylate in human serum assisted by chemometric analysis, 471 (2002) 87
- Simultaneous determination of fluorophores with overlapped spectra by sequential injection analysis coupled to variable angle scanning fluorescence spectrometry and multivariate linear regression algorithms, 471 (2002) 173

**Multivariate calibration methods**

- Stability indicating spectrophotometric methods for determination of glafenine using first derivative of ratio spectra and chemometric techniques, 461 (2002) 155

**Multivariate curve resolution**

- Resolution of overlapped NMR spectra by two-way multivariate curve resolution alternating least squares with imbedded kinetic fitting, 459 (2002) 277
- Application of multivariate curve resolution to the voltammetric study of the complexation of fulvic acids with cadmium(II) ion, 459 (2002) 291
- Study of solvent effects on the acid-base behaviour of adenine, adenosine 3',5'-cyclic monophosphate and poly(adenylic) acid in acetonitrile-water mixtures using hard-modelling and soft-modelling approaches, 471 (2002) 145

**Multivariate ranking**

- Spectrophotometric determination of metal ions in electroplating solutions in the presence of EDTA with the aid of multivariate calibration and artificial neural networks, 463 (2002) 305

**Multivariate spectrophotometric calibration**

- Chemometric assisted simultaneous spectrophotometric determination of four-component nasal solutions with a reduced number of calibration samples, 453 (2002) 289

**Multivariate statistical analysis**

- Characterization of the geographical origin of Italian red wines based on traditional and nuclear magnetic resonance spectrometric determinations, 458 (2002) 177

**Municipal solid waste**

Application of a sequential extraction procedure to study the release of elements from municipal solid waste incineration bottom ash, 451 (2002) 285

**Mura river**

Chemometrics characterisation of the quality of river water, 462 (2002) 87

**Muscle food**

Determination of volatile biogenic amines in muscle food products by ion mobility spectrometry, 463 (2002) 155

**Mussel**

Relative performance of immunochemical (enzyme-linked immunosorbent assay) and gas chromatography–electron-capture detection techniques to quantify polychlorinated biphenyls in mussel tissues, 461 (2002) 75

**Mussel watch**

Principal component analysis application in polycyclic aromatic hydrocarbons "mussel watch" analyses for source identification, 461 (2002) 201

**Must**

Method for monitoring urea and ammonia in wine and must by flow injection–pervaporation, 471 (2002) 105

**Mutation detection**

Electrochemical detection of DNA hybridization based on silver-enhanced gold nanoparticle label, 469 (2002) 165

**Mycotoxin**

Confirmatory analysis method for zearanol, its metabolites and related mycotoxins in urine by liquid chromatography–negative ion electrospray tandem mass spectrometry, 473 (2002) 151

**Myocardial infarction**

Direct detection of myoglobin in whole blood using a disposable amperometric immunosensor, 460 (2002) 141

**Myoglobin**

Direct detection of myoglobin in whole blood using a disposable amperometric immunosensor, 460 (2002) 141

***Mytilus galloprovincialis***

Identification of minor fatty acids in mussels (*Mytilus galloprovincialis*) by GC–MS of their 2-alkenyl-4,4-dimethylloxazoline derivatives, 465 (2002) 409

# N

***N,N'*-dimethylcyanodiaz-8-crown-6**

Novel coated-graphite membrane sensor based on *N,N'*-dimethylcyanodiaz-18-crown-6 for the determination of ultra-trace amounts of lead, 464 (2002) 181

**NAD<sup>+</sup>**

Immobilisation of lactate dehydrogenase on poly(aniline)–poly(acrylate) and poly(aniline)–poly(vinyl sulphonate) films for use in a lactate biosensor, 453 (2002) 191

**NADH**

Immobilisation of lactate dehydrogenase on poly(aniline)–poly(acrylate) and poly(aniline)–poly(vinyl sulphonate) films for use in a lactate biosensor, 453 (2002) 191

Amperometric determination of serum lactate dehydrogenase activity using an ADP-modified graphite electrode, 457 (2002) 275

Screen-printed biosensors for the control of wine quality based on lactate and acetaldehyde determination, 458 (2002) 203

Flow monitoring of NADH consumption in bioassays based on packed-bed reactors bearing NAD<sup>+</sup>-dependent dehydrogenases. Determination of acetaldehyde using alcohol dehydrogenase, 467 (2002) 225

**Nafion**

Application of a polyaniline based ammonium sensor for the amperometric immunoassay of a urease conjugated Tal I protein, 461 (2002) 49

Glucose biosensors prepared by electropolymerization of *p*-chlorophenylamine with and without Nafion, 463 (2002) 239

Voltammetric behavior and determination of estrogens at Nafion-modified glassy carbon electrode in the presence of cetyltrimethylammonium bromide, 464 (2002) 209

Determination of anthraquinone-2-sulfonate in alkaline pulping liquor by spectrophotometry using a Nafion membrane interface, 474 (2002) 69

**Nafion/poly(1,2-diaminobenzene) bilayer modified electrode**

Simultaneous flow-injection assay of creatinine and creatine in serum by the combined use of a 16-way switching valve, some specific enzyme reactors and a highly selective hydrogen peroxide electrode, 462 (2002) 283

**Nafronyl**

Room-temperature luminescence optosensings based on immobilized active principles actives. Application to nafronyl and naproxen determination in pharmaceutical preparations and biological fluids, 462 (2002) 217

**Nano-CdS**

Synchronous fluorescence determination of protein with functionalized CdS nanoparticles as a fluorescence probe, 466 (2002) 87

**Nanoelectrode**

Solid-state pH nanoelectrode based on polyaniline thin film electrodeposited onto ion-beam etched carbon fiber, 452 (2002) 1

**Nanoparticles**

Preparation and application of functionalized nanoparticles of CdS as a fluorescence probe, 468 (2002) 35

**Naphthofluorescein**

A compact long-wavelength fluorescence detection system and its application to flow injection immunoassay, 454 (2002) 31

**Naphthol**

Effect of small organic molecules on room temperature phosphorescence properties of naphthol ternary inclusion complexes in  $\beta$ -cyclodextrin, 463 (2002) 135

**Naproxen**

Room-temperature luminescence optosensings based on immobilized active principles. Application to nafenyl and naproxen determination in pharmaceutical preparations and biological fluids, 462 (2002) 217

Direct and simultaneous spectrofluorometric determination of naproxen and salicylate in human serum assisted by chemometric analysis, 471 (2002) 87

**Natural abundance**

Stable isotope analysis of fatty acids by gas chromatography–isotope ratio mass spectrometry, 465 (2002) 63

**Natural organic matter**

Crucial role of the detection window in metal ion speciation analysis in aquatic systems: the interplay of thermodynamic and kinetic factors as exemplified by nickel and cobalt, 466 (2002) 285

**Natural water**

Spectrophotometric analysis of iodide oxidation by chlorine in highly mineralized solutions, 456 (2002) 105

Determination of calcium and total hardness in natural waters using a potentiometric sensor array, 464 (2002) 89

Crucial role of the detection window in metal ion speciation analysis in aquatic systems: the interplay of thermodynamic and kinetic factors as exemplified by nickel and cobalt, 466 (2002) 285

Flow-injection chemiluminescent determination of nitrite in water based on the formation of peroxynitrite from the reaction of nitrite and hydrogen peroxide, 474 (2002) 107

**N-Bromosuccinimide (NBS)**

Flow injection determination of cationic surfactants by using *N*-bromosuccinimide and *N*-chlorosuccinimide as new oxidizing agents for luminol chemiluminescence, 468 (2002) 53

**N-Chlorosuccinimide (NCS)**

Flow injection determination of cationic surfactants by using *N*-bromosuccinimide and *N*-chlorosuccinimide as new oxidizing agents for luminol chemiluminescence, 468 (2002) 53

**Near infrared**

Trace metal studies of selected white wines: an alternative approach, 458 (2002) 223

**Near infrared (NIR) spectroscopy**

Determination of organic matter in soils using radial basis function networks and near infrared spectroscopy, 453 (2002) 125

**Near infrared spectrometry**

Maintenance of a calibration model for near infrared spectrometry by a combined principal component analysis–partial least squares approach, 452 (2002) 35

On-line non-destructive determination of proteins and infiltrated fat in Iberian pork loin by near infrared spectrometry with a remote reflectance fibre optic probe, 453 (2002) 281

Mineral analysis (Fe, Zn, Ca, Na, K) of fresh Iberian pork loin by near infrared reflectance spectrometry. Determination of Fe, Na and K with a remote fibre-optic reflectance probe, 468 (2002) 293

**Near-IR fluorescence**

Near-infrared fluorimetric determination of nucleic acids by shifting the ion-association equilibrium between heptamethylene cyanine and Alcian blue 8GX, 461 (2002) 235

**Nefazodone hydrochloride**

Electrochemical characterisation of nefazodone hydrochloride and voltammetric determination of the drug in pharmaceuticals and human serum, 462 (2002) 49

**Negative chemical ionization**

Analysis of organophosphorus pesticides by gas chromatography–mass spectrometry with negative chemical ionization: a study on the ionization conditions, 461 (2002) 97

**NEIS no. 3 Chlorella**

Determination of total phosphorus and nitrogen in turbid waters by oxidation with alkaline potassium peroxodisulfate and low pressure microwave digestion, autoclave heating or the use of closed vessels in a hot water bath: comparison with Kjeldahl digestion, 463 (2002) 283

**NEIS no. 2 pond sediment**

Determination of total phosphorus and nitrogen in turbid waters by oxidation with alkaline potassium peroxodisulfate and low pressure microwave digestion, autoclave heating or the use of closed vessels in a hot water bath: comparison with Kjeldahl digestion, 463 (2002) 283

**Nerve agents**

Dual amperometric–potentiometric biosensor detection system for monitoring organophosphorus neurotoxins, 469 (2002) 197

**Net analyte preprocessing**

Chemometric assisted simultaneous spectrophotometric determination of four-component nasal solutions with a reduced number of calibration samples, 453 (2002) 289

Direct and simultaneous spectrofluorometric determination of naproxen and salicylate in human serum assisted by chemometric analysis, 471 (2002) 87

**Net analyte signal-based methods**

Comparative study of net analyte signal-based methods and partial least squares for the simultaneous determination of amoxycillin and clavulanic acid by stopped-flow kinetic analysis, 463 (2002) 75

**Neural network**

Prediction of  $\log k_w$  of disubstituted benzene derivatives in reversed-phase high-performance liquid chromatography using multiple linear regression and radial basis function neural network, 463 (2002) 89

**Neurotransmitter**

In vivo determination of the monoamine neurotransmitters in rat brain by liquid chromatography with a thioctic acid/iridium oxide–palladium modified electrode, 472 (2002) 27

**Neutraceuticals**

High-performance liquid chromatographic determination of neutraceuticals, glucosamine sulphate and chitosan, in raw materials and dosage forms, 462 (2002) 125

**Neutral form**

Lipophilic derivative of rhodamine 19: characterization and spectroscopic properties, 468 (2002) 13

**Neutral ionophore**

Optical test strip for calcium determination based on a neutral ionophore, 451 (2002) 231

**Neutral red**

Investigation on the inclusion behavior of *neutral red* with  $\beta$ -cyclodextrin, hydroxypropyl- $\beta$ -cyclodextrin and sulfobutyl-ether- $\beta$ -cyclodextrin, 474 (2002) 189

**N-Hydroxysuccinimidyl phenylacetate (SIPA)**

N-Hydroxysuccinimidyl phenylacetate as a novel derivatizing reagent for aliphatic amines in gas chromatography, 468 (2002) 255

**Ni**

Determination of trace elements in biological materials using tetramethylammonium hydroxide for sample preparation, 470 (2002) 195

**Nickel**

Column solid-phase extraction with Chromosorb-102 resin and determination of trace elements in water and sediment samples by flame atomic absorption spectrometry, 452 (2002) 77

Crucial role of the detection window in metal ion speciation analysis in aquatic systems: the interplay of thermodynamic and kinetic factors as exemplified by nickel and cobalt, 466 (2002) 285

**Nickel(II) complexes**

Cobalt(II) and nickel(II) complexes of a cyclam derivative as carriers in iodide-selective electrodes, 459 (2002) 229

**Nickel-based alloy**

Determination of bismuth, selenium and tellurium in nickel-based alloys and pure copper by flow-injection hydride generation atomic absorption spectrometry—with ascorbic acid pre-reduction and cupferron chelation-extraction, 459 (2002) 161

**Niobium**

Determination of niobium, tantalum, zirconium and hafnium in geological materials by extraction chromatography and inductively coupled plasma mass spectrometry, 458 (2002) 375

**NIR Spectroscopy**

Classification and quantitation of finishing oils by near infrared spectroscopy, 463 (2002) 295

**Nitrate**

Amperometric detection of nitrite and nitrate at tetra-ruthenated porphyrin-modified electrodes in a continuous-flow assembly, 452 (2002) 23

A simple automated method for the speciation of dissolved inorganic nitrogen in seawater, 469 (2002) 235

Chemiluminescent flow-injection analysis of nitrates in water using on-line ultraviolet photolysis, 474 (2002) 99

**Nitric oxide**

Novel nitric oxide microsensor and its application to the study of smooth muscle cells, 455 (2002) 199

Luminol chemiluminescence reaction: a new method for monitoring nitric oxide in vivo, 458 (2002) 281

**Nitrite**

Amperometric detection of nitrite and nitrate at tetra-ruthenated porphyrin-modified electrodes in a continuous-flow assembly, 452 (2002) 23

A simple automated method for the speciation of dissolved inorganic nitrogen in seawater, 469 (2002) 235

Flow-injection chemiluminescent determination of nitrite in water based on the formation of peroxynitrite from the reaction of nitrite and hydrogen peroxide, 474 (2002) 107

**Nitrogen**

Determination of total phosphorus and nitrogen in turbid waters by oxidation with alkaline potassium peroxodisulfate and low pressure microwave digestion, autoclave heating or the use of closed vessels in a hot water bath: comparison with Kjeldahl digestion, 463 (2002) 283

A simple automated method for the speciation of dissolved inorganic nitrogen in seawater, 469 (2002) 235

**Nitrogen dioxide**

Quantitative analysis of gas mixtures by voltammetric sensing, 475 (2003) 17

**Nitrogen oxide**

Quantitative analysis of gas mixtures by voltammetric sensing, 475 (2003) 17

**Nitromethane**

Characterization of polycyclic aromatic hydrocarbons in environmental samples by selective fluorescence quenching, 459 (2002) 61

**2-Nitrophenylhydrazine hydrochloride**

High-performance liquid chromatographic determination of free fatty acids and esterified fatty acids in biological materials as their 2-nitrophenylhydrazides, 465 (2002) 237

**N-Methylcarbamates**

Static-dynamic pressurized hot water extraction coupled to on-line filtration-solid-phase extraction-high-performance liquid chromatography-post-column derivatization-fluorescence detection for the analysis of N-methylcarbamates in foods, 463 (2002) 189

**N-methylglucamine group**

Separation of  $^{68}\text{Ga}$  from  $^{68}\text{Ge}$  using a macroporous organic polymer containing N-methylglucamine groups, 453 (2002) 135

**NMR**

Characterization of the geographical origin of Italian red wines based on traditional and nuclear magnetic resonance spectrometric determinations, 458 (2002) 177

Characterisation of a wheat straw cell wall residue by various techniques. A comparative study with a synthetic and an extracted lignin, 459 (2002) 133

#### Nodularin

Detection of microcystins with protein phosphatase inhibition assay, high-performance liquid chromatography-UV detection and enzyme-linked immunosorbent assay. Comparison of methods, 466 (2002) 213

#### Nonaqueous

Sensitive capillary electrophoresis microchip determination of trinitroaromatic explosives in nonaqueous electrolyte following solid phase extraction, 469 (2002) 253

#### Non-competitive assay

Development of a non-competitive immunoassay for cortisol and its application to the analysis of saliva, 468 (2002) 315

#### Non-ionic surfactant

Analysis of polyethoxylated surfactants in microemulsion-oil-water systems. Part II, 452 (2002) 129

Study of high-performance liquid chromatographic separation of selected herbicides by hydro-methanolic and micellar liquid chromatography using Genapol X-080 non-ionic surfactant as mobile phase constituent, 466 (2002) 325

#### Non-ionic surfactant-salt-H<sub>2</sub>O extraction system

Investigation of a liquid-liquid extraction system based on non-ionic surfactant-salt-H<sub>2</sub>O and mechanism of drug extraction, 452 (2002) 321

#### Nonlinear modelling

Study of adsorption processes of model drugs at supercritical conditions using partial least squares regression, 452 (2002) 311

#### Non-methylene interrupted fatty acids

Identification of minor fatty acids in mussels (*Mytilus galloprovincialis*) by GC-MS of their 2-alkenyl-4,4-dimethyloxazoline derivatives, 465 (2002) 409

#### Non-reversible interaction

Determination of carbon monoxide in ambient air using piezoelectric crystal sorption detection, 456 (2002) 227

#### Non-steroidal anti-inflammatory drugs

Recent developments in the use and abuse of growth promoters, 473 (2002) 71

#### Noradrenaline

Quantification of noradrenaline and dopamine in *Portulaca oleracea* L. by capillary electrophoresis with laser-induced fluorescence detection, 471 (2002) 203

#### Norepinephrine (NE)

Poly(isonicotinic acid) modified glassy carbon electrode for electrochemical detection of norepinephrine, 454 (2002) 75

Two-rate method for simultaneous kinetic determination based on detecting the reagent in successive reactions, 464 (2002) 153

#### Norisoprenoids

Biogenesis of C<sub>13</sub>-norisoprenoid compounds: experiments supportive for an apo-carotenoid pathway in grapevines, 458 (2002) 3

#### Normalization

Artificial neural networks for quantification in unresolved capillary electrophoresis peaks, 452 (2002) 47

#### N-Phenyl-1-naphthylamine

Evaluation of hydrophobic properties of sodium dodecylsulfate/ $\gamma$ -alumina admicelles based on fluorescence spectra of N-phenyl-1-naphthylamine, 454 (2002) 203

#### NPOE

Copper(II)-selective electrode based on dithioacetal, 455 (2002) 225

#### NTA

Analysis of copper complex lability using <sup>64</sup>Cu-equilibration techniques and free-ion selective radiotracer extraction, 464 (2002) 141

#### Nuclear magnetic resonance

Use of modern nuclear magnetic resonance spectroscopy in wine analysis: determination of minor compounds, 458 (2002) 77

Resolution of overlapped NMR spectra by two-way multivariate curve resolution alternating least squares with imbedded kinetic fitting, 459 (2002) 277

#### Nuclear magnetic resonance spectroscopy

Characterisation of a synthesised fluorescent ligand (4-acridinol-1-sulphonic acid) using nuclear magnetic resonance spectroscopy, 454 (2002) 147

#### Nucleic acid

Renewable microcolumns for automated DNA purification and flow-through amplification: from sediment samples through polymerase chain reaction, 469 (2002) 129

#### Nucleic acid analysis

Planar waveguides for ultra-high sensitivity of the analysis of nucleic acids, 469 (2002) 49

#### Nucleic acid biosensor

Interfacial nucleic acid chemistry studied by acoustic shear wave propagation, 469 (2002) 101

#### Nucleic acid detection

Fluorescence-based nucleic acid detection and microarrays, 469 (2002) 3

#### Nucleic acids

Near-infrared fluorimetric determination of nucleic acids by shifting the ion-association equilibrium between heptamethylene cyanine and Alcian blue 8GX, 461 (2002) 235

Practical physical aspects of interfacial nucleic acid oligomer hybridisation for biosensor design, 469 (2002) 115

#### Nucleosides

Application of probabilistic neural network in the clinical diagnosis of cancers based on clinical chemistry data, 471 (2002) 77

**Nutrient film technique**

Supported liquid membrane extraction for identification of phenolic compounds in the nutrient solution of closed hydroponic growing systems for tomato, 474 (2002) 49

**Nutrients monitoring**

A simple automated method for the speciation of dissolved inorganic nitrogen in seawater, 469 (2002) 235

**N-way PCA**

Three-way principal component analysis applied to food analysis: an example, 462 (2002) 133

**Nystatin**

Spectrophotometric determination of hydrocortisone, nystatin and oxytetracycline in synthetic and pharmaceutical preparations based on various univariate and multivariate methods, 460 (2002) 85

# O

**OAD**

Quantitative determination of proteins by the Rayleigh light-scattering technique after optimization of the derivatization reaction with Arsenazo-DBS, 459 (2002) 313

**Oak wood**

Aroma profile of Portuguese brandies aged in chestnut and oak woods, 458 (2002) 55

***o*-Aminobenzenethiol**

Capacitive immunosensor for transferrin based on an *o*-aminobenzenethiol oligomer layer, 458 (2002) 297

**Ochratoxin A**

Comparison of methods for the determination of ochratoxin A in wine, 453 (2002) 33

**Octyl dimethyl PABA**

Flow injection-chemiluminescence determination of octyl dimethyl PABA in sunscreen formulations, 462 (2002) 209

**Ointment**

Development and validation of a new Fourier transform infrared spectrometric method for the quantification of urea in creams and ointments, 451 (2002) 323

Validation of a micellar electrokinetic capillary chromatography method for the determination of imidurea, methyl and propyl-parabens in a pharmaceutical ointment, 463 (2002) 15

**Okadaic acid**

Immunosensor for okadaic acid using quartz crystal microbalance, 471 (2002) 33

**Olfactometry**

Characterisation of young Cognac spirit aromatic quality, 458 (2002) 191

**Oligomer layer**

Capacitive immunosensor for transferrin based on an *o*-aminobenzenethiol oligomer layer, 458 (2002) 297

**Oligonucleotides**

Immobilization of oligonucleotides onto silica nanoparticles for DNA hybridization studies, 470 (2002) 51

**Oligopeptide**

Quartz crystal microbalance sensor targeting low molecular weight compounds using oligopeptide binder and peptide-immobilized latex beads, 469 (2002) 183

**Olive oils**

Investigations of the adulteration of extra virgin olive oils with seed oils using their weak chemiluminescence, 464 (2002) 135  
Gas chromatographic-tandem mass spectrometric identification of phenolic compounds in Sicilian olive oils, 466 (2002) 335

**On site**

Evaluation of a field-test kit for triazine herbicides (SensioScreen<sup>®</sup> TR500) as a fast assay to detect pesticide contamination in water samples, 475 (2003) 105

**One-site immunometric assay**

Optimization and development of a high-performance liquid chromatography-based one-site immunometric assay with chemiluminescence detection, 470 (2002) 37

**On-line**

Synthesis of amidinothioureido-silica gel and its application to flame atomic absorption spectrometric determination of silver, gold and palladium with on-line preconcentration and separation, 452 (2002) 223

Voltammetry using a dental amalgam electrode for heavy metal monitoring of wines and spirits, 458 (2002) 249

On-line simultaneous monitoring of glucose and acetate with FIA during high cell density fermentation of recombinant *E. coli*, 462 (2002) 293

**On-line classification**

Validation of remote, on-line, near-infrared measurements for the classification of demolition waste, 453 (2002) 117

**On-line detection**

Determination of vanadium, molybdenum and tungsten in complex matrix samples by chelation ion chromatography and on-line detection with inductively coupled plasma mass spectrometry, 466 (2002) 161

**On-line filtration-preconcentration-chromatographic separation-derivatization-fluorescence detection**

Static-dynamic pressurized hot water extraction coupled to on-line filtration-solid-phase extraction-high-performance liquid chromatography-post-column derivatization-fluorescence detection for the analysis of *N*-methOnline photolysis, 463 (2002) 189

**On-line photolysis**

On-line photo-derivatization with flow injection and liquid chromatography-atmospheric pressure electrospray mass spectrometry for the identification of indoles, 460 (2002) 49

**On-line pre-concentration**

Determination of polyethoxylated non-ionic surfactants using potentiometric flow injection systems. Improvement of the detection limits employing an on-line pre-concentration stage, 454 (2002) 217

**On-line process control**

Quinohemoprotein alcohol dehydrogenase-based reagentless amperometric biosensor for ethanol monitoring during wine fermentation, 463 (2002) 39

**On-line processes**

On the ambiguity of self-modeling curve resolution: orthogonal projection approach analysis of the on-line Fourier transform-Raman spectra of styrene/1,3-butadiene block-copolymerization, 460 (2002) 73

**On-line sorption preconcentration**

Comparative study of 8-hydroxyquinoline derivatives as chelating reagents for flow-injection preconcentration of cobalt in a knotted reactor, 453 (2002) 143

**On-site screening**

On-line detection of sulfamethazine and sulfadiazine in porcine bile using a multi-channel high-throughput SPR biosensor, 473 (2002) 143

**Optical oxygen sensor**

Optical oxygen sensor based on fluorescence change of pyrene-1-butyric acid chemisorption film on an anodic oxidation aluminium plate, 471 (2002) 25

**Optical pH sensor**

Stability of new optical pH sensing material based on cross-linked poly(vinyl alcohol) copolymer, 455 (2002) 207

**Optical selectivity**

Poly(vinyl chloride)-membrane ion-selective bulk optode based on 1,10-dibenzyl-1,10-diaza-18-crown-6 and 1-(2-pyridylazo)-2-naphthol for  $\text{Cu}^{2+}$  and  $\text{Pb}^{2+}$  ions, 464 (2002) 187

**Optical sensor**

Dual lifetime referenced optical sensor membrane for the determination of copper(II) ions, 462 (2002) 1

Chromium(VI) transport through the Raipore 1030 anion exchange membrane, 464 (2002) 15

Liquid-supported membranes in chromium(VI) optical sensing: transport modelling, 464 (2002) 197

Optical fibre sensor for hydrogen sulphide monitoring in mouth air, 471 (2002) 13

**Organic acids**

Reducing the interference from  $\text{CO}_2$  or organic acids in ion-selective polymer membrane sensors having a field-effect transistor as internal reference element, 464 (2002) 79

**Organic guest**

Solvent effect on the complex formation of distally dialkylated calix[4]arenes with 1-chloro-4-(trifluoromethyl)benzene, 461 (2002) 273

**Organic matrix**

Determination of actinides and strontium in fish samples by extraction chromatography, 458 (2002) 367

**Organic matter**

Determination of organic matter in soils using radial basis function networks and near infrared spectroscopy, 453 (2002) 125

**Organic polymer**

Separation of  $^{68}\text{Ga}$  from  $^{68}\text{Ge}$  using a macroporous organic polymer containing *N*-methylglucamine groups, 453 (2002) 135

**Organized media**

Determination of zinc in food using atomic fluorescence spectrometry by hydride generation from organized media, 457 (2002) 305

**Organochlorine pesticides**

Supercritical fluid extraction of organochlorine pesticides and some metabolites in frogs from National Park of Ordesa and Monte Perdido, 464 (2002) 303

**Organophosphorous hydrolase**

Dual amperometric-potentiometric biosensor detection system for monitoring organophosphorus neurotoxins, 469 (2002) 197

**Organophosphorus pesticide**

Analysis of organophosphorus pesticides by gas chromatography-mass spectrometry with negative chemical ionization: a study on the ionization conditions, 461 (2002) 97

Application of solid-phase microextraction for monitoring the photocatalytic decomposition of fenthion and parathion in aqueous  $\text{TiO}_2$  suspensions, 467 (2002) 233

Synthesis of haptens for immunoassay of organophosphorus pesticides and effect of heterology in hapten spacer arm length on immunoassay sensitivity, 475 (2003) 85

**Origin**

Stable isotope analysis of fatty acids by gas chromatography-isotope ratio mass spectrometry, 465 (2002) 63

**Ormosil**

Reagentless pH-based biosensing using a fluorescently-labelled dextran co-entrapped with a hydrolytic enzyme in sol-gel derived nanocomposite films, 457 (2002) 47

**Ornithine**

Development of a bienzyme reactor sensor system for the determination of ornithine, 456 (2002) 219

**Ornithine carbamyl transferase**

Development of a bienzyme reactor sensor system for the determination of ornithine, 456 (2002) 219

**Orthogonal design**

Application of generalized artificial neural networks coupled with an orthogonal design to optimization of a system for the kinetic spectrophotometric determination of  $\text{Hg(II)}$ , 469 (2002) 303

Simple method for colorimetric spot-test quantitative analysis of  $\text{Fe(III)}$  using a computer controlled hand-scanner, 471 (2002) 97

**Orthogonal projection approach**

On the ambiguity of self-modeling curve resolution: orthogonal projection approach analysis of the on-line Fourier transform-Raman spectra of styrene/1,3-butadiene block-copolymerization, 460 (2002) 73

**Orthophosphate**

Simultaneous flow-injection determination of fluoride, monofluorophosphate and orthophosphate ions using alkaline phosphatase immobilized on a cellulose nitrate membrane and an open-circulation approach, 467 (2002) 83

**Osmotic pumps**

In situ osmotic analyzer for the year-long continuous determination of Fe in hydrothermal systems, 463 (2002) 265

**Outer product**

Outer product analysis of electronic nose and visible spectra: application to the measurement of peach fruit characteristics, 459 (2002) 107

**Outlier detection**

Robust regression and outlier detection in the evaluation of robustness tests with different experimental designs, 463 (2002) 53

**Oxalate**

Determination of sodium oxalate in Bayer liquor using flow-analysis incorporating an anion exchange column and tris(2,2'-bipyridyl)ruthenium(II) chemiluminescence detection, 458 (2002) 291

**Oxazolines**

Influence of milk fat presence on the determination of *trans* fatty acids in fats used for infant formulae, 465 (2002) 395

 **$\omega$ -Oxidation product**

High-performance liquid chromatography-thermospray ionization-mass spectrometry of the oxidation products of polyunsaturated-fatty acids, 465 (2002) 227

**Oxidizable**

Determination of Al, Cu, Fe, Mn, Pb and Zn in certified reference materials using the optimized BCR sequential extraction procedure, 454 (2002) 249

**Oxidoreductase**

Characterization of oxidoreductase-redox polymer electrostatic film assembly on gold by surface plasmon resonance spectroscopy and Fourier transform infrared-external reflection spectroscopy, 466 (2002) 201

**Oxygen**

Tuning the parameters for fast respirometry, 460 (2002) 257

**Oxygenation**

Effect of oxygenation on polyphenol changes occurring in the course of wine-making, 458 (2002) 15

**Oxytetracycline**

Quantitative analysis for oxytetracycline in medicated premixes and feeds by second-derivative synchronous spectrofluorimetry, 455 (2002) 143

Spectrophotometric determination of hydrocortisone, nystatin and oxytetracycline in synthetic and pharmaceutical preparations based on various univariate and multivariate methods, 460 (2002) 85

Ion-paired solid phase extraction as a sample preparation strategy for the high-performance liquid chromatographic determination of oxytetracycline in the bryophyte *Fontinalis antipyretica*, 475 (2003) 117

**Ozone**

Determination of halogenated hydrocarbons by flow injection ozone chemiluminescence, 451 (2002) 189

Sensitive electrochemical detection of ozone, 459 (2002) 199

Quantitative analysis of gas mixtures by voltammetric sensing, 475 (2003) 17

**Ozone depletion**

Determination of halogenated hydrocarbons by flow injection ozone chemiluminescence, 451 (2002) 189

**Ozonization**

Development of a laccase-based flow injection electrochemical biosensor for the determination of phenolic compounds and its application for monitoring remediation of Kraft E1 paper mill effluent, 463 (2002) 229

## P

 **$^{31}\text{P}$  NMR**

Quantitative nuclear magnetic resonance spectrometry. II. Purity of phosphorus-based agrochemicals glyphosate (*N*-(phosphonmethyl)-glycine) and profenofos (*O*-(4-bromo-2-chlorophenyl) *O*-ethyl *S*-propyl phosphorothioate) measured by  $^1\text{H}$  and  $^{31}\text{P}$  QNMR spectrometry, 474 (2002) 125

**Packed reactor with PTFE beads**

Flow injection on-line preconcentration of low levels of Cr(VI) with detection by ETAAS. Comparison of using an open tubular PTFE knotted reactor and a column reactor packed with PTFE beads, 463 (2002) 99

**Paediatrics**

Stable isotope analysis of fatty acids by gas chromatography-isotope ratio mass spectrometry, 465 (2002) 63

**PAHs**

Monofluorinated polycyclic aromatic hydrocarbons as internal standards in Shpol'skii spectroscopy: 1-fluoropyrene as an example, 459 (2002) 53

Separation of polar and non-polar analytes using dimethyl sulfoxide-modified subcritical water, 460 (2002) 185

Principal component analysis application in polycyclic aromatic hydrocarbons "mussel watch" analyses for source identification, 461 (2002) 201

**Paleodiet**

Stable isotope analysis of fatty acids by gas chromatography–isotope ratio mass spectrometry, 465 (2002) 63

**Palladium**

Synthesis of amidinothioureido-silica gel and its application to flame atomic absorption spectrometric determination of silver, gold and palladium with on-line preconcentration and separation, 452 (2002) 223

Microwave-assisted digestion procedure for the determination of palladium in road dust, 459 (2002) 257

Preconcentration of palladium in a flow-through electrochemical cell for determination by graphite furnace atomic absorption spectrometry, 462 (2002) 305

Ion-exchange method for separation and concentration of platinum and palladium for analysis of environmental samples by inductively coupled plasma atomic emission spectrometry, 464 (2002) 7

**Pallidol**

Direct liquid chromatographic analysis of resveratrol derivatives and flavanols in wines with absorbance and fluorescence detection, 458 (2002) 103

**PAN**

Poly(vinyl chloride)-membrane ion-selective bulk optode based on 1,10-dibenzyl-1,10-diaza-18-crown-6 and 1-(2-pyridylazo)-2-naphthol for  $\text{Cu}^{2+}$  and  $\text{Pb}^{2+}$  ions, 464 (2002) 187

Highly selective spectrophotometric determination of trace cobalt and development of a reagentless fiber-optic sensor, 467 (2002) 205

**Paper mill effluent**

Development of a laccase-based flow injection electrochemical biosensor for the determination of phenolic compounds and its application for monitoring remediation of Kraft E1 paper mill effluent, 463 (2002) 229

**para-Aminobenzoic acid**

Study on molecular recognition of *para*-aminobenzoic acid species by  $\alpha$ -,  $\beta$ - and hydroxypropyl- $\beta$ -cyclodextrin, 458 (2002) 305

**Parabens**

Validation of a micellar electrokinetic capillary chromatography method for the determination of imidurea, methyl and propyl-parabens in a pharmaceutical ointment, 463 (2002) 15

**PARAFAC**

Detection of verapamil drug by fluorescence and trilinear decomposition techniques, 453 (2002) 105

Quantifying catecholamines using multi-way kinetic modelling, 475 (2003) 137

**PARAFAC model**

Three-way principal component analysis applied to food analysis: an example, 462 (2002) 133

**Parallel co-ordinate geometry**

Development of a generic flow-injection analysis method for compounds with a secondary amine or amide function, using an

experimental design approach. Part II. Selection and evaluation of the chemical reaction parameters, 455 (2002) 117

Parallel co-ordinate geometry and principal component analysis for the interpretation of large multi-response experimental designs, 458 (2002) 397

**Parenteral solutions**

Availability of aluminum from glass and an Al form ion exchanger in the presence of complexing agents and amino acids, 459 (2002) 267

**Partial component regression**

Spectrophotometric determination of hydrocortisone, nystatin and oxytetracycline in synthetic and pharmaceutical preparations based on various univariate and multivariate methods, 460 (2002) 85

**Partial least squares (PLS)**

Study of adsorption processes of model drugs at supercritical conditions using partial least squares regression, 452 (2002) 311

Characterization of jewellery products by laser-induced breakdown spectroscopy, 457 (2002) 247

Spectrophotometric determination of hydrocortisone, nystatin and oxytetracycline in synthetic and pharmaceutical preparations based on various univariate and multivariate methods, 460 (2002) 85

Multi-component analysis by flow injection-diode array detection-spectrophotometry using partial least squares calibration model for simultaneous determination of zinc, cadmium and lead, 461 (2002) 181

Fourier transform infrared spectrometric strategies for the determination of Bupropion in pesticide formulations, 468 (2002) 81

**Partial least squares calibration**

Maintenance of a calibration model for near infrared spectrometry by a combined principal component analysis–partial least squares approach, 452 (2002) 35

**Partial least-squares**

Direct and simultaneous spectrofluorometric determination of naproxen and salicylate in human serum assisted by chemometric analysis, 471 (2002) 87

**Particulates**

Aerosol analysis by cavity-ring-down laser spectroscopy, 466 (2002) 1

**Partitioning**

Analysis of polyethoxylated surfactants in microemulsion–oil–water systems. Part II, 452 (2002) 129

**Pathogenic microorganism**

Fluorescence-based nucleic acid detection and microarrays, 469 (2002) 3

**Pathogens**

Fingerprinting bacterial strains using ion mobility spectrometry, 457 (2002) 83

**Pattern recognition**

Clustering with dendrograms on interpretation variables, 454 (2002) 13

Quantitative fuzzy neural network for analytical determination, 468 (2002) 105

**Pb**

Cold ultrasonic acid extraction of copper, lead and zinc from soil samples, 452 (2002) 143

Determination of trace elements in biological materials using tetramethylammonium hydroxide for sample preparation, 470 (2002) 195

**Pb determination**

Cloud point preconcentration and flame atomic absorption spectrometric determination of Cd and Pb in human hair, 470 (2002) 215

**Pb<sup>2+</sup>**

Poly(vinyl chloride)-membrane ion-selective bulk optode based on 1,10-dibenzyl-1,10-diaza-18-crown-6 and 1-(2-pyridylazo)-2-naphthol for Cu<sup>2+</sup> and Pb<sup>2+</sup> ions, 464 (2002) 187

**PCA**

Variable reduction on electronic tongue data, 452 (2002) 255

Principal component analysis application in polycyclic aromatic hydrocarbons "mussel watch" analyses for source identification, 461 (2002) 201

**PCBs**

Relative performance of immunochemical (enzyme-linked immunosorbent assay) and gas chromatography-electron-capture detection techniques to quantify polychlorinated biphenyls in mussel tissues, 461 (2002) 75

**PCR**

Dubin-Watson statistic as a morphological estimator of information content, 454 (2002) 277

Spectrophotometric determination of metal ions in electroplating solutions in the presence of EDTA with the aid of multivariate calibration and artificial neural networks, 463 (2002) 305

Coupling of an indicator-free electrochemical DNA biosensor with polymerase chain reaction for the detection of DNA sequences related to the apolipoprotein E, 469 (2002) 93

Renewable microcolumns for automated DNA purification and flow-through amplification: from sediment samples through polymerase chain reaction, 469 (2002) 129

Survival and polymerase chain reaction-based detection of nucleic acid taggant markers during bacterial growth and sterilization, 475 (2003) 67

**PDA**

High-performance liquid chromatographic analysis of Black Cohosh (*Cimicifuga racemosa*) constituents with in-line evaporative light scattering and photodiode array detection, 471 (2002) 61

**PDMS**

Rapid fabrication of electrochemical enzyme sensor chip using polydimethylsiloxane microfluidic channel, 468 (2002) 143

**PDO**

Multivariate classification of rosé wines from different Spanish protected designations of origin, 458 (2002) 187

**Peak detection**

Matched filtering with background suppression for improved quality of base peak chromatograms and mass spectra in liquid chromatography-mass spectrometry, 454 (2002) 167

**Peat**

Inter-method comparison for the determination of antimony and arsenic in peat samples, 458 (2002) 387

**Penicillin**

Biosensor analysis of penicillin G in milk based on the inhibition of carboxypeptidase activity, 468 (2002) 153

**Pentachlorophenol**

Development of an enzyme-linked immunosorbent assay for pentachlorophenol, 460 (2002) 279

**Pentafluorobenzyl bromide**

Measurement of bisphenol A in human serum by gas chromatography/mass spectrometry, 458 (2002) 331

**Pepsin activity**

Indirect determination of pepsin activity in human serum protein samples by polyphenol oxidase electrodes, 460 (2002) 163

**Peptide nucleic acid (PNA)**

Versatile biosensor surface based on peptide nucleic acid with label free and total internal reflection fluorescence detection for quantification of endocrine disruptors, 469 (2002) 37

**Peptides**

Analytical methods for the characterization of proteins and peptides in wines, 458 (2002) 63

Complexation, liquid-liquid extraction, and transport through a liquid membrane of protonated peptides using crown ethers, 466 (2002) 101

Kinetics of the post-column complexation reaction of Cu(II) with *N*-formylmethionyl chemoattractant and chemotactic peptides, 474 (2002) 1

**Perfluorinated polymer**

Perfluorinated anion-exchange polymer mercury film electrode for anodic stripping voltammetric determination of zinc(II): effect of model organic compounds, 454 (2002) 93

**Perfluorocarbon polymer**

Development of a micro-planar Ag/AgCl quasi-reference electrode with long-term stability for an amperometric glucose sensor, 462 (2002) 253

**Peristaltic pumps**

Propelling devices: the heart of flow injection approaches, 461 (2002) 169

**Permanent chemical modifier**

Flow system with in-line separation/preconcentration coupled to graphite furnace atomic absorption spectrometry with W-Rh

permanent modifier for copper determination in seawater, 463 (2002) 275

#### Permanent modifier

Direct determination of aluminium in serum and urine by electrothermal atomic absorption spectrometry using ruthenium as permanent modifier, 464 (2002) 323

#### Peroxidase-oxidase oscillator

Determination of ascorbic acid based on a peroxidase oscillator reaction, 466 (2002) 257

#### Peroxodisulfate

Pretreatment of water samples using UV irradiation-peroxodisulfate for the determination of total mercury, 454 (2002) 271

#### Personal exposure

Direct-on-filter analysis of crystalline silica using photoacoustic Fourier transform-infrared spectroscopy, 457 (2002) 257

#### Pervaporation

Method for monitoring urea and ammonia in wine and must by flow injection-pervaporation, 471 (2002) 105

#### Pesticide

Development of a heterogeneous chemiluminescent flow immunoassay for DDT and related compounds, 453 (2002) 43

Immobilization of acetylcholinesterase on screen-printed electrodes: comparative study between three immobilization methods and applications to the detection of organophosphorus insecticides, 464 (2002) 171

Fourier transform infrared spectrometric strategies for the determination of Buprofezin in pesticide formulations, 468 (2002) 81

Evolution of antibodies for environmental monitoring: from mice to plants, 468 (2002) 185

Quartz crystal microbalance determination of organophosphorus and carbamate pesticides, 469 (2002) 189

Dual amperometric-potentiometric biosensor detection system for monitoring organophosphorus neurotoxins, 469 (2002) 197

Improved detection of toxic chemicals using bioluminescent bacteria, 471 (2002) 113

#### Pesticide analysis

Assessment of uncertainty in pesticide multiresidue analytical methods: main sources and estimation, 454 (2002) 297

#### Pesticide residues

Simultaneous determination of imidacloprid, carbendazim, methiocarb and hexythiazox in peaches and nectarines by liquid chromatography-mass spectrometry, 461 (2002) 109

#### pH

Spectrophotometric measurement of total inorganic carbon in aqueous solutions using a liquid core waveguide, 451 (2002) 221

Performance of the diffusive gradients in thin films technique for measuring Ca and Mg in freshwater, 460 (2002) 247

#### pH measurement

Acid-base constants of neutral bases in acetonitrile-water mixtures, 454 (2002) 157

#### pH optimization

Prediction of the separation of phenols by capillary zone electrophoresis, 458 (2002) 355

#### pH response

Characteristics of the hydrogen ion-sensitive field effect transistors with sol-gel-derived lead titanate gate, 469 (2002) 205

#### pH scales

Acid-base constants of neutral bases in acetonitrile-water mixtures, 454 (2002) 157

#### pH sensor

Solid-state pH nanoelectrode based on polyaniline thin film electrodeposited onto ion-beam etched carbon fiber, 452 (2002) 1  
Screen-printable sol-gel ceramic carbon composite pH sensor with a receptor zeolite, 455 (2002) 53

#### Phage display

Selection of phage displayed peptides for the detection of 2,4,6-trinitrotoluene in seawater, 457 (2002) 13

#### Phanquinone (4,7-phenanthroline-5,6-dione)

Phanquinone: a useful fluorescent pre-chromatographic derivatization reagent for liquid chromatographic analyses of amino acid dosage forms, 474 (2002) 11

#### Pharmaceutical formulation

Determination of flurbiprofen in pharmaceutical formulations by UV spectrophotometry and liquid chromatography, 463 (2002) 207

#### Pharmaceutical preparations

Room-temperature luminescence optosensings based on immobilized active principles. Application to nafronyl and naproxen determination in pharmaceutical preparations and biological fluids, 462 (2002) 217

Determination of  $\beta$ -blockers in pharmaceutical preparations and human urine by high-performance liquid chromatography with tris(2,2'-bipyridyl)ruthenium(II) electrogenerated chemiluminescence detection, 471 (2002) 51

#### Pharmaceutical samples

Application of time-resolved luminescence to dry reagent chemical technology, 452 (2002) 169

#### Pharmaceuticals

Electrochemical characterisation of nefazodone hydrochloride and voltammetric determination of the drug in pharmaceuticals and human serum, 462 (2002) 49

Rapid spectrophotometric determination of fosfestrol following on-line hydrolysis by alkaline phosphatase using flow injection and chasing zones, 462 (2002) 119

Single-run capillary electrophoretic speciation of iodide and iodine, 466 (2002) 133

Determination of lamivudine and zidovudine in binary mixtures using first derivative spectrophotometric, first derivative of the ratio-spectra and high-performance liquid chromatography-UV methods, 466 (2002) 175

Highly selective spectrophotometric determination of trace cobalt and development of a reagentless fiber-optic sensor, 467 (2002) 205

#### Phase behaviour

Evaluation of the factors affecting extraction of organic compounds based on the acid-induced phase cloud point approach, 460 (2002) 13

#### Phenanthroline

Ligand and surfactant effects on a novel electrochemiluminescent reaction involving cadmium, 454 (2002) 45

#### Phenol analysis

4-Aminoantipyrine spectrophotometric method of phenol analysis. Study of the reaction products via liquid chromatography with diode-array and mass spectrometric detection, 467 (2002) 105

#### Phenol biosensors

Glassy carbon paste electrodes modified with polyphenol oxidase. Analytical applications, 459 (2002) 43

#### Phenolic acids

High-performance liquid chromatographic analysis of Black Cohosh (*Cimicifuga racemosa*) constituents with in-line evaporative light scattering and photodiode array detection, 471 (2002) 61

Supported liquid membrane extraction for identification of phenolic compounds in the nutrient solution of closed hydroponic growing systems for tomato, 474 (2002) 49

#### Phenolic compounds

Spectrofluorimetric determination of hydrogen peroxide scavenging activity, 452 (2002) 177

Development of an enzymeless biosensor for the determination of phenolic compounds, 455 (2002) 215

Analytical performance of commercially available and unavailable phenolic compounds using real samples by high-performance liquid chromatography–diode-array detection, 460 (2002) 61

#### Phenolics

Counter-current supercritical fluid extraction of phenolic compounds from aqueous matrices, 460 (2002) 1

#### Phenols

Effect of maturation in small oak casks on the volatility of red wine aroma compounds, 458 (2002) 45

Prediction of the separation of phenols by capillary zone electrophoresis, 458 (2002) 355

Separation of polar and non-polar analytes using dimethyl sulfoxide-modified subcritical water, 460 (2002) 185

Uptake monitoring of anilines and phenols using modified zeolites, 464 (2002) 1

Abraham model in gas chromatography of phenol pollutants, 466 (2002) 151

Gas chromatographic–tandem mass spectrometric identification of phenolic compounds in Sicilian olive oils, 466 (2002) 335

#### Phenothiazine drugs

Continuous photometric method for the screening of human urines for phenothiazines, 462 (2002) 275

#### Phenylarsonic acid

Microwave-assisted digestion of organoarsenic compounds for the determination of total arsenic in aqueous, biological, and sediment samples using flow injection hydride generation electrothermal atomic absorption spectrometry, 452 (2002) 207

#### Phenylbenzimidazole sulphonic acid

Sequential injection analysis for benzophenone-4 and phenylbenzimidazole sulphonic acid in sunscreen sprays by solid-phase extraction coupled with ultraviolet spectrometry, 464 (2002) 295

#### Phosphate

Simultaneous determination of silicate and phosphate in boiler water at power plants based on series flow cells by using flow injection spectrophotometry, 455 (2002) 315

Determination of the sodium monofluorophosphate in a hardened cement paste by ion chromatography, 472 (2002) 37

#### Phosphorescence

Chemically induced phosphorescence from manganese(II) during the oxidation of various compounds by manganese(III), (IV) and (VII) in acidic aqueous solutions, 451 (2002) 181

Study of different normal-microemulsion compositions by room-temperature phosphorescence to determine benzo[a]pyrene in environmental samples, 474 (2002) 91

#### Phosphorus

Determination of total phosphorus and nitrogen in turbid waters by oxidation with alkaline potassium peroxodisulfate and low pressure microwave digestion, autoclave heating or the use of closed vessels in a hot water bath: comparison with Kjeldahl digestion, 463 (2002) 283

#### Photoacoustic spectroscopy

Direct-on-filter analysis of crystalline silica using photoacoustic Fourier transform-infrared spectroscopy, 457 (2002) 257

#### Photocatalytic treatment

Application of solid-phase microextraction for monitoring the photocatalytic decomposition of fenthion and parathion in aqueous TiO<sub>2</sub> suspensions, 467 (2002) 233

#### Photochemical-fluorimetric determination

Simultaneous potentiometric and fluorimetric determination of diclofenac in a sequential injection analysis system, 470 (2002) 185

#### Photodegradation

Assessment of the toxicity of methyl parathion and its photodegradation products in water samples using conductometric enzyme biosensors, 459 (2002) 33

#### Photodiode

Flow system for liquid–solid extraction and pre-concentration using a renewable extracting solid phase, 472 (2002) 141

#### Photo-isomerization

Differentiating geometrical isomers of retinoids and controlling their photo-isomerization by complexation with cyclodextrins, 468 (2002) 161

**Photoluminescence**

Solvent effect on the complex formation of distally dialkylated calix[4]arenes with 1-chloro-4-(trifluoromethyl)benzene, 461 (2002) 273

**Photometry**

Continuous photometric method for the screening of human urines for phenothiazines, 462 (2002) 275

Automatic screening method for the rapid and simple discrimination between synthetic and natural colorants in foods, 464 (2002) 237

**Photo-reduction**

Chemiluminescent flow-injection analysis of nitrates in water using on-line ultraviolet photolysis, 474 (2002) 99

**pH-stat titrations**

pH-stat techniques in titrimetric analysis. Part 3. The principles of pH-stat chelatometric titrations, 456 (2002) 313

pH-stat techniques in titrimetric analysis. IV. pH-stat monitoring of chelatometric titrations, 470 (2002) 277

**Phthalates**

Development of a solid-phase microextraction method for the determination of phthalic acid esters in water, 457 (2002) 211

**Phthalocyanine**

Cross-sensitive chemical sensors based on tetraphenylporphyrin and phthalocyanine, 457 (2002) 297

**Phthalocyanine dyes**

Study of the white-rot fungal degradation of selected phthalocyanine dyes by capillary electrophoresis and liquid chromatography, 451 (2002) 259

**Physical adsorption**

Physical adsorption of protamine for heparin assay using a quartz crystal microbalance and electrochemical impedance spectroscopy, 462 (2002) 261

**Physiologically important carboxylic acid**

Fluorescent tagging of physiologically important carboxylic acids, including fatty acids, for their detection in liquid chromatography, 465 (2002) 111

**Phytic acid**

Spectrophotometric determination of phytic acid in plant extracts using a multi-pumping flow system, 474 (2002) 161

**Piezoelectric quartz crystal**

Determination of carbon monoxide in ambient air using piezoelectric crystal sorption detection, 456 (2002) 227

**Piezoelectric quartz crystal impedance**

In situ monitoring of gold-surface adsorption and acidic denaturation of human serum albumin by an isolation-capacitance-adopted electrochemical quartz crystal impedance system, 464 (2002) 65

**Piezoelectric sensor signals**

Use of wavelet transform to enhance piezoelectric signals for analytical purposes, 456 (2002) 93

**Pigments**

Effect of oxygenation on polyphenol changes occurring in the course of wine-making, 458 (2002) 15

**Pimozide**

Electrooxidation of pimozide and its differential pulse voltammetric and HPLC-EC determination, 453 (2002) 221

**Pin printing**

Integrated chemical sensor array platform based on a light emitting diode, xerogel-derived sensor elements, and high-speed pin printing, 470 (2002) 101

**Pipemidic acid**

Chemiluminescence flow-through sensor for pipemidic acid using solid sodium bismuthate as an oxidant, 459 (2002) 19

**Pirimicarb**

Molecularly imprinted polymers for on-line preconcentration by solid phase extraction of pirimicarb in water samples, 451 (2002) 297

**Piroxicam**

Spectrofluorimetric method for the determination of piroxicam and pyridoxine, 466 (2002) 275

**pK<sub>a</sub>**

Acid-base constants of neutral bases in acetonitrile-water mixtures, 454 (2002) 157

**Planar waveguide**

Planar waveguides for ultra-high sensitivity of the analysis of nucleic acids, 469 (2002) 49

**Plant samples**

Microwave-assisted digestion of organoarsenic compounds for the determination of total arsenic in aqueous, biological, and sediment samples using flow injection hydride generation electrothermal atomic absorption spectrometry, 452 (2002) 207

**Plasma**

Simultaneous determination of clozapine, clozapine *N*-oxide, *N*-desmethylclozapine, risperidone, and 9-hydroxyrisperidone in plasma by high performance liquid chromatography with ultra-violet detection, 460 (2002) 201

Development and validation of liquid chromatographic method for the determination of lycopene in plasma, 467 (2002) 115

**Plasma polymerization**

Performance of amperometric alcohol electrodes prepared by plasma polymerization technique, 469 (2002) 217

**Plasma spectrochemistry**

Can plasma spectrochemistry assist in improving the accuracy of chemical analysis?, 456 (2002) 63

**Plastic scintillation**

Comparative study of quenching correction procedures for <sup>90</sup>Sr/<sup>90</sup>Y determination by Cerenkov, liquid scintillation and plastic scintillation techniques, 471 (2002) 135

**Plastic scintillators**

Mixed waste reduction in radioactivity determination by using plastic scintillators, 463 (2002) 125

**Platinum**

Measurement of the isotopic composition and atomic weight of an isotopic reference material of platinum, IRMM-010, 460 (2002) 41  
Ion-exchange method for separation and concentration of platinum and palladium for analysis of environmental samples by inductively coupled plasma atomic emission spectrometry, 464 (2002) 7

**PLSI**

Durbin-Watson statistic as a morphological estimator of information content, 454 (2002) 277

**PLS**

Variable selection for multivariate calibration using a genetic algorithm: prediction of additive concentrations in polymer films from Fourier transform-infrared spectral data, 461 (2002) 189  
Spectrophotometric determination of metal ions in electroplating solutions in the presence of EDTA with the aid of multivariate calibration and artificial neural networks, 463 (2002) 305

**PLS2**

Standardization methods for handling instrument related signal shift in gas-sensor array measurement data, 472 (2002) 99

**Pneumolysin**

Flow amperometric detection of indigo for enzyme-linked immunosorbent assays with use of screen-printed electrodes, 462 (2002) 31

***p*-Nitrophenol**

Microbial biosensor for *p*-nitrophenol using *Moraxella* sp., 470 (2002) 79

**Point-like sample**

Radial and longitudinal profiles of the electron paramagnetic resonance signal intensity of a single TE<sub>102</sub> rectangular cavity. A three-dimensional surface plot for a point-like sample, 464 (2002) 163

**Polar ice**

High-sensitivity measurements of strontium isotopes in polar ice, 469 (2002) 225

**Poly(3,3'-diaminobenzidine) film**

Differential pulse voltammetric determination of trace Te(IV) at a poly(3,3'-diaminobenzidine) film modified gold electrode in flow systems, 453 (2002) 209

**Poly(adenylic) acid**

Study of solvent effects on the acid-base behaviour of adenine, adenosine 3',5'-cyclic monophosphate and poly(adenylic) acid in acetonitrile-water mixtures using hard-modelling and soft-modelling approaches, 471 (2002) 145

**Poly(*p*-chloromethylstyrene-ethylene glycol dimethacrylate)**

1,4,8,11-Tetraazacyclotetradecane bound to poly(*p*-chloromethylstyrene-ethylene glycol dimethacrylate) microbeads for selective gold uptake, 464 (2002) 313

**Poly(*p*-chlorophenylamide)**

Glucose biosensors prepared by electropolymerization of *p*-chlorophenylamine with and without Nafion, 463 (2002) 239

**Poly(pyrrole)**

All-solid-state planar miniature ion-selective chloride electrode, 451 (2002) 243

**Polyacrylamide**

Use of the diffusion gradient thin film method to measure trace metals in fresh waters at low ionic strength, 456 (2002) 241

**Polyaniline**

Solid-state pH nanoelectrode based on polyaniline thin film electrodeposited onto ion-beam etched carbon fiber, 452 (2002) 1  
Application of a polyaniline based ammonium sensor for the amperometric immunoassay of a urease conjugated Tal I protein, 461 (2002) 49  
Polyaniline as a new sensitive layer for gas sensors, 475 (2003) 1

**Polyaniline electrode modified with 2,2'-bipyridyl**

Electrochemical and quartz crystal microbalance studies of lead(II) deposition and stripping in the presence of copper on a gold electrode modified with 2,2'-bipyridyl in polyaniline, 455 (2002) 69

**Polychlorinated dibenzo-*p*-dioxins**

Extraction and preconcentration of polychlorinated dibenzo-*p*-dioxins using the cloud-point methodology. Application to their determination in water samples by high-performance liquid chromatography, 470 (2002) 205

**Polyclonal antibodies (PoAbs)**

Development of an immunosensor for human ferritin, a nonspecific tumor marker, based on a quartz crystal microbalance, 453 (2002) 181  
Enzyme-linked immunosorbent assay for the determination of 20(S)-protopanaxatriol, 462 (2002) 157

**Polycyclic**

Improvement of UV spectrophotometry methodology for the determination of total polycyclic aromatic compounds in contaminated soils, 453 (2002) 245

**Polycyclic aromatic hydrocarbons**

Selective fluorescence quenching of polycyclic aromatic hydrocarbons by nitromethane within room temperature ionic liquid 1-butyl-3-methylimidazolium hexafluorophosphate, 453 (2002) 89  
Laser desorption-ionization of polycyclic aromatic hydrocarbons from glass surfaces with ion mobility spectrometry analysis, 453 (2002) 231  
Characterization of polycyclic aromatic hydrocarbons in environmental samples by selective fluorescence quenching, 459 (2002) 61  
Time-resolved laser-induced fluorimetry for screening polycyclic aromatic hydrocarbons on solid-phase extraction membranes, 464 (2002) 261

Pressurised hot water extraction and thermal desorption of polycyclic aromatic hydrocarbons from sediment with use of a novel extraction vessel, 466 (2002) 93

Methods for coating filter paper for solid-phase microextraction with luminescence detection and characterization of the coated filter paper by infrared spectrometry, 474 (2002) 77

#### **Polyelectrolyte**

Polyelectrolyte-stabilized biosensors based on macroporous carbon electrode, 467 (2002) 2

#### **Polyether polyols**

Determination of the ethylene oxide content of polyether polyols by low-field  $^1\text{H}$  nuclear magnetic resonance spectrometry, 472 (2002) 133

#### **Polyethoxylated surfactants**

Analysis of polyethoxylated surfactants in microemulsion-oil-water systems. Part II, 452 (2002) 129

#### **Polyethylene glycol-1000**

Investigation of a liquid-liquid extraction system based on non-ionic surfactant-salt- $\text{H}_2\text{O}$  and mechanism of drug extraction, 452 (2002) 321

#### **Polyhydroxyl compounds**

Nickel oxide-modified composite electrode for electrochemical detection of polyhydroxyl compounds in liquid chromatographic analysis, 471 (2002) 195

#### **Poly-L-Cysteine**

Characterization of metal ion-exchange on modified surfaces of porous carbon, 455 (2002) 233

#### **Polymer microdevices**

Surface modification of polymer-based microfluidic devices, 470 (2002) 87

#### **Polymerase chain reaction**

Surface plasmon resonance biosensor for genetically modified organisms detection, 453 (2002) 165

#### **Polymeric membrane**

Lithium sensor based on the laser scanning semiconductor transducer, 459 (2002) 1

Development of a urea biosensor based on a polymeric membrane including zeolite, 466 (2002) 39

Citrate selective electrodes for the flow injection analysis of soft drinks, beers and pharmaceutical products, 471 (2002) 41

#### **Polymerization**

On the ambiguity of self-modeling curve resolution: orthogonal projection approach analysis of the on-line Fourier transform-Raman spectra of styrene/1,3-butadiene block-copolymerization, 460 (2002) 73

#### **Polyphenol oxidase**

Indirect determination of pepsin activity in human seric protein samples by polyphenol oxidase electrodes, 460 (2002) 163

#### **Polypyrrole**

Bienzymatic amperometric biosensor for glucose based on polypyrrole/ceramic carbon as electrode material, 451 (2002) 251

Electrochemical biosensing of DNA hybridization by ferrocenyl groups functionalized polypyrrole, 469 (2002) 85

Study on the formation of the Prussian blue films on the polypyrrole surface as a potential mediator system for biosensing applications, 472 (2002) 113

#### **Polysaturated fatty acids (PUFA)**

High-performance liquid chromatography-thermospray ionization-mass spectrometry of the oxidation products of polyunsaturated fatty acids, 465 (2002) 227

Determination of free polyunsaturated fatty acids and their oxidative metabolites by high-performance liquid chromatography (HPLC) and mass spectrometry (MS), 465 (2002) 417

#### **Polyurethane foam**

Determination of gallic acid with 4-nitrobenzenediazonium tetrafluoroborate by diffuse reflectance spectrometry on polyurethane foam, 469 (2002) 295

#### **Porcine kidney**

Determination of carazolol residues in porcine tissue by radio-receptor assay, 462 (2002) 149

#### **Porcine muscle**

Determination of carazolol residues in porcine tissue by radio-receptor assay, 462 (2002) 149

#### **Pore-waters**

Iron(II) and iron(III) determination by potentiometry and ion-exchange voltammetry at ionomer-coated electrodes, 474 (2002) 147

#### **Pork**

Mineral analysis (Fe, Zn, Ca, Na, K) of fresh Iberian pork loin by near infrared reflectance spectrometry. Determination of Fe, Na and K with a remote fibre-optic reflectance probe, 468 (2002) 293

#### **Porous carbon**

Polyelectrolyte-stabilized biosensors based on macroporous carbon electrode, 467 (2002) 217

#### **Porphyrin**

Amperometric detection of nitrite and nitrate at tetra-ruthenated porphyrin-modified electrodes in a continuous-flow assembly, 452 (2002) 23

Quartz crystal microbalance sensor targeting low molecular weight compounds using oligopeptide binder and peptide-immobilized latex beads, 469 (2002) 183

Cyclodextrin-porphyrin supramolecular sensitizer for mercury(II) ion, 469 (2002) 285

#### **Port wine**

Sequential injection flow system with improved sample throughput: determination of glycerol and ethanol in wines, 458 (2002) 131

***Portulaca oleracea* L.**

Quantification of noradrenaline and dopamine in *Portulaca oleracea* L. by capillary electrophoresis with laser-induced fluorescence detection, 471 (2002) 203

**Post-column detection**

Optimization and development of a high-performance liquid chromatography-based one-site immunometric assay with chemiluminescence detection, 470 (2002) 37

**Post-column electrochemistry**

Kinetics of the post-column complexation reaction of Cu(II) with *N*-formylmethionyl chemoattractant and chemotactic peptides, 474 (2002) 1

**Potassium hydrogentartrate**

Optimisation of the method for determination of the temperature of saturation in wines, 458 (2002) 257

**Potassium superoxide**

Investigations of the adulteration of extra virgin olive oils with seed oils using their weak chemiluminescence, 464 (2002) 135

**Potential step**

Surface plasmon resonance transients at an electrochemical interface: time resolved measurements using a bicell photodiode, 475 (2003) 47

**Potentiometric biosensors**

Glucose and urea biosensors based on all solid-state PVC-NH<sub>2</sub> membrane electrodes, 452 (2002) 29

**Potentiometric determination**

Simultaneous potentiometric and fluorimetric determination of diclofenac in a sequential injection analysis system, 470 (2002) 185

**Potentiometric flow injection system**

Determination of polyethoxylated non-ionic surfactants using potentiometric flow injection systems. Improvement of the detection limits employing an on-line pre-concentration stage, 454 (2002) 217

**Potentiometric sensor**

Methylene blue potentiometric sensor for selective determination of sulfide ions, 466 (2002) 47

**Potentiometric titration**

Methylene blue potentiometric sensor for selective determination of sulfide ions, 466 (2002) 47

**Potentiometry**

Solid-state pH nanoelectrode based on polyaniline thin film electrodeposited onto ion-beam etched carbon fiber, 452 (2002) 1

Determination of stoichiometry of Li<sub>1-x</sub>CoO<sub>2</sub> materials by flame atomic absorption spectrometry and automated potentiometric titration, 455 (2002) 35

Fabrication of a covalently attached multilayer film electrode containing cobalt phthalocyanine and its application as a potentiometric sensor of iodide ion, 455 (2002) 61

Yeast cells sucrose biosensor based on a potentiometric oxygen electrode, 458 (2002) 215

Zn(II)-selective membrane electrode based on tetra(2-aminophenyl) porphyrin, 460 (2002) 177

Selective thiocyanate poly(vinyl chloride) membrane based on a 1,8-dibenzyl-1,3,6,8,10,13-hexaazacyclotetradecane-Ni(II) perchlorate, 462 (2002) 25

Novel Ag<sup>+</sup> ion-selective electrodes based on two new mixed azathioether crowns containing a 1,10-phenanthroline sub-unit, 462 (2002) 225

Cobalt(II)-selective membrane electrode using a recently synthesized mercapto compound, 462 (2002) 245

Determination of chloride by multisyringe flow injection analysis and sequential injection analysis with potentiometric detection, 467 (2002) 25

Citrate selective electrodes for the flow injection analysis of soft drinks, beers and pharmaceutical products, 471 (2002) 41

Iron(II) and iron(III) determination by potentiometry and ion-exchange voltammetry at ionomer-coated electrodes, 474 (2002) 147

Ytterbium(III)-selective membrane electrode based on cefixime, 475 (2003) 59

**Power plant**

Simultaneous determination of silicate and phosphate in boiler water at power plants based on series flow cells by using flow injection spectrophotometry, 455 (2002) 315

**PQC sensor**

Piezoelectric quartz crystal sensors based on ion-pair complexes for the determination of cinchonine in human serum and urine, 454 (2002) 65

**Pralidoxime**

Solvent extraction flow-injection manifold for the simultaneous spectrophotometric determination of free cyanide and thiocyanate ions based upon on-line masking of cyanides by formaldehyde, 452 (2002) 295

**Preconcentration**

Molecularly imprinted polymers for on-line preconcentration by solid phase extraction of pirimicarb in water samples, 451 (2002) 297

Automated flow analysis system based on multicommution for Cd, Ni and Pb on-line pre-concentration in a cationic exchange resin with determination by inductively coupled plasma atomic emission spectrometry, 453 (2002) 301

Evaluation of electroless gold deposited on porous silica for ligand attachment for metal ion-exchange, 454 (2002) 37

Silica gel functionalized with resacetophenone: synthesis of a new chelating matrix and its application as metal ion collector for their flame atomic absorption spectrometric determination, 454 (2002) 229

Determination of copper in seawater based on a liquid membrane preconcentration system, 460 (2002) 35

Flow injection on-line preconcentration of low levels of Cr(VI) with detection by ETAAS. Comparison of using an open tubular PTFE knotted reactor and a column reactor packed with PTFE beads, 463 (2002) 99

1,4,8,11-Tetraazacyclotetradecane bound to poly(*p*-chloromethylstyrene-ethylene glycol dimethacrylate) microbeads for selective gold uptake, 464 (2002) 313

Extraction and preconcentration of Cr(VI) from urine using supported liquid membrane, 474 (2002) 59

#### **Preconcentration and separation**

Synthesis of amidinothioureido-silica gel and its application to flame atomic absorption spectrometric determination of silver, gold and palladium with on-line preconcentration and separation, 452 (2002) 223

Implementation of suitable flow injection/sequential injection-sample separation/preconcentration schemes for determination of trace metal concentrations using detection by electrothermal atomic absorption spectrometry and inductively coupled plasma mass spectrometry, 467 (2002) 3

#### **Prediction bias**

Limit of detection estimator for second-order bilinear calibration, 451 (2002) 313

#### **Prediction of binding affinity**

Prediction of human serum albumin-drug binding affinity without albumin, 454 (2002) 101

#### **Prediction variance**

Limit of detection estimator for second-order bilinear calibration, 451 (2002) 313

#### **Pre-processing**

Variable reduction on electronic tongue data, 452 (2002) 255

#### **Preprocessing method**

A comparison of two algorithms for warping of analytical signals, 456 (2002) 77

#### **Preservatives determination**

Validation of a micellar electrokinetic capillary chromatography method for the determination of imidurea, methyl and propylparabens in a pharmaceutical ointment, 463 (2002) 15

#### **Pressurised hot water extraction**

Static-dynamic pressurized hot water extraction coupled to on-line filtration-solid-phase extraction-high-performance liquid chromatography-post-column derivatization-fluorescence detection for the analysis of *N*-methylcarbamates in foods, 463 (2002) 189

Pressurised hot water extraction and thermal desorption of polycyclic aromatic hydrocarbons from sediment with use of a novel extraction vessel, 466 (2002) 93

#### **Pre-term**

Stable isotope analysis of fatty acids by gas chromatography-isotope ratio mass spectrometry, 465 (2002) 63

#### **Pretreatment**

Pretreatment of water samples using UV irradiation-peroxodisulfate for the determination of total mercury, 454 (2002) 271

#### **Principal component analysis**

Maintenance of a calibration model for near infrared spectrometry by a combined principal component analysis-partial least squares approach, 452 (2002) 35

Characterisation of humic substances by acid catalysed transesterification, 452 (2002) 105

Wheat lipids to discriminate species, varieties, geographical origins and crop years, 454 (2002) 315

Development of a generic flow-injection analysis method for compounds with a secondary amine or amide function, using an experimental design approach. Part II. Selection and evaluation of the chemical reaction parameters, 455 (2002) 117

Application of multivariate methods to scalp hair metal data to distinguish between drug-free subjects and drug abusers, 455 (2002) 253

Parallel co-ordinate geometry and principal component analysis for the interpretation of large multi-response experimental designs, 458 (2002) 397

Differentiation of human serum samples by surface plasmon resonance monitoring of the integral glycoprotein interaction with a lectin panel, 459 (2002) 25

Chemometrics characterisation of the quality of river water, 462 (2002) 87

Flow injection analysis applied to a voltammetric electronic tongue, 471 (2002) 159

#### **Principal component regression**

Determination of the antibacterial enrofloxacin by differential-pulse adsorptive stripping voltammetry, 454 (2002) 83

#### **Principal components**

Spectrophotometric determination of acidity constants of 4-(2-pyridylazo)resorcinol in binary methanol-water mixtures, 455 (2002) 335

#### **Principal factor analysis**

Classification of metal ions according to their complexing properties: a data-driven approach, 455 (2002) 131

#### **Principle component analysis**

Cross-sensitive chemical sensors based on tetraphenylporphyrin and phthalocyanine, 457 (2002) 297

#### **Probabilistic neural network**

Application of probabilistic neural network in the clinical diagnosis of cancers based on clinical chemistry data, 471 (2002) 77

#### **Probe**

In vitro study of experimental factors affecting the microdialysis results, 459 (2002) 143

#### **Procaine hydrochloride**

Investigation of a liquid-liquid extraction system based on non-ionic surfactant-salt-H<sub>2</sub>O and mechanism of drug extraction, 452 (2002) 321

Frequency doubling scattering and second-order scattering technology as novel methods for the determination of the inclusion constant of procaine hydrochloride to  $\beta$ -cyclodextrin, 472 (2002) 89

**Process analysis**

- Quantitation of intracellular recombinant human superoxide dismutase using surface plasmon resonance, 456 (2002) 193  
Determination of the ethylene oxide content of polyether polyols by low-field  $^1\text{H}$  nuclear magnetic resonance spectrometry, 472 (2002) 133

**Process analyzers**

- Solving the problems of sequential injection systems as process analyzers, 467 (2002) 61

**Procyclidine**

- Capillary electrophoresis with electrochemiluminescence detection of procyclidine in human urine pretreated by ion-exchange cartridge, 470 (2002) 137

**Prodrug**

- Analysis of fatty acid anhydrides and polyanhydrides, 465 (2002) 257

**Profenofos**

- Quantitative nuclear magnetic resonance spectrometry. II. Purity of phosphorus-based agrochemicals glyphosate (*N*-(phosphonmethyl)-glycine) and profenofos (*O*-(4-bromo-2-chlorophenyl) *O*-ethyl *S*-propyl phosphorothioate) measured by  $^1\text{H}$  and  $^{31}\text{P}$  QNMR spectrometry, 474 (2002) 125

**Progesterone**

- Use of specific bioluminescent cell lines for the detection of steroid hormone (ant)agonists in meat producing animals, 473 (2002) 119

**Propelling devices**

- Propelling devices: the heart of flow injection approaches, 461 (2002) 169

**Propylparaben**

- Simultaneous determination of methylparaben, propylparaben, sodium diclofenac and its degradation product in a topical emulgel by reversed-phase liquid chromatography, 467 (2002) 91

**Prostanoid**

- Strategy and principles of the simultaneous analysis of prostanoids by gas chromatography/mass spectrometry/selected-ion monitoring, 465 (2002) 379

**Protamine**

- Physical adsorption of protamine for heparin assay using a quartz crystal microbalance and electrochemical impedance spectroscopy, 462 (2002) 261

**Protein**

- Reagentless pH-based biosensing using a fluorescently-labelled dextran co-entrapped with a hydrolytic enzyme in sol-gel derived nanocomposite films, 457 (2002) 47  
Analytical methods for the characterization of proteins and peptides in wines, 458 (2002) 63  
Langmuir aggregation of Evans blue on cetyltrimethylammonium bromide and on proteins and its application, 458 (2002) 417

- Quantitative determination of proteins by the Rayleigh light-scattering technique after optimization of the derivation reaction with Arsenazo-DBS, 459 (2002) 313

- Synchronous fluorescence determination of protein with functionalized CdS nanoparticles as a fluorescence probe, 466 (2002) 87

**Protein A**

- Protein A immobilized monolithic capillary column for affinity chromatography, 466 (2002) 141

**Protein complex**

- Screening of antagonists based on induced dissociation of a calmodulin-melittin interaction entrapped in a sol-gel derived matrix, 470 (2002) 19

**Protein engineering**

- Development of a thermostable firefly luciferase, 457 (2002) 115

**Protein phosphatase**

- Detection of microcystins with protein phosphatase inhibition assay, high-performance liquid chromatography-UV detection and enzyme-linked immunosorbent assay. Comparison of methods, 466 (2002) 213

**Protoporphyrin**

- Molecular imprinting-based fluorescent chemosensor for histamine using zinc(II)-protoporphyrin as a functional monomer, 466 (2002) 31

**Prussian blue**

- Study on the formation of the Prussian blue films on the polypyrrole surface as a potential mediator system for biosensing applications, 472 (2002) 113

***Pseudomonas fluorescens***

- Use of bioluminescent bacterial sensors as an alternative method for measuring heavy metals in soil extracts, 456 (2002) 55

***Pseudomonas putida* BA-11**

- Determination of organophosphorus aromatic nitro insecticides by using electric-field cell orientation in microbial suspensions, 462 (2002) 165

***Pseudomonas putida* C-11**

- Determination of organophosphorus aromatic nitro insecticides by using electric-field cell orientation in microbial suspensions, 462 (2002) 165

**PTFE**

- Speciation of chromium(III) and chromium(VI) by in situ separation and sequential determination with electrothermal vaporization inductively coupled plasma atomic emission spectrometry, 471 (2002) 121

***Puerariae radix***

- Determination of puerarin and daidzein in *Puerariae radix* and its medicinal preparations by micellar electrokinetic capillary chromatography with electrochemical detection, 452 (2002) 123

**Puerarin**

Determination of puerarin and daidzein in *Puerariae radix* and its medicinal preparations by micellar electrokinetic capillary chromatography with electrochemical detection, 452 (2002) 123

**PUFA oxidative metabolites**

Determination of free polyunsaturated fatty acids and their oxidative metabolites by high-performance liquid chromatography (HPLC) and mass spectrometry (MS), 465 (2002) 417

**Pulsed flow**

Monitoring urea levels during haemodialysis with a pulsed-flow chemiluminescence analyser, 461 (2002) 131

Multi-pumping in flow analysis: concepts, instrumentation, potentialities, 466 (2002) 125

**Pulsed voltammetry**

Flow injection analysis applied to a voltammetric electronic tongue, 471 (2002) 159

**Pure copper**

Determination of bismuth, selenium and tellurium in nickel-based alloys and pure copper by flow-injection hydride generation atomic absorption spectrometry—with ascorbic acid pre-reduction and cupferron chelation-extraction, 459 (2002) 161

**Purine bases**

Separation of six purine bases by capillary electrophoresis with electrochemical detection, 457 (2002) 225

**Purine nucleoside phosphorylase**

Selective fluorescent and fluorogenic substrates for purine-nucleoside phosphorylases from various sources, and direct fluorimetric determination of enzyme levels in human and animal blood, 472 (2002) 63

**Purines**

Determination of purines and pyrimidines in beer samples by capillary zone electrophoresis, 454 (2002) 185

**Purity measurements**

Quantitative nuclear magnetic resonance spectrometry. II. Purity of phosphorus-based agrochemicals glyphosate (*N*-(phosphonomethyl)-glycine) and proflinofos (*O*-(4-bromo-2-chlorophenyl) *O*-ethyl *S*-propyl phosphorothioate) measured by  $^1\text{H}$  and  $^{31}\text{P}$  QNMR spectrometry, 474 (2002) 125

**Putrescine**

Determination of volatile biogenic amines in muscle food products by ion mobility spectrometry, 463 (2002) 155

**PVC**

Copper(II)-selective electrode based on dithioacetal, 455 (2002) 225  
Entrapment of glucose oxidase in non-porous poly(vinyl chloride), 461 (2002) 57

**PVC membrane**

Lead-selective fluorescent optode membrane based on 3,3',5,5'-tetramethyl-*N*-(9-anthrylmethyl)benzidine, 460 (2002) 123

Selective thiocyanate poly(vinyl chloride) membrane based on a 1,8-dibenzyl-1,3,6,8,10,13-hexaazacyclotetradecane-Ni(II) perchlorate, 462 (2002) 25

Novel  $\text{Ag}^+$  ion-selective electrodes based on two new mixed azathioether crowns containing a 1,10-phenanthroline sub-unit, 462 (2002) 225

Cobalt(II)-selective membrane electrode using a recently synthesized mercapto compound, 462 (2002) 245

Novel coated-graphite membrane sensor based on *N,N'*-dimethylcyanodiaz-18-crown-6 for the determination of ultra-trace amounts of lead, 464 (2002) 181

Poly(vinyl chloride)-membrane ion-selective bulk optode based on 1,10-dibenzyl-1,10-diaza-18-crown-6 and 1-(2-pyridylazo)-2-naphthol for  $\text{Cu}^{2+}$  and  $\text{Pb}^{2+}$  ions, 464 (2002) 187

Ytterbium(III)-selective membrane electrode based on cefixime, 475 (2003) 59

**PVC-NH<sub>2</sub> membrane electrode**

Glucose and urea biosensors based on all solid-state PVC-NH<sub>2</sub> membrane electrodes, 452 (2002) 29

**Py-GC-MS**

Application of factor analysis for resolving thermogravimetric-mass spectrometric analysis spectra, 461 (2002) 215

**Pyrene**

Monofluorinated polycyclic aromatic hydrocarbons as internal standards in Shpol'skii spectroscopy: 1-fluoropyrene as an example, 459 (2002) 53

Optical oxygen sensor based on fluorescence change of pyrene-1-butyric acid chemisorption film on an anodic oxidation aluminium plate, 471 (2002) 25

**Pyridoxine**

Spectrofluorimetric method for the determination of piroxicam and pyridoxine, 466 (2002) 275

**4-(2-Pyridylazo)resorcinol**

Spectrophotometric determination of acidity constants of 4-(2-pyridylazo)resorcinol in binary methanol-water mixtures, 455 (2002) 335

**Pyrimidines**

Determination of purines and pyrimidines in beer samples by capillary zone electrophoresis, 454 (2002) 185

**Pyrohydrolysis**

Potentiometric determination of fluoride in geological and biological samples following pyrohydrolytic decomposition, 466 (2002) 117

**Pyrolysis**

Sorption of aquatic humic matter by DAX-8 and XAD-8 resins. Comparative study using pyrolysis gas chromatography, 471 (2002) 219

**Pyrrolidine dithiocarbamate**

Column solid-phase extraction with Chromosorb-102 resin and determination of trace elements in water and sediment samples by flame atomic absorption spectrometry, 452 (2002) 77

**Pyruvate**

Flow monitoring of NADH consumption in bioassays based on packed-bed reactors bearing NAD<sup>+</sup>-dependent dehydrogenases. Determination of acetaldehyde using alcohol dehydrogenase, 467 (2002) 225

**Pyruvate decarboxylase**

Flow monitoring of NADH consumption in bioassays based on packed-bed reactors bearing NAD<sup>+</sup>-dependent dehydrogenases. Determination of acetaldehyde using alcohol dehydrogenase, 467 (2002) 225

**Pyruvate oxidase**

Development of a bienzyme reactor sensor system for the determination of ornithine, 456 (2002) 219

## Q

**QCM**

Quartz crystal microbalance determination of organophosphorus and carbamate pesticides, 469 (2002) 189

**QSPR**

Radial basis function network-based quantitative structure-property relationship for the prediction of Henry's law constant, 462 (2002) 101

**Quality**

Characterisation of young Cognac spirit aromatic quality, 458 (2002) 191

**Quality control**

Contribution of European research to anti-microbials and hormones, 473 (2002) 83

Contribution of European research to endocrine disruptors, 473 (2002) 161

**Quantification**

Artificial neural networks for quantification in unresolved capillary electrophoresis peaks, 452 (2002) 47

Quantitative fuzzy neural network for analytical determination, 468 (2002) 105

Simultaneous determination of sulfadiazine and trimethoprim in animal feed by liquid chromatography with UV and tandem mass spectrometric detection, 473 (2002) 183

**Quantitative analysis**

Application of quantitative IR spectral analysis of bacterial cells to acetone-butanol-ethanol fermentation monitoring, 471 (2002) 127

**Quantitative EPR spectroscopy**

From a point-like to an arbitrarily shaped sample. A survey of equations for electron paramagnetic resonance signal intensity calculations, 456 (2002) 129

**Quantitative EPR spectroscopy**

Radial and longitudinal profiles of the electron paramagnetic resonance signal intensity of a single TE<sub>102</sub> rectangular cavity. A three-dimensional surface plot for a point-like sample, 464 (2002) 163

**Quantitative millimetre wavelength spectrometry**

Quantitative millimetre wavelength spectrometry at pressures approaching atmospheric. Part I. Absolute determination of transition line strengths and sample concentrations with a confocal Fabry-Perot cavity spectrometer, 466 (2002) 57

Quantitative millimetre wavelength spectrometry at pressures approaching atmospheric. II. Determination of oxygen at atmospheric pressure, 468 (2002) 323

**Quantitative mode**

Advantages and limitations of the semi-quantitative operation mode of an inductively coupled plasma-mass spectrometer for multi-element analysis of wines, 463 (2002) 165

**Quantitative NMR spectroscopy**

Quantitative nuclear magnetic resonance spectrometry. II. Purity of phosphorus-based agrochemicals glyphosate (*N*-(phosphonomethyl)-glycine) and profenofos (*O*-(4-bromo-2-chlorophenyl) *O*-ethyl *S*-propyl phosphorothioate) measured by <sup>1</sup>H and <sup>31</sup>P QNMR spectrometry, 474 (2002) 125

**Quantitative structure-retention relationships**

Prediction of log *k*<sub>0</sub> of disubstituted benzene derivatives in reversed-phase high-performance liquid chromatography using multiple linear regression and radial basis function neural network, 463 (2002) 89

**Quartz crystal**

Interfacial nucleic acid chemistry studied by acoustic shear wave propagation, 469 (2002) 101

**Quartz crystal microbalance (QCM)**

Development of an immunosensor for human ferritin, a nonspecific tumor marker, based on a quartz crystal microbalance, 453 (2002) 181

Physical adsorption of protamine for heparin assay using a quartz crystal microbalance and electrochemical impedance spectroscopy, 462 (2002) 261

Quartz crystal microbalance sensor targeting low molecular weight compounds using oligopeptide binder and peptide-immobilized latex beads, 469 (2002) 183

Immunosensor for okadaic acid using quartz crystal microbalance, 471 (2002) 33

Study on the formation of the Prussian blue films on the polypyrrole surface as a potential mediator system for biosensing applications, 472 (2002) 113

**Quartz piezoelectric crystal**

Kinetic detection of benzene/chloroform and toluene/chloroform vapors using a single quartz piezoelectric crystal coated with calix[6]arene, 464 (2002) 57

**Quenching**

Selective fluorescence quenching of polycyclic aromatic hydrocarbons by nitromethane within room temperature ionic liquid 1-butyl-3-methylimidazolium hexafluorophosphate, 453 (2002) 89

**Quenching correction**

Comparative study of quenching correction procedures for  $^{90}\text{Sr}/^{90}\text{Y}$  determination by Cerenkov, liquid scintillation and plastic scintillation techniques, 471 (2002) 135

**Quinoxalines**

Recent developments in the use and abuse of growth promoters, 473 (2002) 71

# R

**Radial basis function**

Prediction of  $\log k_w$  of disubstituted benzene derivatives in reversed-phase high-performance liquid chromatography using multiple linear regression and radial basis function neural network, 463 (2002) 89

**Radial basis function networks**

Radial basis function network-based quantitative structure–property relationship for the prediction of Henry's law constant, 462 (2002) 101

**Radial basis function networks (RBFN)**

Determination of organic matter in soils using radial basis function networks and near infrared spectroscopy, 453 (2002) 125

**Radiative transition**

Measurement of K shell radiative transition probabilities and  $K$ ,  $L_2$  and  $L_3$  shell/subshell fluorescence yields of some elements in the atomic number range  $30 \leq Z \leq 40$ , 454 (2002) 327

**Radical scavengers**

'Untypical aging off-flavor' in wine: formation of 2-aminoacetophenone and evaluation of its influencing factors, 458 (2002) 29

**Radioactivity**

Mixed waste reduction in radioactivity determination by using plastic scintillators, 463 (2002) 125

**Radiometric detection**

High performance liquid chromatography of fatty acid metabolites. Improvement of sensitivity by radiometric, fluorimetric and mass spectrometric methods, 465 (2002) 193

**Radio-receptor assay**

Determination of carazolol residues in porcine tissue by radio-receptor assay, 462 (2002) 149

Detection of illegal growth promoters in biological samples using receptor binding assays, 473 (2002) 135

**Radiotracer technique**

Analysis of copper complex lability using  $^{64}\text{Cu}$ -equilibration techniques and free-ion selective radiotracer extraction, 464 (2002) 141

**Radium**

Separation of Sr from Ca, Ba and Ra by means of  $\text{Ca}(\text{OH})_2$  and  $\text{Ba}(\text{Ra})\text{Cl}_2$  or  $\text{Ba}(\text{Ra})\text{SO}_4$  for the determination of radiostrotrium, 466 (2002) 109

**RAFA**

Determination of rate constants from two-way kinetic-spectral data by using rank annihilation factor analysis, 454 (2002) 21

**Rain water**

Calibrationless determination of cadmium, lead and copper in rain samples by stripping voltammetry at mercury microelectrodes. Effect of natural convection on the deposition step, 452 (2002) 65

**Raipore R1030**

Chromium(VI) transport through the Raipore 1030 anion exchange membrane, 464 (2002) 15

**Rank annihilation**

Rank annihilation correction for the amendment of instrumental inconsistencies, 464 (2002) 249

**Rapid detection**

Direct detection of myoglobin in whole blood using a disposable amperometric immunosensor, 460 (2002) 141

**Rapid field test**

Evaluation of a field-test kit for triazine herbicides (SensioScreen<sup>®</sup> TR500) as a fast assay to detect pesticide contamination in water samples, 475 (2003) 105

**Rapid PCR**

ResonSense<sup>®</sup>: simple linear fluorescent probes for quantitative homogeneous rapid polymerase chain reaction, 457 (2002) 61

**Rapid test**

Rapid on-site immunoassay for diflubenzuron in grains, 468 (2002) 209

**Rapid toxicity tests**

Comparison of three microbial assay procedures for measuring toxicity of chemical compounds: ToxAlert<sup>®</sup> 10, CellSense and Biolog MT2 microplates, 456 (2002) 41

**Rate constant determination**

Determination of rate constants from two-way kinetic-spectral data by using rank annihilation factor analysis, 454 (2002) 21

**Ratio derivative spectrophotometry**

Determination of lamivudine and zidovudine in binary mixtures using first derivative spectrophotometric, first derivative of the ratio-spectra and high-performance liquid chromatography–UV methods, 466 (2002) 175

**Reactive oxygen**

Chemiluminescence assay for catechin based on generation of hydrogen peroxide in basic solution, 472 (2002) 75

**Reactive oxygen species**

Monitoring reactive oxygen species in vivo using microdialysis sampling and chemiluminescence detection as an alternative

global method for determination of total antioxidant capacity, 467 (2002) 133

#### **Readsorption**

Continuous-flow system for reduction of metal readsorption during sequential extraction of soil, 472 (2002) 147

#### **Real-time accuracy assessment**

Simultaneous potentiometric and fluorimetric determination of diclofenac in a sequential injection analysis system, 470 (2002) 185

#### **Reconstituted biological membranes**

Membrane supported bilayer lipid membranes array: preparation, stability and ion-channel insertion, 460 (2002) 23

#### **Recovery**

In vitro study of experimental factors affecting the microdialysis results, 459 (2002) 143

#### **Recycled paper packaging materials**

Migration studies from recycled paper packaging materials: development of an analytical method for rapid testing, 467 (2002) 253

#### **Red wine**

Determination of ethylphenol compounds in wine by headspace solid-phase microextraction in conjunction with gas chromatography and flame ionization detection, 458 (2002) 111  
Anthocyanin-derived pigments and colour of red wines, 458 (2002) 147

#### **Redox polymer**

Quinohemoprotein alcohol dehydrogenase-based reagentless amperometric biosensor for ethanol monitoring during wine fermentation, 463 (2002) 39  
Characterization of oxidoreductase–redox polymer electrostatic film assembly on gold by surface plasmon resonance spectroscopy and Fourier transform infrared–external reflection spectroscopy, 466 (2002) 201

#### **Reducible**

Determination of Al, Cu, Fe, Mn, Pb and Zn in certified reference materials using the optimized BCR sequential extraction procedure, 454 (2002) 249

#### **REE pattern**

Determination of the oxidation state of cerium in rocks by Ce L<sub>III</sub>-edge X-ray absorption near-edge structure spectroscopy, 468 (2002) 345

#### **Reflectance**

Optical fibre sensor for hydrogen sulphide monitoring in mouth air, 471 (2002) 13

#### **Reflectometric interference spectroscopy**

Versatile biosensor surface based on peptide nucleic acid with label free and total internal reflection fluorescence detection for quantification of endocrine disruptors, 469 (2002) 37

#### **Refractive index change**

Surface plasmon resonance study on enhanced refractive index change of an Ag<sup>+</sup> ion-sensing membrane containing dithiosquarylium dye, 460 (2002) 133

#### **Regiospecificity**

Chromatographic analysis of lipoxygenase products, 465 (2002) 319

#### **Regularized forward selection**

Determination of organic matter in soils using radial basis function networks and near infrared spectroscopy, 453 (2002) 125

#### **Release**

Application of a sequential extraction procedure to study the release of elements from municipal solid waste incineration bottom ash, 451 (2002) 285

#### **Reliability**

Can plasma spectrochemistry assist in improving the accuracy of chemical analysis?, 456 (2002) 63

#### **Remediation**

Development of a laccase-based flow injection electrochemical biosensor for the determination of phenolic compounds and its application for monitoring remediation of Kraft E1 paper mill effluent, 463 (2002) 229  
Covalent binding of genetically engineered microorganisms to porous glass beads, 470 (2002) 71

#### **Remote analysis**

Development of the continuously variable volume reactor for flow injection analysis. Part 1. Design, capabilities and testing, 455 (2002) 287  
Quantitative millimetre wavelength spectrometry at pressures approaching atmospheric. II. Determination of oxygen at atmospheric pressure, 468 (2002) 323

#### **Remote microwave spectroscopy**

Remote microwave wavelength spectrometry using an infrared fibre optic telecommunication network, 463 (2002) 1

#### **Remote near-infrared sensing**

Validation of remote, on-line, near-infrared measurements for the classification of demolition waste, 453 (2002) 117

#### **Renewable**

Flow system for liquid–solid extraction and pre-concentration using a renewable extracting solid phase, 472 (2002) 141

#### **Renewable microcolumn**

Renewable microcolumns for automated DNA purification and flow-through amplification: from sediment samples through polymerase chain reaction, 469 (2002) 129

#### **Renewable reagent**

Chromium(VI) transport through the Raipore 1030 anion exchange membrane, 464 (2002) 15

#### **Re–Os dating**

Simplified method for the Re–Os dating of molybdenite using acid digestion and isotope dilution ICP-MS, 463 (2002) 111

**Resacetophenone**

Silica gel functionalized with resacetophenone: synthesis of a new chelating matrix and its application as metal ion collector for their flame atomic absorption spectrometric determination, 454 (2002) 229

**Residue**

Comparison of immunoaffinity column recovery patterns of polychlorinated dibenzo-*p*-dioxins/polychlorinated dibenzofurans on columns generated with different monoclonal antibody clones and polyclonal antibodies, 457 (2002) 199

Rapid on-site immunoassay for diflubenzuron in grains, 468 (2002) 209

Simultaneous determination of fluorophores with overlapped spectra by sequential injection analysis coupled to variable angle scanning fluorescence spectrometry and multivariate linear regression algorithms, 471 (2002) 173

Contamination of animal feedingstuffs as a cause of residues in food: a review of regulatory aspects, incidence and control, 473 (2002) 3

Use of specific bioluminescent cell lines for the detection of steroid hormone (ant)agonists in meat producing animals, 473 (2002) 119

On-line detection of sulfamethazine and sulfadiazine in porcine bile using a multi-channel high-throughput SPR biosensor, 473 (2002) 143

Halofuginone contamination in feeds as a cause of residues in eggs, 473 (2002) 177

**Residue analysis**

Contribution of European research to anti-microbials and hormones, 473 (2002) 83

**Resolution**

Micellar-organic versus aqueous-organic mobile phases for the screening of  $\beta$ -blockers, 454 (2002) 109

Prediction of the separation of phenols by capillary zone electrophoresis, 458 (2002) 355

Gas chromatographic separation of *R/S*- $\alpha$ -hydroxy fatty acid esters, 465 (2002) 299

**Resonance light scattering**

Study of the interaction of Azur B with DNA and the determination of DNA based on resonance light scattering measurements, 452 (2002) 285

**Resonance Rayleigh scattering**

Resonance Rayleigh scattering, frequency doubling scattering and second-order scattering spectra of the heparin-crystal violet system and their analytical application, 468 (2002) 275

**ResonSense<sup>®</sup>**

ResonSense<sup>®</sup>: simple linear fluorescent probes for quantitative homogeneous rapid polymerase chain reaction, 457 (2002) 61

**Resorcylic acid lactone**

Confirmatory analysis method for zeranol, its metabolites and related mycotoxins in urine by liquid chromatography-negative ion electrospray tandem mass spectrometry, 473 (2002) 151

**Respiration**

Microbial biosensor for *p*-nitrophenol using *Moraxella* sp., 470 (2002) 79

**Respirometry**

Comparison of three microbial assay procedures for measuring toxicity of chemical compounds: ToxAlert<sup>®</sup> 10, CellSense and Biolog MT2 microplates, 456 (2002) 41

Tuning the parameters for fast respirometry, 460 (2002) 257

**Retinoic acid isomers**

Simple quantification of endogenous retinoids in bovine serum by high-performance liquid chromatography – diode-array detection, 468 (2002) 237

**Retinoids**

Differentiating geometrical isomers of retinoids and controlling their photo-isomerization by complexation with cyclodextrins, 468 (2002) 161

**Retinol**

Simple quantification of endogenous retinoids in bovine serum by high-performance liquid chromatography – diode-array detection, 468 (2002) 237

**Retinyl palmitate**

Simple quantification of endogenous retinoids in bovine serum by high-performance liquid chromatography – diode-array detection, 468 (2002) 237

**Reversed-phase**

Comparison of methods for the determination of ochratoxin A in wine, 453 (2002) 33

**Reversed-phase liquid chromatography**

Micellar-organic versus aqueous-organic mobile phases for the screening of  $\beta$ -blockers, 454 (2002) 109

Development and validation of liquid chromatographic method for the determination of lycopene in plasma, 467 (2002) 115

Phanquinone: a useful fluorescent pre-chromatographic derivatization reagent for liquid chromatographic analyses of amino acid dosage forms, 474 (2002) 11

**Reversible**

Reversible affinity interactions of antibody molecules at functionalized dendrimer monolayer: affinity-sensing surface with reusability, 456 (2002) 209

**Review**

High-performance liquid chromatography of fatty acids in biological samples, 465 (2002) 81

Analysis of fatty acids by column liquid chromatography, 465 (2002) 145

Chromatographic separation and identification of conjugated linoleic acid isomers, 465 (2002) 207

High-performance liquid chromatographic determination of free fatty acids and esterified fatty acids in biological materials as their 2-nitrophenylhydrazides, 465 (2002) 237

**Rhodamine 19 octadecylamide**

Lipophilic derivative of rhodamine 19: characterization and spectroscopic properties, 468 (2002) 13

**Rhodamine B**

Flow-injection chemiluminescence determination of ascorbic acid by use of the cerium(IV)-Rhodamine B system, 464 (2002) 289

Surface-enhanced Raman scattering detection of the breast cancer susceptibility gene *BRCA1* using a silver-coated microarray platform, 469 (2002) 149

**Rhodamine B hydrazide**

Novel spectrofluorimetric method for the determination of sulfite with rhodamine B hydrazide in a micellar medium, 456 (2002) 121

**Rhubarb**

Determination of six components in Rhubarb by cyclodextrin-modified micellar electrokinetic chromatography using a mixed micellar system of sodium cholate and sodium taurocholate, 456 (2002) 183

**Ring-down**

Aerosol analysis by cavity-ring-down laser spectroscopy, 466 (2002) 1

**Ring-like deposit**

Fluorescence microscopic quantification of DNA with  $\alpha, \beta, \gamma, \delta$ -tetakis[4-(trimethylammonium)phenyl]porphine by a ring-like deposition technique, 466 (2002) 193

**Risk analysis**

Contribution of European research to anti-microbials and hormones, 473 (2002) 83

**Risk assessment**

Contribution of European research to endocrine disruptors, 473 (2002) 161

**Risperidone**

Simultaneous determination of clozapine, clozapine *N*-oxide, *N*-desmethyloclozapine, risperidone, and 9-hydroxyrisperidone in plasma by high performance liquid chromatography with ultra-violet detection, 460 (2002) 201

**Ritalin<sup>®</sup>**

Quantification of methylphenidate in rat, rabbit and dog plasma using a chiral liquid-chromatography/tandem mass spectrometry method. Application to toxicokinetic studies, 469 (2002) 261

**River water**

Interactions of Pb(II) with particles of a polluted river, 462 (2002) 73

**RLS**

Quantitative determination of proteins by the Rayleigh light-scattering technique after optimization of the derivation reaction with Arsenazo-DBS, 459 (2002) 313

**Road dust samples**

Microwave-assisted digestion procedure for the determination of palladium in road dust, 459 (2002) 257

**Robust regression**

Robust regression and outlier detection in the evaluation of robustness tests with different experimental designs, 463 (2002) 53

**Rockwool**

Supported liquid membrane extraction for identification of phenolic compounds in the nutrient solution of closed hydroponic growing systems for tomato, 474 (2002) 49

**Roman pigment**

Investigation of a Roman age "bulk pigment" found in Vicenza, 475 (2003) 181

**Room temperature ionic liquids**

Selective fluorescence quenching of polycyclic aromatic hydrocarbons by nitromethane within room temperature ionic liquid 1-butyl-3-methylimidazolium hexafluorophosphate, 453 (2002) 89

**Room temperature phosphorescence**

Determination of trace levels of mercury in water samples based on room temperature phosphorescence energy transfer, 455 (2002) 179

Effect of small organic molecules on room temperature phosphorescence properties of naphthol ternary inclusion complexes in  $\beta$ -cyclodextrin, 463 (2002) 135

**Room-temperature fluorimetry**

Spectrofluorimetric method for the determination of piroxicam and pyridoxine, 466 (2002) 275

**Rosé wines**

Multivariate classification of rosé wines from different Spanish protected designations of origin, 458 (2002) 187

**Rotating disk electrode (RDE) linear sweep voltammetry**

Electrochemical studies on antioxidants in bovine milk, 474 (2002) 137

**R-Perindopril**

On-line simultaneous determination of *S*- and *R*-perindopril using amperometric biosensors as detectors in flow systems, 467 (2002) 189

**RP-HPLC**

Chromatographic analysis of lipoxygenase products, 465 (2002) 319

**Ruthenium**

Direct determination of aluminium in serum and urine by electrothermal atomic absorption spectrometry using ruthenium as permanent modifier, 464 (2002) 323

**Ruthenium(II) trisbipyridyl chelate**

Determination of adrenaline by using inhibited Ru(bpy)<sub>3</sub><sup>2+</sup> electrochemiluminescence, 471 (2002) 187

## S

**Salbutamol**

Using on-line solid phase extraction for flow-injection spectrophotometric determination of salbutamol, 455 (2002) 103

**Salicylate**

Direct and simultaneous spectrofluorometric determination of naproxen and salicylate in human serum assisted by chemometric analysis, 471 (2002) 87

**Saliva**

Development of a screening method for cocaine and cocaine metabolites in saliva using hollow fiber membrane solvent microextraction, 458 (2002) 311

**Saliva analysis**

Development of a non-competitive immunoassay for cortisol and its application to the analysis of saliva, 468 (2002) 315

**Sample pretreatment**

Implementation of suitable flow injection/sequential injection-sample separation/preconcentration schemes for determination of trace metal concentrations using detection by electrothermal atomic absorption spectrometry and inductively coupled plasma mass spectrometry, 467 (2002) 3

**Sample shape**

From a point-like to an arbitrarily shaped sample. A survey of equations for electron paramagnetic resonance signal intensity calculations, 456 (2002) 129

**Sample stability**

Influence of the storage conditions on the concentration of clenbuterol in cattle urine samples, 452 (2002) 115

**Sampling**

Automated control and optimisation of ion mobility spectrometry responses using a sheath-flow inlet, 463 (2002) 143

**Sampling devices**

Solving the problems of sequential injection systems as process analyzers, 467 (2002) 61

**SAMs**

Surface-enhanced Raman scattering detection of the breast cancer susceptibility gene *BRCA1* using a silver-coated microarray platform, 469 (2002) 149

**Sb**

Study of chemical and spectral interferences in the simultaneous determination of As, Bi, Sb, Se and Sn by hydride generation inductively coupled plasma atomic emission spectrometry, 468 (2002) 71

**Scanning**

Simultaneous detection of uric acid and glucose on a dual-enzyme chip using scanning electrochemical microscopy/scanning chemiluminescence microscopy, 458 (2002) 263

**Scanning chemiluminescence microscopy**

Simultaneous detection of uric acid and glucose on a dual-enzyme chip using scanning electrochemical microscopy/scanning chemiluminescence microscopy, 458 (2002) 263

**Scanning electron microscopy**

Investigation of a Roman age "bulk pigment" found in Vicenza, 475 (2003) 181

**Schizophrenia patients**

Simultaneous determination of clozapine, clozapine *N*-oxide, *N*-desmethylclozapine, risperidone, and 9-hydroxyrisperidone in plasma by high performance liquid chromatography with ultraviolet detection, 460 (2002) 201

**Screening**

Spectrafluorimetric method for the rapid screening of toxic heavy metals in water samples, 451 (2002) 203

Internal validation of screening methodology for residues of epitenbolone, trenbolone, epi-nortestosterone and nortestosterone in bovine urine using immunoaffinity cartridges for sample clean-up, 473 (2002) 111

**Screening analysis**

Estimating the uncertainty of binary test results to assess their compliance with regulatory limits, 455 (2002) 267

**Screening method**

Application of time-resolved luminescence to dry reagent chemical technology, 452 (2002) 169

Automatic screening method for the rapid and simple discrimination between synthetic and natural colorants in foods, 464 (2002) 237

Contribution of European research to anti-microbials and hormones, 473 (2002) 83

**Screen-printed**

Immobilization of acetylcholinesterase on screen-printed electrodes: comparative study between three immobilization methods and applications to the detection of organophosphorus insecticides, 464 (2002) 171

**Screen-printed electrode**

All-solid-state planar miniature ion-selective chloride electrode, 451 (2002) 243

Screen-printed biosensors for the control of wine quality based on lactate and acetaldehyde determination, 458 (2002) 203

Direct detection of myoglobin in whole blood using a disposable amperometric immunosensor, 460 (2002) 141

Flow amperometric detection of indigo for enzyme-linked immunosorbent assays with use of screen-printed electrodes, 462 (2002) 31

Voltammetric behavior and trace determination of  $Pb^{2+}$  at a mercury-free screen-printed silver electrode, 464 (2002) 229

**Screen-printing technique**

Screen-printable sol-gel ceramic carbon composite pH sensor with a receptor zeolite, 455 (2002) 53

**Se**

Study of chemical and spectral interferences in the simultaneous determination of As, Bi, Sb, Se and Sn by hydride generation inductively coupled plasma atomic emission spectrometry, 468 (2002) 71

**Se speciation**

Speciation analysis of selenium using voltammetric techniques, 467 (2002) 167

**Se(VI)**

Speciation analysis of selenium using voltammetric techniques, 467 (2002) 167

**Sea Nine 211**

Headspace solid phase microextraction for the analysis of the new antifouling agents Irgarol 1051 and Sea Nine 211 in natural waters, 468 (2002) 171

**Seafood**

Microwave-assisted digestion of organoarsenic compounds for the determination of total arsenic in aqueous, biological, and sediment samples using flow injection hydride generation electrothermal atomic absorption spectrometry, 452 (2002) 207

Ultrasonic extraction combined with fast furnace analysis as an improved methodology for total selenium determination in seafood by electrothermal-atomic absorption spectrometry, 452 (2002) 217

**Seawater**

Determination of inorganic antimony species in seawater by differential pulse anodic stripping voltammetry: stability of the trivalent state, 452 (2002) 237

Analysis for Cd, Cu, Ni, Zn, and Mn in estuarine water by inductively coupled plasma mass spectrometry coupled with an automated flow injection system, 455 (2002) 11

Determination of copper in seawater based on a liquid membrane preconcentration system, 460 (2002) 35

In situ osmotic analyzer for the year-long continuous determination of Fe in hydrothermal systems, 463 (2002) 265

Flow system with in-line separation/preconcentration coupled to graphite furnace atomic absorption spectrometry with W-Rh permanent modifier for copper determination in seawater, 463 (2002) 275

Continuous shipboard determination of Fe(II) in polar waters using flow injection analysis with chemiluminescence detection, 466 (2002) 261

A simple automated method for the speciation of dissolved inorganic nitrogen in seawater, 469 (2002) 235

Extraction and preconcentration of polychlorinated dibenzo-*p*-dioxins using the cloud-point methodology. Application to their determination in water samples by high-performance liquid chromatography, 470 (2002) 205

**SEB**

Development of a tetramethylrhodamine-labeled probe for a capillary electrophoresis-based competitive immunoassay of staphylococcal enterotoxin B, 457 (2002) 21

**Second derivatives**

Matched filtering with background suppression for improved quality of base peak chromatograms and mass spectra in liquid chromatography-mass spectrometry, 454 (2002) 167

**Secondary amines**

Development of a generic flow-injection analysis method for compounds with a secondary amine or amide function, using an experimental design approach. Part II. Selection and evaluation of the chemical reaction parameters, 455 (2002) 117

**Second-order bilinear calibration**

Limit of detection estimator for second-order bilinear calibration, 451 (2002) 313

**Second-order scattering**

Resonance Rayleigh scattering, frequency doubling scattering and second-order scattering spectra of the heparin-crystal violet system and their analytical application, 468 (2002) 275

Frequency doubling scattering and second-order scattering technology as novel methods for the determination of the inclusion constant of procaine hydrochloride to  $\beta$ -cyclodextrin, 472 (2002) 89

**Sediment**

Microwave-assisted digestion of organoarsenic compounds for the determination of total arsenic in aqueous, biological, and sediment samples using flow injection hydride generation electrothermal atomic absorption spectrometry, 452 (2002) 207

Principal component analysis application in polycyclic aromatic hydrocarbons "mussel watch" analyses for source identification, 461 (2002) 201

Pressurised hot water extraction and thermal desorption of polycyclic aromatic hydrocarbons from sediment with use of a novel extraction vessel, 466 (2002) 93

Comparison of conventional and fast thermal programme approaches for determination of total and extractable Cd in sediments by electrothermal atomic absorption spectrometry following sequential extraction, 466 (2002) 303

Microwave digestion of sludge, soil and sediment samples for metal analysis by inductively coupled plasma-atomic emission spectrometry, 468 (2002) 335

Renewable microcolumns for automated DNA purification and flow-through amplification: from sediment samples through polymerase chain reaction, 469 (2002) 129

**Sediment and colloid fractionation**

Assessment of the distribution of pesticides on soil particle fractions in simulated irrigation run-off using centrifugal SPLITT fractionation and ELISA, 468 (2002) 199

**Sediment samples**

Determination of some trace metals in water and sediment samples by flame atomic absorption spectrometry after coprecipitation with cerium (IV) hydroxide, 452 (2002) 231

**Seed oils**

Investigations of the adulteration of extra virgin olive oils with seed oils using their weak chemiluminescence, 464 (2002) 135

**Selective separation**

Systematic studies on adsorption of trace elements Pt, Pd, Au, Se, Te, As, Hg, Sb on thiol cotton fiber, 456 (2002) 147

**Selectivity**

Towards the optimization of an optical DNA sensor: control of selectivity coefficients and relative surface affinities, 457 (2002) 29

Time shift correction in second-order liquid chromatographic data with iterative target transformation factor analysis, 470 (2002) 163

Optimized separation of pharmacologically active xanthenes from *Securidaca inappendiculata* by micellar electrokinetic chromatography and microemulsion electrokinetic chromatography, 474 (2002) 37

#### Selectivity filter

Sensitive electrochemical detection of ozone, 459 (2002) 199

#### *Selenastrum capricornutum*

Toxicity evaluation of single and mixed antifouling biocides measured with acute toxicity bioassays, 456 (2002) 303

#### Selenium

Ultrasonic extraction combined with fast furnace analysis as an improved methodology for total selenium determination in seafood by electrothermal-atomic absorption spectrometry, 452 (2002) 217

Determination of bismuth, selenium and tellurium in nickel-based alloys and pure copper by flow-injection hydride generation atomic absorption spectrometry—with ascorbic acid prereduction and cupferron chelation—extraction, 459 (2002) 161

#### Selenocystine

Speciation analysis of selenium using voltammetric techniques, 467 (2002) 167

#### Self-assembled monolayer (SAM)

Development of an immunosensor for human ferritin, a nonspecific tumor marker, based on a quartz crystal microbalance, 453 (2002) 181

Effect of hydrogel matrix on binding kinetics of protein–protein interactions on sensor surface, 456 (2002) 201

Voltammetric determination of DNA hybridization using methylene blue and self-assembled alkanethiol monolayer on gold electrodes, 462 (2002) 39

Low density lipoprotein interaction with amino acid-modified self assembled monolayers on surface plasmon resonance surfaces, 470 (2002) 3

#### Self-modeling curve resolution

On the ambiguity of self-modeling curve resolution: orthogonal projection approach analysis of the on-line Fourier transform-Raman spectra of styrene/1,3-butadiene block-copolymerization, 460 (2002) 73

#### Self-ordered ring (SOR) technique

Fluorescent microscopic determination of cadmium in water samples with the self-ordered ring of  $\alpha,\beta,\gamma,\delta$ -tetra(5-sulphophenyl)-porphine formed on the solid support of glass slides, 453 (2002) 97

#### Semi-infinite diffusion

Determination of diffusion profiles of silver ions in soda-lime–silica glass by X-ray fluorescence spectrometry, 459 (2002) 305

#### Semi-quantitative analysis

Estimating the uncertainty of binary test results to assess their compliance with regulatory limits, 455 (2002) 267

#### Semi-quantitative mode

Advantages and limitations of the semi-quantitative operation mode of an inductively coupled plasma-mass spectrometer for multi-element analysis of wines, 463 (2002) 165

#### Sensitive layer

Polyaniline as a new sensitive layer for gas sensors, 475 (2003) 1

#### Sensor

Conducting polymer-based array for the discrimination of odours from trim plastic materials used in automobiles, 455 (2002) 41

Zn(II)-selective membrane electrode based on tetra(2-aminophenyl) porphyrin, 460 (2002) 177

Development of integrated chemiluminescence flow sensor for the determination of adrenaline and isoprenaline, 463 (2002) 257

#### Sensor array

Determination of calcium and total hardness in natural waters using a potentiometric sensor array, 464 (2002) 89

Quantitative fuzzy neural network for analytical determination, 468 (2002) 105

#### Sensor chip CM5

Effect of hydrogel matrix on binding kinetics of protein–protein interactions on sensor surface, 456 (2002) 201

#### Sensor property

Ion-sensor property and blood compatibility of neutral-carrier-type poly(vinyl chloride) membranes coated by phosphorylcholine polymers, 463 (2002) 31

#### Separating demolition waste

Validation of remote, on-line, near-infrared measurements for the classification of demolition waste, 453 (2002) 117

#### Separation

Sulfonamide imprinted polymers using co-functional monomers, 452 (2002) 277

Flow system with in-line separation/preconcentration coupled to graphite furnace atomic absorption spectrometry with W–Rh permanent modifier for copper determination in seawater, 463 (2002) 275

Isolation and separation of individual long-chain acyl-coenzyme A esters, 465 (2002) 427

Separation of Sr from Ca, Ba and Ra by means of  $\text{Ca}(\text{OH})_2$  and  $\text{Ba}(\text{Ra})\text{Cl}_2$  or  $\text{Ba}(\text{Ra})\text{SO}_4$  for the determination of radiostrontium, 466 (2002) 109

#### Sequential extraction

Application of a sequential extraction procedure to study the release of elements from municipal solid waste incineration bottom ash, 451 (2002) 285

Comparison of conventional and fast thermal programme approaches for determination of total and extractable Cd in sediments by electrothermal atomic absorption spectrometry following sequential extraction, 466 (2002) 303

Continuous-flow system for reduction of metal readsorption during sequential extraction of soil, 472 (2002) 147

**Sequential immunoassay**

Simultaneous and sequential enzyme immunoassays on gold bands with flow electrochemical detection, 453 (2002) 63

**Sequential injection (SI)**

Development of an automated sequential injection on-line solvent extraction-back extraction procedure as demonstrated for the determination of cadmium with detection by electrothermal atomic absorption spectrometry, 456 (2002) 283

Sequential injection flow system with improved sample throughput: determination of glycerol and ethanol in wines, 458 (2002) 131

Sequential injection analysis for benzophenone-4 and phenylbenzimidazole sulphonic acid in sunscreen sprays by solid-phase extraction coupled with ultraviolet spectrometry, 464 (2002) 295

Implementation of suitable flow injection/sequential injection-sample separation/preconcentration schemes for determination of trace metal concentrations using detection by electrothermal atomic absorption spectrometry and inductively coupled plasma mass spectrometry, 467 (2002) 3

Solving the problems of sequential injection systems as process analyzers, 467 (2002) 61

Renewable microcolumns for automated DNA purification and flow-through amplification: from sediment samples through polymerase chain reaction, 469 (2002) 129

**Sequential injection analysis**

Spectrofluorimetric determination of aluminum in drinking waters by sequential injection analysis, 457 (2002) 311

Quinohemoprotein alcohol dehydrogenase-based reagentless amperometric biosensor for ethanol monitoring during wine fermentation, 463 (2002) 39

Determination of chloride by multisyringe flow injection analysis and sequential injection analysis with potentiometric detection, 467 (2002) 25

On-line determination of iron(II) and iron(III) using a spectrophotometric sequential injection system, 467 (2002) 35

Determination of chromium(III) and chromium(VI) by use of a spectrophotometric sequential injection system, 467 (2002) 51

On-line simultaneous determination of *S*- and *R*-perindopril using amperometric biosensors as detectors in flow systems, 467 (2002) 189

Simultaneous determination of fluorophores with overlapped spectra by sequential injection analysis coupled to variable angle scanning fluorescence spectrometry and multivariate linear regression algorithms, 471 (2002) 173

**SERS**

Surface-enhanced Raman scattering detection of the breast cancer susceptibility gene *BRCA1* using a silver-coated microarray platform, 469 (2002) 149

**Serum**

Minimalism approach for determination of Cu, Fe and Zn in serum by simultaneous electrothermal atomic absorption spectrometry, 458 (2002) 321

High-performance liquid chromatographic determination of free fatty acids and esterified fatty acids in biological materials as their 2-nitrophenylhydrazides, 465 (2002) 237

**Serum and urine**

Piezoelectric quartz crystal sensors based on ion-pair complexes for the determination of cinchonine in human serum and urine, 454 (2002) 65

**Serum lactate dehydrogenase activity**

Amperometric determination of serum lactate dehydrogenase activity using an ADP-modified graphite electrode, 457 (2002) 275

**SFE**

Supercritical fluid extraction of organochlorine pesticides and some metabolites in frogs from National Park of Ordesa and Monte Perdido, 464 (2002) 303

**Sheath-flow inlet**

Automated control and optimisation of ion mobility spectrometry responses using a sheath-flow inlet, 463 (2002) 143

**Shell method**

From a point-like to an arbitrarily shaped sample. A survey of equations for electron paramagnetic resonance signal intensity calculations, 456 (2002) 129

**SIA**

Simultaneous potentiometric and fluorimetric determination of diclofenac in a sequential injection analysis system, 470 (2002) 185

**Signal generation techniques**

Coupling conducting polymers and mediated electrochemical responses for the detection of *Listeria*, 475 (2003) 37

**Signal intensity calculation**

From a point-like to an arbitrarily shaped sample. A survey of equations for electron paramagnetic resonance signal intensity calculations, 456 (2002) 129

**Signal intensity profile**

Radial and longitudinal profiles of the electron paramagnetic resonance signal intensity of a single TE<sub>102</sub> rectangular cavity. A three-dimensional surface plot for a point-like sample, 464 (2002) 163

**Signal shift**

Standardization methods for handling instrument related signal shift in gas-sensor array measurement data, 472 (2002) 99

**Signal-to-noise ratio**

Use of wavelet transform to enhance piezoelectric signals for analytical purposes, 456 (2002) 93

**Silica gel**

Silica gel functionalized with resacetophenone: synthesis of a new chelating matrix and its application as metal ion collector for their flame atomic absorption spectrometric determination, 454 (2002) 229

**Silica nanoparticles**

Immobilization of oligonucleotides onto silica nanoparticles for DNA hybridization studies, 470 (2002) 51

**Silicate**

Simultaneous determination of silicate and phosphate in boiler water at power plants based on series flow cells by using flow injection spectrophotometry, 455 (2002) 315

**Silicon**

Methods for coating filter paper for solid-phase microextraction with luminescence detection and characterization of the coated filter paper by infrared spectrometry, 474 (2002) 77

Polyaniline as a new sensitive layer for gas sensors, 475 (2003) 1

**Silver**

Determination of trace silver in superalloys and steels by inductively coupled plasma-mass spectrometry, 451 (2002) 329

Synthesis of amidinothioureido-silica gel and its application to flame atomic absorption spectrometric determination of silver, gold and palladium with on-line preconcentration and separation, 452 (2002) 223

Characterization of jewellery products by laser-induced breakdown spectroscopy, 457 (2002) 247

Voltammetric behavior and trace determination of  $Pb^{2+}$  at a mercury-free screen-printed silver electrode, 464 (2002) 229

**Silver chloride collosol**

Study on the new fluorescence enhancement system of Tb-1,10-bis(2'-carboxylphenyl)-1,4,7,10-tetraoxadecane in silver chloride collosol and its analytical application, 468 (2002) 287

**Silver electrode**

Determination of nanomolar concentrations of lead and cadmium by anodic-stripping voltammetry at the silver electrode, 457 (2002) 285

Characteristics of subtractive anodic stripping voltammetry of Pb and Cd at silver and gold electrodes, 464 (2002) 99

**Silver ion-selective electrode**

Calix[2]furan[2]pyrrole and related compounds as the neutral carrier in silver ion-selective electrode, 453 (2002) 81

**Silver(I) determination**

Study on the new fluorescence enhancement system of Tb-1,10-bis(2'-carboxylphenyl)-1,4,7,10-tetraoxadecane in silver chloride collosol and its analytical application, 468 (2002) 287

**Silver-selective electrodes**

Novel  $Ag^+$  ion-selective electrodes based on two new mixed azathioether crowns containing a 1,10-phenanthroline sub-unit, 462 (2002) 225

**SIMCA**

Classification and quantitation of finishing oils by near infrared spectroscopy, 463 (2002) 295

**SIMCA models**

Analysis and comparison of SIMCA models for denominations of origin of wines from de Canary Islands (Spain) builds by means of their trace and ultratrace metals content, 472 (2002) 161

**Simplisma**

Comparison of various chemometric evaluation approaches for on-line FT-NIR transmission and FT-MIR/ATR spectroscopic

data of methyl methacrylate solution polymerization, 452 (2002) 265

**Simultaneous analysis**

Strategy and principles of the simultaneous analysis of prostanoids by gas chromatography/mass spectrometry/selected-ion monitoring, 465 (2002) 379

**Simultaneous assay**

Simultaneous flow-injection assay of creatinine and creatine in serum by the combined use of a 16-way switching valve, some specific enzyme reactors and a highly selective hydrogen peroxide electrode, 462 (2002) 283

Solving the problems of sequential injection systems as process analyzers, 467 (2002) 61

**Simultaneous detection**

On-line simultaneous determination of S- and R-perindopril using amperometric biosensors as detectors in flow systems, 467 (2002) 189

**Simultaneous determination**

Solvent extraction flow-injection manifold for the simultaneous spectrophotometric determination of free cyanide and thiocyanate ions based upon on-line masking of cyanides by formaldehyde, 452 (2002) 295

Simultaneous determination of silicate and phosphate in boiler water at power plants based on series flow cells by using flow injection spectrophotometry, 455 (2002) 315

Minimalism approach for determination of Cu, Fe and Zn in serum by simultaneous electrothermal atomic absorption spectrometry, 458 (2002) 321

Comparative study of net analyte signal-based methods and partial least squares for the simultaneous determination of amoxycillin and clavulanic acid by stopped-flow kinetic analysis, 463 (2002) 75

A simple automated method for the speciation of dissolved inorganic nitrogen in seawater, 469 (2002) 235

Integration of bienzymatic disaccharide sensors for simultaneous determination of disaccharides by means of light addressable potentiometric sensor, 471 (2002) 3

**Simultaneous immunoassay**

Simultaneous and sequential enzyme immunoassays on gold bands with flow electrochemical detection, 453 (2002) 63

**Simultaneous sample preparation**

Simultaneous sample preparation for high-performance liquid chromatographic determination of Vitamin A and  $\beta$ -carotene in emulsified nutritional supplements after solid-phase extraction, 463 (2002) 21

**Single molecule**

Ultrasensitive chemiluminescence detection of aM vanadium(IV) by capillary electrophoresis, 456 (2002) 177

**Single rectangular cavity**

Radial and longitudinal profiles of the electron paramagnetic resonance signal intensity of a single  $TE_{102}$  rectangular cavity. A

three-dimensional surface plot for a point-like sample, 464 (2002) 163

#### **Singlet oxygen**

Simple and convenient chemiluminescence method for the determination of melatonin, 455 (2002) 193

#### **Site-selectivity**

Determination of hydrogen peroxide using glassy carbon and graphite/polyester composite electrodes modified by vanadium-doped zirconias, 452 (2002) 11

#### **Site-specific immobilization**

Electron paramagnetic resonance spin label titration: a novel method to investigate random and site-specific immobilization of enzymes onto polymeric membranes with different properties, 470 (2002) 29

#### **Skatole**

Homogeneous stopped-flow fluoroimmunoassay using europium as label, 460 (2002) 271

#### **Skeletal muscle**

Determination of long-chain fatty acids in heart and skeletal muscle by capillary gas chromatography, 465 (2002) 351

#### **Skin**

Effects of enzyme treatment and skin extraction on varietal volatiles in Spanish wines made from Chardonnay, Muscat, Airén, and Macabeo grapes, 458 (2002) 39

#### **Sludge**

Microwave digestion of sludge, soil and sediment samples for metal analysis by inductively coupled plasma-atomic emission spectrometry, 468 (2002) 335

#### **Small organic molecules**

Effect of small organic molecules on room temperature phosphorescence properties of naphthol ternary inclusion complexes in  $\beta$ -cyclodextrin, 463 (2002) 135

#### **Smooth muscle cells**

Novel nitric oxide microsensor and its application to the study of smooth muscle cells, 455 (2002) 199

#### **Sn**

Determination of tin in soil by continuous hydride generation and inductively coupled plasma mass spectrometry, 456 (2002) 263  
Study of chemical and spectral interferences in the simultaneous determination of As, Bi, Sb, Se and Sn by hydride generation inductively coupled plasma atomic emission spectrometry, 468 (2002) 71

#### **Soda**

Determination of anthraquinone-2-sulfonate in alkaline pulping liquor by spectrophotometry using a Nafion membrane interface, 474 (2002) 69

#### **Sodium bismuthate**

Chemiluminescence flow-through sensor for pipemidic acid using solid sodium bismuthate as an oxidant, 459 (2002) 19

#### **Sodium diclofenac**

Simultaneous determination of methylparaben, propylparaben, sodium diclofenac and its degradation product in a topical emulgel by reversed-phase liquid chromatography, 467 (2002) 91

Simultaneous potentiometric and fluorimetric determination of diclofenac in a sequential injection analysis system, 470 (2002) 185

#### **Sodium dodecyl sulphate**

Direct injection micellar liquid chromatographic method for the analysis of corticosteroids in creams, ointments and other pharmaceuticals, 454 (2002) 125

#### **Sodium dodecylbenzene sulfonate**

Novel assay of thiamine based on its enhancement of total internal reflected resonance light scattering signals of sodium dodecylbenzene sulfonate at the water/tetrachloromethane interface, 475 (2003) 151

#### **Sodium dodecylsulfate**

Evaluation of hydrophobic properties of sodium dodecylsulfate/ $\gamma$ -alumina admicelles based on fluorescence spectra of *N*-phenyl-1-naphthylamine, 454 (2002) 203

#### **Sodium ethylenediaminetetraacetate**

Spectrophotometric determination of metal ions in electroplating solutions in the presence of EDTA with the aid of multivariate calibration and artificial neural networks, 463 (2002) 305

#### **Sodium hydrosulfite**

Determination of anthraquinone-2-sulfonate in alkaline pulping liquor by spectrophotometry using a Nafion membrane interface, 474 (2002) 69

#### **Sodium monofluorophosphate**

Determination of the sodium monofluorophosphate in a hardened cement paste by ion chromatography, 472 (2002) 37

#### **Sodium persulfate**

Microwave-assisted digestion of organoarsenic compounds for the determination of total arsenic in aqueous, biological, and sediment samples using flow injection hydride generation electrothermal atomic absorption spectrometry, 452 (2002) 207

#### **Soft independent modelling of class analogy**

Application of multivariate methods to scalp hair metal data to distinguish between drug-free subjects and drug abusers, 455 (2002) 253

#### **Soil**

Cold ultrasonic acid extraction of copper, lead and zinc from soil samples, 452 (2002) 143

Determination of organic matter in soils using radial basis function networks and near infrared spectroscopy, 453 (2002) 125

Improvement of UV spectrophotometry methodology for the determination of total polycyclic aromatic compounds in contaminated soils, 453 (2002) 245

Determination of tin in soil by continuous hydride generation and inductively coupled plasma mass spectrometry, 456 (2002) 263

- Tin determination in marine sediment, soil, coal fly ash and coal slurried samples by hydride generation-electrothermal atomic absorption spectrometry, 461 (2002) 261
- Environmental analysis of aliphatic carboxylic acids by ion-exclusion chromatography, 465 (2002) 157
- Microwave digestion of sludge, soil and sediment samples for metal analysis by inductively coupled plasma-atomic emission spectrometry, 468 (2002) 335
- Determination of chlorophenoxy acid herbicides and their esters in soil by capillary high performance liquid chromatography with ultraviolet detection, using large volume injection and temperature gradient, 470 (2002) 147
- Sex hormones originating from different livestock production systems: fate and potential disrupting activity in the environment, 473 (2002) 27
- Soil bacteria**
- Use of bioluminescent bacterial sensors as an alternative method for measuring heavy metals in soil extracts, 456 (2002) 55
- Soil extraction**
- Use of bioluminescent bacterial sensors as an alternative method for measuring heavy metals in soil extracts, 456 (2002) 55
- Solenoid pumps**
- Multi-pumping in flow analysis: concepts, instrumentation, potentialities, 466 (2002) 125
- Sol-gel**
- Bienzymatic amperometric biosensor for glucose based on polypyrrole/ceramic carbon as electrode material, 451 (2002) 251
- Screen-printable sol-gel ceramic carbon composite pH sensor with a receptor zeolite, 455 (2002) 53
- Stability of new optical pH sensing material based on cross-linked poly(vinyl alcohol) copolymer, 455 (2002) 207
- Reagentless pH-based biosensing using a fluorescently-labelled dextran co-entrapped with a hydrolytic enzyme in sol-gel derived nanocomposite films, 457 (2002) 47
- Novel fiber-optic biosensor based on immobilized glutathione *S*-transferase and sol-gel entrapped bromocresol green for the determination of atrazine, 460 (2002) 151
- Properties and applications of proteins encapsulated within sol-gel derived materials, 461 (2002) 1
- Sol-gel luminescence biosensors: Encapsulation of recombinant *E. coli* reporters in thick silicate films, 462 (2002) 11
- Characteristics of the hydrogen ion-sensitive field effect transistors with sol-gel-derived lead titanate gate, 469 (2002) 205
- Screening of antagonists based on induced dissociation of a calmodulin-melittin interaction entrapped in a sol-gel derived matrix, 470 (2002) 19
- Solid phase extraction (SPE)**
- Molecularly imprinted polymers for on-line preconcentration by solid phase extraction of pirimicarb in water samples, 451 (2002) 297
- Column solid-phase extraction with Chromosorb-102 resin and determination of trace elements in water and sediment samples by flame atomic absorption spectrometry, 452 (2002) 77
- Comparison of methods for the determination of ochratoxin A in wine, 453 (2002) 33
- Determination of polyethoxylated non-ionic surfactants using potentiometric flow injection systems. Improvement of the detection limits employing an on-line pre-concentration stage, 454 (2002) 217
- Using on-line solid phase extraction for flow-injection spectrophotometric determination of salbutamol, 455 (2002) 103
- Determination of volatile phenols in fino sherry wines, 458 (2002) 95
- Simultaneous sample preparation for high-performance liquid chromatographic determination of Vitamin A and  $\beta$ -carotene in emulsified nutritional supplements after solid-phase extraction, 463 (2002) 21
- Time-resolved laser-induced fluorimetry for screening polycyclic aromatic hydrocarbons on solid-phase extraction membranes, 464 (2002) 261
- Sequential injection analysis for benzophenone-4 and phenylbenzimidazole sulphonic acid in sunscreen sprays by solid-phase extraction coupled with ultraviolet spectrometry, 464 (2002) 295
- Spectrofluorimetric method for the determination of piroxicam and pyridoxine, 466 (2002) 275
- Multisyringe flow injection spectrofluorimetric determination of warfarin at trace levels with on-line solid-phase preconcentration, 467 (2002) 13
- Development and validation of liquid chromatographic method for the determination of lycopene in plasma, 467 (2002) 115
- Sensitive capillary electrophoresis microchip determination of trinitroaromatic explosives in nonaqueous electrolyte following solid phase extraction, 469 (2002) 253
- Simultaneous analysis of six antiepileptic drugs and two selected metabolites in human plasma by liquid chromatography after solid-phase extraction, 472 (2002) 1
- Solid phase microextraction**
- Development of a solid-phase microextraction method for the determination of phthalic acid esters in water, 457 (2002) 211
- Determination of ethylphenol compounds in wine by headspace solid-phase microextraction in conjunction with gas chromatography and flame ionization detection, 458 (2002) 111
- Application of solid-phase microextraction for monitoring the photocatalytic decomposition of fenthion and parathion in aqueous  $\text{TiO}_2$  suspensions, 467 (2002) 233
- Solid sample digestion**
- Determination of Cd, Cu, Pb and Zn in environmental samples: microwave-assisted total digestion versus aqua regia and nitric acid extraction, 462 (2002) 59
- Solid substrate room temperature phosphorescence immunoassay (SS-RTP-IA)**
- Solid substrate room temperature phosphorescence immunoassay based on an antibody labeled with tetramethylrhodamine B isothiocyanate, 470 (2002) 121
- Solid-matrix fluorescence and phosphorescence**
- Methods for coating filter paper for solid-phase microextraction with luminescence detection and characterization of the coated filter paper by infrared spectrometry, 474 (2002) 77

**Solid-matrix luminescence**

Time-resolved laser-induced fluorimetry for screening polycyclic aromatic hydrocarbons on solid-phase extraction membranes, 464 (2002) 261

**Solid-phase oxidant**

Chemiluminescence flow-through sensor for pipemidic acid using solid sodium bismuthate as an oxidant, 459 (2002) 19

**Solid-state sensor array platform**

Integrated chemical sensor array platform based on a light emitting diode, xerogel-derived sensor elements, and high-speed pin printing, 470 (2002) 101

**Solvent extraction**

Solvent extraction flow-injection manifold for the simultaneous spectrophotometric determination of free cyanide and thiocyanate ions based upon on-line masking of cyanides by formaldehyde, 452 (2002) 295

Effect of 1,10-phenanthroline on the extraction and separation of lithium(I), sodium(I) and potassium(I) with thenoyltrifluoroacetone, 454 (2002) 241

**Solvent mixtures**

Spectrophotometric determination of acidity constants of 4-(2-pyridylazo)resorcinol in binary methanol-water mixtures, 455 (2002) 335

**Solvent polymeric membrane**

Chronocoulometric flow-injection analysis with solvent polymeric membrane ion sensors, 459 (2002) 11

**Somatotropin**

Recent developments in the use and abuse of growth promoters, 473 (2002) 71

**Sonic spray ionization**

Sonic spray ionization interface for liquid chromatography-mass spectrometry, 468 (2002) 263

**Sorption**

Determination of gallic acid with 4-nitrobenzenediazonium tetrafluoroborate by diffuse reflectance spectrometry on polyurethane foam, 469 (2002) 295

**SOS response**

SOS-LUX- and LAC-FLUORO-TEST for the quantification of genotoxic and/or cytotoxic effects of heavy metal salts, 456 (2002) 31

**Spacer arm**

Synthesis of haptens for immunoassay of organophosphorus pesticides and effect of heterology in hapten spacer arm length on immunoassay sensitivity, 475 (2003) 85

**SPE**

Development of a tandem thin-layer chromatography-high-performance liquid chromatography method for the identification and determination of corticosteroids in cosmetic products, 457 (2002) 187

Determination of amitraz and other acaricide residues in beeswax, 475 (2003) 97

**Speciation**

Determination of As(III) and arsenic(V) in natural waters by cathodic stripping voltammetry at a hanging mercury drop electrode, 459 (2002) 151

Heavy metal mobility assessment in sediments based on a kinetic approach of the EDTA extraction: search for optimal experimental conditions, 459 (2002) 245

Interactions of Pb(II) with particles of a polluted river, 462 (2002) 73

Crucial role of the detection window in metal ion speciation analysis in aquatic systems: the interplay of thermodynamic and kinetic factors as exemplified by nickel and cobalt, 466 (2002) 285

On-line determination of iron(II) and iron(III) using a spectrophotometric sequential injection system, 467 (2002) 35

Simultaneous determination of chromium(VI) and chromium(III) at trace levels by adsorptive stripping voltammetry, 470 (2002) 241

Speciation of chromium(III) and chromium(VI) by in situ separation and sequential determination with electrothermal vaporization inductively coupled plasma atomic emission spectrometry, 471 (2002) 121

Iron(II) and iron(III) determination by potentiometry and ion-exchange voltammetry at ionomer-coated electrodes, 474 (2002) 147

Flow-injection determination of chromium(III) by its catalysis on the oxidative coupling of 3-methyl-2-benzothiazolinone hydrazine with *N*-ethyl-*N*-(2-hydroxy-3-sulfopropyl)-3-methoxyaniline, 474 (2002) 167

**Speciation analysis**

Investigation on the geometric and matrix effects and quantitative determination of K, Cl and S atomic fraction for biomass burning particles by Monte Carlo simulation, 459 (2002) 93

Determination of chromium(III) and chromium(VI) by use of a spectrophotometric sequential injection system, 467 (2002) 51

**Speciation kinetics**

Analysis of copper complex lability using <sup>64</sup>Cu-equilibration techniques and free-ion selective radiotracer extraction, 464 (2002) 141

**Spectral deconvolution**

Spectral curve deconvolution in micellar systems with H-point curve isolation and H-point standard addition methods, 459 (2002) 119

**Spectral interferences**

Study of chemical and spectral interferences in the simultaneous determination of As, Bi, Sb, Se and Sn by hydride generation inductively coupled plasma atomic emission spectrometry, 468 (2002) 71

**Spectrofluorimetric**

Direct spectrofluorimetric determination of glutathione in biological samples using 5-maleimidyl-2-(*m*-methylphenyl) benzoxazole, 451 (2002) 211

**Spectrofluorimetric biparameter sensor**

Use of a solid sensing zone implemented with unsegmented flow analysis for simultaneous determination of thiabendazole and warfarin, 459 (2002) 235

**Spectrofluorimetric method**

Spectrofluorimetric study of the  $\beta$ -cyclodextrin-dapsone-linear alcohol supramolecular system and determination of dapsone, 469 (2002) 273

**Spectrofluorimetry**

Spectrofluorimetric determination of hydrogen peroxide scavenging activity, 452 (2002) 177

Time-based multisyringe flow injection system for the spectrofluorimetric determination of aluminium, 455 (2002) 149

Novel spectrofluorimetric method for the determination of sulfite with rhodamine B hydrazide in a micellar medium, 456 (2002) 121

Multisyringe flow injection spectrofluorimetric determination of warfarin at trace levels with on-line solid-phase preconcentration, 467 (2002) 13

Simultaneous determination of fluorophores with overlapped spectra by sequential injection analysis coupled to variable angle scanning fluorescence spectrometry and multivariate linear regression algorithms, 471 (2002) 173

**Spectrofluorometry**

Direct and simultaneous spectrofluorometric determination of naproxen and salicylate in human serum assisted by chemometric analysis, 471 (2002) 87

**Spectrometric techniques**

Study of solvent effects on the acid-base behaviour of adenine, adenosine 3',5'-cyclic monophosphate and poly(adenylic) acid in acetonitrile-water mixtures using hard-modelling and soft-modelling approaches, 471 (2002) 145

**Spectrophotometric**

Application of generalized artificial neural networks coupled with an orthogonal design to optimization of a system for the kinetic spectrophotometric determination of Hg(II), 469 (2002) 303

Flow system for liquid-solid extraction and pre-concentration using a renewable extracting solid phase, 472 (2002) 141

**Spectrophotometric determination**

Spectrophotometric determination of trace ionic and non-ionic surfactants based on a collection on a membrane filter as the ion associate of the surfactant with Erythrosine B, 455 (2002) 83

**Spectrophotometric pH**

Spectrophotometric pH measurements of freshwater, 453 (2002) 13

**Spectrophotometry**

Spectrophotometric measurement of total inorganic carbon in aqueous solutions using a liquid core waveguide, 451 (2002) 221

Direct spectrophotometric determination of calcium in clinical samples with carboxyazo-*p*-CH<sub>3</sub>, 452 (2002) 303

Spectrophotometric catalytic determination of Fe(III) in estuarine waters using a flow-batch system, 455 (2002) 327

Spectrophotometric analysis of iodide oxidation by chlorine in highly mineralized solutions, 456 (2002) 105

Sensitized spectrophotometric determination of trace Hg(II) in benzalkonium chloride media, 459 (2002) 75

Rapid spectrophotometric determination of fosfestrol following on-line hydrolysis by alkaline phosphatase using flow injection and chasing zones, 462 (2002) 119

Spectrophotometric determination of metal ions in electroplating solutions in the presence of EDTA with the aid of multivariate calibration and artificial neural networks, 463 (2002) 305

Multi-pumping in flow analysis: concepts, instrumentation, potentialities, 466 (2002) 125

Exploiting monosegmented flow analysis to perform in-line standard additions using a single stock standard solution in spectrophotometric sequential injection procedures, 466 (2002) 345

Automated spectrophotometric determination of clomipramine on a multicommutated flow system, 467 (2002) 75

Highly selective spectrophotometric determination of trace cobalt and development of a reagentless fiber-optic sensor, 467 (2002) 205

Method for monitoring urea and ammonia in wine and must by flow injection-pervaporation, 471 (2002) 105

Determination of anthraquinone-2-sulfonate in alkaline pulping liquor by spectrophotometry using a Nafion membrane interface, 474 (2002) 69

Spectrophotometric determination of phytic acid in plant extracts using a multi-pumping flow system, 474 (2002) 161

Flow-injection determination of chromium(III) by its catalysis on the oxidative coupling of 3-methyl-2-benzothiazolinone hydrazone with *N*-ethyl-*N*-(2-hydroxy-3-sulfopropyl)-3-methoxyaniline, 474 (2002) 167

**Spectrophotometry (<sup>1</sup>DD)**

Stability indicating spectrophotometric methods for determination of glafenine using first derivative of ratio spectra and chemometric techniques, 461 (2002) 155

**Spectroscopic techniques**

Outer product analysis of electronic nose and visible spectra: application to the measurement of peach fruit characteristics, 459 (2002) 107

**Spectrum-structure correlation**

Visible spectrophotometric determination of metal ions: the influence of structure on molar absorptivity value of copper(II) complexes in aqueous solution, 459 (2002) 323

**SPE-electrode**

Sensitive electrochemical detection of ozone, 459 (2002) 199

**Spent PWR fuels**

Determination of Ru, Rh, Pd, Te, Mo and Zr in spent pressurized water reactor fuels by ion exchange and extraction chromatographic separations and inductively coupled plasma atomic emission spectrometric analysis, 475 (2003) 171

**S-Perindopril**

On-line simultaneous determination of *S*- and *R*-perindopril using amperometric biosensors as detectors in flow systems, 467 (2002) 189

**SP-HPLC**

Chromatographic analysis of lipoxxygenase products, 465 (2002) 319

**Spirits**

Characterisation of young Cognac spirit aromatic quality, 458 (2002) 191

**SPLITT cell fractionation**

Dimensional and elemental characterization of suspended particulate matter in natural waters: quantitative aspects in the integrated ultrafiltration, split-flow thin cell and inductively coupled plasma-atomic emission spectrometry approach, 470 (2002) 253

**Spoilage**

Determination of volatile biogenic amines in muscle food products by ion mobility spectrometry, 463 (2002) 155

**Spot-test**

Simple method for colorimetric spot-test quantitative analysis of Fe(III) using a computer controlled hand-scanner, 471 (2002) 97

**SPR biosensor**

Effect of hydrogel matrix on binding kinetics of protein-protein interactions on sensor surface, 456 (2002) 201

**SPR optical biosensor**

On-line detection of sulfamethazine and sulfadiazine in porcine bile using a multi-channel high-throughput SPR biosensor, 473 (2002) 143

**20(S)-Protopanaxatriol**

Enzyme-linked immunosorbent assay for the determination of 20(S)-protopanaxatriol, 462 (2002) 157

**SPR sensor**

Surface plasmon resonance transients at an electrochemical interface: time resolved measurements using a bicell photodiode, 475 (2003) 47

**Square wave voltammetry**

A "virtual" electroanalytical instrument for square wave voltammetry, 467 (2002) 179

**Sr**

Determination of actinides and strontium in fish samples by extraction chromatography, 458 (2002) 367

**SrCO<sub>3</sub>-based sensor**

Nanosized SrCO<sub>3</sub>-based chemiluminescence sensor for ethanol, 466 (2002) 69

**SRM 2710**

Determination of Al, Cu, Fe, Mn, Pb and Zn in certified reference materials using the optimized BCR sequential extraction procedure, 454 (2002) 249

**SRM 2711**

Determination of Al, Cu, Fe, Mn, Pb and Zn in certified reference materials using the optimized BCR sequential extraction procedure, 454 (2002) 249

**Stability constants**

Classification of metal ions according to their complexing properties: a data-driven approach, 455 (2002) 131

**Stabilization**

Polyelectrolyte-stabilized biosensors based on macroporous carbon electrode, 467 (2002) 217

**Stable isotopes**

Stable isotope analysis of fatty acids by gas chromatography-isotope ratio mass spectrometry, 465 (2002) 63

**Standard**

Accurate and precise lithium isotopic determinations of igneous rock samples using multi-collector inductively coupled plasma mass spectrometry, 456 (2002) 271

**Standard addition**

Exploiting monosegmented flow analysis to perform in-line standard additions using a single stock standard solution in spectrophotometric sequential injection procedures, 466 (2002) 345

**Standard Gibbs free energy for ion transfer**

Evaluation of Gibbs free energy for the transfer of a highly hydrophilic ion from an acidic aqueous solution to an organic solution based on ion pair extraction, 452 (2002) 149

**Standard reference materials**

Development and application of a micro-digestion device for elemental analysis of biological samples, 451 (2002) 279

**Standardized sequential extraction**

Determination of Al, Cu, Fe, Mn, Pb and Zn in certified reference materials using the optimized BCR sequential extraction procedure, 454 (2002) 249

**Stanozolol**

Analytical possibilities for the detection of stanozolol and its metabolites, 473 (2002) 39

**Staphylococcal enterotoxin B**

Development of a tetramethylrhodamine-labeled probe for a capillary electrophoresis-based competitive immunoassay of staphylococcal enterotoxin B, 457 (2002) 21

**Starch-iodine film**

Starch-iodine films respond to water vapor, 455 (2002) 49

**Static headspace**

Aroma composition of wine studied by different extraction methods, 458 (2002) 85

**Static-dynamic extraction mode**

Static-dynamic pressurized hot water extraction coupled to on-line filtration-solid-phase extraction-high-performance liquid chromatography-post-column derivatization-fluorescence detection for the analysis of *N*-methylcarbamates in foods, 463 (2002) 189

**Stationary phase tuning**

Analysis of fatty acids in foods by supercritical fluid chromatography, 465 (2002) 131

**Statistical analysis**

Comparison of three microbial assay procedures for measuring toxicity of chemical compounds: ToxAlert<sup>®</sup> 10, CellSense and Biolog MT2 microplates, 456 (2002) 41

**Steels**

Determination of trace silver in superalloys and steels by inductively coupled plasma-mass spectrometry, 451 (2002) 329

**Stereoselective antibodies**

Enantioselective sequential-injection chemiluminescence immunoassays for 3,3',5-triiodothyronine (T<sub>3</sub>) and thyroxine (T<sub>4</sub>), 463 (2002) 5

**Stereospecificity**

Chromatographic analysis of lipoxygenase products, 465 (2002) 319

**Steroid hormone receptor**

Detection of illegal growth promoters in biological samples using receptor binding assays, 473 (2002) 135

**Steroid hormones**

Sex hormones originating from different livestock production systems: fate and potential disrupting activity in the environment, 473 (2002) 27

Use of specific bioluminescent cell lines for the detection of steroid hormone (ant)agonists in meat producing animals, 473 (2002) 119

**Steroids**

Sonic spray ionization interface for liquid chromatography-mass spectrometry, 468 (2002) 263

Screening and confirmatory strategies for the surveillance of anabolic steroid abuse within Northern Ireland, 473 (2002) 99

**Stilbenes**

Direct liquid chromatographic analysis of resveratrol derivatives and flavanols in wines with absorbance and fluorescence detection, 458 (2002) 103

**Stoichiometry**

Determination of stoichiometry of Li<sub>1-x</sub>CoO<sub>2</sub> materials by flame atomic absorption spectrometry and automated potentiometric titration, 455 (2002) 35

**Stokes' shift**

Natively fluorescent isoflavones exhibiting anomalous Stokes' shifts, 468 (2002) 3

**Stopped-flow**

Homogeneous stopped-flow fluorimmunoassay using europium as label, 460 (2002) 271

Fourier transform infrared spectrometric strategies for the determination of Buprofezin in pesticide formulations, 468 (2002) 81

**Stopped-flow kinetic analysis**

Comparative study of net analyte signal-based methods and partial least squares for the simultaneous determination of amoxycillin and clavulanic acid by stopped-flow kinetic analysis, 463 (2002) 75

**Stress**

Quantifying catecholamines using multi-way kinetic modelling, 475 (2003) 137

**Striatum**

New microdialysis-electrochemical device for simultaneous determination of ascorbic acid and 5-hydroxyindole-3-acetic acid in rat striatum, 458 (2002) 337

**Stripping voltammetry**

Perfluorinated anion-exchange polymer mercury film electrode for anodic stripping voltammetric determination of zinc(II): effect of model organic compounds, 454 (2002) 93

Electrochemical and quartz crystal microbalance studies of lead(II) deposition and stripping in the presence of copper on a gold electrode modified with 2,2'-bipyridyl in polyaniline, 455 (2002) 69

Determination of As(III) and arsenic(V) in natural waters by cathodic stripping voltammetry at a hanging mercury drop electrode, 459 (2002) 151

A "virtual" electroanalytical instrument for square wave voltammetry, 467 (2002) 179

Simultaneous determination of chromium(VI) and chromium(III) at trace levels by adsorptive stripping voltammetry, 470 (2002) 241

**Stripping with nitrogen**

Aroma composition of wine studied by different extraction methods, 458 (2002) 85

**Strongly acidic cation-exchange resin**

Vacancy ion-exclusion chromatography of carboxylic acids on a strongly acidic cation-exchange resin, 474 (2002) 31

**Strontium-90**

Separation of Sr from Ca, Ba and Ra by means of Ca(OH)<sub>2</sub> and Ba(Ra)Cl<sub>2</sub> or Ba(Ra)SO<sub>4</sub> for the determination of radiostrontium, 466 (2002) 109

**Strontium**

High-sensitivity measurements of strontium isotopes in polar ice, 469 (2002) 225

Comparative study of quenching correction procedures for <sup>90</sup>Sr/<sup>90</sup>Y determination by Cerenkov, liquid scintillation and plastic scintillation techniques, 471 (2002) 135

**Structural composition**

Sorption of aquatic humic matter by DAX-8 and XAD-8 resins. Comparative study using pyrolysis gas chromatography, 471 (2002) 219

**Styrene/1,3-butadiene**

On the ambiguity of self-modeling curve resolution: orthogonal projection approach analysis of the on-line Fourier transform-Raman spectra of styrene/1,3-butadiene block-copolymerization, 460 (2002) 73

**Subarachnoid administration**

Determination of umbilical cord and maternal plasma concentrations of fentanyl by using novel spectrophotometric and chemiluminescence enzyme immunoassays, 459 (2002) 177

**Subcritical water chromatography**

Separation of polar and non-polar analytes using dimethyl sulfoxide-modified subcritical water, 460 (2002) 185

**Subset selection**

Representative subset selection, 468 (2002) 91

**Subtractive anodic stripping voltammetry**

Characteristics of subtractive anodic stripping voltammetry of Pb and Cd at silver and gold electrodes, 464 (2002) 99

**Successive reaction**

Two-rate method for simultaneous kinetic determination based on detecting the reagent in successive reactions, 464 (2002) 153

**Sucrose**

Yeast cells sucrose biosensor based on a potentiometric oxygen electrode, 458 (2002) 215

**Sulfadiazine**

Simultaneous determination of sulfadiazine and trimethoprim in animal feed by liquid chromatography with UV and tandem mass spectrometric detection, 473 (2002) 183

**Sulfide**

Differential pulse cathodic stripping voltammetric determination of nanomolar levels of dissolved sulfide applicable to field analysis of groundwater, 459 (2002) 209

**Sulfide ions**

Voltammetric investigation on sulfide ions in aqueous solutions with mercury-coated platinum microelectrodes, 464 (2002) 217  
Methylene blue potentiometric sensor for selective determination of sulfide ions, 466 (2002) 47

**Sulfite**

Novel spectrofluorimetric method for the determination of sulfite with rhodamine B hydrazide in a micellar medium, 456 (2002) 121

**Sulfonamide**

Sulfonamide imprinted polymers using co-functional monomers, 452 (2002) 277

Sulfonamide-type di-Schiff base ligands as chelate extraction reagents for divalent metal cations, 466 (2002) 295

On-line detection of sulfamethazine and sulfadiazine in porcine bile using a multi-channel high-throughput SPR biosensor, 473 (2002) 143

**Sulfonylurea**

Resolution of overlapped NMR spectra by two-way multivariate curve resolution alternating least squares with imbedded kinetic fitting, 459 (2002) 277

Molecularly imprinted polymer for metsulfuron-methyl and its binding characteristics for sulfonylurea herbicides, 468 (2002) 217

**Sulfonylurea herbicides**

Continuous flow liquid membrane extraction: a novel automatic trace-enrichment technique based on continuous flow

liquid-liquid extraction combined with supported liquid membrane, 455 (2002) 93

Development of a rapid, specific fluorescence polarization immunoassay for the herbicide chlorsulfuron, 468 (2002) 229

**Sulfur dioxide**

Quantitative analysis of gas mixtures by voltammetric sensing, 475 (2003) 17

**Sulfur dioxide determination**

Quantitative millimetre wavelength spectrometry at pressures approaching atmospheric. Part I. Absolute determination of transition line strengths and sample concentrations with a confocal Fabry-Perot cavity spectrometer, 466 (2002) 57

**Sulphur compounds**

Volatile sulphur compounds in wines related to yeast metabolism and nitrogen composition of grape musts, 458 (2002) 157

**Sumithion**

Determination of organophosphorus aromatic nitro insecticides by using electric-field cell orientation in microbial suspensions, 462 (2002) 165

**Sunscreen**

Flow injection-chemiluminescence determination of octyl dimethyl PABA in sunscreen formulations, 462 (2002) 209

Sequential injection analysis for benzophenone-4 and phenylbenzimidazole sulphonic acid in sunscreen sprays by solid-phase extraction coupled with ultraviolet spectrometry, 464 (2002) 295

**Sunscreen cosmetic products**

Cleaning validation in the toiletries industry, 467 (2002) 261

**Superalloys**

Determination of trace silver in superalloys and steels by inductively coupled plasma-mass spectrometry, 451 (2002) 329

**Supercritical fluid chromatography**

Analysis of fatty acids in foods by supercritical fluid chromatography, 465 (2002) 131

**Supercritical fluids**

Study of adsorption processes of model drugs at supercritical conditions using partial least squares regression, 452 (2002) 311

**Superoxide anion radical**

Studies on catalytic spectrophotometry using  $\beta$ -cyclodextrin polymer-Schiff base metal complex as mimetic enzyme, 459 (2002) 83

**Superoxide anions**

Novel chemiluminescence method for detection of superoxide anions and its application to dry-cured meat, 467 (2002) 145

**Superoxide dismutase**

Studies on catalytic spectrophotometry using  $\beta$ -cyclodextrin polymer-Schiff base metal complex as mimetic enzyme, 459 (2002) 83

**Superoxide radical**

Superoxide sensor based on cytochrome c immobilized on mixed-thiol SAM with a new calibration method, 454 (2002) 53

'Untypical aging off-flavor' in wine: formation of 2-aminoacetophenone and evaluation of its influencing factors, 458 (2002) 29

#### **Supervised pattern recognition techniques**

Electronic nose based on metal oxide semiconductor sensors as a fast alternative for the detection of adulteration of virgin olive oils, 459 (2002) 219

#### **Supported liquid membrane (SLM)**

Continuous flow liquid membrane extraction: a novel automatic trace-enrichment technique based on continuous flow liquid-liquid extraction combined with supported liquid membrane, 455 (2002) 93

Extraction and preconcentration of Cr(VI) from urine using supported liquid membrane, 474 (2002) 59

#### **Supramolecular complex**

Cyclodextrin-porphyrin supramolecular sensitizer for mercury(II) ion, 469 (2002) 285

#### **Supramolecular mechanism**

Spectrofluorimetric study of the  $\beta$ -cyclodextrin-dapsone-linear alcohol supramolecular system and determination of dapsone, 469 (2002) 273

#### **Surface adsorption**

Structural and thermodynamic investigations of metabolites of the thromboxane synthase pathway, 465 (2002) 441

#### **Surface charge**

Surface plasmon resonance transients at an electrochemical interface: time resolved measurements using a bicell photodiode, 475 (2003) 47

#### **Surface imprinting**

Enantioselective polymer prepared by surface imprinting technique using a bifunctional molecule, 469 (2002) 173

#### **Surface modification**

Surface modification of polymer-based microfluidic devices, 470 (2002) 87

#### **Surface plasmon resonance (SPR)**

Surface plasmon resonance biosensor for genetically modified organisms detection, 453 (2002) 165

Enhanced surface plasmon resonance immunoassay for human complement factor 4, 453 (2002) 173

Differentiation of human serum samples by surface plasmon resonance monitoring of the integral glycoprotein interaction with a lectin panel, 459 (2002) 25

Surface plasmon resonance study on enhanced refractive index change of an Ag<sup>+</sup> ion-sensing membrane containing dithiosquarylium dye, 460 (2002) 133

Electrochemical enzyme immunoassay using immobilized antibody on gold film with monitoring of surface plasmon resonance signal, 463 (2002) 219

Low density lipoprotein interaction with amino acid-modified self assembled monolayers on surface plasmon resonance surfaces, 470 (2002) 3

#### **Surfactant**

Ligand and surfactant effects on a novel electrochemiluminescent reaction involving cadmium, 454 (2002) 45

Spectrophotometric determination of trace ionic and non-ionic surfactants based on a collection on a membrane filter as the ion associate of the surfactant with Erythrosine B, 455 (2002) 83

Enantioselective polymer prepared by surface imprinting technique using a bifunctional molecule, 469 (2002) 173

#### **Suspended particle matter**

Dimensional and elemental characterization of suspended particulate matter in natural waters: quantitative aspects in the integrated ultrafiltration, split-flow thin cell and inductively coupled plasma-atomic emission spectrometry approach, 470 (2002) 253

#### **Suspended particles**

Interactions of Pb(II) with particles of a polluted river, 462 (2002) 73

#### **SW voltammetry**

Simultaneous coulometric determination of iodide, bromide and chloride in a mixture by automated coupling of constant current chronopotentiometry and square wave voltammetry, 464 (2002) 115

#### **Sweet wines**

Role of melanoidins in sweet wines, 458 (2002) 169

#### **SYBR<sup>®</sup> Gold**

ResonSense<sup>™</sup>: simple linear fluorescent probes for quantitative homogeneous rapid polymerase chain reaction, 457 (2002) 61

#### **Synchronous fluorescence**

Study of the interaction between terazosin and serum albumin. Synchronous fluorescence determination of terazosin, 452 (2002) 185

Synchronous fluorescence determination of protein with functionalized CdS nanoparticles as a fluorescence probe, 466 (2002) 87

#### **Synchronous spectrofluorimetry**

Quantitative analysis for oxytetracycline in medicated premixes and feeds by second-derivative synchronous spectrofluorimetry, 455 (2002) 143

#### **Synergism**

Effect of 1,10-phenanthroline on the extraction and separation of lithium(I), sodium(I) and potassium(I) with thenoyltrifluoroacetone, 454 (2002) 241

#### **Synergistic effect**

Assessment of the toxicity of methyl parathion and its photodegradation products in water samples using conductometric enzyme biosensors, 459 (2002) 33

## **T**

#### **Tablet**

Electrooxidation of pimozone and its differential pulse voltammetric and HPLC-EC determination, 453 (2002) 221

Enantiomeric analysis of methotrexate in pharmaceuticals by cyclodextrin-modified capillary electrophoresis, 471 (2002) 211

#### Taggants

Survival and polymerase chain reaction-based detection of nucleic acid taggant markers during bacterial growth and sterilization, 475 (2003) 67

#### Tal 1 protein

Application of a polyaniline based ammonium sensor for the amperometric immunoassay of a urease conjugated Tal 1 protein, 461 (2002) 49

#### Tandem mass spectrometry

Screening and confirmatory strategies for the surveillance of anabolic steroid abuse within Northern Ireland, 473 (2002) 99

#### Tandem streams

Multicommutation in flow analysis: concepts, applications and trends, 468 (2002) 119

#### Tannin

Spectrofluorimetric determination of tannins based on their activating effect on the Cu(II) catalytic oxidation of rhodamine 6G by hydrogen peroxide, 455 (2002) 187

Comparison of wine aromas with different tannic content aged in French oak barrels, 458 (2002) 139

#### Tantalum

Determination of niobium, tantalum, zirconium and hafnium in geological materials by extraction chromatography and inductively coupled plasma mass spectrometry, 458 (2002) 375

#### Tap waters

Simultaneous UV and electrochemical determination of the herbicide asulam in tap water samples by micellar electrokinetic capillary chromatography, 469 (2002) 243

#### Tartaric acid

Ultrasound-assisted extraction and determination of tartaric and malic acids from grapes and winemaking by-products, 458 (2002) 119

#### Taste sensor

Flow injection analysis applied to a voltammetric electronic tongue, 471 (2002) 159

#### Tb(III) chelates

Heterogeneous and homogeneous electrochemiluminoimmunoassays of hTSH at disposable oxide-covered aluminum electrodes, 458 (2002) 271

#### Tea

Spectrofluorimetric determination of tannins based on their activating effect on the Cu(II) catalytic oxidation of rhodamine 6G by hydrogen peroxide, 455 (2002) 187

Chemiluminescence assay for catechin based on generation of hydrogen peroxide in basic solution, 472 (2002) 75

#### Teicoplanin

Chiral discrimination of dansyl-amino-acid enantiomers on teicoplanin phase: sucrose-perchlorate anion dependence, 457 (2002) 149

#### Telecommunication network

Remote microwave wavelength spectrometry using an infrared fibre optic telecommunication network, 463 (2002) 1

#### Tellurium

Determination of bismuth, selenium and tellurium in nickel-based alloys and pure copper by flow-injection hydride generation atomic absorption spectrometry—with ascorbic acid pre-reduction and cupferron chelation-extraction, 459 (2002) 161

#### Temperature

Practical physical aspects of interfacial nucleic acid oligomer hybridisation for biosensor design, 469 (2002) 115

#### Temperature effect

Determination of testosterone and its metabolites using liquid chromatography with elevated column temperature and flow-rate gradient, 457 (2002) 165

#### Temperature gradient

Determination of chlorophenoxy acid herbicides and their esters in soil by capillary high performance liquid chromatography with ultraviolet detection, using large volume injection and temperature gradient, 470 (2002) 147

#### Temperature of saturation

Optimisation of the method for determination of the temperature of saturation in wines, 458 (2002) 257

#### Tenax

Migration studies from recycled paper packaging materials: development of an analytical method for rapid testing, 467 (2002) 253

#### Terazosin

Study of the interaction between terazosin and serum albumin. Synchronous fluorescence determination of terazosin, 452 (2002) 185

#### Terbium

Study on the new fluorescence enhancement system of Tb-1,10-bis(2'-carboxyphenyl)-1,4,7,10-tetraoxadecane in silver chloride collosol and its analytical application, 468 (2002) 287

Screening of antagonists based on induced dissociation of a calmodulin-melittin interaction entrapped in a sol-gel derived matrix, 470 (2002) 19

#### Terbium photoluminescence

Enhanced spore detection using dipicolinate extraction techniques, 455 (2002) 167

#### Terbium sensitized fluorescence

Post-column terbium complexation and sensitized fluorescence detection for the determination of norepinephrine, epinephrine and dopamine using high-performance liquid chromatography, 462 (2002) 179

**Terbium(III)**

Application of time-resolved luminescence to dry reagent chemical technology, 452 (2002) 169

**Test strip**

Optical test strip for calcium determination based on a neutral ionophore, 451 (2002) 231

**Testosterone**

Determination of testosterone and its metabolites using liquid chromatography with elevated column temperature and flow-rate gradient, 457 (2002) 165

**Tetra(2-aminophenyl) porphyrin**

Zn(II)-selective membrane electrode based on tetra(2-aminophenyl) porphyrin, 460 (2002) 177

 **$\alpha,\beta,\gamma,\delta$ -Tetra(5-sulfophenyl)porphine (TPPS<sub>4</sub>)**

Fluorescent microscopic determination of cadmium in water samples with the self-ordered ring of  $\alpha,\beta,\gamma,\delta$ -tetra(5-sulfophenyl)-porphine formed on the solid support of glass slides, 453 (2002) 97

**1,4,8,11-Tetraazacyclotetradecane**

1,4,8,11-Tetraazacyclotetradecane bound to poly(*p*-chloromethylstyrene-ethylene glycol dimethacrylate) microbeads for selective gold uptake, 464 (2002) 313

**Tetraethyl-ammonium determination**

Chronocoulometric flow-injection analysis with solvent polymeric membrane ion sensors, 459 (2002) 11

**Tetraethylborate in situ ethylation**

Headspace solid-phase micro-extraction gas chromatography-mass detection method for the determination of butyltin compounds in wines, 458 (2002) 231

 **$\alpha,\beta,\gamma,\delta$ -tetrakis[4-(Trimethylammonium)phenyl]porphine (TAPP)**

Fluorescence microscopic quantification of DNA with  $\alpha,\beta,\gamma,\delta$ -tetrakis[4-(trimethylammonium)phenyl]porphine by a ring-like deposition technique, 466 (2002) 193

**Tetramethylammonium hydroxide**

Determination of trace elements in biological materials using tetramethylammonium hydroxide for sample preparation, 470 (2002) 195

**Tetramethylrhodamine B isothiocyanate (TRITC)**

Solid substrate room temperature phosphorescence immunoassay based on an antibody labeled with tetramethylrhodamine B isothiocyanate, 470 (2002) 121

**Tetraphenylarsonium chloride**

Microwave-assisted digestion of organoarsenic compounds for the determination of total arsenic in aqueous, biological, and sediment samples using flow injection hydride generation electrothermal atomic absorption spectrometry, 452 (2002) 207

**Tetraphenylporphyrin**

Cross-sensitive chemical sensors based on tetraphenylporphyrin and phthalocyanine, 457 (2002) 297

**TG-MS**

Application of factor analysis for resolving thermogravimetric-mass spectrometric analysis spectra, 461 (2002) 215

**Thallium**

Voltammetry using a dental amalgam electrode for heavy metal monitoring of wines and spirits, 458 (2002) 249

 **$\Delta^9$ -THC**

Determination of primary active constituents in *Cannabis* preparations by high-resolution gas chromatography/flame ionization detection and high-performance liquid chromatography/UV detection, 468 (2002) 245

**Thermal desorption**

Pressurised hot water extraction and thermal desorption of polycyclic aromatic hydrocarbons from sediment with use of a novel extraction vessel, 466 (2002) 93

**Thermal desorption-gas**

Comparison of wine aromas with different tannic content aged in French oak barrels, 458 (2002) 139

**Thermal ionisation mass spectrometry**

Recent advances in measurement of Pb isotopes in polar ice and snow at sub-picogram per gram concentrations using thermal ionisation mass spectrometry, 453 (2002) 1

Chlorine stable isotope measurements of chlorinated aliphatic hydrocarbons by thermal ionization mass spectrometry, 455 (2002) 1

**Thermodynamic properties**

Complexation, liquid-liquid extraction, and transport through a liquid membrane of protonated peptides using crown ethers, 466 (2002) 101

**Thermoelectric cooling**

Construction and validation of a cryogen free gas chromatography-electron-capture detection system for the measurement of ambient halocarbons, 461 (2002) 85

**Thermostability**

Development of a thermostable firefly luciferase, 457 (2002) 115

**Thiabendazole**

Use of a solid sensing zone implemented with unsegmented flow analysis for simultaneous determination of thiabendazole and warfarin, 459 (2002) 235

**Thiamine**

Novel assay of thiamine based on its enhancement of total internal reflected resonance light scattering signals of sodium dodecylbenzene sulfonate at the water/tetrachloromethane interface, 475 (2003) 151

**Thiazole orange**

Tethered thiazole orange intercalating dye for development of fibre-optic nucleic acid biosensors, 470 (2002) 57

**Thin insulating film-coated electrodes**

Hot electron-induced electrogenerated chemiluminescence of 1-aminonaphthalene-4-sulphonate at oxide-covered aluminium electrodes in aqueous solution, 454 (2002) 193

Heterogeneous and homogeneous electrochemiluminoimmunoassays of hTSH at disposable oxide-covered aluminum electrodes, 458 (2002) 271

**Thioacidolyse**

Characterisation of a wheat straw cell wall residue by various techniques. A comparative study with a synthetic and an extracted lignin, 459 (2002) 133

**Thioctic acid/iridium oxide-palladium modified electrode**

In vivo determination of the monoamine neurotransmitters in rat brain by liquid chromatography with a thioctic acid/iridium oxide-palladium modified electrode, 472 (2002) 27

**Thiocyanate**

Solvent extraction flow-injection manifold for the simultaneous spectrophotometric determination of free cyanide and thiocyanate ions based upon on-line masking of cyanides by formaldehyde, 452 (2002) 295

**Thiocyanate-selective electrode**

Selective thiocyanate poly(vinyl chloride) membrane based on a 1,8-dibenzyl-1,3,6,8,10,13-hexaazacyclotetradecane-Ni(II) perchlorate, 462 (2002) 25

**Thiol cotton fiber**

Systematic studies on adsorption of trace elements Pt, Pd, Au, Se, Te, As, Hg, Sb on thiol cotton fiber, 456 (2002) 147

**Thiol/disulfide exchange reaction**

Immobilization of oligonucleotides onto silica nanoparticles for DNA hybridization studies, 470 (2002) 51

**Thromboxane**

Structural and thermodynamic investigations of metabolites of the thromboxane synthase pathway, 465 (2002) 441

**Thyreostats**

Recent developments in the use and abuse of growth promoters, 473 (2002) 71

**Thyroxine**

Optimization and development of a high-performance liquid chromatography-based one-site immunometric assay with chemiluminescence detection, 470 (2002) 37

**Thyroxine (T<sub>4</sub>)**

Enantioselective sequential-injection chemiluminescence immunoassays for 3,3',5-triiodothyronine (T<sub>3</sub>) and thyroxine (T<sub>4</sub>), 463 (2002) 5

**Time shift**

Time shift correction in second-order liquid chromatographic data with iterative target transformation factor analysis, 470 (2002) 163

**Time window**

Time shift correction in second-order liquid chromatographic data with iterative target transformation factor analysis, 470 (2002) 163

**Time-based injection**

Time-based multisyringe flow injection system for the spectrophotometric determination of aluminium, 455 (2002) 149

Multisyringe flow-injection system for total inorganic arsenic determination by hydride generation-atomic fluorescence spectrometry, 455 (2002) 277

**Time-resolved electrochemiluminescence**

Time-resolved electrochemiluminescence of platinum(II) coproporphyrin, 453 (2002) 269

**Time-resolved laser-induced fluorimetry**

Time-resolved laser-induced fluorimetry for screening polycyclic aromatic hydrocarbons on solid-phase extraction membranes, 464 (2002) 261

**Time-resolved luminescence**

Application of time-resolved luminescence to dry reagent chemical technology, 452 (2002) 169

**TIMS**

High-sensitivity measurements of strontium isotopes in polar ice, 469 (2002) 225

**Tin**

Tin determination in marine sediment, soil, coal fly ash and coal slurried samples by hydride generation-electrothermal atomic absorption spectrometry, 461 (2002) 261

**TiO<sub>2</sub>**

Application of solid-phase microextraction for monitoring the photocatalytic decomposition of fenthion and parathion in aqueous TiO<sub>2</sub> suspensions, 467 (2002) 233

**Tiron**

Highly sensitive spectrofluorimetric kinetic determination of ultra-trace amounts of vanadium(V) based on the oxidation of 1,8-diaminonaphthalene by bromate, 455 (2002) 159

**Titrimetric analysis**

pH-stat techniques in titrimetric analysis. Part 3. The principles of pH-stat chelatometric titrations, 456 (2002) 313

pH-stat techniques in titrimetric analysis. IV. pH-stat monitoring of chelatometric titrations, 470 (2002) 277

**Titrimetry**

Determination of stoichiometry of Li<sub>1-x</sub>CoO<sub>2</sub> materials by flame atomic absorption spectrometry and automated potentiometric titration, 455 (2002) 35

**TLC**

Development of a tandem thin-layer chromatography-high-performance liquid chromatography method for the identification and determination of corticosteroids in cosmetic products, 457 (2002) 187

**TMAH**

Sorption of aquatic humic matter by DAX-8 and XAD-8 resins. Comparative study using pyrolysis gas chromatography, 471 (2002) 219

**TMANB**

Lead-selective fluorescent optode membrane based on 3,3',5,5'-tetramethyl-N-(9-anthrylmethyl)benzidine, 460 (2002) 123

**TMB**

Determination of umbilical cord and maternal plasma concentrations of fentanyl by using novel spectrophotometric and chemiluminescence enzyme immunoassays, 459 (2002) 177

**Tobaccos**

Analysis by gas chromatography/mass spectrometry of fatty acids and esters in alcoholic beverages and tobaccos, 465 (2002) 309

**Tolterodine**

Sonic spray ionization interface for liquid chromatography-mass spectrometry, 468 (2002) 263

**Toothpaste**

Simultaneous flow-injection determination of fluoride, monofluorophosphate and orthophosphate ions using alkaline phosphatase immobilized on a cellulose nitrate membrane and an open-circulation approach, 467 (2002) 83

**Tosflex**

Perfluorinated anion-exchange polymer mercury film electrode for anodic stripping voltammetric determination of zinc(II): effect of model organic compounds, 454 (2002) 93

**Total and individual platelet phospholipids**

High-performance liquid chromatographic determination of free fatty acids and esterified fatty acids in biological materials as their 2-nitrophenylhydrazides, 465 (2002) 237

**Total antioxidant capacity**

Monitoring reactive oxygen species in vivo using microdialysis sampling and chemiluminescence detection as an alternative global method for determination of total antioxidant capacity, 467 (2002) 133

**Total hardness**

Determination of calcium and total hardness in natural waters using a potentiometric sensor array, 464 (2002) 89

**Total internal reflected resonance light scattering**

Novel assay of thiamine based on its enhancement of total internal reflected resonance light scattering signals of sodium dodecylbenzene sulfonate at the water/tetrachloromethane interface, 475 (2003) 151

**Total internal reflection fluorescence**

Versatile biosensor surface based on peptide nucleic acid with label free and total internal reflection fluorescence detection for quantification of endocrine disruptors, 469 (2002) 37

**Total mercury**

Pretreatment of water samples using UV irradiation-peroxodisulfate for the determination of total mercury, 454 (2002) 271

**Total reflection X-ray fluorescence spectrometry**

Development and application of a micro-digestion device for elemental analysis of biological samples, 451 (2002) 279

**ToxAlert<sup>®</sup> 10**

Comparison of three microbial assay procedures for measuring toxicity of chemical compounds: ToxAlert<sup>®</sup> 10, CellSense and Biolog MT2 microplates, 456 (2002) 41

**Toxic compounds**

Identification of toxic compounds in wastewater treatment plants during a field experiment, 456 (2002) 19

**Toxic gas analysis**

Hydrogen fluoride analyzer for gases and aerosols, 460 (2002) 219

**Toxicity**

Comparative evaluation of the effects of pesticides in acute toxicity luminescence bioassays, 451 (2002) 195

In-field monitoring of cleaning efficiency in waste water treatment plants using two phenol-sensitive biosensors, 456 (2002) 3

Toxicity evaluation of single and mixed antifouling biocides measured with acute toxicity bioassays, 456 (2002) 303

Assessment of the toxicity of methyl parathion and its photodegradation products in water samples using conductometric enzyme biosensors, 459 (2002) 33

**Toxicity testing**

Sol-gel luminescence biosensors: Encapsulation of recombinant *E. coli* reporters in thick silicate films, 462 (2002) 11

**Toxicokinetic**

Quantification of methylphenidate in rat, rabbit and dog plasma using a chiral liquid-chromatography/tandem mass spectrometry method. Application to toxicokinetic studies, 469 (2002) 261

**Trace analysis**

Determination of nanomolar concentrations of lead and cadmium by anodic-stripping voltammetry at the silver electrode, 457 (2002) 285

Characteristics of subtractive anodic stripping voltammetry of Pb and Cd at silver and gold electrodes, 464 (2002) 99

**Trace and ultratrace metals**

Analysis and comparison of SIMCA models for denominations of origin of wines from de Canary Islands (Spain) builds by means of their trace and ultratrace metals content, 472 (2002) 161

**Trace elements**

Application of multivariate methods to scalp hair metal data to distinguish between drug-free subjects and drug abusers, 455 (2002) 253

Systematic studies on adsorption of trace elements Pt, Pd, Au, Se, Te, As, Hg, Sb on thiol cotton fiber, 456 (2002) 147

**Trace heavy metals**

Dimensional and elemental characterization of suspended particulate matter in natural waters: quantitative aspects in the integrated ultrafiltration, split-flow thin cell and inductively coupled plasma-atomic emission spectrometry approach, 470 (2002) 253

**Trace metal analysis**

Analysis for Cd, Cu, Ni, Zn, and Mn in estuarine water by inductively coupled plasma mass spectrometry coupled with an automated flow injection system, 455 (2002) 11

**Trace metals**

Dithione as chelator in the flow injection separation and pre-concentration system of trace metals in biological samples, 451 (2002) 305

Column solid-phase extraction with Chromosorb-102 resin and determination of trace elements in water and sediment samples by flame atomic absorption spectrometry, 452 (2002) 77

Determination of some trace metals in water and sediment samples by flame atomic absorption spectrometry after coprecipitation with cerium (IV) hydroxide, 452 (2002) 231

Use of the diffusion gradient thin film method to measure trace metals in fresh waters at low ionic strength, 456 (2002) 241

Trace metal studies of selected white wines: an alternative approach, 458 (2002) 223

**Trace tellurium determination**

Differential pulse voltammetric determination of trace Te(IV) at a poly(3,3'-diaminobenzidine) film modified gold electrode in flow systems, 453 (2002) 209

**Trace-enrichment**

Continuous flow liquid membrane extraction: a novel automatic trace-enrichment technique based on continuous flow liquid-liquid extraction combined with supported liquid membrane, 455 (2002) 93

**trans Fatty acids**

Influence of milk fat presence on the determination of *trans* fatty acids in fats used for infant formulae, 465 (2002) 395

**trans,trans-Muconic acid**

Ultratrace analysis for *trans,trans*-muconic acid by electrophoretic derivatization and capillary gas chromatography, 455 (2002) 111

**Trans- $\beta$ -carotene**

Ultrasensitive assays of *trans*- and *cis*- $\beta$ -carotenes in vegetable oils by high-performance liquid chromatography-thermal lens detection, 460 (2002) 193

**Transcription**

Use of specific bioluminescent cell lines for the detection of steroid hormone (ant)agonists in meat producing animals, 473 (2002) 119

**Transduction**

Polyaniline as a new sensitive layer for gas sensors, 475 (2003) 1

**Transesterification/esterification**

Characterisation of humic substances by acid catalysed transesterification, 452 (2002) 105

**Transferrin**

Capacitive immunosensor for transferrin based on an *o*-aminobenzothiol oligomer layer, 458 (2002) 297

**Transformation products**

Occurrence and determination of herbicides and their major transformation products in environmental waters, 462 (2002) 187

**Transport**

Complexation, liquid-liquid extraction, and transport through a liquid membrane of protonated peptides using crown ethers, 466 (2002) 101

**Triazines**

Evaluation of a field-test kit for triazine herbicides (SensioScreen<sup>®</sup> TR500) as a fast assay to detect pesticide contamination in water samples, 475 (2003) 105

**Trichomoniasis**

Novel application for ion mobility spectrometry: diagnosing vaginal infections through measurement of biogenic amines, 474 (2002) 115

**Trihydroxyindole**

Quantifying catecholamines using multi-way kinetic modelling, 475 (2003) 137

**Triiodothyronine (T<sub>3</sub>)**

Enantioselective sequential-injection chemiluminescence immunoassays for 3,3',5'-triiodothyronine (T<sub>3</sub>) and thyroxine (T<sub>4</sub>), 463 (2002) 5

**Trimethoprim**

Simultaneous determination of sulfadiazine and trimethoprim in animal feed by liquid chromatography with UV and tandem mass spectrometric detection, 473 (2002) 183

**Trimethylamine (TMA)**

Determination of volatile biogenic amines in muscle food products by ion mobility spectrometry, 463 (2002) 155

**Tris(2,2'-bipyridyl)ruthenium**

Determination of sophoridine and related lupin alkaloids using tris(2,2'-bipyridine)ruthenium electrogenerated chemiluminescence, 466 (2002) 79

**tris(2,2'-Bipyridyl)ruthenium(II)**

Determination of  $\beta$ -blockers in pharmaceutical preparations and human urine by high-performance liquid chromatography with tris(2,2'-bipyridyl)ruthenium(II) electrogenerated chemiluminescence detection, 471 (2002) 51

**Tris(2,2'-bipyridyl)ruthenium(II) chemiluminescence**

Determination of sodium oxalate in Bayer liquor using flow-analysis incorporating an anion exchange column and tris(2,2'-bipyridyl)ruthenium(II) chemiluminescence detection, 458 (2002) 291

**Tris(1,10-phenanthroline)iron(III)**

Two-rate method for simultaneous kinetic determination based on detecting the reagent in successive reactions, 464 (2002) 153

**Triterpene glycosides**

High-performance liquid chromatographic analysis of Black Cohosh (*Cimicifuga racemosa*) constituents with in-line evaporative light scattering and photodiode array detection, 471 (2002) 61

**Triton X-114**

Cloud point preconcentration and flame atomic absorption spectrometric determination of Cd and Pb in human hair, 470 (2002) 215

**Tryptophan and its derivatives**

Electrochemical behavior of tryptophan and its derivatives at a glassy carbon electrode modified with hemin, 452 (2002) 245

**Tucker3 model**

Three-way principal component analysis applied to food analysis: an example, 462 (2002) 133

**Tunnel emission**

Time-resolved electrochemiluminescence of platinum(II) coproporphyrin, 453 (2002) 269

Hot electron-induced electrogenerated chemiluminescence of 1-aminonaphthalene-4-sulphonate at oxide-covered aluminium electrodes in aqueous solution, 454 (2002) 193

**Turbid waters**

Determination of total phosphorus and nitrogen in turbid waters by oxidation with alkaline potassium peroxodisulfate and low pressure microwave digestion, autoclave heating or the use of closed vessels in a hot water bath: comparison with Kjeldahl digestion, 463 (2002) 283

**Turnover**

Stable isotope analysis of fatty acids by gas chromatography-isotope ratio mass spectrometry, 465 (2002) 63

**Tween 80**

Novel spectrofluorimetric method for the determination of sulfite with rhodamine B hydrazide in a micellar medium, 456 (2002) 121

**Tween 20**

Group-specific enzyme-linked immunosorbent assay for fenitrothion and 3-methyl-4-nitrophenol in water samples based on a polyclonal antibody, 460 (2002) 99

**Two-rate method**

Two-rate method for simultaneous kinetic determination based on detecting the reagent in successive reactions, 464 (2002) 153

**Two-way kinetic-spectral data**

Determination of rate constants from two-way kinetic-spectral data by using rank annihilation factor analysis, 454 (2002) 21

**Tylosin A solid-phase clean-up**

Quantitation of tylosin in swine tissues by liquid chromatography combined with electrospray ionization mass spectrometry, 473 (2002) 167

## U

**Ultrafiltration sampling**

Flow-injection chemiluminescence detection for studying protein binding for drug with ultrafiltration sampling, 468 (2002) 65

**Ultrasonic**

Cold ultrasonic acid extraction of copper, lead and zinc from soil samples, 452 (2002) 143

**Ultrasonic extraction**

Ultrasonic extraction combined with fast furnace analysis as an improved methodology for total selenium determination in seafood by electrothermal-atomic absorption spectrometry, 452 (2002) 217

**Ultrasound-assisted extraction**

Ultrasound-assisted extraction and determination of tartaric and malic acids from grapes and winemaking by-products, 458 (2002) 119

**Ultra-thin films**

Grazing-exit electron probe X-ray microanalysis of ultra-thin films and single particles with high-angle resolution, 455 (2002) 245

**Umbilical cord samples**

Determination of umbilical cord and maternal plasma concentrations of fentanyl by using novel spectrophotometric and chemiluminescence enzyme immunoassays, 459 (2002) 177

**Uncertainty**

Assessment of uncertainty in pesticide multiresidue analytical methods: main sources and estimation, 454 (2002) 297

Estimating the uncertainty of binary test results to assess their compliance with regulatory limits, 455 (2002) 267

**Underpotential deposition**

Characteristics of subtractive anodic stripping voltammetry of Pb and Cd at silver and gold electrodes, 464 (2002) 99  
Voltammetric behavior and trace determination of Pb<sup>2+</sup> at a mercury-free screen-printed silver electrode, 464 (2002) 229

**Uniform design**

Representative subset selection, 468 (2002) 91

**United States Department of Agriculture**

An odyssey—meeting European Union analytical criteria for residues from afar: experiences from North America, 473 (2002) 49

**Univariate**

Standardization methods for handling instrument related signal shift in gas-sensor array measurement data, 472 (2002) 99

**Univariate calibration**

Comparison of various chemometric evaluation approaches for on-line FT-NIR transmission and FT-MIR/ATR spectroscopic data of methyl methacrylate solution polymerization, 452 (2002) 265

**Unresolved peaks**

Artificial neural networks for quantification in unresolved capillary electrophoresis peaks, 452 (2002) 47

**Unsegmented flow analysis**

Use of a solid sensing zone implemented with unsegmented flow analysis for simultaneous determination of thiabendazole and warfarin, 459 (2002) 235

**Untypical aging off-flavor (UTA)**

'Untypical aging off-flavor' in wine: formation of 2-aminoacetophenone and evaluation of its influencing factors, 458 (2002) 29

**Urea**

Development and validation of a new Fourier transform infrared spectrometric method for the quantification of urea in creams and ointments, 451 (2002) 323

Monitoring urea levels during haemodialysis with a pulsed-flow chemiluminescence analyser, 461 (2002) 131

Method for monitoring urea and ammonia in wine and must by flow injection-pervaporation, 471 (2002) 105

**Urea biosensor**

Glucose and urea biosensors based on all solid-state PVC-NH<sub>2</sub> membrane electrodes, 452 (2002) 29

Development of a urea biosensor based on a polymeric membrane including zeolite, 466 (2002) 39

**Urease**

Application of a polyaniline based ammonium sensor for the amperometric immunoassay of a urease conjugated Tal 1 protein, 461 (2002) 49

**Uric acid**

Monitoring reactive oxygen species in vivo using microdialysis sampling and chemiluminescence detection as an alternative global method for determination of total antioxidant capacity, 467 (2002) 133

**Uricase**

Simultaneous detection of uric acid and glucose on a dual-enzyme chip using scanning electrochemical microscopy/scanning chemiluminescence microscopy, 458 (2002) 263

**Urine**

Separation and determination of homovanillic acid and vanillyl-mandelic acid by capillary electrophoresis with electrochemical detection, 461 (2002) 123

Post-column terbium complexation and sensitized fluorescence detection for the determination of norepinephrine, epinephrine and dopamine using high-performance liquid chromatography, 462 (2002) 179

Room-temperature luminescence optosensings based on immobilized active principles actives. Application to nafenyl and naproxen determination in pharmaceutical preparations and biological fluids, 462 (2002) 217

Continuous photometric method for the screening of human urines for phenothiazines, 462 (2002) 275

Determination of  $\beta$ -blockers in pharmaceutical preparations and human urine by high-performance liquid chromatography with tris(2,2'-bipyridyl)ruthenium(II) electrogenerated chemiluminescence detection, 471 (2002) 51

Screening and confirmatory strategies for the surveillance of anabolic steroid abuse within Northern Ireland, 473 (2002) 99

Confirmatory analysis method for zeranone, its metabolites and related mycotoxins in urine by liquid chromatography-negative ion electrospray tandem mass spectrometry, 473 (2002) 151

Extraction and preconcentration of Cr(VI) from urine using supported liquid membrane, 474 (2002) 59

Quantifying catecholamines using multi-way kinetic modelling, 475 (2003) 137

**Urine analysis**

Rapid determination of diuretics in human urine by gas chromatography-mass spectrometry following microwave assisted derivatization, 475 (2003) 125

**UV**

Flow injection-chemiluminescence determination of octyl dimethyl PABA in sunscreen formulations, 462 (2002) 209

**UV filters**

Cleaning validation in the toiletries industry, 467 (2002) 261

**UV irradiation**

Pretreatment of water samples using UV irradiation-peroxodisulfate for the determination of total mercury, 454 (2002) 271

**UV spectrometry**

Improvement of UV spectrophotometry methodology for the determination of total polycyclic aromatic compounds in contaminated soils, 453 (2002) 245

Sequential injection analysis for benzophenone-4 and phenylbenzimidazole sulphonic acid in sunscreen sprays by solid-phase extraction coupled with ultraviolet spectrometry, 464 (2002) 295

**UV spectrophotometry**

Determination of flurbiprofen in pharmaceutical formulations by UV spectrophotometry and liquid chromatography, 463 (2002) 207

**UV-absorbing complex**

Determination of ethambutol by ion-pair reversed phase liquid chromatography with UV detection, 456 (2002) 189

**UV-Vis**

Determination of anthraquinone-2-sulfonate in alkaline pulping liquor by spectrophotometry using a Nafion membrane interface, 474 (2002) 69

**UV-Vis absorption**

Investigation on the inclusion behavior of *neutral* red with  $\beta$ -cyclodextrin, hydroxypropyl- $\beta$ -cyclodextrin and sulfobutylether- $\beta$ -cyclodextrin, 474 (2002) 189

**UV-visible detection**

High-performance liquid chromatographic determination of free fatty acids and esterified fatty acids in biological materials as their 2-nitrophenylhydrazides, 465 (2002) 237

**V****Vacancy chromatography**

Vacancy ion-exclusion chromatography of carboxylic acids on a strongly acidic cation-exchange resin, 474 (2002) 31

**Vacancy transfer**

Measurement of K shell radiative transition probabilities and  $K_{L_2}$  and  $L_{3\beta}$  shell/subshell fluorescence yields of some elements in the atomic number range  $30 \leq Z \leq 40$ , 454 (2002) 327

**Vaginitis**

Novel application for ion mobility spectrometry: diagnosing vaginal infections through measurement of biogenic amines, 474 (2002) 115

**Validation**

Validation of remote, on-line, near-infrared measurements for the classification of demolition waste, 453 (2002) 117

Determination of primary active constituents in *Cannabis* preparations by high-resolution gas chromatography/flame ionization detection and high-performance liquid chromatography/UV detection, 468 (2002) 245

Internal validation of screening methodology for residues of epi-trenbolone, trenbolone, epi-nortestosterone and nortestosterone in bovine urine using immunoaffinity cartridges for sample clean-up, 473 (2002) 111

Simultaneous determination of sulfadiazine and trimethoprim in animal feed by liquid chromatography with UV and tandem mass spectrometric detection, 473 (2002) 183

**Valinomycin**

Membrane supported bilayer lipid membranes array: preparation, stability and ion-channel insertion, 460 (2002) 23

**Vanadium determination**

Highly sensitive spectrofluorimetric kinetic determination of ultra-trace amounts of vanadium(V) based on the oxidation of 1,8-diaminonaphthalene by bromate, 455 (2002) 159

**Vanadium(IV)**

Ultrasensitive chemiluminescence detection of aM vanadium(IV) by capillary electrophoresis, 456 (2002) 177

**Vanadium-doped**

Determination of hydrogen peroxide using glassy carbon and graphite/polyester composite electrodes modified by vanadium-doped zirconias, 452 (2002) 11

**Vancomycin column**

Quantification of methylphenidate in rat, rabbit and dog plasma using a chiral liquid-chromatography/tandem mass spectrometry method. Application to toxicokinetic studies, 469 (2002) 261

**Vanillylmandelic acid**

Separation and determination of homovanillic acid and vanillyl-mandelic acid by capillary electrophoresis with electrochemical detection, 461 (2002) 123

**Vaporization-ICP-AES**

Speciation of chromium(III) and chromium(VI) by in situ separation and sequential determination with electrothermal vaporization inductively coupled plasma atomic emission spectrometry, 471 (2002) 121

**Variable reduction**

Variable reduction on electronic tongue data, 452 (2002) 255

**Variable scanning fluorescence**

Simultaneous determination of fluorophores with overlapped spectra by sequential injection analysis coupled to variable angle scanning fluorescence spectrometry and multivariate linear regression algorithms, 471 (2002) 173

**Variable selection**

Variable selection for multivariate calibration using a genetic algorithm: prediction of additive concentrations in polymer films from Fourier transform-infrared spectral data, 461 (2002) 189

**Varietal aroma**

Effects of enzyme treatment and skin extraction on varietal volatiles in Spanish wines made from Chardonnay, Muscat, Airén, and Macabeo grapes, 458 (2002) 39

**Vegetable oil**

Ultrasensitive assays of *trans*- and *cis*- $\beta$ -carotenes in vegetable oils by high-performance liquid chromatography-thermal lens detection, 460 (2002) 193

Stable isotope analysis of fatty acids by gas chromatography-isotope ratio mass spectrometry, 465 (2002) 63

**Vegetables**

Flow-injection chemiluminescence determination of ascorbic acid by use of the cerium(IV)-Rhodamine B system, 464 (2002) 289

**Verapamil drug**

Detection of verapamil drug by fluorescence and trilinear decomposition techniques, 453 (2002) 105

**Very long-chain fatty acids (VLCFAs)**

Chromatography of very long-chain fatty acids from animal and plant kingdoms, 465 (2002) 273

**Veterinary drug residue**

Detection of illegal growth promoters in biological samples using receptor binding assays, 473 (2002) 135

**Veterinary drugs**

Contribution of European research to anti-microbials and hormones, 473 (2002) 83

**Veterinary medicines**

Contamination of animal feedingstuffs as a cause of residues in food: a review of regulatory aspects, incidence and control, 473 (2002) 3

**Viagra**

Luminol chemiluminescence reaction: a new method for monitoring nitric oxide in vivo, 458 (2002) 281

**Vibrational spectroscopy**

Comparison of various chemometric evaluation approaches for on-line FT-NIR transmission and FT-MIR/ATR spectroscopic data of methyl methacrylate solution polymerization, 452 (2002) 265

**Vibrio fischeri**

Comparative evaluation of the effects of pesticides in acute toxicity luminescence bioassays, 451 (2002) 195

Toxicity evaluation of single and mixed antifouling biocides measured with acute toxicity bioassays, 456 (2002) 303

**Vincristine**

Study of uptake kinetics of vincristine for human erythrocytes by capillary zone electrophoresis with electrochemical detection, 461 (2002) 117

**Vine variety**

Use of modern nuclear magnetic resonance spectroscopy in wine analysis: determination of minor compounds, 458 (2002) 77

**Vines**

Biogenesis of C<sub>13</sub>-norisoprenoid compounds: experiments supportive for an apo-carotenoid pathway in grapevines, 458 (2002) 3

**Vinylphenols**

Determination of volatile phenols in fino sherry wines, 458 (2002) 95

**Virgin olive oils**

Electronic nose based on metal oxide semiconductor sensors as a fast alternative for the detection of adulteration of virgin olive oils, 459 (2002) 219

**Virtual instrument**

A "virtual" electroanalytical instrument for square wave voltammetry, 467 (2002) 179

**Visible absorption spectrophotometry**

Visible spectrophotometric determination of metal ions: the influence of structure on molar absorptivity value of copper(II) complexes in aqueous solution, 459 (2002) 323

**Vitamin A**

Simultaneous sample preparation for high-performance liquid chromatographic determination of Vitamin A and  $\beta$ -carotene in emulsified nutritional supplements after solid-phase extraction, 463 (2002) 21

Simple quantification of endogenous retinoids in bovine serum by high-performance liquid chromatography – diode-array detection, 468 (2002) 237

**Vitamin B<sub>12</sub>**

Implementation of chemiluminescence detection in the multisyringe flow injection technique, 467 (2002) 155

**Vitis vinifera**

Biogenesis of C<sub>13</sub>-norisoprenoid compounds: experiments supportive for an apo-carotenoid pathway in grapevines, 458 (2002) 3

**Volatile fatty acids**

Environmental analysis of aliphatic carboxylic acids by ion-exclusion chromatography, 465 (2002) 157

**Volatile organic compounds**

Cooled internal reflection element for infrared chemical sensing of volatile to semi-volatile organic compounds in the headspace of aqueous solutions, 462 (2002) 235

**Volatile sulfur compound**

Portable oral malodor analyzer using highly sensitive In<sub>2</sub>O<sub>3</sub> gas sensor combined with a simple gas chromatography system, 475 (2003) 27

**Volatiles**

Comparison of wine aromas with different tannic content aged in French oak barrels, 458 (2002) 139

**Voltammetry**

Electrochemical reduction and oxidation of the antibiotic cefepime at a carbon electrode, 457 (2002) 265

Voltammetry using a dental amalgam electrode for heavy metal monitoring of wines and spirits, 458 (2002) 249

Application of multivariate curve resolution to the voltammetric study of the complexation of fulvic acids with cadmium(II) ion, 459 (2002) 291

Electrochemical characterisation of nefazodone hydrochloride and voltammetric determination of the drug in pharmaceuticals and human serum, 462 (2002) 49

Voltammetric behavior and determination of estrogens at Nafion-modified glassy carbon electrode in the presence of cetyltrimethylammonium bromide, 464 (2002) 209

Electrochemical nucleic acid biosensors, 469 (2002) 63

Iron(II) and iron(III) determination by potentiometry and ion-exchange voltammetry at ionomer-coated electrodes, 474 (2002) 147

Quantitative analysis of gas mixtures by voltammetric sensing, 475 (2003) 17

**W****Wall-jet cell**

Determination of arsenic in gold samples using matrix exchange differential pulse stripping voltammetry, 453 (2002) 201

**Warfarin**

Use of a solid sensing zone implemented with unsegmented flow analysis for simultaneous determination of thiabendazole and warfarin, 459 (2002) 235

Multisyringe flow injection spectrofluorimetric determination of warfarin at trace levels with on-line solid-phase preconcentration, 467 (2002) 13

**Washing**

Removal of exogenously bound elements from human hair by various washing procedures and determination by inductively coupled plasma mass spectrometry, 455 (2002) 23

**Waste**

Environmental analysis of aliphatic carboxylic acids by ion-exclusion chromatography, 465 (2002) 157

**Wastewater**

Spectrofluorimetric method for the rapid screening of toxic heavy metals in water samples, 451 (2002) 203

In-field monitoring of cleaning efficiency in waste water treatment plants using two phenol-sensitive biosensors, 456 (2002) 3

Identification of toxic compounds in wastewater treatment plants during a field experiment, 456 (2002) 19

Tuning the parameters for fast respirometry, 460 (2002) 257

Highly selective spectrophotometric determination of trace cobalt and development of a reagentless fiber-optic sensor, 467 (2002) 205

#### Wastewaters analysis

Methylene blue potentiometric sensor for selective determination of sulfide ions, 466 (2002) 47

#### Water

Determination of some trace metals in water and sediment samples by flame atomic absorption spectrometry after coprecipitation with cerium (IV) hydroxide, 452 (2002) 231

Pretreatment of water samples using UV irradiation-peroxodisulfate for the determination of total mercury, 454 (2002) 271

Spectrofluorimetric determination of aluminum in drinking waters by sequential injection analysis, 457 (2002) 311

Development of an enzyme-linked immunosorbent assay for pentachlorophenol, 460 (2002) 279

Environmental analysis of aliphatic carboxylic acids by ion-exclusion chromatography, 465 (2002) 157

Separation of Sr from Ca, Ba and Ra by means of  $\text{Ca}(\text{OH})_2$  and  $\text{Ba}(\text{Ra})\text{Cl}_2$  or  $\text{Ba}(\text{Ra})\text{SO}_4$  for the determination of radiostrontium, 466 (2002) 109

Abraham model in gas chromatography of phenol pollutants, 466 (2002) 151

Multisyringe flow injection spectrofluorimetric determination of warfarin at trace levels with on-line solid-phase preconcentration, 467 (2002) 13

Determination of chloride by multisyringe flow injection analysis and sequential injection analysis with potentiometric detection, 467 (2002) 25

Sex hormones originating from different livestock production systems: fate and potential disrupting activity in the environment, 473 (2002) 27

Chemiluminescent flow-injection analysis of nitrates in water using on-line ultraviolet photolysis, 474 (2002) 99

#### Water analysis

Optical test strip for calcium determination based on a neutral ionophore, 451 (2002) 231

Development of a solid-phase microextraction method for the determination of phthalic acid esters in water, 457 (2002) 211

Group-specific enzyme-linked immunosorbent assay for fenitrooxon and 3-methyl-4-nitrophenol in water samples based on a polyclonal antibody, 460 (2002) 99

#### Water and sediment samples

Column solid-phase extraction with Chromosorb-102 resin and determination of trace elements in water and sediment samples by flame atomic absorption spectrometry, 452 (2002) 77

#### Water bath heating

Determination of total phosphorus and nitrogen in turbid waters by oxidation with alkaline potassium peroxodisulfate and low pressure microwave digestion, autoclave heating or the use of closed vessels in a hot water bath: comparison with Kjeldahl digestion, 463 (2002) 283

#### Water quality

Chemometrics characterisation of the quality of river water, 462 (2002) 87

#### Water samples

Determination of As(III) and total inorganic arsenic by flow injection hydride generation atomic absorption spectrometry, 460 (2002) 227

#### Water vapor

Starch-iodine films respond to water vapor, 455 (2002) 49

#### Wavelength selection

Variable selection for multivariate calibration using a genetic algorithm: prediction of additive concentrations in polymer films from Fourier transform-infrared spectral data, 461 (2002) 189

#### Wavelet transform

Use of wavelet transform to enhance piezoelectric signals for analytical purposes, 456 (2002) 93

#### 16-Way switching valve

Rapid measurement of fish freshness indices by an amperometric flow-injection system with a 16-way switching valve and immobilized enzyme reactors, 470 (2002) 175

#### White wine

Removal of iron, copper and manganese from white wines through ion exchange techniques: effects on their organoleptic characteristics and susceptibility to browning, 458 (2002) 197

#### White-rot fungal degradation

Study of the white-rot fungal degradation of selected phthalocyanine dyes by capillary electrophoresis and liquid chromatography, 451 (2002) 259

#### Wine

Comparison of methods for the determination of ochratoxin A in wine, 453 (2002) 33

Effect of oxygenation on polyphenol changes occurring in the course of wine-making, 458 (2002) 15

'Untypical aging off-flavor' in wine: formation of 2-aminoacetophenone and evaluation of its influencing factors, 458 (2002) 29

Effects of enzyme treatment and skin extraction on varietal volatiles in Spanish wines made from Chardonnay, Muscat, Airén, and Macabeo grapes, 458 (2002) 39

Analytical methods for the characterization of proteins and peptides in wines, 458 (2002) 63

Use of modern nuclear magnetic resonance spectroscopy in wine analysis: determination of minor compounds, 458 (2002) 77

Determination of volatile phenols in fino sherry wines, 458 (2002) 95

Direct liquid chromatographic analysis of resveratrol derivatives and flavanols in wines with absorbance and fluorescence detection, 458 (2002) 103

Sequential injection flow system with improved sample throughput: determination of glycerol and ethanol in wines, 458 (2002) 131

Comparison of wine aromas with different tannic content aged in French oak barrels, 458 (2002) 139

Volatile sulphur compounds in wines related to yeast metabolism and nitrogen composition of grape musts, 458 (2002) 157

Screen-printed biosensors for the control of wine quality based on lactate and acetaldehyde determination, 458 (2002) 203

Headspace solid-phase micro-extraction gas chromatography-mass detection method for the determination of butyltin compounds in wines, 458 (2002) 231

Micelle mediated methodology for the determination of free and bound iron in wines by flame atomic absorption spectrometry, 458 (2002) 241

Voltammetry using a dental amalgam electrode for heavy metal monitoring of wines and spirits, 458 (2002) 249

Advantages and limitations of the semi-quantitative operation mode of an inductively coupled plasma-mass spectrometer for multi-element analysis of wines, 463 (2002) 165

Method for monitoring urea and ammonia in wine and must by flow injection-pervaporation, 471 (2002) 105

#### **Wine colour**

Anthocyanin-derived pigments and colour of red wines, 458 (2002) 147

#### **Wine volatiles**

Aroma composition of wine studied by different extraction methods, 458 (2002) 85

#### **Wines tartaric stability**

Optimisation of the method for determination of the temperature of saturation in wines, 458 (2002) 257

#### **Wood**

Effect of maturation in small oak casks on the volatility of red wine aroma compounds, 458 (2002) 45

#### **Wool wax**

Gas chromatographic and mass spectrometric methods for the characterisation of long-chain fatty acids. Application to wool wax extracts, 465 (2002) 359

## **X**

#### **XANES**

Determination of the oxidation state of cerium in rocks by Ce L<sub>III</sub>-edge X-ray absorption near-edge structure spectroscopy, 468 (2002) 345

#### **Xanthone**

Optimized separation of pharmacologically active xanthenes from *Securidaca inappendiculata* by micellar electrokinetic chromatography and microemulsion electrokinetic chromatography, 474 (2002) 37

#### **XPS**

Characterisation of a wheat straw cell wall residue by various techniques. A comparative study with a synthetic and an extracted lignin, 459 (2002) 133

#### **X-ray fluorescence spectrometry**

Determination of diffusion profiles of silver ions in soda-lime-silica glass by X-ray fluorescence spectrometry, 459 (2002) 305

#### **Xylitol oxidase**

Development of xylitol oxidase-based flow injection analysis for monitoring of xylitol concentrations, 456 (2002) 293

## **Y**

#### **Yeast**

Yeast cells sucrose biosensor based on a potentiometric oxygen electrode, 458 (2002) 215

#### **Ytterbium ion-selective electrode**

Ytterbium(III)-selective membrane electrode based on cefixime, 475 (2003) 59

## **Z**

#### **Zearalenone**

Confirmatory analysis method for zearanol, its metabolites and related mycotoxins in urine by liquid chromatography-negative ion electrospray tandem mass spectrometry, 473 (2002) 151

#### **Zeolite**

Screen-printable sol-gel ceramic carbon composite pH sensor with a receptor zeolite, 455 (2002) 53

Development of a urea biosensor based on a polymeric membrane including zeolite, 466 (2002) 39

#### **Zeolites**

Uptake monitoring of anilines and phenols using modified zeolites, 464 (2002) 1

#### **Zeranol**

Confirmatory analysis method for zearanol, its metabolites and related mycotoxins in urine by liquid chromatography-negative ion electrospray tandem mass spectrometry, 473 (2002) 151

#### **Zidovudine**

Determination of lamivudine and zidovudine in binary mixtures using first derivative spectrophotometric, first derivative of the ratio-spectra and high-performance liquid chromatography-UV methods, 466 (2002) 175

#### **Zinc**

Ligand and surfactant effects on a novel electrochemiluminescent reaction involving cadmium, 454 (2002) 45

Perfluorinated anion-exchange polymer mercury film electrode for anodic stripping voltammetric determination of zinc(II): effect of model organic compounds, 454 (2002) 93

Determination of zinc in food using atomic fluorescence spectrometry by hydride generation from organized media, 457 (2002) 305

Voltammetry using a dental amalgam electrode for heavy metal monitoring of wines and spirits, 458 (2002) 249

Minimalism approach for determination of Cu, Fe and Zn in serum by simultaneous electrothermal atomic absorption spectrometry, 458 (2002) 321

Multi-component analysis by flow injection-diode array detection-spectrophotometry using partial least squares calibration model for simultaneous determination of zinc, cadmium and lead, 461 (2002) 181

#### **Zinc(II)**

pH-stat techniques in titrimetric analysis. IV. pH-stat monitoring of chelatometric titrations, 470 (2002) 277

#### **Zirconias**

Determination of hydrogen peroxide using glassy carbon and graphite/polyester composite electrodes modified by vanadium-doped zirconias, 452 (2002) 11

#### **Zirconium**

Determination of niobium, tantalum, zirconium and hafnium in geological materials by extraction chromatography and inductively coupled plasma mass spectrometry, 458 (2002) 375

#### **Zn**

Cold ultrasonic acid extraction of copper, lead and zinc from soil samples, 452 (2002) 143

Determination of calcium, iron and zinc in milk powder by reaction cell inductively coupled plasma mass spectrometry, 470 (2002) 223

#### **Zn<sup>2+</sup>-selective electrode**

Zn(II)-selective membrane electrode based on tetra(2-aminophenyl) porphyrin, 460 (2002) 177

#### **Zootechnical feed additives**

Contamination of animal feedingstuffs as a cause of residues in food: a review of regulatory aspects, incidence and control, 473 (2002) 3

#### **Zr(IV)-porphyrins**

Zirconium(IV)-porphyrins as novel ionophores for fluoride-selective polymeric membrane electrodes, 468 (2002) 133
